INTRODUCTION.

"Subseciva quaedam tempora incurrunt quae ego perire non patior."—Cicero.

Falconry, like other field sports, has its literature. It would be strange if it were not so; for on turning over the pages of the world's history, it is apparent that for centuries it has played a conspicuous part amongst the diversions of people of all nations.

But the literature of the subject has been much neglected. The older treatises in all languages have become scarce and costly, and of the rest the booksellers are unable to supply, or even to name, a tithe of them. This, perhaps, is partly due to the circumstance that no Bibliography of Falconry, having any claim to completeness, exists. It cannot be said that no such work has been attempted; for in 1853 the late Professor Schlegel, of Leyden, appended to his splendid Traité de Fauconnerie a Catalogue Raisonné of such books on the subject as were known to him; while since that date has appeared the Bibliographie de la Chasse of M. Souhart, in which Falconry, although by no means adequately treated, has received some share of attention.

Long prior to the publication of these two works the Catalogues of Kreysig (1750), Lallémant Frères (1763), and Lastri (1787) included the titles of books on Hawking, as well as of those relating to other branches of the Chase; while since their appearance, lists, varying in length and importance, have been printed by Baudrillart, Hammer-Purgstall, Riesenthal, and Señores Uhagon and Leguina. Of these the most
comprehensive is certainly that of Schlegel; but although extensive as compared with other lists of the kind, it is conspicuously deficient in regard to the titles of English, French, and German works on Falconry; not because many of these were printed after Schlegel's Traité had appeared (which would have furnished a sufficient reason for their omission), but because they were evidently unknown to him.

In the present Bibliotheca Accipitraria, profiting by the labours of my predecessors, and having made researches in all directions, I have been able to set down 378 titles in nineteen languages. These have been transcribed verbatim et literatim, and the various editions and translations indicated. In the course of twenty years' collecting, the majority of the books have been either procured, or seen, and carefully examined; and it is believed that no printed work of any importance has escaped notice. Incidentally a great number of MSS. have been referred to, and the libraries in which they are preserved indicated; but they have not been catalogued for two reasons. In the first place, I have already given an account of the English MSS. relating to Falconry in my Introduction to an Elizabethan treatise on the Sparrow-hawk and Goshawk (No. 81 of the present Bibliotheca); and, in the next place, no proper catalogue of existing MSS. on the subject in other languages could be prepared without making a tour of the principal Continental libraries, and devoting a considerable time to an examination of the originals. It has been thought desirable, however, to state where MSS. of importance are deposited, so that those who have the leisure and inclination to examine them may be guided in their research. This information will be found in the critical notes which follow the titles, where also the reader will often discover some account of the authors of important works, with hints as to the sources of their inspiration.

In a few cases the extreme rarity of a treatise, or the trouble which would be entailed upon those who would attempt the perusal of the original, has suggested a translation of so much as was deemed necessary to convey an accurate notion of the contents. For example, a précis is given (pp. 67-71) of the rare Livre du Faulcon (c. 1486)—of which no English translation exists—with quotations which sufficiently
INTRODUCTION.

exemplify the phraseology of its unknown author. The history and disputed authorship of the almost equally rare Livre du Roi Modus is examined (pp. 61–66). The celebrated Spanish treatise on Falconry by the Prince Don Juan Manuel is epitomised (pp. 113–115), as is also that of the famous work of Martinez de Espinar. An epitome is furnished (pp. 169–172) of the Latin work of the Emperor Frederick II., De Arte Venandi cum Avibus (1245), and of the Greek work of Demetrius of Constantinople, written in 1270 (pp. 181–183); while in the case of the Russian books catalogued, half-a-dozen in number, a transliteration of the titles follows the original, and is succeeded by an abstract of the contents.

I can claim no acquaintance, I regret to say, with Oriental languages, but by means of French and German translations, and with the assistance of friends well versed in the matter, I have been able to give an account of most, if not all, of the treatises on Falconry which are worth quoting in Turkish, Persian, Arabic, Chinese, and Japanese. It may be observed that many of these are in MS., and there is perhaps little likelihood of their being published. Strictly speaking, as manuscripts, they ought not to have been included in the present Catalogue; but to have omitted all mention of them would have been to pass over some important sources of information, while by directing attention to their existence, opportunity is afforded to the reader of judging the extent of Oriental literature on this particular branch of sport.

To Mr. Sydney A. J. Churchill, of the Persian Legation, I am indebted for much kind assistance in regard to the Persian and Arabic titles, and the fact that the proof-sheets of this portion of the Bibliotheca Accipitraria have been revised by the eminent Orientalist, Dr. Rieu, of the British Museum, gives it an imprimatur without which it could not be expected to find favour in the eyes of critics. As regards the Chinese and Japanese titles, I am under great obligation to Mr. F. V. Dickins, Assistant Registrar of the University of London, whose knowledge of these languages has enabled him to give most valuable assistance.

Altogether, there are catalogued 378 titles in nineteen languages. The way in which they are apportioned will be seen on
reference to the following table, which also shows the important additions which have been made to the catalogue published by Schlegel:

On examining the titles of all these works, two things are particularly striking—first, the great antiquity of Falconry; and secondly, its widespread practice.

The origin of the art it is now impossible to discover. From the earliest times of which history takes cognizance people of all nations, but more particularly those of Eastern origin, have practised the sport, and we may form some idea of its antiquity from Sir Henry Layard's discovery of a bas-relief amongst the ruins of Khorsabad, in which a falconer is represented carrying a hawk upon his fist. From this he has inferred that hawking was practised there some 1700 years before the Christian era.

In China it was known even at an earlier date than this,
INTRODUCTION

for in a Japanese work (No. 376), of which a French translation appeared at the beginning of the present century, it is stated that falcons were amongst the presents made to princes in the time of the Hia dynasty, which is supposed to have commenced in the year 2205 B.C.

It would carry me far beyond the limits of this Introduction were I to attempt to trace here the history and progress of Falconry, although the necessary materials are at hand in the works which I have catalogued. On this part of the subject a second volume might be written. Suffice it to remark, that the sport was introduced into Europe from the East, and that there is reason to believe that Hawking was practised by Europeans at least three centuries before the Christian era.*

It is remarkable how on almost every point the falconers of the East and West are agreed. Although the communication between them has been interrupted for centuries, their general system of treatment, and the many ingenious contrivances, either discovered or handed down from posterity, are very similar. Both make use of jesses, leashes, bells, and hoods, varying only in pattern and material. They imp broken flight-feathers in the same way, and both bathe and weather their hawks, feed and give castings, in the same manner.

This alone would prove the ancient origin of Falconry, which appears to have had but one source, and probably to have been introduced by the Indo-Germanic race from the plains of Hindostan, so favourable to Hawking.

On looking into the history of Falconry in Europe, one figure of a great falconer in the Middle Ages stands out prominently—namely, the Emperor Frederick II. of Germany, who died in 1250. He had seen something of Hawking in the East, and in 1239, on his return from a Crusade which he had undertaken the year before, when he was crowned King of Jerusalem and Sicily, he brought with him from Syria and Arabia several expert falconers with their hawks, and spent much of his leisure time in learning from them the secrets of their art, which he considered the noblest and most worthy of all the arts. The excellent treatise which he composed in

* See No. 79 of this Catalogue, p. 69.
Latin, *De Arte Venandi cum Avibus*, was the first which appeared in the West, and is still one of the best which exists. It has been translated into German by Pacius (No. 101), and its marked influence on the literature of the subject is perceptible on examining the subsequently published treatises of the French author Tardif and our English Turbervile.

In the Middle Ages the Germans were great falconers; so also were the French, and the natives of Brabant, of whom a celebrated Spanish falconer in 1325 wrote that they were the best falconers in the world. To a less extent the art was practised in Spain and Italy during many centuries, and books were written in all these countries by those who had become proficient in the art, and were fired by the enthusiasm of their success. The Kings of Norway and Denmark preferred hunting to hawking, but rendered good service to the sister sport by procuring, from various parts of Scandinavia, the celebrated jerfalcons of Northern Europe, which were held in the highest esteem by those to whom they were sent as presents.

Although the precise date of the introduction of Hawking into England cannot now be ascertained, we know from several sources that it was practised by our ancestors in early Saxon times. In a letter addressed by King Ethelbert (A.D. 748–760) to Boniface, Archbishop of Mayence, who died in 755, the monarch asked him to send over two falcons that would do to fly at the crane, for, said he, "there are very few birds of use for that flight in this country"—*i.e.*, in Kent. Asser, in his Life of Alfred the Great, particularly refers to the king's love of hawking; and William of Malmesbury records much the same of Athelstan, who procured his hawks from Wales. The same historian says of Edward the Confessor that his chief delight was to follow a pack of swift hounds and cheer them with his voice, or to attend the flight of hawks taught to pursue and catch their kindred birds.

So general, indeed, was the pastime of Hawking in Saxon times, that the monks of Abingdon found it necessary in 821 to procure a charter from King Kenulph to restrain the practice in harvest-time, in order to prevent their crops from being trampled upon. (Dugdale, *Monasticon*, i. p. 100.)
One of the most interesting pieces of documentary evidence on this part of the subject is deposited in the MS. Department of the British Museum. I refer to the *Colloquy* of Archbishop Ælfric, a composition of the tenth century. The object of this and similar colloquies and vocabularies compiled about the same period was to interpret Latin to the Anglo-Saxon student, and furnish him with the Latin words for the common objects of life. In this MS. we find a dialogue between a scholar and a falconer, in which the latter imparts some interesting details on the subject of his art as then practised.*

Hawking was pursued by many of our early kings with the greatest enthusiasm, and some reference to their doings will be found in No. 79 of this Catalogue, which contains (pp. 71–85) many details of interest serving to illustrate the history of Falconry in England.

Henry VIII.'s love of Hawking may be inferred from the anecdote related of him in Hall's "Chronicle," to the effect that, being one day out hawking at Hitchin, in Hertfordshire, he was leaping a dyke with a hawking-pole, when it suddenly broke, and the king was immersed in mud and water, and might have lost his life had not Edmund Moody, one of the attendants, come to his assistance. (Chronicle 1548, fol. 130 verso.)

A portrait of his chief falconer, Robert Cheseman, from the painting by Holbein in the Royal Gallery at The Hague, will be found amongst the illustrations to the present work.†

A representation is also given (see the frontispiece) of Sir Ralph Sadler, the Grand Falconer to Queen Elizabeth, in whose reign Hawking was much in vogue. It is reproduced from an old panel-portrait by Gerhardt which hangs in the Manor House at Everley, Wilts, the former residence of

* This dialogue will be found printed in the Introduction to No. 81.
† It was in the reign of Henry VIII. that the royal hawks were removed from the Mews at Charing Cross (where they had been kept during many reigns), and the place was converted into stables. The name, however, confirmed by long usage, remained to the building, although after the hawks were withdrawn it became inapplicable. But what is more curious still, in later times, when the people of London began to build stabling at the back of their houses, they christened those places "mews" after the old stabling at Charing Cross.
INTRODUCTION.

Henry Sadler, the third son of Sir Ralph (see the note to No. 19, pp. 16, 17, and "Notes to the Illustrations," p. 242).

James I., as is well known, was an enthusiastic sportsman, and especially delighted in Hawking, on which amusement he spent considerable sums annually, as may be seen by the entries of payments made during this reign, printed in Devon's "Issues of the Exchequer."*

His portrait as a youth, with a sparrow-hawk on his fist, is here reproduced from a scarce engraving by Raddon, and his appearance in after-life is shown in the portrait by Vandyck.

It was in his reign that Sir Thomas Monson, who succeeded Sir Ralph Sadler as Royal Falconer, was said to have given £1000 for a cast of falcons—a story which has been repeatedly told in print, but which is altogether based upon a misapprehension. The facts are correctly stated by Sir Antony Weldon in his "Court and Character of King James," 1650; the truth being that Sir Thomas Monson spent £1000 before he succeeded in getting a cast of jerfalcons that were perfect for flying at the kite, and this he might very well have done, seeing that he would have to defray the cost of expeditions to Norway or Iceland for them.†

By great good fortune, while these pages were passing through the press, I learnt that a lineal descendant of the Hon. Lewis Latham, Falconer to Charles I., was living at Hyattsville, Maryland, U.S.A., in the person of Mr. F. A. Holden, and that he had in his possession a contemporary portrait of his ancestor. I lost no time in communicating with him, and in due course received a photograph of the portrait, here reproduced, with permission to publish it.

All the Stuarts were fond of Hawking, but after the Restoration the sport ceased to be popular. The causes which led to its decline were many and various. The disastrous state of the country during the period of the civil wars

* See also Professor Newton's account of Hawking in Norfolk, appended to the second edition of Lubbock's "Fauna of Norfolk," 1879, pp. 226–227, and the supplementary remarks thereon, contributed by the present writer to the Transactions of the Norfolk Naturalists' Society, 1880, vol. iii. pp. 82–89.
† See note to No. 27.
naturally put an end, for the time being, to the general indulgence in field sports. The inclosure of waste lands, the drainage and cultivation of marshes, the great improvement in fire-arms, and particularly the introduction of shot, all contributed to lessen the interest once so universally taken in this sport. Fashion also, no doubt, had a good deal to do with the decline of Hawking, for so soon as the reigning sovereign ceased to take an interest in the sport, the courtiers and their friends followed suit. Nevertheless, it never really died out, and from that time to the present it has never ceased to be practised by a few admirers of the old sport in various parts of the country, while during the last few years signs have not been wanting of its increasing popularity.

In addition to those already mentioned, the portraits of one or two of its staunchest supporters during the present century will be found amongst the illustrations here given; notably the Scottish falconers, Fleming of Barochan, John Anderson, and Peter Ballantine (who died in 1884); and the English masters of the craft, Colonel Thornton, of Thornville Royal, Yorkshire, and Edward Clough Newcome, of Hockwold, in the county of Norfolk, concerning whom some details will be found in the "Notes to the Illustrations."

Of the other plates to this volume, it may be said that the writer's aim has been to give authoritative representations of falconers of various nations, in their national costumes, and with the hawks and falcons used by them; occasionally also to figure such curiosities connected with the sport as may be of interest not only to falconers, but also to lovers of art.

As an aid to those who are but imperfectly acquainted with the technical terms employed in the exercise of this ancient sport, it is hoped that the English Glossary and polyglot Vocabulary at the end of this volume will prove of service; the more so, since many of the words therein contained are not to be found in the ordinary dictionaries.

It may be expected, and indeed it has been already hinted to the writer, that in the course of this Introduction to the Literature of Falconry, some introduction to the Sport
INTRODUCTION.

itself should be included, to enable a proper understanding of the critical notes which follow. It is difficult to attempt this without incurring the risk of writing too much, and going too minutely into a branch of the subject which the present volume is not primarily intended to deal with. A bibliography is one thing, a treatise on Falconry is quite another, and would, if fully considered, extend far beyond the limits of an Introduction. Nevertheless, as the two are so connected that an explanation of the one will lead to a better appreciation of the other, a brief outline may here be given of what may be termed the principia artis accipitraria.*

The birds employed by falconers belong to two classes—the long-winged, dark-eyed falcons, and the short-winged, yellow-eyed hawks. To the former class belong the Jerfalcon, Peregrine, Lanner, Saker, Barbary Falcon, the Indian Shahin, the Hobby, and the Merlin; to the latter the Goshawk and Sparrow-hawk. The former take their prey by rising above it in the air, and stooping at it from a considerable height, and striking it to the ground; the latter pursue in a straight line, and, overtaking the quarry by superior speed, clutch it, and come down with it. The larger falcons are flown at winged game of all kinds—crows, magpies, rooks, herons, and wild-fowl; the smaller falcons, such as the merlin and hobby, are used for taking larks; while of the short-winged hawks, the sparrow-hawk is flown at blackbirds and thrushes, partridges early in the season, and quails; the goshawk taking pheasants, partridges, and wild-fowl, rabbits and hares. With all birds of prey the females are invariably larger and more powerful than the males, and the sexes are consequently selected according to the quarry they have to pursue. Jerfalcons are now rarely employed, partly owing to the difficulty of procuring them, partly because the peregrine falcon is preferred, and experience has shown that, except in a woody or inclosed country, where the goshawk and sparrow-hawk are preferable, the peregrine is the most useful of all the birds of prey.

* The details which follow are taken from the article “Falconry” (No. 82) contributed by the present writer to the last edition of Chambers’s Encyclopedia, 1889.
Hawks are either taken young from the nest before they can fly, when they are termed eyesses, or are caught later, during the period of their migration, by means of a decoy pigeon and a bow-net, when they are called passage-hawks.* The mode of treatment is a little different, inasmuch as the latter have already learned to catch and kill prey for themselves, and only require to be tamed; the former have everything to learn. A passage-hawk on being caught is hooded, and has jesses, or soft leather straps, fastened on her legs. She is then set down on a block of turf to prevent damage to feathers, and fed once a day, at first through the opening of the hood, afterwards with the hood removed. The bird is always fed upon the gloved hand, and gradually learns to step on to it from the perch, increasing the distance daily until she is obliged to fly to reach the fist. The training then commences. The hawk is called off, as it is termed, to the lure, which means that after tying a long line to the ends of the jesses she is held hooded on the hand of an assistant, until the falconer, at the distance of five-and-twenty yards, swings the lure to which the bird has been accustomed to come to be fed. The hood being then removed, the hawk flies to the lure, and is exercised in this way for some time daily, until she is sufficiently tractable to be trusted without a line, care being taken not to feed her until she has flown, and always to reward her for coming to the lure with a morsel of the meat with which it is garnished. She is then entered at the quarry at which she is intended to be flown (partridge, rook, or whatever it may be) by first giving her a live bird at the end of a long line, and allowing her to go off the fist and kill it; eventually the line is dispensed with, and she is flown at wild quarry.

Such, briefly, is the mode of training a passage-hawk. An eyess is somewhat differently treated. An straw-covered platform is put up in some shed or outhouse, and on this the nestlings (which should not be taken too young, or they will turn out screamers) are placed, the platform being about as high up

* The mode of capturing passage-hawks as practised by the Dutch falconers will be found described in No. 79, p. 109.
INTRODUCTION.

as one can reach to feed the birds. They are fed three times a day on fresh lean beef, while growing, to keep up their strength, or hunger-traces will appear, like cuts across the webs of the feathers, and the latter, breaking, will render the birds useless. When they are strong enough and able to fly, jesses are put on the legs, and a spherical brass bell (of Dutch or Indian make), on one leg, is fastened just above the jess with a little narrow strip of leather termed a bewit. At feeding-time, now once a day, they are called to the lure, and being allowed their liberty for some weeks (in which state they are said to be flying at hack), they daily gain strength and wing-power, until the time comes for taking them up and commencing their training, which after this stage does not differ much from the method above described for passage-hawks. When flying at hack, a hawk sometimes becomes wild, wanders away to a distance, and kills game for herself. When this is perceived, a bow-net, or other device for snaring, is set for her, to which she is decoyed and recaptured. The first operation in training is hooding, which, if successfully performed, overcomes much difficulty. It requires some patience and dexterity, and should be practised at first in a darkened room, in which the hawk will be much quieter than in broad daylight. The hood is simply a cap of leather, made to fit the head in such a manner as to obscure the light, a single aperture only being left, through which the beak protrudes, and a slit behind, which is opened and closed, when the hood is put on and off, by means of braces, one pair of which opens, the other pair closes the slit; the eye-pieces, which to prevent injury to the eyes are carefully blocked out, are covered for ornament with red or green cloth. By temporarily blindfolding the hawk, the hood causes her to sit perfectly quiet, and prevents her from bating, or fluttering, at the risk of breaking feathers, as she would do if frightened by passers-by until gradually accustomed to them.

Allusion has already been made to the jesses, or soft straps of leather (dogskin is best), which are fastened to the legs of the hawk, by which to hold her on the glove and tie her to
the perch or block. These jesses are about six inches long, and are never removed when the hawk is flown, though they require to be renewed from time to time. In former days varvels, or flat rings of silver, with the owner's name engraved thereon, were permanently attached to the ends of the jesses, and through these one end of the leash was passed, the other end being prevented from going through by a leather button. At the present day, however, most falconers prefer using a figure 8 swivel, which is always detached before the hawk is flown.

The lure, already referred to, is a device for luring the hawk back to her owner after an unsuccessful flight, and on this account the hawk is early made acquainted with it by being fed upon it daily while being trained. There are various patterns; one of the simplest and most easily made consists of a couple of pigeons' wings tied together on a flat circular leaden weight covered with leather, upon which a piece of raw meat is tied on both sides. The tabur-stick and drawer, which were formerly used as lures, have long been discarded.

The beaks and claws of wild-caught hawks are generally so long and sharp as to require paring, or coping as it is termed; but this operation requires to be very carefully performed (the hawk being hooded and held by an assistant), and not more than the tenth of an inch removed, or the efficiency of the beak and claws will be impaired. Indeed, some falconers will never cope a hawk except when the beak is overgrown; and with goshawks especially, which have to hold such powerful prey as hares and rabbits, strong and sharp pounces are indispensable.

Eastern falconers carry their hawks upon the right hand; European falconers always carry them on the left, leaving the right hand free for detaching leash and swivel, and removing and replacing the hood.

For further information than can be afforded within the narrow limits of an Introduction, the reader must be referred to some of the works catalogued in the following pages.

And here it may be well to direct attention to some of
INTRODUCTION.

the more useful books in different languages, for it is not to be supposed that they are all of equal merit. On the contrary, many of them are of no practical value at the present day, and are mere literary curiosities, interesting only from their rarity, or as early specimens of printing and engraving. Amongst these may be mentioned "The Book of St. Albans" (No. 1);* "The Institution of a Gentleman," 1555 (No. 10); Maplet's "Greene Forest," 1567 (No. 11); Swan's Speculum Mundi, 1635 (No. 26); Stevenson's "Twelve Moneths," 1661 (No. 32); Hicfelt's Aucupatorium Herodiorum, 1450 (No. 88); Eberhard Tapp's Waidwerck und Federspiel, 1542 (No. 93); Pomey's Buchlein, 1671 (No. 98); Le Livre du Roi Modus, 1486 (No. 138); Le Roi Dancus, 1284 (No. 139); Le Livre du Faulcon, 1486 (No. 140); and others. Yet these are all book rarities, and command high prices when they occur for sale.

Again, many books are included in this Bibliotheca Accipitaria which do not relate exclusively to Falconry; such, for instance, as the works of Gervase Markham (Nos. 3–8) and William Gryndall (No. 13); "The Jewel for Gentry" (No. 17); and "The Gentleman's Recreation," by Nicholas Cox (Nos. 37–39) and Richard Blome (No. 41); as also certain Encyclopaedias. But as these contain important sections, or articles, on the practice of Falconry, it would have been manifestly unwise to omit mention of them.

Of compilations, not always acknowledged, and translations, there are naturally a good many, but the critical notes appended to the titles of these will put the reader on his guard against attaching undue importance to them, however indispensable they may seem to the collector of books on Hawking.

Those who may be disposed to take up the subject seriously, if they know nothing about it already, will be naturally perplexed if offered a choice of nearly four hundred volumes. It may be well, therefore, to indicate those which will be found of most use at the present day, including, on

* The history and practical value of the treatise on Hawking, which forms part of the "Book of St. Albans," is minutely examined in No. 79, pp. 96–108.
account of their excellence, a few of the older treatises which
deserve to be consulted.

**English.**—Turbervile (14, 15), Latham (18, 19, 20), and
Bert (22) may be regarded as the old English masters of
Falconry. They wrote chiefly from experience, although
Turbervile borrowed much from French and Italian authors of
repute. Before his day the books in use were either garbled
versions of the "Book of St. Albans," and of little practical
value, or compositions by writers who had but slight acquain-
tance with the subject. Markham's "Gentleman's Academic,"
1595 (3), and "Hunger's Prevention," 1621 (8), are perhaps
the most desirable of this author's works from the falconer's
point of view.

Sir Antony Weldon's curious little volume (27) is worth
securing, if opportunity occurs, since it contains the true story
of Sir Thomas Monson's hawks, so strangely perverted by
subsequent writers (see pp. xvi, 23). The alleged extrava-
gance of this "Master Falconer" by the charge of £1000 in
gos-falcons for one flight (that of the kite) is first noticed by
Oldys in the *Biographia Britannica*, afterwards by Warton in his
Observations on Spenser (1762, ii. 173), and then by Pennant
(1768, i. 133), who in his "British Zoology" inserted all
Warton's notices of hawking without acknowledgment—
whence they were copied by Yarrell and others. In the first
edition Sir A. W. calls the birds "gos-faulcons"; in the second
edition they are styled more correctly "ger-faulcons."

Ray's "Summary of Falconry" (35), though not original,
being abridged from Turberville and Latham, is to be com-
mended; but, being in folio, its size is cumbersome.

Nicholas Cox's "Gentleman's Recreation" passed through
so many editions that there is no difficulty in procuring a
copy. It is of little merit, however, being chiefly compiled
from the works of previous writers (see the note on p. 28).

A folio work with the same title, by Richard Blome (41), is
better worth having, and has numerous fine engravings.

Campbell's "Treatise of Modern Faulconry," 1773 (49), is
a practical one, but is disfigured by a long and ridiculous
preface, for which he was not responsible (see note on p. 34).
INTRODUCTION.

Colonel Thornton's "Sporting Tour" (57), though relating to various field sports, is full of allusions to Falconry, of which he was a famous exponent, and illustrates in a delightful manner the practical part of the subject.

Sir John Sebright's "Observations upon Hawking" (61), originally published in pamphlet form (64 pp. only) for eighteenpence, would now be cheap at a guinea. The author wrote from his own experience, and was assisted by an excellent falconer, Mr. John Dawson Downes, of Gunton, Suffolk, who revised the MS. Some account of the original MS. lately examined by me will be found in The Zoologist, 1890 (pp. 417-421).

The second edition of Lubbock's "Fauna of Norfolk" (65) is to be commended for the sake of the chapter on the remains of Falconry in Norfolk (pp. 33-44) and the excellent notes on this subject communicated in an Appendix (pp. 224-239) by Professor Newton.

Coming now to the recent works by English writers, those by Salvin and Brodrick (67), Freeman (68, 71), and Delmé Radcliffe (72, 73) are indispensable to all who would learn something of the history and practice of a noble and ancient sport; while, if an author may be permitted to refer to his own labours, it may be hinted that in Nos. 79 and 80 of the present Catalogue the reader will find some information not unworthy of his attention.

German.—The list of German books contains the titles of a good many that are more curious than useful. The first on the list (87) is regarded as the earliest printed book on Falconry in any language.

The reader perhaps would do well to begin with Dr. Landau's Beiträge zur Geschichte der Jagd und der Falknerei in Deutschland (121) and the section on Hawking in Die Raubvögel Deutschlands by Riesenthal (127), and then to look back into some of the older authors, such as Eberhard Tapp, Knoblauch, and Hans von Fleming, by which time he will be better prepared to understand their technicalities. One of the best of these is the translation of the work of the French falconer, Charles d'Arcussia (97), published at Frankfort in
INTRODUCTION.

1617, and full of interesting details of hawking, written at the most flourishing period of its history—namely, at the time when the falconers of James I. of England and of Louis XIII. of France vied with each other in a display of their art.

French.—The French literature is rich in hawking books. Amongst the older writers, Guillaume Tardif (142), Jean de Franchières (145), de Gommer (152), Charles d'Arcussia (153), Sainte-Aulaire (155), Pierre Harmont, dit "Mercure," (156), Claude de Morais (164), and Seigneur de Boissoudan (202) were all masters of their art, and their works are accordingly of value. Amongst writers of the modern school, precedence must be given to Schlegel's splendid Traité de Fauconnerie with its erudite text and beautifully coloured plates. No less valuable, from its comprehensive and complete nature, is Baron de Noirmont's Histoire de la Chasse en France (206), the third volume of which contains much important information on the history and progress of Falconry. Reference should also be made to the very useful and instructive work of Viollet-le-Duc,* in which will be found figures and descriptions of some early forms of lure (fig. 21) and hood (figs. 22, 23). As we come nearer to our own time, French works on Falconry, instead of showing signs of decline, seem to issue from the press more frequently, thereby indicating a revived interest in the ancient and time-honoured sport, which is happily sustained by the united efforts and enthusiasm of living French and English falconers.

Thus may be mentioned with respect and admiration the names of MM. Charavay (210), D'Aubusson (211), Pichot (207, 208, 221), Soubets (216), Saint Marc (217), Foye (218), Belvalette (219), and Cerfon (220)—all of whom have contributed in an important degree to rescue la chasse au vol from neglect, and place it again upon the footing it once held amongst national field sports.

To Monsieur P. A. Pichot the present writer is particularly indebted for much kind assistance in relation to French litera-

ture during the preparation of this Bibliotheca Accipitraria, as well as for the figure of a French falconer in the time of Louis XV., which will be found amongst the illustrations.

Spanish.—As a curiosity, Los Paramientos de la Caza (224), attributed to Sancho VI. (el Sabio), is worth reading, although Don Jose Gutierrez de la Vega (226) doubts whether the MS. is of the age assigned to it (p. xcvii). But the two most celebrated books in Spanish upon this subject are those by the Prince Don Juan Manuel (226) and the Chancellor Pero Lopez de Ayala (228). Nor should we omit to notice the now scarce work of Martinez de Espinar (245). Those who are not familiar with the Spanish literature of the chase will probably be surprised at the number of works (38) now catalogued, especially as only seven are enumerated by Schlegel. But of these thirty-eight, it must be confessed that several are of but slight importance, while a few are merely translations from the Latin and French.

Italian.—The best known, and perhaps on the whole the most useful, treatises in Italian are those of Carcano (267) and Federico Georgi (268); but the following may also be recommended for reasons which appear in the notes following the titles—namely, Codroipo (274), Raimondi (277), Olina (278), and Tuano, translated from the Latin by Bergantini (284). It was to the works of Carcano and Georgi that our English Turbervile was so much indebted in the preparation of his "Booke of Faulconrie," 1575-1611 (14, 15).

Those who desire a deeper acquaintance with the Italian literature of the subject will do well to look into the works edited by Professors Spezi (294), Ceruti (295), Zambrini (296), and Ferraro (297).

Latin.—With the exception of the Hieracosophion of Thuanus, or, to give him his real name, De Thou (306), already mentioned in connection with the Italian translation of his poem, it will suffice to mention a single work in Latin as worth perusal at the present day, and this is a most important one—namely, the work of the Emperor Frederick II., De Arte Venandi cum Avibus (308). To master this is to acquire a liberal education in the art of Hawking. It is ex-
tremely easy to read, and, with the aid of the polyglot Vocabulary at the end of this Bibliotheca Accipitraria, would furnish a Latin classic for schools which to the majority of schoolboys would prove of far greater interest than the works of many Latin authors which are placed in their hands at the present day. A good English translation of this, and of De Thou's celebrated poem, would form acceptable additions to the well-known series of Latin classics for English readers.

Greek.—The only treatise deserving of special mention is that of Demetrius of Constantinople (327), one of the oldest writers on Falconry. The text was first printed by Nicolas Rigault, librarian to Louis XIII., in his Rei Accipitrariae Scriptores (314), from two MSS. in the Bibliothèque Royale, Paris; but a Latin translation by Pierre Gilles (à Petro Gillio Latine redditus) had been previously published at Leyden in 1562, with the Historia Animalium of Ælian. This is reprinted by Rigault (op. cit.) with separate pagination (pp. 1–118). An English analysis will be found in the present volume (pp. 182–183). The learned Sir Thomas Browne (36) has remarked that "the Greeks understood hunting early, but little or nothing of our Falconry. If Alexander had known it, we might have found something of it and more of hawks in Aristotle. . . . Though he hath mentioned divers hawks, yet Julius Scaliger, an expert falconer, despaired to reconcile them unto ours. And 'tis well if among them you can clearly make out a Lanner, a Sparrowhawk, and a Kestrel, but must not hope to find your Gerfalcon there, which is the noble hawk; and I wish you one no worse than that of Henry, King of Navarre, which Scaliger saith he saw strike down a buzzard, two wild geese, divers kites, a crane and a swan" (op. cit., p. 118; Wilkins' ed., vol. iv. p. 189). The statement of Scaliger, it is presumed, is to be found in his Annotations to Aristotle's Historia Animalium, although a search for the particular passage has not led to its discovery. (See pp. 9, 179.)

Russian.—The work of Constantine Haller (336), late President of the Russian Falconry Club at St. Petersburg, 1885, is the only one of the half-dozen here catalogued that is worthy of special mention. It will be seen from the English
analysis here given (pp. 189-191) that it is a modern sketch of the history and practice of Falconry in Russia, by one who, being himself an enthusiastic falconer, may be regarded as a reliable authority on the subject.

Arabic.—As the present writer can claim no acquaintance with Oriental languages, he will not be expected to do more than recommend such works as he has been enabled to master by means of translations, and of these the only one of much interest is that of Sid Mohamed el Mangali (360), of which a French translation, with the Arabic text, was published in Paris in 1880. A review of it is given in No. 79 (pp. 362-370). It should not be forgotten, however, that the works of Arabic writers have exercised, in the course of centuries, a distinct influence on the literature of Falconry in Europe; not only by means of the MSS. which were translated for the Emperor Frederick II., and were utilised by him in his celebrated Latin treatise, but also by means of the methods, appliances, and technical terms which were introduced by the Moors into Spain, and which eventually found their way into the works of Spanish authors, who in their turn influenced the writers of other countries.

It only remains to state that the great number of technical terms employed by falconers in the practice of their art, and made use of by all writers on the subject, has suggested the preparation of an English Glossary and a polyglot Vocabulary, which will be found at the end of the volume, and which it is hoped will prove useful to the reader in his perusal of treatises in languages other than his own.

A description of the accompanying plates will be found in the "Notes to the Illustrations."

"Hæc studia adolescentiam alunt senectutem oblectant."—Cicero.
CATALOGUE OF BOOKS
RELATING TO
FALCONRY.

Note.—To show the progress of the literature, the titles are arranged in chronological order under countries; but the work of any author may be found at once by reference to the Index at the end of the volume.

English.

[Reproduced in facsimile with an Introduction by William Blades. London, 1881. 4to.]

Black letter, 88 leaves, without title-page, pagination, or catchwords. The earliest English printed book, although not the earliest English treatise, which relates to Falconry. Attributed to Dame Juliana Barnes, Bernes, or Berners, whose name occurs in the first edition (fol. 23) as “Barnes,” and in the second edition as “Bernes.” It is not, however, an original composition, but a compilation from earlier MSS. (See No. 81 of this Catalogue, pp. vii.—viii., and No. 79, pp. 96—108.)

The colophon runs:—“Here in thys boke afore are conteynt the bokys of Haukyng and Huntynge wyth other plesuris dyverse as in the boke apperis and also of Coot-armuris a nobull werke. And here now endyth the boke of blasying of armys translatyt
and complyty togedyr at Seynt Albans the yere from thincarnacion of owre Lorde Jhū Crist, mcccclxxxvi."

2. **BARNES** (Juliana). **The Book containing the Treatises of Hawking; Hunting; Coat-Armour; Fishing; and Blasing of Arms.** As printed at Westminster by Wynkyn de Worde; the year of the Incarnation of our Lord, 1496. sm. folio. [Reprinted with an Introduction by Joseph Haslewood. London, 1810. sm. folio.]

The original, in black letter, 74 leaves, is without title-page, pagination, or catch-words. On the **recto** of the first leaf is a woodcut of Birds, and on the **verso** a group of men with a hawk, beneath which follows the title in four lines and a half, beginning:—"This present boke shewyth the manere of hawkynge and huntynge, and also of divysynge of Cote armours," etc. **Colophon.** "Here in this boke afore ben shewed the treatyse pertynyng to hawkynge & huntynge with other dyvers playsaunt materes belongynge unto noblesse: and also a ryght noble treatise of Cotarmours, as in this present boke it may appere. . . . . Emprynted at Westmestre by Wynkyn the Worde the yere of thyncarnacōn of our Lorde mcccclxxxvi."

The book of Hunting ends thus: "Explicit dame Julyans Bernes doctryne in her boke of huntynge."

The "treatyse of Fysshynge wyth an Angle" formed no part of the Boke of St. Albans as originally printed in 1486, but was added by Wynkyn de Worde ten years later. A few copies of Haslewood's "Introduction," dated 30th Oct. 1811, were separately issued, one of which is in the writer's possession.

Between 1496 and 1596 several different versions, more or less altered from the original, appeared; several undated, most of them without an editor's name, and all of them now excessively rare. They are known by the names and addresses of the printers by whom they were issued. Thus:—
"The Boke of Hawkynge and Huntynge and Fysshynge. Impynted in Flete Strete at ye sygne of ye Sonne by Wynkyn de Worde."

[Black letter, 46 leaves, A—H in eights and fours alternately, except G, which has 6 leaves: about 1503. sm. 4to.]

A unique copy (formerly Haworth's) in the Huth Library was purchased at Daniel's sale, in July 1864, for £110.

Another:—

Imprynted at London in Saynt Martyn's paryshe in ye Vinetre [Vintry] upon the Thre Crane Wharfe, by Wylyam Coplande.

[Black letter, 48 leaves, A—M in fours: undated, about 1548, fide Milner. sm. 4to.]

Each treatise has a separate but similar colophon. Milner's copy, in 1829, sold for £7; Haslewood's for £8."

A third:—

Imprynted at London in Flete strete at the signe of the Rose Garland by Wylyam Coplande for Robert Toye.

[Black letter, 48 leaves, A—M in fours: undated, sm. 4to.]

A copy of this edition is in the collection of Earl Spencer.

A fourth:—

Imprynted at London in Flete streate at the sygne of the Rose Garlande by Wylyam Coplande for Rychard Tottell.

[Black letter, 48 leaves: undated, c. 1561. sm. 4to.]

A copy is in the British Museum, G. 10494.
A fifth:—

Imprynted at London in Paules Churche-yarde at the sygne of the Lambe by Abraham Vele.

[Black letter, 48 leaves, A—M in fours: undated, c. 1560. sm. 4to.]

A copy at Milner's sale, 1829, fetched £8 19s. An imperfect copy is in the British Museum, C. 31. c 2.

A sixth:—

Imprynted at London in Pauls chyrchyarde by me Heřy Tab.

[Black letter, 46 leaves, A—M in fours, except I, which has 2 leaves: undated. sm. 4to.]

The only copy known to exist is amongst Crynes's books in the Bodleian Library. See Haslewood's Introduction, p. 86, where a facsimile of the title is given, with some account of Nathaniel Crynes, who died in 1745, and bequeathed his library to the Bodleian.

A seventh:—

Imprynted at London in Foster Lane by John Waley.

[Black letter, 46 leaves, A—M in fours, except I, which has only 2 leaves: undated. sm. 4to.]

The "Measures of blowing" are omitted in this edition. Pickering had a copy. Haworth's copy (958) sold for £8.

An eighth:—

Imprynted at London in Flete Strete at the sygne of the George next to Saynt Dunstane's Church by Wyllyam Powell.

[Black letter, 48 leaves: undated. sm. 4to.]

And a ninth:—

HAWKING, HUNTING, AND FISHING, with the
True Measures of Blowing. Newly corrected and amended. At London, printed by Edward Alde and are to be solde at the Long Shop adjoining unto Saint Mildred's Church in the Pultrie.

[Black letter, 44 leaves: 1586. sm. 4to.]

A copy is preserved in the Phillipps Library, now in the possession of the collector's daughter, Mrs. Fenwick, of Thirlstaine House, Cheltenham.

Of this version another edition with a similar title was printed in 1596 (cf. Haslewood, p. 97). Meanwhile in 1595 appeared the following:

3. MARKHAM (Gervase). The Gentleman's Academie: or the Booke of S. Albans: containing three most exact and excellent Bookes: the first of Hawking, the second of all the proper termes of Hunting, and the last of Armorie: all compiled by Iuliana Barnes in the yere from the incarnation of Christ 1486. And now reduced into a better method, by G. M. London. Printed for Humfrey Lownes, and are to be sold at his shop in Paules church-yard, 1595. sm. 4to.

2 prelim. leaves, with Dedication "To the gentlemen of England, and all the good fellowship of Huntsmen and Falconers." Then follows a treatise of Hawking, fols. 1–24 verso and 4 blank leaves; a treatise of Hunting, with separate title-page printed by Valentine Sims for Humfrey Lownes, 1595, fols. 29–38 and 2 blank leaves; the Booke of Armorie, with separate title-page printed by Valentine Sims for Humfrey Lownes, 1595, fols. 41–95 and 1 blank leaf. Headline throughout the volume, "The Gentleman's Academie."

Two copies are in the British Museum (C. 32. e 30, and G. 10493) and one in possession of the writer.

The author, Gervase Markham, of Cotham, in the Co. Nottingham, published several works on Field Sports, Veterinary
Science, and Agriculture, of which the following contain sections on Hawking:—

4. **MARKHAM** (Gervase). **Country Contentments**: or the Husbandmans Recreations. Contayning the wholsome Experiences in which any man ought to Recreate himselfe, after the toyle of more serious businesse. As, namely, Hunting, Hawking, Coursing with Greyhounds, and the lawes of the Lease, Shooting in Long-bow or Cross-bow, etc. By G. M. London, 1611. sm. 4to.

No less than fourteen editions of this work were published, to all of which (except two) the dates may be here supplied: 1st, 1611; 2nd, 1615; 3rd, 1623; 4th, 1631; 5th, 1633; 6th, 1649; 7th, 1654; 8th, 1656; 9th, 1660; 10th, 1668; 11th, 1675; 12th, (?); 13th, (?); and 14th, 1683. The fifth chapter of this work treats "of the Hawking with all sorts of Hawkes, and the whole Art thereof."

5. **MARKHAM** (Gervase). **Cheape and Good Husbandry** for the well-ordering of all Beasts and Fowles, and for the generall Cure of their Diseases. Containing the Natures, Breeding, Choice . . . of all manner of Cattell . . . Shewing further the whole Art of Riding great Horses, with the breaking and ordering of them . . . And diverse good and well-approved Medicines for the Cure of all the diseases in Hawkes, of what kind soever . . . Gathered together for the generall good and profit of this whole Realme by exact and assured experience from English practises . . . By G. M. Printed by T. S. for R. Jackson. London, 1614. sm. 4to.

Other editions of this book, which contains a treatise "On
the Cure and Ordering of Hawkes" (pp. 164-176, sixth edition),
were printed in 1615, 1616, 1623 (all by T. S. for R. Jackson),
1631 (by Anne Griffin for John Harison), 1648, 1658, 1664,
and 1676.

6. MARKHAM (Gervase). A WAY TO GET WEALTH; containing sixe principal vocations or
callings in which every good Husband or House-
wife may lawfully employ themselves, as I. the
natures . . . use, and feeding of all sorts of cattell
and fowle . . . II. the knowledge . . . and . . . prac-
tice of all the recreations meete for a gentleman.
III. etc. The first five bookes gathered by G.
Markham). The last [on Bees] by Master W(illiam)
Lawson). The sixt time corrected and augmented
by the author. Printed by E. G. for John Harison.
London, 1638—31-38. sm. 4to.

This compilation consists of a re-issue of several of Markham's
works, each with a separate title-page, pagination, and register,
and arranged in the following order:—
3. The English Housewife, 1637.
4. The Inrichment of the Weald of Kent, 1636.
5. Markham's Farewell to Husbandry, 1638.
6. A new Orchard and Garden, 1638.
Nos. 1 and 2, as above shown, contain chapters on Hawks
and Hawking.

7. MARKHAM (Gervase). THE YOUNG SPORTS-
MAN'S DELIGHT and Instructor in Angling, Fowling,
Hawking, Hunting, etc. By G. M. Sold at the Gold
Ring in Little Britain by G. Conyers, 1652. 32mo.

With a frontispiece of an angler; described by Mr. Hazlitt
as "a thumb volume, A–I, in eights." No copy of this is in the
British Museum, but one was sold by Messrs. Sotheby & Wilkinson (Lot 394) on the 11th April 1885. It was reprinted on vellum by Gosden in 1820, with the following title:—

**The Young Sportsman's Instructor**: or Angling, Fowling, Hawking, Hunting, Ordering Singing Birds, Hawks, Poultry, Coneys, Hares, and Dogs, and how to cure them. By G. M. Sold at the Gold Ring in Little Britain. n.d. [1652]. 32mo.

This curious and diminutive volume, of which a copy is in the British Museum (C. 29. a 24), measures only 2½ by 1½ inches, and contains pp. vi., 136, and one leaf, as follows:—The Young Angler's Instructor, pp. 1-76. The Art of Fowling, pp. 77-112. Instructions for the Huntsman, pp. 113-122. Directions for Hawking and Managing Hawks to fly at all game with success, pp. 123-130. Concluding with the words "And thus much for the princely recreation of Hawking." On the last page (p. 136) a recipe headed "Hawks, to cure of all inward sickness, all sorts of wormes," etc. Westwood and Satchell (Bibl. Piscat., p. 147) notice two later editions, 1707 and 1712, with slightly different titles and some additions. The letters G. M. on the title, usually attributed to "Gervase Markham," must be taken only to imply that the subject-matter was borrowed from his writings he himself having died before the first edition of this little book had appeared.

8. **MARKHAM** (Gervase). **Hunger's Prevention**; or the whole Arte of Fowling by Water and Land. Containing all the Secrets belonging to that Arte, etc. By Gervase Markham, London. Printed by A. Math. for Anne Helme and Thomas Langley, and are to be sold at their shops in Saint Dunstons Church-yard, and over against the Sarazens head without Newgate. 1621. 12mo.
PORTRAIT OF ROBERT CHESEMAN,
Falconer to Henry VIII.
From a painting by Hans Holbein
In the Royal Gallery at The Hague.
Frontispiece, 6 prelim. leaves, with Dedication to Sir Edwin Sands, Kt., and others, pp. 1-285: Hawks, pp. 134-183, with cuts of the Haggard Faulcon and Goshawk (pp. 182-183).

Another edition, varying only in the title-page, "Printed for Francis Grove and are to be sold by Martha Harrison at the signe of the Lambe at the east end of St. Paules Church, 1655." 12mo.

9. ELYOT (Sir Thomas, Knt.). The Boke named the Governor, devised by Sir Thomas Elyot, Knyght. London, 1531. sm. 8vo.

Chapter xviii. is entitled "The auncient huntyng of Greekes and Romans," and contains some remarks on the origin of Falconry which the author confesses his inability to discover. He quotes Pliny (lib. x. cap. 10), who seems to have copied Aristotle in his description of hawking in Thrace, and conjectures that "from Thracia came this disporte of hauking," adding, "but in what wise or wheresover the beginninge of hauking was, surely it is a right delectable solace"; and, a little further on, "hauking measurably used and for a passetyme gyveth to a man good appetite to his souper." He alludes to the old sport of "daring larks with a Hobby," which he himself had witnessed. This sport is described by Nicholas Cox (No. 38, pp. 58, 59), and noticed by Somervile (No. 45, ed. 1813, p. 103). Sir Thomas Elyot's "Boke" has been several times reprinted, as in 1534, 1537, 1544, 1546, 1547, 1553, 1557, 1565, 1580. In 1834 a new edition in 8vo, by A. T. Eliot, was published at Newcastle, and the latest, edited by H. S. Croft, with Notes, in 2 vols. 4to, appeared in 1880. (London, Kegan Paul & Co.)

The oldest English treatise on the subject, long preceding the publications of Peacham and Brathwait, and a very scarce little book. The unknown author "bryngeth in good occasion to
speake here of Haukinge and Huntynge for because in these dayes [1555] manye Gentlemen wil do almoste nothinge els, or at the leaste can do that better than any other thinge." Considering "what pastimes gentlemen ought to use," he remarks:—

"The like sayinge is that hee cannot bee a gentleman whych loveth not haukyng and hunting, which I have hard old Woodmen wel allow as an approved sentence among them. The like sayinge is that hee cannot bee a gentleman whych loveth not a dogge."

After insinuating that sportsmen, as a rule, are not learned men, because they give nearly all their time to field sports to the neglect of books, he adds:—"Yet may it cum to passe that these daylye haukeres and hunters in tayking of a hauke cannot easely be amended, neyther to reclayme her, to knowe howe many cotes shee is of, to gyve her a measurable gorge, to deserne perfitt induing, to know when a hauke is ful summed, to know likewise her diseases, as the craye, the frounce and others, to selde a hauke, to impe her, to cope her, wyth many termes moe, whych thyngs and others knowenne, a manne maye bee a perfeite good Falconer."

Copies of both the first and second editions of this scarce little book are in the British Museum (232 a. 43. and 722 a. 14) and one of the second edition in the Bodleian Library. From a copy of the second edition in the possession of the late Mr. George Singer, an admirable reprint was made in 1839 at the Chiswick Press, of which only 25 copies were issued, "for presentation." One of these is in the writer's possession.

11. MAPLET (John). A GREENE FOREST, or, naturall Historie: Wherein may bee seene first the most sufferaigne Vertues in all the whole kinde of Stones and Mettals: next of Plants .... Lastly of Brute Beastes, Foules, etc. .... Compiled by John Maplet, M. of Arte and Student in Cambridge .... Anno 1567. Imprinted at London by Henry Denham. 12mo.

Title within border, pp. i.–xiv. and 112 leaves black letter. On the verso of last leaf, "Imprinted at London by Henry
ENGLISH.

Denham dwelling in Paternoster Rowe at the Starre. Anno Domini 1567 June 3. Cum Privilegio.”

A quaint little work, divided into three “Bookes,” the second and third having each a separate title-page and Preface. The species of animals and plants described are arranged alphabetically. Curious descriptions are given of the Falcon (p. 86) and Goshawke (p. 87), in which not a few errors may be detected.

12. **MASCALL (Leonard).** A Booke of Fishing with Hooke and Line, and of all other instruments thereunto belonging. Another of Sundrie Engines and Trappes to take Polcats, Buzards, Rattes, Mice and all other kindes of vermine and beasts whatsoever, most profitable for all Warriners, and such as delight in this kinde of sport and pastime. Made by L. M. [Woodcut of fisher and fowler.] London. Printed by John Wolfe and are to be solde by Edwarde White dwelling at the little North doore of Paules at the signe of the Gunne. 1590. sm. 4to.

Black letter, pp. 93, with folding plate of the Crow-net set or bent, and various traps for Hawks. The treatise on fishing is a mutilated version of that in the Book of St. Albans. Interesting to the Falconer as describing methods of catching Hawks. It is in this volume that the introduction of the Carp into England is attributed to “Maister Mascall, of Plumsted in Sussex, who also brought first the planting of the Pippin in England.”

Three other editions of this book appeared in 1596, 1600, and 1606.

13. **GRYNDALL (William).** Hawking, Hunting, Fowling and Fishing; with the true measures of blowing. A worke right pleasant and profitable for all estates who so loveth it to practise, and exceeding delightfull to refresh the irksomenesse of tedious time. Whereunto is annexed the maner and order in keeping
of Hawkes, their diseases and cures; and all such speciall poynets as anywise appertaine to so gentleman-like qualitie. Now newly collected by W. G.; Faulkener. Publicum commodum privato preferendum. Imprinted at London by Adam Islip and are to be sold by Richard Olive, 1596. sm. 4to.

The title in roman; remainder in black letter; A—I in fours. This is practically a later version of the Book of St. Albans with variations, and is of extreme rarity. No copy is to be found in the British Museum; but copies were disposed of in Haworth’s Sale, 1826, £4 4s.; Milner’s, 1829, £6; and Donovan’s, £4 5s. The portion on Fowling, entitled “A brief Treatis of Fowling, wherein is contained divers proper devises both of bayts and others with the making of Byrdlime,” etc., is for the most part copied verbatim without acknowledgment from Batman uppon Bartholome his booke, De proprietatibus rerum, profitable for all estates, as well for the mind as for the body. Printed by Thomas East, 1582; folio. (Intro. Book xii. de avibus.)

14. TURBERVILLE (George). The Booke of Faulconrie or Hawking; for the onely delight and pleasure of all Noblemen and Gentlemen. Collected out of the best authours as well Italians as Frenchmen, and some English practises withall concernyng Faulconrie: the contents whereof are to be seen in the next page followyng. By George Turbervile, gentleman. Nocet empta dolore voluptas.

[Half-page cut of Falconers with hawk and spaniels.] Imprinted at London for Christopher Barker at the signe of the Grasshopper in Paules Churchyarde. Anno 1575. sm. 4to.

Dedication to the Rt. Hon. Ambrose, Earl of Warwick.

George Turbervile, a gentleman of Dorsetshire family, was a poet as well as a writer on Field Sports. He was appointed Secretary to Thomas Randolph during his Embassy to Russia.
ENGLISH.

(temp. Eliz.), and many of his minor poems are either addressed from Muscovia or refer to his visit to that country. He was an intimate friend of the poet Spenser, to whom he dedicated one of his epistles. See Ritson, "Bibliogr. Poetica," p. 368. For some account of the Italian and French writers on Falconry from whom he borrowed, see Introduction to No. 81, pp. xxii.–xxiii.

Second edition. 3 prelim. leaves, pp. i–370; Epilogue, 2 leaves. Like the first, usually bound up with "The Booke of Hunting" by the same author. In the cuts on pp. 81 and 112 the bust of the Queen Elizabeth on horseback has been cut out, and the portrait of James I. substituted. By this alteration, amongst others, the edition may be known of copies which have the title wanting. This edition also wants the "Dedication" to the Earl of Warwick.

In the British Museum, amongst the Additional MSS., will be found No. 5750, containing (pp. 206–211) Warrants relating to the Falconers' department in the Royal household, temp. Eliz., Jac. I. and Car. I.

16. SURFLET (Richard). Maison Rustique; or the Countrey Farme: Compiled in the French tongue by Charles Stevens and John Liebault, Doctors of Physicke: and translated into English by Richard Surflet, Practitioner in Physicke. Also a short collection of the hunting of the Hart, Wilde Bore, Hare,
Fox, Gray, Cony: Of Birds and Faulconrie: The Contents whereof are to be seene in the page following. [Woodcut.] London. Printed by Arnold Hatfield for John Norton and John Bill. 1606. 4to.

Liebault, in his address to the reader, refers to "the editions already so oft by me augmented within these eighteen yeares, during which they have been printed in all countries." This would place the date of the first edition about 1588. There is a folio of 1600, a 4to of 1606, and another folio edited by Gervase Markham in 1616. The original work was so popular that more than a hundred editions appeared in French, to say nothing of translations in English, Italian, and German.

The seventh Book contains three chapters (xlii., xliii. and xliv.) on Hawking, of little value, and with numerous errors of both translator and printer.

17. S. (T.). A Jewell for Gentrie. Being an exact Dictionary or true Method to make any man understand all the Art, Secrets and worthy Knowledges belonging to Hawking, Hunting, Fowling and Fishing. Together with all the true Measures for Winding of the Horne. Now newly published, and beautified with all the rarest experiments that are known or practised at this Day. [Woodcut as in Turbervile, No. 15.] Printed at London for John Helme, and are to be sold at his shop in St. Dunstanes Church-yard in Fleet Street, 1614. sm. 4to.

A thin 4to of 98 pp. in black letter, except title; Dedication, and address "To the Reader." It is divided into four books, styled, according to the head-lines, the Booke of Hawking (p. 37), the Booke of Hunting, the Booke of Fowling, and the Booke of Fishing. The two last have separate titles within borders.

The following is a transcript of the entry of this book in the Register of the Stationers' Company:—"18 Nov. 1613. John Helme entred for his coppie by the consent of Elizabeth Olive, wydowe, a book heretofore printed by Richard Olive called a
Jewell for Gentry shoueing howe a man may understand all the art of Hawking, hunting, fishing and fowling...—vjd.

The Dedication, “To the Right Worshipfull Mr. John Tooke, one of the Auditors of his Maiesties Courts of Wards and Liveries,” is signed T. S.

The author, whose name nowhere appears, explains in an address “To the Reader,” which follows the Dedication, that his work is an attempt to improve on the Boke of St. Albans, in which, he says, “the defects were so grosse that Tristram himselfe would hardly have knowne so neare a kinsman.”

For remarks on the authorship of this book, see Introduction to No. 81, pp. xxv.-xxvi.

18. LATHAM (Symon). Falconry; or the Faulcon’s Lure and Cure: in two Books. The first concerning the ordering and training up of all Hawkes in generall, especially the Haggard Faulcon Gentle. The second teaching approved medicines for the cure of all Diseases in them. Gathered by long practice and experience, and published for the delight of noble mindes, and instruction of young Faulconers in things pertaining to this Princely Art. By Symon Latham, Gent. [Woodcut of the Haggard Faulcon.] London. Printed by J. B. for Roger Jackson, and are to be sold at his shop neere Fleet Street Conduit, 1615. sm. 4to.

Latham dedicated this, his first book of Falconry (pp. 147), to Sir Thomas Monson (or Munson, as he phonetically spells the name), Baronet, Master of his Maiesties Armory, and Master of the Hawkes to his Highnesse. For a notice of Sir Thomas Monson’s hawks, see No. 27, pp. 104, 105.

The following is a transcript of the entry of the first edition of this book in the Register of the Stationers’ Company:—“5 Sept. 1614. Roger Jackson entred for his coppie under the hand of Master Adams a book called the faulcon’s lure by Symon Latham...—vjd.”

19. LATHAM (Symon). New and Second Booke of Faulconry: concerning the ordering and training
up of all such Hawkes as was omitted or left unmentioned in his printed Booke of the Haggard Faulcon and Gerfaucon, namely the Goshawke and Tassell with the Sparhawke, the Lanner and Lanneret, as they are divided in their generation: the Hobby and Marlyn in their kindes: Teaching approved medicines for all such infirmities and diseases as are incident to them. Published for the delight of noble mindes, and instruction of young Faulconers in all things pertaining to this Art. [Woodcut.] At London, printed by J. B. for Roger Jackson, and are to bee sold at his shop neere Fleet Conduit. 1618. sm. 4to.

This second Book (148 pp., usually bound up with the first) is dedicated to Sir Patrick Hume, Knight, "Master Falconer to the King's Most Excellent Majestie," who in 1618 had succeeded Sir Thomas Monson, and was in turn succeeded in his office by Sir Allen Apsley, afterwards Earl of Burford.

Under the two last named Masters, as one of the Assistant Falconers, and subsequently as Sergeant of the Hawks (1627), served Lewis Latham, of Elstow, in the Co. Bedford, gent. He lived to the extreme old age of 100 (b. 1555, d. 1655), and was doubtless a relative of Symon Latham; perhaps an uncle, for he was 60 years of age when Symon, in 1615, published the first edition of his book. He was not his father, for the only sons of Lewis were Henry and John. But this par parenthèse.

Following the "Epistle to the Reader," in this second book of Symon's, is an acknowledgment to his "first and loving master Henry Sadler of Everley, from whom he had his art," and "who taught him the way to live." This was the third son of Sir Ralph Sadler or Sadleir, of Standon in the Co. of Herts, Chief Secretary of State to Henry VIII. and Grand Falconer to Queen Elizabeth, who granted him the manor, park, and warren of Everley, Wilts, on the attainder of the previous owner, the Duke of Somerset. He had charge of Mary Queen of Scots when imprisoned in the castle of Tutbury (1584–85), and got into trouble for taking her out hawking and
JAMES THE FIRST OF SCOTLAND.

From an original Picture in the Collection of the
Right Honourable the Earl of Dartmouth.
allowing her to roam too far from the castle. (Memoirs, vol. i. p. 33.) He died at the age of eighty in 1587, and was buried at Standon, where a noble monument is erected to his memory. In the manor house at Everley there is a portrait of him on panel, painted probably by Marc Gerhardt, from which our frontispiece has been accurately copied by the skill of Mr. W. Griggs. A copy, less successful, is given in Clutterbuck's "History of Hertfordshire," 1827, vol. iii. p. 226.

Second edition: quite as good as the first, of which it is a reprint without alteration.

A few years ago I found a copy of this edition, now in the collection of M. Pierre A. Pichot, of Paris, containing the suggestive inscription, "Wm. Crosley, Falconer to Col. Thornton. Dec. 29, 1781." (See No. 57.)

Smaller and less desirable editions were published in 1653 and 1658.

21. **LATHAM (Symon).** THE GENTLEMAN'S EXERCISE, OR SUPPLEMENT TO THE BOOKES OF FAULCONRY. London, 1662. sm. 4to.

A much scarcer book than the last named. No copy is to be found in the British Museum.

22. **BERT (Edmund).** AN APPROVED TREATISE OF HAWKES AND HAWKING. Divided into three Bookes. The first teacheth, How to make a short-winged Hawke good, with good conditions. The second, How to reclaime a Hawke from any ill condition. The third teacheth, Cures for all knowne griefes and diseases. By Edmund Bert, Gentleman. [Cut of Hawk, leash, glove, hood, lure, etc.] London. Printed
by T. S. for Richard Moore, and are to be sold at his shop in S. Dunstan’s Church-yard. 1619. sm. 4to.

This book, a small quarto (pp. i.–xiv., 1–109), is dedicated “to the Rt. Hon. Henry Earl of Oxenford, Viscount Bulbeck, Lord Sanford and Scales, and Lord Great Chamberlaine of England.” The author, who lived at Collier Row, near Romford, Essex, details his method of training the Goshawk, in which he was very successful. He used to ride out of Essex into Sussex to hawk over the downs, where, he says, “I have killed for the most part of a moneth together with an intermewed goshawke eight, nine, or tenne Partridges in a day. The day of my going thither and the day of my returne to London was just five weeks, and it was a fortnight or more in Michaelmas terme when I came backe. I killed in that time with that one hawke foure score and odd Partridges, five Pheasants, seven Rayles, and four Hares against my will.”

He had “for a Goshawke and Tarsell a hundred marks both solde to one man within sixteen months” (Preface). For another Goshawk he was offered “fortie pounds” (p. 105), and ultimately sold her for thirty. In 1795, a silver “varvel,” engraved with the name “Oxenforde,” was found near Headingham Castle, the ancient seat of this family in Essex. It is figured and described in the Archaeologia, vol. xii. pl. 51, p. 410, and may well have belonged to the nobleman to whom this book is dedicated.

Note.—A reprint of this scarce treatise, with an Introduction by the present writer, has lately been published by Mr. Quaritch. 100 copies only.

This author particularly mentions the junction of the Little
KING JAMES THE FIRST,
1603-1625.

Amongst English Monarchs the chief patron of Falconry.
From a portrait by Van Dyck.
Ouse, or Brandon river, with the Thet, and refers to Thetford as a place much esteemed by falconers in his day. His description towards the end of Song xx., of "a flight at brook," near Thetford, is very animated:

"The trembling fowl that hear the jigging hawk-bells ring,
And find it is too late to trust then to their wing,
Lie flat upon the flood. . . .
The hawks get up again into their former place,
And ranging here and there in that their airy race,
Still as the fearful fowl attempt to 'scape away,
With many a stooping brave them in again they lay.
But when the falconers take their hawking-poles in hand,
And, crossing of the brook, do put it over land,
The hawk gives it a 'souse,' that makes it to rebound
Well near the height of man sometime above the ground,
With many a Wo-ha-ha, and jocond cheer again,
When he the quarry makes upon the grassy plain."

The text has "jocond lure" an absurdity uncorrected in the latest edition of the Polyolbion, by the Rev. Richard Hooper, 1876 (vol. iii. p. 23). Prof. Skeat, in stating in his "Etymological Dictionary," 1882, that the form "jocond" is "not recorded, but obviously must have existed," has overlooked its use by Drayton in the line above quoted.

For an illustration of "brook-hawking" as described by Drayton, see Blome (No. 41), plate v. p. 44.

24. BRATHWAIT (Richard). THE ENGLISH GENTLEMAN: containing sundry excellent Rules or Exquisite Observations, tending to Direction of every Gentleman . . . . how to demene or accomodate himselfe in the manage of publike or private affaires. Sold by R. Bostock. London, 1630. 4to.

Contains several passages and one or two good anecdotes relating to Hawking (pp. 93, 96, 97, 110, 113). A second edition, 4to, appeared in 1633, and a third, folio, in 1641. In 1652 it reappeared with a new title, "Time's Treasury; or Academie for Gentry."

Note.—In Peacham's "Complete Gentleman, fashioning him
BOOKS ON FALCONRY.

absolut . . . to which is added the Gentleman's Exercise," London, 4to, 1627, 1634, and 1661, Falconry is unaccountably neglected, the author's tastes inclining him especially to Heraldry.

A quaint discourse (pp. 280) wherein each interlocutor commends his own pursuit. The Countryman remarks (p. 34), "As for Hawking, I commend it in some, condemne it in others; but in men of meane ranke and religious men I condemne it with Pet. Blesensis as an idle and foolish vanitie; for I have ever thought it a kinde of madnesse for such men to bestow ten pounds in feathers which at one blast might be blowne away. . . . Yet I must acknowledge I have in my youthfull dayes with Machabæus (dicitur Machabæus domesticasse acciptres in avium capturam) beeene guiltie of this vanitie, and have been as glad as ever I was to come from schoole to see a little Marlin in the dead time of the yeare . . . . make her way through the midst of . . . crows and kites which pursued her . . . . and maugre all their oppositions pull downe her prey bigger than herselfe, being mounted aloft steeple high, downe to the ground. And to heare an Accipitrary relate againe how he went forth in a cleare calme and sun-shine evening, about an houre before the sunne did usually maske himselfe, unto the river, where finding of a Mallard he whistled off his Faulcon, and how shee flew from him as if shee would never have turned head againe, yet presently upon a shoote came in, how then by degrees, by little and little, by flying about and about, shee mounted so high, untill shee had lessened herselfe to the view of the beholder, to the shape of a Pigeon or Partridge, and had made the height of the moone the place of her flight, how presently upon the landing of the fowle, shee came down like a stone and enewed it, and suddenly got up againe, and suddenly upon a second landing came downe
again, and missing of it, in the downe come recovered it, beyond expectation, to the admiration of the beholder at a long flight.

"And to heare him tell a third time, how he went forth early on a winter's morning, to the woody fields and pastures to flie the Cocke, where having by the little white feather in his tayle discovered him in a brake, he cast off a tassel gentle, and how he never ceased in his circular motion until he had recovered his place, how suddenly upon the flushing of the Cocke he came downe, and missing of it in the downe come what working there was on both sides, how the Cocke mounted as if he would have pierced the skies; how the Hawke flew a contrarie way, until he had made the winde his friend, how then by degrees he got up, yet never offered to come in until he had got the advantage of the higher ground, and then he made in, what speed the Cocke made to save himselfe, and what hasty pursuit the Hawke made, and how after two long miles flight killed it, yet in killing of it killed himselfe.

"These discourses I love to heare, and can well be content to be an eyewitnesse of the sport when my occasions will permit. But to see one of those feminine birds who like some wives of our time keep under the masculine [the females being larger and more powerful than the males] I meane a swift winged Goshawke or high-flying Jerkin [Jerfalcon] whose proper game is the Pheasant, Crane, or Bittorne, in the month of August to pull downe a little Partridge . . . there to surprise and kill her suddenly, I must confesse it hath often gone against my stomache . . . yet I must likewise confesse I have beene sometimes for societie's sake, a spectator of such a tragedie" (pp. 35-37).

26. SWAN (John). Speculum Mundi, or a glasse representing the face of the world: whereunto is added a Discourse of the Creation together with a consideration of such things as are pertinent to each days worke. Written by John Swan, M' of Arts, late student of Trinitie Colledge Camb. Prin. in Cambridge. By T. Buck and R. Daniel. 1635. sm. 4to.

Engraved title-page with title on shield in lower half of page.

The 8th chapter, sec. 2, which treats "Of Birds, or Fowl flying in the open firmament of heaven," contains (p. 399) a curious description of the mode of defence adopted by the Heron, or Hernsew, when pursued by "the gossehawk and other kinde of hawks" (2nd ed., p. 392; 3rd ed., p. 355). "Of hawks," says this author (p. 400), "there be many and several kindes; as the Falcon, Merlin, Lanner, Tassell, and sundrie others. Howbeit the Tassells are supposed to be the males of such birds as live by prey: as the Tassell of the Saker is called a Hobbie [no] or Mongrell hawk; that of the Sparrowhawk a Musket; that of the Lanner a Lanneret; and so of the rest. Now some again distinguish these birds three several ways. First by the form and fashion of their bodie; some being great, as the Gosselhawke, Faulcon, Gerfaidcon, &c., some small, as the Merlin, Musket, Sparrowhawk, Hobbie and such others. Secoundy by their game, as some for the pheasant, some for the partridge, some for the hernshaw, some for the duck and mallard, some for one thing, some for another. Thirdly they are said to differ in the manner of their following the game; as such know better than myself, who use to keep and manage hawks."

27. WELDON (Sir Anthony). The Court and Character of K. James. Written and taken by Sir A. W., being an eye and ear witness. Qui nescit dissimulare nescit regnare. Published by Authority. London. Printed by R. I., and are to be sold by John Wright at the Kings Head in the Old Baily. 1650. 12mo. [First edition.]

The Court and Character of King James. Whereunto is now added The Court of King Charles: continued unto the beginning of these unhappy times. With some observations upon him instead of a character. Collected and perfected by Sir A. W. Qui nescit dissimulare, nescit regnare. Published by
THE HON. LEWIS LATHAM, FALCONER TO CHARLES I.

Born 1555, Died 1655.

From an original Painting in possession of his descendant,
Mr. F. A. Holden of Hyattsville, Maryland, U.S.A.
Authority. Printed at London by R. I., and are to be sold by J. Collins in Little Brittaine. 1651. 12mo. [Second edition.]

It is in this book that the statement is first made (pp. 104, 105; 2nd ed., pp. 96, 97) concerning the price paid for a cast of falcons by Sir Thomas Monson, Master Falconer to James I. —a statement almost invariably misquoted and misunderstood by subsequent writers. (See No. 79, p. 80.) In the first edition the hawks are there called "Gos-Faulcons," in the second edition, "Ger-Faulcons." For the sequel to the story told by Sir A. Weldon, of the lost hawk belonging to the king, see Harting, "Notes on Hawking as formerly practised in Norfolk," Trans. Norf. Nat. Soc., vol. iii. p. 87.

The second edition, enlarged, 1655; the third, 1661; the fourth, 1668; the fifth, 1676.

The second and subsequent editions contain remarks on Hawks and Hawking by a Falconer, "Auceps," with "a list of the Long-winged and short-winged hawks that be chiefly in use amongst us in this nation."

The fifth edition was the last revised by Walton himself, and to this was added for the first time Charles Cotton's treatise.

In Part II., chapter xiv. is entitled "Of Hawks and Hawking." Sir Thomas Browne's Miscellanies, 1684, are quoted, and the following curious anecdote related:—"From Sir James Long of
Draycot. Memorandum. Between the years 1630 and 1634 Henry Poole of Cirencester Esquire (since Sir Henry Poole, Baronet) lost a falcon flying at brook in the spring of the year about three o'clock in the afternoon: and he had a falconer in Norway at that time to take hawks for him, who discovered this falcon upon the stand from whence he was took at first, the next day in the evening. This flight must be 600 miles at least" (p. 116).

Describing the grandeur of the Herbets, Earls of Pembroke, at Wilton House, Wiltshire, under the heading "of his lordship's Hounds, Greyhounds and Hawkes" (p. 87), he writes:— "When they returned from hawking the ladies would come out to see the hawkes at the highest flying, and then they made use of their setting-dogges to be sure of a flight. His lordship had two hawkes (one a falcon called 'Shrewsbury,' which he had of the Earle of Shrewsbury, and another called 'the little tercel') which would fly quite out of sight that they knew not how to shew the fowles till they found the head stood right. They had not little telescopes in those dayes; these would have been of great use for the discovery which way the hawke's head stood."

Other editions, 1714, 1721, 1723, 1731. A new edition, to which is prefixed Some Account of his Life, 8vo, 1784, is accounted the best. At p. 56 (1st ed. p. 37) will be found a curious anecdote of Charles I. partridge-hawking in Scotland related by the king in the hearing of the author; and another (p. 59) of a sparrow-hawk of Charles II., which got away with its leash on, and becoming entangled in an iron crown on the White Tower, died there.

31. PHILLIPS (Edward). A New World of Words, with explication of all the terms used in Fishing, Hawking, Hunting, Fowling, etc. By Edw. Phillips, gent. London, 1658. folio.
Other editions, 1662, 1669, 1671, 1678, 1696, 1706 and 1720. The last, edited by Skerrey, is stated by Lowndes to be the best.

The author was a nephew of the poet Milton, traces of whose master-hand are apparent in some of his works, especially in the preface to the "Theatrum Poetarum, or Complete Collection of the Poets," 1675; and in the criticism on Shakespeare and Marlowe. Phillips published a "Life of Milton." 1694.

32. STEVENSON (M.). The Twelve Moneths: or, A pleasant and profitable discourse of every action whether of Labour or Recreation proper to each particular Moneth, branched into Directions relating to Husbandry . . . . as also of Recreations, as Hunting, Hawking, Fishing, Fowling, Coursing, Cockfighting, etc. By M. Stevenson. Humida solstitia atq. hiemes orate serenas, Virg. London. Printed by M. S. for Thomas Jenner, and are to be sold at his Shop at the South Entrance of the Royal Exchange. 1661. sm. 4to.

A very scarce and quaint little volume of 59 pp. with 12 full-page engravings illustrative of the occupations of each month, in one of which, September, Partridge Hawking is introduced. Across each plate in large characters the Latin name of the month is printed in black letter, followed by the number of days in the month.

In his address "to the Reader," the author says: "For matters of . . . . fishing, fowling and the like exercises, I confesse them somewhat out of my Road, but I assure you to pleasure you and satisfie myself, I have consulted the most approved Authors and given you here the creame and marrow of their severall experiences in their own expresse characters."

As a specimen of the author's style, take the following under January (p. 4):—"Now the Woodcock and the Pheasant pay their lives for their feed, and the Hare after a course makes his hearse in a pye . . . . the poor Coney is so ferreted that she cannot keep in her burrough; the curryer and the lime rod are the death of the fowle, and a long piece and a good Waterspaniel are no bad company. The Faulcon's bells ring the Mallard's
knell, and the Hare and the hound put the Huntsman to the horne."

A copy of this book is in the British Museum. 966. c. 26 (3).

33. **BARLOW (Francis).** _Severall wayes of Hunting, Hawking, and Fishing, according to the English manner._ Invented by Francis Barlow, etched by W. Hollar, and are to be sould by John Overton at the White Horse without Newgate, London, 1671. obl. 4to.

Engraved title with quatrain at foot, and 12 plates, namely:—Hare-hunting, Stagg-hunting, Cony-catching, Otter-hunting, Coursing Fallow-deer, Fox-hunting, Feasant-hawking, Partridge-hawking, Hern-hawking, Angling, River-fishing, and Salmon-fishing. Under each plate is a quatrain similar in style to that on title. Perfect copies are scarce. Dr. E. Hamilton has one; another is in the possession of Mr. Crawhall of Newcastle-upon-Tyne; and an imperfect copy, wanting the quatrains, is amongst the prints in the British Museum.

34. **LAMBERT (James).** _The Countryman's Treasure:_ shewing the nature, causes, and cure of all diseases incident to cows, horses, etc.; with plain rules for improving arable and pasture lands . . . . To which is added the Art of Hawking, Hunting, Angling and Ringing. London. Printed for T. Norris, and sold at the Looking Glass on London Bridge, n.d.

An unimportant 12mo of 167 pages. Other editions, omitting the Field Sports, sm. 8vo, 1676 and 1683.

35. **RAY (John, F.R.S.).** _A Summary of Falconry_; collected out of several authors. London, 1678. folio.

This treatise, abridged from Turbervile (No. 14) with addi-
ENGLISH FALCONERS OF THE XVII CENTURY
Pheasant-hawking with the Goshawk.
From a print by F. Barlow, engraved by W. Hollar, 1671.
tions from Latham (No. 18), and Aldrovandus, is printed as an appendix (pp. 397–437), to Ray’s translation of Willughby’s “Ornithology,” 1678, which was published in Latin two years previously.

36. BROWNE (Sir Thomas). CERTAIN MISCELLANY TRACTS. Written by Thomas Brown, Kt. and Doctour of Physick; late of Norwich. London. Printed for Charles Mearne, and are to be sold by Henry Bonwick at the Red Lyon in St. Paul’s Churchyard. 1684. sm. 8vo.

Published after the author’s death by Dr. Tenison, afterwards Archbishop of Canterbury.

Tract V. treats “of Hawks and Falconry Ancient and Modern” (pp. 111–119), and is devoted chiefly to a consideration of the remedies applied by falconers for the diseases of their birds. The author mentions incidentally that “upon good account, an hawk in this county of Norfolk made a flight at a Woodcock near thirty miles in one hour” (p. 116).

This tract is reprinted in Wilkin’s edition (which is the best) of Sir Thomas Browne’s “Works,” 1836 (vol iv. pp. 186–190), where the author’s surname is spelled with a final e. This is not so in the original tract, nor in the title-page of the folio of 1686, printed for Thomas Basset and others. But the final e is to be found in the MS. in the Bodleian Library, as well as on the author’s tomb at Norwich.

37. COX (Nicholas). THE GENTLEMAN’S RECREATION: in four parts, viz., Hunting, Hawking, Fowling, Fishing. Collected from ancient and modern authors forren and domestick, and rectified by the experience of the most skilfull artists of these times. Illustrated with Sculptures. London. Printed by E. Flesher for Maurice Atkins at the Half-moon in St. Pauls Churchyard and Nicholas Cox over against Furnivals-Inn-Gate in Holborne, 1674. 8vo.
In this, the first edition, the book is not claimed by Nicholas Cox, whose name in subsequent editions is appended to the "Epistle Dedicatory." It is a mere compilation, without acknowledgment, from various authors, which caused it to be severely criticised by John Ray in his Preface to Willughby's "Ornithology" (1678). He says:—"I cannot but reflect upon the author of a late English book entitled 'The Gentleman's Recreation.' . . . For I find that all he hath considerable concerning Fowling is taken out of the aforesaid book of Markham's ['Hunger's Prevention, or the Art of Fowling'], and yet hath he not to my remembrance made any mention of his author. What he hath of Hawking is likewise an epitome of Turberville's collections, with some additions out of Latham's 'Falconry,' without acknowledgement that all were borrowed. I do not blame him for epitomizing, but for suppressing his author's names and publishing their works as his own, insomuch that not only the vulgar, but even learned men, have been deceived by him."

Ray, however, overlooked the statement on the title-page that the various treatises were "collected from ancient and modern authors forrein and domestick," though it is true that the names of these authors are not mentioned.

The first edition of this book has become very scarce, and the second, third, and fourth editions (1677, 1686, and 1697) are seldom found quite perfect. The later editions of 1706 and 1721 are more often to be met with. In some the title varies, as, for example:—

The preceding half-title has engraved scenes of Coursing,
Hunting, Hawking, and Fishing, with the words "The Gentleman's Recreation" on a shield in the centre.

39. COX (Nicholas). The Gentleman's Recreation: being a Treatise of Hawking and Faulconry. Fitted for the delight and pleasure of all Noblemen and Gentlemen. Collected from ancient and modern Authors, and rectified by the experience of the most skilful Artists of these times. With an Abstract of such Statute-Laws as concern this Recreation. London, 1686. 8vo.

This forms the second Part of the third edition (1686) of the last-named work, in which the several portions have each a separately printed title.

The four parts of the work were subsequently printed separately, without date, by J. Smeaton, printer, 148 St. Martin's Lane, and issued in thin octavo pamphlet form with the titles, "The Huntsman" (pp. iv.–i24), "The Fowler" (pp. iv.–76), "The Fisherman" (pp. iv.–148), and "The Falconer" (pp. iv.–95). All except "The Fisherman" are stated to be "by Nicholas Coxe Esq." The title of the part on Hawking runs thus:—

40. COX (Nicholas). The Falconer; or the Art of Hawking and Falconry. Containing the Terms of Art used by Falconers. The descriptions and names of Hawks used in Falconry. . . . . The methods of making, manning, reclaiming, luring, sealing and mewing all kinds of Hawks for sport. Their flights with the proper game-bird for each. . . . . The implements and furniture requisite in hawking. The various castings and scourings for Hawks. Valuable receipts for removing their diseases: and the means of preserving them in good health. To which is added The Cocker: being a full illustration of the royal sport of
BOOKS ON FALCONRY.

Cock-fighting, with reflections on Betting, etc. By Nicholas Coxe, Esq. London: Printed and sold by J. Smeeton, 148, St. Martin's Lane, Charing Cross, n. d. [1815?]. 8vo.

41. BLOME (Richard). The Gentleman's Recreation. In two Parts. The first being an Encyclopedy of the Arts and Sciences, to wit, an abridgement thereof . . . . The second Part treats of Horsemanship, Hawking, Hunting, Fowling, Fishing, and Agriculture. With a short treatise of Cock-fighting for the breeding, dyetting, ordering, matching, and fighting them. All which are collected from the most authentick authors, and the many gross errors therein corrected, with great enlargements made by those well experienced in the said Recreations. And for the better Explanation thereof, great variety of useful Sculptures, as Nets, Traps, Engines, etc., are added for the taking of Beasts, Fowl, and Fish, not hitherto published by any. The whole illustrated with about an hundred ornamental and useful Sculptures engraven in copper relating to the several subjects. London. Printed by S. Roycroft for Richard Blome, dwelling at the upper end of Dutchy-Lane, near Somerset-House in the Strand. 1686. folio.

The title of this work, "The Gentleman's Recreation" (printed in black and red), was first used by Nicholas Cox in 1674, and was perhaps suggested by Markham's "Husbandman's Recreation," 1611.

The second part, founded on a translation of Les Ruses Innocentes, 1660, and on the works of Markham and Turbervile, has a separate title (in black only), worded as in the lower half of
the first title, but spaced out, and each division of this part has an engraved copper-plate facing the first chapter. The division on "Hawking and Faulconry" has this sub-heading:—"Wherein is treated of the several kinds of Hawks now in use, with their natures and qualities. The manner of reclaiming, mewing, and flying them for the respective game proper for each Hawk, with direction for feeding and ordering them. Their diseases and cures. With a short discourse of the Spaniel, showing his use in Faulconry: With directions for the breeding, ordering and managing him for the game: Together with directions for the choosing, ordering, and making a setting dog."

This portion of the work is illustrated with five full-page copper-plate engravings, dedicated to noblemen and gentlemen who at that date were notable exponents of Hawking, and expert in those branches of the sport with which their names are associated. Thus:—

1. Partridge-hawking with Tiercels (p. 33), John Bassett, Esq., of Heanton Punchardon, Devonshire.
2. Pheasant Hawking (p. 34), Sir John Thorold, Bart., of Marston, in the Co. Lincoln.
3. Partridge-hawking with the Goshawk (Manning Hawks, p. 37), Sir Richard Wenman, Bart., of Caswell, Oxfordshire.

Furthermore, in regard to this portion of the work, the author was especially indebted for information to Sir Ralph Dutton, of Sherborn in Gloucestershire, and George Russel, of Abbots Aston in Buckinghamshire, Serjeant of His Majesty's Hawks, both long-experienced falconers.

A second edition, corrected, appeared in 1710, also in folio, and copies of several of the plates, reduced in size to 8vo, were re-published in the "Sportsman's Dictionary; or the Country Gentleman's Companion in all rural recreations," of which a second edition in 1 vol. thick 8vo was printed for J. Osborne, at the Golden Ball in Paternoster Row, in 1744.

Vol. 3 contains several chapters on Hawks and Falconry, chiefly compiled from Willughby and Ray (No. 35).

A small and unimportant treatise, but seldom to be met with.

44. **ANON.** *The Sportsman's Dictionary; or the Country Gentleman's Companion in all rural recreations*. With full and particular instructions for Hunting, Shooting, Fishing, Hawking, &c. London. 1735. 2nd ed. 1744. 8vo.

With plates reduced from Blome (No. 41).

The first edition in folio, pp. 14, the original price of which was one shilling, contains a description of flying at the Stag with Eagles; Heron-hawking; Flying at the River; Partridge Hawking; and Daring Larks with a Hobby.

Of this work there have been several editions, of which the handsomest in 4to was printed by Bulmer in 1813, with cuts by Bewick. Of the smaller editions, the best is that by Edward Topham, printed with *The Chace* at the Chiswick Press in 1817, with engravings by Scott from paintings by Sartorius.
46. ANON. The Country Gentleman's Companion through the Rural Pursuits of Pleasure and Profit. (Containing treatises on Hunting, Hawking, etc.) By a Country Gentleman, from his own experience. London, Printed for the author 1756. 2 vols. sm. 8vo.

Each volume has a second title-page embodying contents. Vol. I. includes a chapter "Of Hawks" (pp. 210-228); and Vol. II. contains a section on Hawking (pp. 39-50), which is a reprint without acknowledgment of the chapter on Hawking in Gervase Markham's "Country Contentments," and with the last paragraph omitted (p. 50).

47. PENNANT (Thomas). British Zoology. Published under the inspection of the Cymmrodorion Society. London. 1766. folio.

Second edition, 1768. 2 vols. 8vo. Other editions, 1768-70, 4 vols. 8vo; 1776-7, 4 vols. 4to. New edition (the first with author's name on title), 1812, 4 vols. 8vo. In this will be found (vol. i. pp. 210-213, 220, 226, 247, 253; and vol. ii. pp. 309-311) several passages relating to Falconry. His "Falcon Gentil" (p. 222) is the Goshawk, and his "Lanner" (p. 223) is the Peregrine.

On Eagles trained by the Tartars (ii. 195); on the method of capturing Jerfalcons in Iceland (ii. 217-218); and on the antiquity of Falconry (ii. 218-220).

49. CAMPBELL (James). A Treatise of Modern Faulconry: to which is prefixed, from authors not generally known, an Introduction, shewing the Practice of Faulconry in certain remote times and countries. By James Campbell, Esq. — Nititur pennis—Hor. Edinburgh, Printed by Balfour and Smellie for the Author. 1773. 8vo.
BOOKS ON FALCONRY.

The author of this book was falconer to the Earl of Eglinton, and submitting it to the inspection of the Rev. A. Gillies, was told that an early account of hawking should be prefixed. He could only speak from practice, the other artfully, knowing little of the practice but something of the history, offered to supply the deficiency. Hence the preface in ridicule of "The Origin and Progress of Language" then newly published, and a fabulous account of hawking by the Emperor Arambomboberus with Trebizonian Eagles on the alleged authority of a MS. in the Grand Sultan's library. This bantering of the wit produced the worst effect for the author, who instead of securing a rapid sale, found himself possessed of a mass of waste paper. (Haslewood, Introduction to the Book of St. Albans, 1810, p. 29). But what he himself wrote is reliable.

50. ANON. HAWKING MORALISED. Reading. 1776. 12mo.

The woodcut purporting to represent "Sir H. Glendinning" is a rude copy of an engraving by C. Turner, from a painting by Howe, of Mr. Fleming of Barochan, Renfrewshire, and his falconer John Anderson.

With frontispiece and 42 plates; one (p. 390) of heron-hawking.

52. ANON. ESSAYS by a Society of Gentlemen at Exeter. [Quotation from Horace.] Exeter. Printed
by and for Trewman and Son. London. Sold by Cadell and Davies, Fleet Street, etc. 1796. 8vo.

Contains an Essay (pp. 131-164) of no great merit entitled "Historical Outlines of Falconry."

Article "Falconry" (historical outlines), vol. i. pp. 319-333.

In vol. vii. (pp. 135-140) will be found directions for training Hawks from the French of the Abbé la Pluche.

For observations on Hawks and Hawking, see vol. i. pp. 56, 65, 73, 107-110, 114, 176.

56. STRUTT (Joseph). The Sports and Pastimes of the English People: including the Rural and Domestic Recreations, . . . . from the earliest period to the present time. London. 1801. 4to.

Pp. 1-302, with 39 engravings. The same, fine paper, with coloured plates. Reprinted 1810, 4to, with coloured plates, a few copies illuminated. New edition by W. Hone, 1830, 8vo, with 140 engravings. The same, large paper, roy. 8vo. The same reprinted for Thomas Tegg & Son, 1834 and 1838, 8vo. The second chapter is devoted to "Hawking," with four woodcuts from ancient MSS. The author has fallen into some curious errors which the editor should have corrected; for example, in sect. ix., "Caparison of a Hawk," he says:—"The bewits, we are informed, were useful to keep the hawk from winding
when she bated." He means the *tyrrits* (Fr. *tourettes*), which took the place of the modern swivel. *Bewits* are thin strips of leather by which the bells are fastened to the hawk's legs. Sect. x., "Early treatises on Hawking," is very meagre. Compare the account of MSS. on Falconry in the British Museum given in No. 81, pp. ii.–xvii.

57. **THORNTON (Colonel T.).** A **Sporting Tour** through the Northern Parts of England and great part of the Highlands of Scotland; including remarks on English and Scottish landscape, etc. By Colonel T. Thornton, of Thornville Royal, in Yorkshire. *De gustibus non. est disputandum.* London. Printed for Vernon and Hood, 31 Poultry; Constable and Hunter, Edinburgh; and Brush and Reid, Glasgow; by James Swan, Angel Street. 1804. 4to.

Contains much practical information on falconry, and details of the sport, especially grouse-hawking (in which the author was very successful) snipe-hawking and kite-hawking. He was the only falconer of modern times who procured a young goshawk from a nest in Great Britain. This bird was taken in the forest of Rothiemurcus (p. 76), where there were a few eyries in the great fir trees, some of which he saw (p. 107). He formed a Falconers' Club, of which the following amongst others were members: the Earl of Orford, the Earl of Eglinton, Mr. Lascelles, Mr. Parson, Mr. Edward Parson, the Duke of Rutland and Mr. P. Stanley. They found Alconbury Hill a very desirable place to meet at for part of the season, on account of the number of Kites which were then to be found there, and which afforded excellent sport. They used then to go on to Barton Mills, as appears by a memorandum in the handwriting of Col. Thornton, which in 1823 (the year of his death) was in possession of Mr. T. Gosden. After showing good sport with his hawks for nine years he was presented by Lord Orford, on behalf of himself and other subscribers, in 1781, with a handsome silver-gilt urn, on the cover of which is the appropriate design of a Goshawk holding a Hare. This urn, which passed into the possession of Col.
COLONEL T. THORNTON
OF THORNVILLE ROYAL, IN YORKSHIRE.
BORN 1757. DIED 1823.

From a portrait in the possession of the Earl of Rosebery.
Thornton Wodehouse, R.A. (a relative by marriage), was sold at "Christie's" on the 11th June 1884, and was purchased by the present Lord Orford, by whom it is now exhibited in the Grosvenor Gallery.

58. **THORNTON (Colonel T.).** A **Sporting Tour** through various parts of France, in the year 1802. . . . In a series of Letters to the Right Hon. the Earl of Darlington. To which is prefixed an Account of French Wolf-hunting. By Colonel Thornton, of Thornville Royal, Yorkshire. Illustrated, etc. Albion Press. Printed by James Cunder, Ivy Lane, for Longman & Co., Paternoster Row, and C. Chappie, Pall Mall, 1806. 2 vols. 4to.

A portrait of the author carrying a favourite falcon forms a frontispiece to the first volume. The original oil painting from which this portrait was engraved is in the possession of the Earl of Rosebery at the Durdans, Epsom.

The appendix contains some practical remarks on pheasant-hawking (pp. 230–234) with a description and plate of the Hawk-house at Thornville Royal.

59. **HOWITT (Samuel).** **The British Sportsman:** Seventy plates, without text. London. 1812. 4to.

60. **CHAFIN (William).** **Anecdotes and History of Cranbourn Chase.** By William Chafin, clerk. London. 1816. 8vo.

The author describes (p. 45) "the large tract of land in and near the Chase, called the Hawking Downs, formerly covered with gorse and fern, and the resort of winged game, pheasants, and partridges: and the bordering woods that produced woodcocks which came to a flight for the hawks in the open glades when disturbed from the woods, and shewed great sport." He refers also (p. 47) to "the English hawks annually trained in the neighbourhood of Bridport in Dorsetshire for the taking of Land-rails in the hemp and flax-fields near that town," and prints several letters (pp. 48–51) from Mr. W. Tregonwell Frampton, who about the year 1670 was "the most active pursuer of this diversion in the West of England." These letters give some curious details of the importation of hawks in those days, brought over in the Russian ships, and the value set upon them.

For a portrait of Frampton, see The Field, 22nd April 1854 (vol. iii. p. 381).

A practical and now scarce treatise. In preparing it, the author was assisted by Mr. Downes of Gunton, who, with Lord Orford, Col. Thornton, Col. Wilson (afterwards Lord Berners), Mr. Hall of Weston, near Newmarket, and Mr. E. C. Newcome of Feltwell, upheld this sport in England during the first quarter of the present century.

62. HAREWOOD (H.). Dictionary of Sports: or companion to the field, the forest, and the river side. Containing explanations of every term applicable to racing, shooting, hunting, fishing, hawking, etc. With essays upon all national amusements. By Harry Harewood, of Springfield, in the County of York, Esq. London. 1835. sm. 8vo.

An improved version of the "Sportsman's Dictionary." (No. 44.) With woodcuts, including the Goshawk and Hobby.
EDWARD CLOUGH NEWCOME

Of Hockwold in the county of Norfolk.

Born 1810, Died 1871.

Second edition (the best) revised by "Harry Hieover," "Ephemera," and others, and illustrated with 600 engravings on wood from drawings by Alken, T. Landseer, and others. London (Longmans), 1852. Other editions 1858 (illustrated by Leech) and 1870.

64. **BELANY (J. C.). A Treatise upon Falconry.** In two Parts. By James Cockburn Belany, Berwick upon Tweed. Printed for the Author. 1841. 8vo.

*Part I.* contains observations upon the Nature, Antiquity and History of Falconry.

*Part II.* contains notices of the different Hawks used in British Hawking, the proper method of keeping, training, and flying the birds, the apparatus belonging to the art, etc.

Appended is a Glossary of the "Terms used in Falconry," very incomplete, and not always accurate, the body of the work also containing many serious errors. A work much overrated by the booksellers.

BOOKS ON FALCONRY.

For a writer having no practical knowledge of the subject, but merely describing what he saw and heard, this little book is well written, and has a charming frontispiece by J. Wolf representing a Goshawk seizing a gazelle, with other illustrations.

The errors in the text are evidently due to the fact of the author not always understanding what he saw, or heard described.

67. SALVIN (F. H.) and BRODRICK (W.). FALCONRY IN THE BRITISH ISLES. With coloured plates of all the Hawks used by Falconers. London, John Van Voorst. 1855. roy. 8vo.

Second edition, 1873. The best modern book in English on the art and practice of Falconry. The second edition is to be preferred for the emendations and additions to the text, but the illustrations to the first edition are much superior. An interesting review of the second edition written by the late A. E. Knox, of Trotton, Sussex, appeared in the Quarterly Review for July 1875.

68. FREEMAN (G. E.) and SALVIN (F. H.). FALCONRY: ITS CLAIMS, HISTORY AND PRACTICE. To which are added remarks on Training the Otter and Cormorant, by Captain Salvin. London, Longmans. 1859. 8vo.

Though out of print, a work to be commended; by two practical falconers, both of whom are still living. The chapter on heron-hawking as pursued 40 years ago was communicated by the late Edward Clough Newcome, of Feltwell Hall, Brandon, Norfolk, one of the best practical falconers of modern times, and the last who kept Heron-hawks in England. In 1843 he had two remarkable Heron-hawks, "De Ruyter" and "Sultan," which were brought from Holland by the Dutch falconer Jan Pells, and in that year took 54 herons, and in the
MR. FLEMING OF BAROCHAN, RENFREWSHIRE,

With his falconers, John Anderson and George Harvey.

Engraved by C. Turner from a painting by J. Howe, 1811.
following season 57 herons. "De Ruyter" was lost on Lakenheath Warren, but "Sultan," who in the season of 1845 killed 25 rooks and 3 herons, lived for some time afterwards, and, on dying, was preserved, with jesses, hood, and bells, in a glass case, which may still be seen at Hockwold Hall.

The last four chapters of vol. ii. (pp. 171–308) are devoted to Falconry, historical and descriptive, but contain numerous technical errors, owing to the author's want of practical acquaintance with the sport.

70. BRODRICK (W.). FALCONER'S FAVORITES. By W. Brodrick, one of the authors of "Falconry in the British Islands." London, Van Voorst. 1865. folio.

A series of six coloured plates of hawks, life size, with a page of descriptive letterpress to each. The species figured are:— "Comet," a year old Peregrine Tiercel; an adult male Sparrow-hawk; "Shark," an adult male Goshawk; an adult male Hobby; "Hurricane," a young female Peregrine [more like a Norwegian Jerfalcon], and a young male Merlin. The plates drawn and lithographed by the author.

For a memoir of the late William Brodrick, see The Field, 12th Jan. 1889.

This little book, written from personal experience of the author, has done much to keep alive the traditions of falconry and encourage its modern revival. It has been unfortunately for some time out of print.
72. DELMÉ-RADCLIFFE (Col. E.). Notes on the Falconidae used in India in Falconry. [Cut of hooded falcon on glove.] Southsea, n.d. [1871]. sm. 8vo.

This small pamphlet of 38 pp. contains much practical information derived by the author from personal experience in India. It is a reprint of three articles, with the same title, which appeared in The Field of July 22, Aug. 5, and Aug. 26, 1871.

Schlegel cites a treatise on Falconry in India written in English, but known to him only through a German translation in Wiersbitzki’s Taschenbuch für Jäger und Naturfreunde (see German authors, No. 116). It contains some curious details about Hawking as practised in India in modern times. To this it may be added that in Hume’s “Scrap-Book, or Rough Notes on Indian Oology and Ornithology” (two parts, 8vo, Calcutta, 1869–70), will be found some excellent notes communicated by Mr. R. Thompson of Gurhwal, on hawking in India with the Peregrine, Saker, Goshawk, Sparrow-hawk and Hobby, the last-named being flown at the Hoopoe, and affording very pretty sport.

74. FISHER (C. Hawkins), FREEMAN (G. E.), and others. Prize Essays on Falconry; submitted to the Barnet Committee of the Alexandra Park with the object of suggesting the best means for reviving the practice of Falconry. Adjudicated upon by Lord Lilford, Lieut.-Col. Delmé-Radcliffe, and E. C. Newcome. London. 1871. sm. 8vo.

75. ROWLEY (George Dawson). Ornithological Miscellany. London. 1875–78. 3 vols. 4to.

Contains a few, but unimportant, notes on Falconry (part i
PETER BALLANTINE,
THE LAST OF THE OLD SCOTCH FALCONERS,
BORN 1798, DIED 1884.
From a painting by A. D. Cooper, 1879, in the possession of,
Mr. R. Oswald of Auchencruive, Ayrshire.
ENGLISH.

pp. 55–60, and part iv. pp. 213–222), collected from various sources, with facsimile woodcuts from Turbervile (No. 15).

76. LACROIX (Paul). MANNERS, CUSTOMS, AND DRESS DURING THE MIDDLE AGES. London. 1877. 4to.
A translation from the French (which see) with full-page illuminated plates, and engravings from early MSS., a chapter being devoted to Falconry (pp. 195–212).

Contains a chapter on “Hawks and Hawking” (pp. 49–82), explaining the Hawking terms used by Shakespeare, with illustrations from other authors, and some curious statistics concerning the prices paid for hawks, and the practice of the art in the 16th century. The frontispiece represents Shakespeare with a falcon on his glove, drawn by J. Wolf, the only portrait of Shakespeare with a hawk.

Contains chapters on Hunting and Hawking, the Boke of St. Albans, Hawking as taught by the Boke, Taking Passage Hawks in Holland, How to Train a Passage Hawk, and a review of an Arabic Treatise on Hawking.

The various steps to be taken in taming, training, feeding, and flying hawks are detailed from personal knowledge, and from
the teaching of two experienced professional falconers, the late John Barr, and Adrian Mollen, of Valkenswaard.

81. **HARTING (J. E.).** *A Perfecte Booke for Kepinghe of Sparhawkes or Goshawkes.* Written about 1575. Now first printed from the original MS. on vellum. With Introduction and Glossary by J. E. Harting. London, Quaritch. 1886. sm. 4to.

The original MS. is in the possession of Mr. W. A. Tyssen-Amherst, of Didlington Hall, Norfolk. The Introduction (pp. i.–xxxii.) embodies a review of the Early English literature of falconry (including manuscripts), and appended to the treatise (pp. 39–51) is a “glossary” of all the technical terms employed by Falconers. Only 100 copies of this treatise have been published.

**Dutch.**

83. **MAERLANT (Jacob van).** *Der Natura Bloemen: Historia Naturalis Metrica.* Leyden, n.d.

This work, preserved in MS. at Leyden, is cited by Schlegel as being mentioned in a “Catalogus librorum manuscriptorum bibliotheca Lugduno Batava descriptit J. Geel, 1852” (p. 195, No. 659), and contains some remarks on Falconry, relating chiefly to the diseases of hawks and the remedies for them.

84. **MERULA (Paul G. F.).** *Placaten ende Ordonancien op t’stuck van de Wildernissen in orde gesteld door Paul G. F. Merulam, Dordracenum.* In’s Gravenhage bij B. C. Nieulant. 1605. folio.
DUTCH FALCONER OF THE XVI CENTURY.

From a portrait by Frans de Vrient
In the Brunswick Gallery.
Placaten en Ordenancien op 't stuck van de Wildernisse, Hout-Vesterye, Vogelrye, ende Visscherye . . . van Merula uytgegeven. 'S Gravenhage. 1672. 4to.

According to Schlegel the third book, entitled Ixeutica of Vlucht-Bedrijf, contains a brief account of Falconry in Holland.

85. ACKERSDIJCK (W. C.). De Valkenjagt te Valkenswaard en Waalre. 1838. 8vo.

Unknown to Schlegel. See also an anonymous pamphlet, published at the Hague in 1840, entitled "Quelques détails sur les Faucons et l'art de les dresser à la chasse." Both these publications refer to the doings of the Loo Hawking Club in Holland.

Not seen; cited by Schlegel and said to contain some observations on Falconry (pp. 25–40). Wulverhorst was part author with Schlegel of the Traité de Fauconnerie.

German.

87. ANON. Das erste Buch vahet also an und leret paissen [beyssen, beizen, oder beitzen] und auch den Habich erkennen Augsburg [c. 1472]. sm. 4to.

Black letter, 46 leaves unpaged, and without signatures; 22 lines to a page. Without author’s name or date. The earliest printed book on Falconry in any language. Extremely rare. The only copy mentioned by bibliographers is one formerly in the library of the Abbé de Bearzi.

This extremely interesting treatise, written between 1430 and 1450, is printed in Black letter for the first time from a MS. in the Royal Library at Vienna. It contains a facsimile in colours (the MS. being illuminated) of the first page, which commences:—"Incipit aucupatorium herodiorum ex antiquorum philosophorum dictis per magistrum Eberhardum Hicfelt collectum et translatum.”

It is apparently founded on the earlier treatises of Symmachus and Theodosius, A. de Eglis, Ladislaus of Hungary, and Crescentius (see Latin authors), and deals first with the nature and habits of Falcons (*Herodiorum sive Falkonum*); secondly, with taming and training them (*de donatone et doctrina*); and thirdly, with the cure of their diseases (*de egritudinibus earnidem curis*). The editor, Baron von Dombrowski, in an excellent Introduction notices some of the older works from which the author derived information, and prints in parallel columns a passage from Hicfelt and from Crescentius.

Only 220 numbered copies of this have been printed, of which that in the writer's possession is No. 61.

89. **KAISER MAXIMILIAN.** *Handschrift über die Falknerrey (1493–1519) auf der K.K. Hofbibliothek zu Wien.*

Printed, from a MS. of the fifteenth century in the Imperial Library at Vienna, by Hammer Purgstall in his "Falknerklee" (No. 113), 8vo, pp. 94–96. Wien. 1840. It is an Ordinance of the Emperor, addressed to a Grand Duke of Austria, relative to the state of falconry in that country. From this it appears
that he used to receive annually twelve Sakers from Cyprus (sent by the republic of Venice), and twelve Peregrines from the grand falconer at the court of Prussia, besides purchasing hawks in Holland and Alsace, and at Augsburg.

Another MS. of this Emperor, namely:—his "Geheimes Jagdbuch," relating to Deer, was edited and published at Vienna, in 1858, by Th. G. von Karajan.

91. STEYNER (Heinrich). WAIDWERCK; VÖGEL ZU FAHEN MIT RAUBVÖGELN, etc. Augsburg. n.d. [c. 1530]. 4to.

92. EGENOLPH (Christoph). WAIDWERCK; VÖGEL ZU FAHEN MIT RAUBVÖGELN, netzen, stricken, leim, geschoss, etc. Strassburg. 1530. 4to.

48

BOOKS ON FALCONRY.

Reprint of 1886, of which only 250 numbered copies were issued, this being No. 31. Copies of the original edition of 1542 are extremely scarce. In twenty years I have only once seen it in a bookseller's catalogue. Not in Brit. Mus.

The title may be thus translated:—"The Chase and the Lure. On Goshawks and Falcons, their nature, species, and peculiarities: how to train, tame, and feed them; and treating of all their diseases. Almost indispensable, and most useful to all fanciers of goshawks and falcons. By Eberhard Tapp, Lunensis, a citizen of Cologne. 1542." The preface is dated Cologne, 24 May, 1541.

Compiled from previous writers, the portion on hunting being translated, for the first time, from the French of Jacques du Fouilloux. The first part treats of Hunting, the second of Hawking; with engravings by Jost Amman. Not in the British Museum.

Other editions, 1592, 1598 (Brit. Mus.) and 1607. In the edition of 1598 the treatise on Falconry extends from p. 692 to p. 732 with half-page engraving of Heron-hawking.

96. CRESCENTIUS (Petrus). NEUW FELDT UND ACKERBAW .... von Otter und Biberjagd, von Wasser und Fischweydwerck, vom adelichen Weydwerck
PRINCE WILLIAM V OF HOLLAND

Heron-hawking at the Loo in 1767.
From a rare engraving by Mourik.

From the Latin original, *Ruralium commodorum libri xii.*, first printed at Augsburg in 1471. There are, however, earlier German editions than this. Several were printed at Strassburg about the end of the fifteenth century, and later.

97. **ARCUSSIA (C. von).** **FALCONARIA**; das ist eigentlicher Bericht und Anleytung wie mann mit Falcken und andern Weydtvögeln beitzen soll . . . . in fünf Theil abgetheilet von Carolo d'Arcussia . . . . französisch beschrieben. . . . Gedruckt zu Franckfurt am Mayn durch Nicolaum Hoffmann. 1617. 4to.

A German translation from the French of D'Arcussia, and evidently based on the fourth Paris edition of 1607, for it contains but five parts (see note to No. 153). It is illustrated by the same full-page engravings, but within borders, and a folding plate of hawking implements between pp. 266–267: the title within a finely engraved and very appropriate border. Two copies are in the British Museum (7906, g. 24, and 7906, g. 25).

Graesse cites an earlier edition printed at Augsburg in 1611, but this is perhaps a misprint for 1617.

The first reprint of this curious treatise originally appended to the second edition of a Latin-German-French Dictionary, dated 1671, of which the first edition appeared at Lyons in 1664 and another in 1684, subsequently at Frankfort in 1681 and 1690. It contains treatises on Hunting and Hawking, with glossaries of the technical terms used in both these branches of sport. The portion on Falconry, in the edition of 1671, in which it first appeared, extends from p. 42 to p. 48, and is in double column. The author's name in the original is Pomey, not Pomay, as in the reprint.

Illustrated with copper plates.

Other editions, 1723 (cited by Schlegel as the first) and 1749. The author, whose remarks on Falconry are compiled chiefly from D'Arcussia, states (pp. 336–337, ed. 1749) that in his day falcons for heron-hawking were annually brought into Germany from Holland, by Dutch falconers who knew how to train them. And Döbel (No. 100), who repeats this statement (ii. pp. 194–195), adds that most of them came from Valkenswaard.

Other editions, Leipzig, 1754, folio; Vienna, 1785–86, 4 vols. 8vo. In the last published edition (Leipzig, 3 vols. 8vo, 1828), the portion relating to falconry, of no great importance, is omitted.

von den Falken und Habichten aus dessen 23 Buche
Pacius. Ansbach. 1756. sm. 8vo.

A translation from the Latin edition of 1596; consequently
incomplete, since it contains but two books out of six.

102. ANON. Neue Lustige und Vollständige Jagd-
kunst: so wohl von denen Vögel als auch andern
Thieren, Bestehend in fünf Theilen . . . iv. Von
den Falken, wie solche zum Vögel und Haasenfangen
abzurichten und deren vielfaltige Krankheiten zu curiren
und zu preserviren . . . . Nebst sehr vielen Figuren
und einer Nachricht von Canarienvögeln. Zweyte ver-
besserte Auflage. Leipzig: 1762. sm. 8vo.

Part IV. (chapters i.–xxii.) is devoted to Falconry, the details
of which occupy 78 pp. First edition not seen.

103. RIDINGER (J. E.). Jäger und Falconiers
mit ihren Verrichtungen. Vienna. c. 1760, folio.

A fine series of engravings of Hunting and Hawking.
The plates are lettered alphabetically from A to Z, and in-
clude the following illustrations of hawking:—

(D.) Falconier.
(E.) Falconier den Falcken abhaubend.
(F.) Falcken Jüngle mit der Chatsche. [Cadge.]
(G.) Falconier Knecht ë Uhu auf der hand führend.
(H.) Falconier Knecht ë Uhu vom bodë aufnehmend.
(Q.) Den Hasen mit dem Habicht zu bitzen.
(R.) Falconier mit dem Luier den Falcken einholend.
(W.) Der Falconier nimt den Falcken wider auf.
(X.) Der Reyher wird von den Falcken oben herab geschlagen.
(Y.) Wilde Gänse mit dem Habicht zu baitzen.
(Z.) Wild-Enten baitze nachdem sie aufgestöbert worden.

All Ridinger's engravings are valuable; the present series
epecially so, from its rarity. Besides the copy now before me,
I have seen but two others, one of which is in the British
Museum (458, f. 6). There is no accompanying letterpress as with some of Ridinger's works, but each plate has a description at foot in German and French. (See Thienemann, "Leben und Wirken des J. E. Ridinger," 8vo, Leipzig, 1856, pp. 34–38.) In another series there is a fine engraving of two hooded Jerfalcons and a water-dog, and in a third series, of much larger plates, depicting field-sports of the four seasons (Brit. Mus. 458, h. 15), the third plate gives a splendid representation of heron-hawking.

104. **BECKMANN (Johann).** Beyträge zur geschichte der Erfindungen. Göttingen. 1785. 8vo.

The article on Falconry in this work (ii. pp. 157–176) has been already noticed under the English translation by Johnston (No. 53).

105. **HEPPE (Johann C.).** Die Jagdlust oder die hohe und niedere Jagd, nach allen ihren Verschiedenheiten in drey Theilen gründlich beschrieben und mit nothigen Kupfern erläutert von Johann Christoph Heppe. Nürnberg. 1783–84. 3 vols. sm. 8vo.

The third vol. contains a treatise on the birds of prey (pp. 1–121) and on Falconry (pp. 121–197), with a plate (tab. 2) of hoods for the Gerfalcon, Saker, Alphanet, and Lanner.

106. **BECHSTEIN (J. M.).** Naturgeschichte der Vögel Deutschlands. Leipzig. 1801. 8vo.

The remarks on Falconry (vol. ii. p. 720 et seq.) are for the most part taken from Pennant (No. 47), who in turn borrowed from Warton and others.

A third edition appeared at Nürnberg in 1840.

There have been few better observers of bird-life than the elder Naumann, and falconers will find in the first volume of his work much interesting information concerning the habits in a wild state of the birds of prey which are trained for hawking.

With 27 plates of Eagles, Falcons, and Hawks; some copies coloured, others plain.

First edition, with variation in title, Dresden, 1827, 4to. This book is chiefly occupied with directions for the profitable management of a sporting estate, to which the remarks on hawks are, as it were, supplementary.

Compiled chiefly from the French of Charles D'Arcussia de Capre, seigneur d'Esparron (see Nos. 153 and 154).

Not seen, and not in the British Museum. If, as the title suggests, it is comparable to Die Kleine Jagd of Heink (No. 109), it will probably be found to include some notice of Falconry.
54

BOOKS ON FALCONRY.

112. HAMMER—PURGSTALL (Jos. von). Falknerklee: bestehend in drey ungedruckten Werken über die Falknerery nähmlich: (1) das Falkenbuch. aus dem Türkischen; (2) Ierakosophion, das ist "die Habichtslehre" aus dem Griechischen verdeutscht; und (3) Kaiser Maximilian’s Handschrift über Falknerery. Wien. 1840. 8vo.

The Turkish and Greek texts of the above-mentioned works are given with the German translation, and an Introduction of 32 pp. with a short list of such works relating to Falconry as were known to the editor.

The name "Falknerklee," or "Falconer's Trefoil," was evidently bestowed in allusion to the three works in one volume, like three leaves on one stem. Only 300 copies were printed of this book, which has now become scarce.

113. SÜSEMIHL (Johann Conrad). Die Vögel Europas. Darmstadt. 1842. roy. 8vo.

Contains an essay on Falconry by H. Schlegel, which he himself has cited as "un aperçu succinct de la fauconnerie," with coloured plates of falcons by Joseph Wolf.

Printed in Wiersbitzki’s "Taschenbuch für Jäger und Naturfreunde" (No. 12, pp. 205–264), but full of errors, although the author, it appears, was instructed by Professor Bein, of the School of Forestry at Dreissigacker in Thuringia, as well as by M. le Perin, Grand Falconer to the Duke of Vicenza. Schlegel, who cites this author, has pointed out several of his blunders.

This is the journal referred to in the note to last title. The contents of the article on Falconry (pp. 205–264) are as

116. THIENEMANN (F. A. L.). KRITISCHE REVISION DER EUROPÄISCHEN JAGDFALKEN. 1846. 8VO.

This important memoir, which contains some interesting details concerning the Lanner and Saker in Central Europe, is printed in Rhea, "Zeitschrift für die gesammte Ornithologie." 8vo. Leipzig. 1846. (Heft i. pp. 44–98).

In the same journal (pp. 39–43) is a paper by J. W. E. von Woborzil, entitled "Beitrag zur Naturgeschichte der 'Raroh,' Falco lanarius," Pallas, in which the writer states that near the Bohemian village of Wetruschitz, in the valley of the Moldau, where the mountain rocks overhang the river, he found the Lanner nesting, and secured five eggs and one of the birds. He adds that this falcon was well known to the villagers by the name of Raroh, and came there every year.

Coloured figures are given of the male and female.

The Dutch falconer, Adrian Mollen, who was head falconer to the Loo Hawking Club, informed the writer that he had caught young Lanners in Hungary, and trained them for Prince Trautmansdorf, of Oberweseldorf, near Vienna.

Amongst the many subjects dealt with in this work, which may be compared with the English “Book of Days” published by Chambers, we find the following on hawking:—“Wie soll man die Falken berichten: Wie man Hasen mit Falken fängt; Vögel-Weidwerck auf dem Wasser; Von allerlei Vöglerei, und Feder-spiel; etc.” Mit holzschnitten nach Jost Amman.

118. **SCHÜTZ (Carl Heinrich)**. *Der Praktische Jäger*, oder Kunst mittelst neu erfundener Fallen Füchse, Dachse, Wilde Katzen, und allerhand Raub-vögel zu fangen. Heilbron. 1847. 8vo.

Interesting to falconers for the instructions which are given for capturing hawks.

Contains a brief history of Falconry, but is evidently not written from any practical acquaintance with the subject; the most interesting portion being the illustrations, copied from old illuminated MSS.

This work is illustrated with twenty coloured plates, containing 200 figures of birds.

121. **LANDAU (G.)**. *Beiträge zur Geschichte der Jagd und der Falknerei in Deutschland*. Die
GERMAN FALCONER OF THE XVI CENTURY.

In this octavo volume of 340 pp., the "Zweites Buch" (pp. 326–340) is devoted to a history of Falconry in Hesse-Cassel and Hesse-Darmstadt, and some curious details are quoted from old German archives.

This is printed in vol. xx. of the "Bibliothek des Literarischen Vereins in Stuttgart." A poem of 185 verses extending to 38 pages (pp. 171–208).

123. **EHRENKREUTZ (H. von).** Meine Geheim-Sammlung der besten Wildköder, Beizen, Fischköder, etc. Ulm. 1859. 12mo.

Not seen: probably, from its size, of no great importance.

Not seen, and not in British Museum.

Not seen, and not in British Museum.

This curious treatise of 98 pp., of which the portion on Falconry extends to 58 pp., is printed in the "Bibliothek des Literarischen Vereins in Stuttgart," vol. lxxi., with a note by Dr. Hassler, to the effect that it is from a MS. copied in 1473, by "Clara Hätzlerin zu Augsburg." It is entitled "Hie hebt sich an das Puoch von den Valcken, Habichen, Sperben, Pfäriden und Hunden."

This volume contains a long chapter on Hawking (pp. 153–199), with plates of Hawk-catching; Hawk-net; Trap for Goshawk; Hawks on perch, and block; and Heron-hawking; the last-named being a reduced copy of the folio plate in Schlegel's "Traité de Fauconnerie." (See French authors. No. 194.)

128. **FOICHTINGER (J.).** **Die Geschichte der Falkenjagd.** Leipzig. 1878–79. 8vo.

One of a series of treatises on sport, by different authors, which appeared in parts in the "Bibliothek für Jäger und Jagdfreunde," 1878–79.

A German version of the celebrated Spanish work (which see) from the MS. (S. 34) in the National Library at Madrid. As to this version, see a notice by M. A. Savine in the "Polybiblion" (part. lit.), Nov. 1882, pp. 456–457.

130. **RHYN (Otto, H. am.).** **Kulturgeschichte des Deutschen Volkes.** Berlin. 1886. 2 vols. 4to.
In the first volume of this beautifully-illustrated work, abounding in wood engravings, chromo-lithographs, facsimile MSS., and early printed pages, will be found a dissertation on Falconry, with a representation of Heron Hawking from a MS. of the fourteenth century (p. 202), and some curious “playing-cards” of the fifteenth century (p. 258), on one of which is the figure of a huntsman (Jeger) with boar-spear and two hounds; on another, a falconer (Valkner) on horseback, with a cast of falcons on his left arm.

(See Hicfelt, No. 88.)

132. POMEY (Fr.). Ein sehr artig Buchlein von dem WEYDWERCK und der FALCKNEREY. [1671.] Reprint, Stuttgart, 1886. 8vo.
(See No. 98.) The recent publication of these reprints indicates a revived taste and demand for the old treatises on Hunting and Hawking, many of which, though quaint in expression, are sound enough in doctrine.

Danish and Norwegian.

133. DEICHMANN (C.). OM FALKE OG FALKEJAGT. Kjøbenhavn. 1788. 4to.

To be found in the “Nye Samling af det Kong. Norske Videnskabers Selskabs Skrifter,” but contains little more than brief outlines of the subject.

Reprinted from the “Nye Historisk Tidsskrift.”
In Horrebow’s “Natural History of Iceland,” translated from
the Danish (folio, London, 1758), will be found a description of
the mode in which the Icelanders used to capture falcons; and
in Anderson's "Account of a Description of Iceland and Groen-
land," printed at Hamburg in 1746 (8vo, p. 328), it is stated
that from Iceland were brought the finest falcons in the world.
The King of Denmark used to send an officer every year to
fetch them, and allowed him a good salary; the price of a white
falcon being ten crowns. See also, under Latin authors,
Brünnich, Ornithologia Borealis, 1764, pp. 2–3.

B. Meyer, in his Naturgeschichte der Vögel Deutschlands,
published at Nürnberg in folio in 1805, states (under the head
of der Isländische Falk) that a ship which arrived at Copenhagen
from Iceland on the 1st Sept., 1754, brought a consignment of
148 falcons, of which 12 were white ones. The prices then
given were—for a Peregrine, 7 crowns; for one of another
colour, 10 crowns; and for a white one, 15 crowns. A letter
from Copenhagen, dated Dec. 17, 1791, and published in the
St. James's Chronicle of Jan. 10, 1792, states that "the
vessel, on board of which were the Falcons from Iceland
annually sent to the Court of Vienna, was shipwrecked off
Castrop" [st. Kastrup, Denmark].

135. REINHARDT (J.). Falkejagten. Ire populære Foredrag, holdte i den naturhistoriske Forening
i Vinter en 1858 af J. Reinhardt. Kjøbenhavn. 1858.
8vo.

Printed in the "Dansk Maandeskrift," 1858, pp. 279–314
and 383–412, with two woodcuts—head of a falcon and head of
an eagle.

136. COLLETT (R.). Falkejagten. Udgivet in
"Folkevennen," et Tidsskrift udgivet af "Selskabet
for Folkeoplysningens Fremme." Kristiania. 1874.
sm. 8vo.

So far as the writer is aware, this article by Prof. R. Collett,
of Christiania, published in the Norwegian journal "Folke-
195–224), is the only contribution on Falconry from the pen of a
Norwegian author. It is partly historical, partly descriptive, the subject being divided into sections entitled:—

"Falkejagten's Opkomst og Bøsen; Falkejagten's Udbredelse; Jagtfuglene; Falkenes Indfangning; Falkenes Afrettelse; and Jagten." Some particulars are given respecting the numbers of Jerfalcons formerly taken in Norway and Iceland for exportation, the mode of capturing them, and the prices paid for them.

**Swedish.**

137. ANON. Om JAGT-FALKEN. Stockholm. 1833.

Printed in the "Tidsskrift för Jägare och Naturforskare utgifven af Jägare-förbundet" (pp. 352–363).

All attempts, says Schlegel (op. cit. p. 80), to fix the date of the introduction of hawking in Scandinavia and Denmark have been fruitless. We are entirely ignorant whether the art was carried thither by the colonists who (tradition says) came there from Asia, or whether it was introduced by the Normans, who, in the early part of the Middle Ages, invaded the shores of Great Britain, France, Holland, and many other countries. Hawks are mentioned in the Scandinavian and Icelandic "Sagas," but not in such a way as to lead to the inference that they were trained for the purposes of falconry.

It is of interest to note that Linnaeus in the Journal of his Tour in Dalecarlia, 1734 (the original MS. of which, in Swedish, is in the Library of the Linnean Society of London), describes his meeting with some Dutch falconers who were catching hawks with the aid of a Grey Shrike. He gives sketches of the hoods and other appliances used by them, and expresses surprise that no Swede had learnt to catch and train hawks, and so, like the Dutchmen, made money thereby.

**French.**

138. LE ROI MODUS. Le Livre du Roy Modus et de la Royne Ratio. Cy commence le livre du Roy Modus et de la Royne Ratio lequel fait mention
comment on doit deviser de toutes manières de chasses, etc. Imprimé à Chambéry par Anthoine Neyret l’an de grâce mil quatre cens ottante et six le xxve jour de octobre [1486]. 4to.

The earliest printed book in French which treats of Hunting and Hawking except the translation of the Latin work of Peter Crescentius, which was printed in the same year. The older French MS. of Le Livre du Roi Dancus, translated from the Latin in 1284, was not printed until 1883 (No. 139). The name of the author of Le Livre du Roi Modus is unknown, although he offers a clue to it in a mélange of the letters of his name and that of the transcriber grouped in a rosace. These letters are F. D. R. H. I. E. N. R. E. I. E. S. E. R. E. (in outer circle), and H. D. O. S. E. D. M. I. S. N. E. R. (in inner circle), from which the authorship has been attributed (by M. Joseph
Lavallée) to "Henri de Vergy, Seigneur de Feré," and (by M. Alphonse Chassant) to "Henri de Ferrières" and "Denis d'Hornes." See the articles by MM. Sorel and Lavallée in the "Journal des Chasseurs," August 1868 and September 1869, and Chassant, "Bulletin du Bouquiniste," June 1869. (Tiré à part, 50 exemplaires, 1870.)

In a neatly lithographed essay of 16 pp. 4to (Paris, 1888, Barthe, Rue Le Peletier 51), M. Victor Bouton, Héraut d'Armes, discusses this question, and, disagreeing with MM. Lavallée and Chassant, believes that in the Trésor de Vinerie of Hardouin, 1394, wherein allusion is made to contemporary authorities on the chase, he has discovered the author of Le Livre du Roy Modus in Jean de Melun, Sieur de Tancarville, Chambellan du Régent Philippe V. (dit "le Long"). If so, as the regency in question lasted only a year, the date of the MS. would be 1318; but there is no reason why it should not have been written by him after he had ceased to hold this appointment, the title of which might still be continued out of compliment. Moreover, in some of the MSS. there is evidence to show that the actual date of the composition is 1328.

M. Grasset d'Orcet, criticising this view in a letter, which I have been privileged to see, addressed to M. Pierre A. Pichot, Directeur de la "Revue Britannique," reads the inscription in the outer circle "Fit DuRHeIEN REIESERE," that is, "fit du régent régisseur," a term which he admits is applicable to Jean de Melun, Vicomte de Tancarville, and adds that, in his opinion, the letters of the inner circle, HDOSEMISNER, indicate Théodose de Misner, ou Seigneur du Mai.

The date of the first MS. is fixed approximately by the author's statement that he had seen Charles IV., who died in 1328, hunting in the Forêt de Bréteuil, and lived to become the historian of Charles V., who died in 1380. For several reasons, then, it seems justifiable to attribute this "Livre" to the Vicomte de Tancarville—(1) his identity is sufficiently indicated by the letters in the rosace; (2) he was living at the dates referred to by the author, and died in 1382; (3) he is specially mentioned as an authority on Falconry by his contemporary, Pero Lopez de Ayala (the Spanish Ambassador to the Court of Charles V.), in his "Libro de la Caza de las Aves," written in 1386; and (4) he is mentioned several times by name in the Jugement des Chiens et des Oyseaux with which the "Livre du Roy Modus"
concludes. (See ff. cxiv., recto et verso, and cxvii.–cxviii. ed. Blaze). The Juge ment ends thus:—“Explicit le jugement que fist le Comte de Tancarville.” The third point seems to have been overlooked by all my predecessors in this inquiry, and the fourth by all except M. Bouton.

There are several copies of the MS. in the Bibliothèque Royale, Paris, most of them illuminated. One of these (No. 632-12) was written in 1379. Another (No. 7096-2) was copied by Alexandre Danes de Maigny for Mgr. Jehan de Hangest, Chevalier, Seigneur de Genly et du dit Maigny in 1406. These MSS. begin:—“Cy commenche le livre du Roy Modus et de la Royne Ratio qui parle des deduyt des Chiens et des Oiseaux.” It was first printed in 4to, black letter, with woodcuts, at Chambery in 1486, the same year in which the English “Book of St. Albans” appeared. A second edition, also in 4to, but undated, was printed in Paris by Jehan Janot. A third, Paris, 1526, in 4to, black letter, with cuts; a fourth, full of blunders, was published in 8vo, by Corozet, and by Guillaume Lenoir, Paris, in 1560, and the last by Elzéar Blaze in 1839.

In regard to the peculiar title of the work, it may be remarked that, at the period when it was written, authors were fond of concealing their identity under some allegorical pseudonym. In this case the writer explains the reason for his selecting the names Modus and Ratio to be that there can be no good method without reason, and no reason without good method. “Le Roi Modus” discusses the various methods of hunting and hawking; “La Reine Ratio” the natural instincts of the beasts and birds of the chase. The cuts have been reproduced by Elzéar Blaze (see p. 65), and by MM. Lacroix and Seré (No. 194).

tonnelle que à la pipée : et aultres nouvelles choses trouvées pour les prêdre . . . [à la fin]. Imprimé nouvellement à Paris par Jehan Trepperel imprimeur et libraire demeurant en la Rue neufve Nostre Dame à l'enseigne de l'escu de France. [Sans date.] 4to, gothique, ff. i–iv. et 94.

Other copies of the same date bear the names of Vincent Sertenas and Guillaume le Noir. This edition, however, is characterized by Elzéar Blaze as full of inaccuracies.

This edition, carefully collated with the MSS. in the Bibli-
thèque Royale, is, in the opinion of Baron Pichon, the learned Président des Bibliophiles Français, much better than any of the preceding editions, now so rare and costly; and is, moreover, the only one that can now be procured at a moderate price (£5 or £6). The editor found on examining the MSS. that in former editions of the work whole paragraphs, and even entire chapters, had been omitted, and these he has restored. It should be observed, however, that he has given no notes, an omission much to be regretted.

Three hundred copies only of this edition were printed on Dutch paper, from the oldest known French MS. on Falconry, namely, from a translation dated “19 Août 1284,” of the Latin work of Albertus Magnus, who died in 1280. To this is added another translation from the same Latin work, dating from the end of the 15th century.

The original Latin text has been lost, but there remain these French translations and some in Italian. (See Italian authors.)

Tardif, in his “Art de Faulconnerie” (No. 142), in the dedication to Charles VIII. admits that his book was “translaté en français des livres en latin du roy Danchus, qui premier trouva et escrivit l'art de faulconnerie, et des livres en latin de Moamus, de Guillinus et de Guicennas, et colligé des autres bien scavans et expers en ladicte art.”

According to Jean de Franchières (No. 145), Dancus was a king of Armenia, who had a great reputation as a falconer. He was visited by Galatien, king of Egypt, who begged to be instructed in the art, and who subsequently sent his son Atanacio to spend some time at the Court of King Dancus, in order to be taught by him and his falconer Martino, who had previously been falconer to King Roger of Hungary. The inference to be
drawn is that this book is the outcome of the king's teaching. M. Martin Dairvault, however, in his preliminary "Notice" to this the earliest French version in print, deprives us of the romance by stating that no king of the name of Dancus ever existed in Armenia, nor did any King Galatien ever reign in Egypt, Roger of Hungary being equally "introuvable dans l'histoire." Is this work, then, the composition of Albertus Magnus, who, to give it an air of greater reality, introduced the names of imaginary personages? The MS. printed by M. Dairvault was discovered by him in the Bibliothèque Nationale, Paris (No. 12581, du Fonds Français), and is fully described in his "Notice" above mentioned.

The author's name is sometimes written Danchus, and Daulcus or Dalcus, as by Lescullier in his MS. "Livre des Oyseaulx de proye tant en l'art d'esperverie aultrusserie que faulconnerie." This MS., in folio on vellum (No. 275, Bibl. de l'Arsenal), which is referable to the reign of François I. or Henri II., ends thus: "Cy fine le livre de l'art de esperverie . . . . faict et traduict du contenu en plusieurs vieulx livres . . . . par Charles Lescullier, natif de Moulins en Bourbonnais demeurant à Paris."

140. **LE LIVRE DU FAULCON** [sans lieu ni date. Paris, Anthoine Verard. 1486–92 ?]

A work in prose and verse of extreme rarity, and known to the present writer only through the black-letter facsimile reprint of 1817, dedicated and presented by Robert Lang to the members of the Roxburghe Club. The author is unknown. From what is stated by Brunet, it would seem that there were at least four editions, all printed in Paris, which are thus characterized:—

1. Sans lieu ni date, petit in 4° gothique de 19 ff signés A–E iii. Ouvrage en vers et en prose. La présente édition, qui paraît avoir été imprimé pour Anthoine Verard [1486–92], est fort rare, et le seul exemplaire qu'on en connaisse a été vendu £5 12s. 6d. (Lang) et £1 14s. (Heber). M. Lang en a fait faire une réimpression petit in 4° tirée à petit nombre pour les membres du Roxburgh Club. Cette réimpression a été vendu £2 1s. (Sykes), £2 10s. (Lang).

2. "Le Livre du Faulcon." Imprimé à Paris par le petit Laurens en la rue Saint Jacquez près Saint Yvez. Petit in 4°,
gothique, de 26 ff non chiffres. Signés A–D, 26 ou 28 lignes par page. Le frontispice porte le titre ci-dessus avec une vignette en bois, donnant la marque, la devise et le nom du Petit Laurens. (175f. Maréchal de Nancy, 1850.)

3. Autre édition rare, "Le Livre du Faulcon des Dames." Finis sans lieu ni date. Petit in 8° gothique, de 24 ff sign. a. b. c. Le feuille du titre porte au recto une figure en bois, et au verso un rondeau donnant en acrostiche les mots "Isabeau Faulcon." Il existe deux éditions différentes de cette pièce de format in 8° gothique et de 24 ff chacune. La vignette en bois du frontispice peut servir à les distinguer. . . . Les deux éditions sont également rares. La seconde nous paraît être de Guillaume Nyverd, parceque la vignette du titre a été souvent employée dans d'autres livres donnés par cet imprimeur.

As no translation of this work has appeared, and the reprint of 1817 has become almost as scarce as the original, I shall here attempt a précis for the satisfaction of the reader.

The author commences with a "Prologue déclaratif de la matière de ce présent livre appelé le fœlco."

We have not to read far before discovering that this is not a serious treatise on Falconry, but an allegory, partly in prose, partly in verse, in which the lover is likened to a falconer, and his mistress to a falcon, who will not be reclaimed at first with the lure of love (le leurre d'amours). The falconer then tries a jewelled lure:

"il prist peine et diligence d'accumuler precieuses pierres de toutes espèces et couleurs ensemble, riche et sotpeste orfaverie des leuelles il compta subtillement ung leurre très curieux et singulier qui pendoit à ung bel las de soye brodé mignonnement de fil d'or de cypre et semé d'un costé et d'autre de lectres greques et romaines."
With this lure he brings down his falcon. Meantime, jealousy, envy, and evil report, symbolized respectively by three hawks (a Saker, a Lanner, and a Tunisian falcon), are at work to the discomfiture of the falcon. The owner of the falcon is represented as missing her from the perch whereon the other three hawks are tied, and, on inquiry, learns that she has gone off with the falconer. The other hawks, each speaking in turn, malign the absent one, the Saker jealously, the Lanner enviously, and the Tunisian hawk, like an ill-boding raven, is described as "ung oyseau doultr les fleuves marins nomé Tunicien qui de sa propre nature resemble au corbeau, car il est voulétiers raporteur de faulces nouvelles."

Beneath the perch four hounds, "lesqûx chiens quant à condition de chasse se monstroient totalémêt de semblables" (as hounds usually are, all coloured alike), yelp in chorus, iappoyent contre lonneur du faulcon, and represent the hue and cry following the evil reports.

"Faux raport toujours raporte plus tost le mal que le bien!"

The falcon breaks forth into lamentation, and, apostrophizing the falconer at some length, determines to fly away:

"Giray prendre perche et apuy es montaignes devers le puy ou en Auvergne quelque part après mon douleureulx départ cerches amours en autre lieu . . . .
Ne pësez plus au plaisir de mes yeulx mais regredez nostre folle acoinfâce et ayes biè toujo's en convenance les faulx rapors des maudz envieux."

The falconer, overcome with grief, throws himself upon a seat, and, bewailing his fate, moralizes at some length. Eventually, while wandering about the grounds of the château, he is roused from his meditations by the lady of the castle, who, after upbraiding him for losing the falcon, concludes by dismissing him from her service. Thus the lovers are parted—"l'un tira vers l'orient, l'autre vers l'occident, et ne securent rien l'un de l'autre car leur ptémêt fut têt soudain qu'ilz neurêt loisir de cûserer en- semble de leurs besônges."
The falconer arrives at a deserted country house, deserted parforce de morbre pestilentiel, dismounts from his horse, enters, flings himself down, and, after a reverie of some hours, falls asleep from sheer fatigue. While thus sleeping, Cupid, god of Love, appears to him, holding in his hand the dart with which he pierces men's hearts, upbraids him for his folly, and remonstrates with him for his want of courage, reminds him of Paris and the fair Helen, Jason, Æneas, and other heroes, and advises him to return:

"Rétoune autant qu'il soit plus tard
   tu as trop longuement erré
   va contempler le doux regard
   du faucon que tu as leurré."

The falconer, awaking, and seeing no one there, begins to cogitate on the vision, and, reflecting on what he has heard, takes comfort and courage. Quitting the house, he finds his horse grazing in a meadow, and, quickly mounting him, swears that, in spite of the jealousy of the Saker, the envy of the Lanner, the false reports of the Tunisian falcon, and les abais des mauvais chiens, toute sa vie il n'oubliera le faucon mais l'aymera jusques à la mort.

Meanwhile the falcon has taken flight from the castle to the edge of a wood, and, while meditating in uncertainty which way to go, the sun sets, darkness supervenes, and the moon rises. It is now the falcon's turn to have a vision. This time it is a beautiful female figure, lightly draped, who announces herself as the goddess of Reason.

"Je suis Raison princepe de vertus
   de tout honneur la nourrice et la mère."

And she adds:

"Je viens à toy O faucon ignorant
   car jay pitié quût je te vois mourant
   par folle erreur et par impatience."

After a lengthy reproof and exhortation, the goddess gives this good advice:

"Femme se doit honnêtement tenir
   de beau maintien de simple contenance"
peu se montrer peu aller peu venir quelle ne puist à honte parvenir":" and concludes:

"Notez ces mots O faulcon esgare 
otez ces mots et sagement te garde 
de retourner soies tout préparé 
pour ton honneur estre mieulx reparé 
affinue nul en mal ne te regarder 
ne doubtez rien, prens moy pour saue garde."

The falcon listens to Reason, and returns: thus all ends well. This charming romance is worthy of being once more reprinted verbatim et literatim, with appropriate illustrations designed by an artist who can draw hawks and hounds well.

This translation in black letter from the Latin of Crescentius, Ruralium commodorum libri xii. (which see), was undertaken in 1373 at the request of Charles V., and is a sort of Maison Rustique, containing several chapters on Hawking and Hunting. Other editions in French are: Paris, Jehan Bonhomme, 1486; Paris, Jacques Huzeton, s.d. (1497 ?); Paris, Jehan Petit and Michel Le Noir, 1516; Paris, pour la veuve de feu M. Le Noir, 1521; Paris, pour Philippe Le Noir, 1529; Lyon, Claude Nourry dict le Prince, 1530; Lyon, Pierre de Ste. Lucie dict le Prince, 1539.

Under a fresh title, "Le Bon Mesnaiger," it reappeared at Paris, Nicholas Cousteau, 1533; and Charles Langellier et Denys Janot, 1540, and has since been translated into German and Italian.

142. TARDIF (Guillaume). Le Livre de L'ART DE FAULCONNERIE ET DES CHIENS DE CHASSE. Imprimé à Paris ce cinquiesme jour de Janvier mil quatre cens quatre vingz et douze pour Anthoine Verard, libraire demourant sur le pont Nostre Dame, 1492. 4to.

First edition, 41 feuillets, gothique, fig. sur bois. Other
editions, Paris, Anthoine Verard, 1506; Paris, Jehan Trepperel, 1506; Lyon, Pierre de Sainte Lucie dict Le Prince, sans date [1530–1555]; Paris, Philippe le Noir, sans date, printed with “La Fauconnerie” de Jean de Franchières, &c., 1567, 1585, 1602, 1607, 1613, 1614, 1618, 1621, 1624, 1627, 1628.

Translated into Latin and printed at Geneva and Venice, 1560, and at Basle, 1578, with the treatise of the Emperor Frederick II. See Latin authors.

The latest edition in French is that by M. Jullien, published in the “Cabinet de Vénerie,” with the following title:—

Guillaume Tardif du Puy en Vellay was a Professor at the Collège de Navarre, and reader to Charles VIII. of France, who was a great falcoîer (1483–1498). His work, to which our English Turbervile (No. 14) was indebted, is chiefly a translation from the Latin text (since lost) of “Le Roi Dancus” (No. 139), with additions from the MSS. of Artelouche de Alagona and De Franchières, from the unpublished MSS. of Moamus, Guillinus, and Guicennas, and from the Latin work of the Emperor Frederick II., written about 1245. Le Livre de Tardif is divided into two parts; the first relating to Hawks, the second to Hounds. The first is again divided into two parts, which treat (1) of the different kinds of hawks used by falconers and the mode of training them; (2) of the recipes for the cure of their diseases.

As to the writers Moamus, Guillinus, and Guicennas, from whom Tardif states that he derived information, nothing with certainty is known of them, their MSS. being presumably lost. Arcussia, who likewise quotes them (No. 153), regards the two last-named writers as Egyptians, though MM. Lallémant Frères (No. 175) make Guicennas an Arab.

This poem is singularly interesting as having been composed by order of the French king Jean, during his captivity in England. It was commenced at Hertford by his chaplain, Gace de la Bigne, in 1359, and finished in Paris. M.M. Lalléman Frères (Bibl. Hist. et Crit. pp. 95–97), following the MS. in the Bibliothèque du Roi (No. 7627, sm. folio), give the full title as follows:—

"Gace de la Bigne, jadis premier chapelain de très excellent Prince le Roy Jehan de France qui Dieu absoulle, commenga ce Roman à Hertfort en Angleterre, l'an mccclix, du mandement dudit Seigneur afinque Messire Philippe [de Valois] son quart filz, et duc de Bourgoigne, qui aidoit estoit jeune, apprist les desduiz pour eschever le pésché oiseulx, et qu'il en fist mieulx enseigne en moeurs et en vertus; et depuys le dit Gace le parfist à Paris. Ici commence le Roman de Déduits."

This curious poem is not printed separately, but is misleadingly appended to the work of Gaston Phébus, Comte de Foix, "Le Myroir de Phébus des déduuits de la Chasse aux bestes saulvaiges" (which contains nothing on Falconry), as if composed by that author. An analysis of it will be found in the "Mémoires sur l'ancienne Chévalerie" by La Curne de Sainte-Palaye, 1781, vol. iii. pp. 389–419. See also "Notes et documents relatifs à Jean ROI de France" (Philobibl. Soc. vol. ii., London, 1855–56), "Bulletin du Bibliophile" (Mars 1857), et "Journal de Chasseurs" (vol. v. p. 188).

An extract from this poem, giving the story of a sparrow-hawk which, being turned out to moult, caught a tame starling and brought it to his owner, is given by La Curne de Sainte-Palaye (No. 181, vol. iii. pp. 253–256); and another extract, entitled "La devise du bel Faucon," is printed by Baron Dunoyer de Noirmont in the third volume of his "Histoire de la Chasse en France," p. 376.

Amongst other incidents, Gace de la Bigne describes a flight
at the crane with two falcons brought from Barbary and given to Charles V. by Bertrand du Guesclin, Connétable de France.

After binding to the crane, they brought it to the ground, where it was dispatched in sight of the king with the aid of greyhounds (levriers), trained for the purpose after the fashion of Eastern falconers. At this time, according to Gace de la Bigne, the falconers of Charles V. had charge of thirty hawks.

This work, which is comparable to the Jugement des Chiens et des Oyseaulx in the "Livre du Roy Modus," is in black letter, and has on the verso of the last leaf "Cy fine le Débat dentre deux Dames sur le passe-temps des chiens et oyseaulx, nouvellement imprimé à Paris le premier jour d’avril mil cinq cens xxvi par Anthoine Couteau, pour Jean Longis, libraire."

Another edition, "imprimé à Paris par maistre Guichard Soquand," 1528, and a subsequent one without date, or printer’s name. The author, who, in addition to the office above mentioned, was also "Royal Historiographer," lived under Charles VIII., Louis XII., and Francis I., and in this somewhat dull poem revives a discussion which at that period was so fashionable between the respective votaries of Hunting and Hawking.

See Goujot (Bibl. Franç. x. 23) and Lallemant (pp. 153-156). Schlegel, who refers to this composition, does not give the title of it, nor the date of its publication. It was reprinted in Paris in 1882, with notes by M. Ernest Jullien.

145. FRANCHIERES (Jean de). Le Livre de l’Art de Faulconnerie: lequel Frère Jehan de Francières, chevalier de l’ordre de Saint Jean de Hierusalem, Commandeur de Choisy en France, a extrait et assemblé, c’est assavoir des Livres des trois maistres Faulconniers cy-après nommés, lesquels en
leur temps furent moult experts et scavans au dit art de Faulconnerie, et selon la Nature des Faulcons. Ensemble le déduit des Chiens de chasse comme cy-après ce monstrera et sera traicté en ce présent Livre. Paris, imprimé par Pierre Sergent, 4to, goth., sans date [? 1531, not 1511 as cited by Schlegel, for Sergent did not print before 1531].

The author lived in the reign of Louis XI., and, being fond of science, was considered a savant by his contemporaries.

The three "maistres faulconniers" from whom he acknowledges to have derived information are "Maistre Malopin," head falconer to the Prince of Antioch, "Maistre Michelin," falconer to the King of Cyprus, and "Maistre Aymé Cassian," a Greek from the island of Rhodes, an excellent falconer who lived a long time, and of whom the author says, "moi-même je l'ai vu en mon temps." For information concerning the MS. treatises of these writers, see Harting, No. 81, Introduction, p. xxiii.

This edition is printed throughout in italic. A copy at M. Bartel's sale in Paris, April 1889, fetched 300f.

Autre Édition. La Fauconnerie de Jean de Franchières, Grand Prieur d'Aquitaine, avec tous les
BOOKS ON FALCONRY.

The three editions here quoted will suffice to show the variations which are to be found in the title of this work, which is illustrated throughout with woodcuts, and is often bound up with "La Vénerie" de Jacques du Fouilloux, an equally celebrated treatise on Hunting. It was printed in Paris in 4to by Abel L'Angelier in 1585, 1602, 1607, 1613, 1614, 1618, and 1627; and by Cramoisy in 1621, 1624, and 1628. Though thus frequently reprinted, it is still amongst the rarest of French works on the subject.

The first part of the second book contains descriptions, pp. 83–131, of the diurnal birds of prey, with some general and historical details relating to Falconry. It was from this source that Bouchet (No. 150), a few years later (1567), derived most of his information: in fact, Belon as an original observer has had many copyists.

147. ESTIENNE (Charles). L'Agriculture et Maison Rustique de M. Charles Estienne, docteur en médecine. En laquelle est contenu tout ce qui peut estre requis, etc. . . . Plus un bref Recueil de la Chasse et de la Fauconnerie. Paris, Jacques du Puys. 1564. 4to.

148. **ESTIENNE (Charles) & LIEBAULT (Jean).**

Other editions: Genève 1569, Paris 1570, Lyons 1583, 1590, 1595, 1650, 1659, 1668, 1689, 1698, 1702, etc.; Rouen 1600, 1620, 1625, 1629, 1641, 1674, 1676, etc. The extraordinary popularity which this work once enjoyed is shown by the great number of editions which have appeared, upwards of a hundred being cited by Souhart (Bibl. pp. 167-170), exclusive of translations in Italian, English, and German. It is curious that it should be known to Schlegel only through the fact of the Rouen editions of 1625 and 1629 being cited by Kreysig (g.v.). The English translation by Surflet will be found noticed in this catalogue under that author's name.

149. **ALAGONA (Arthelouche de).** **La Fauconnerie** de Messire Arthelouche de Alagona, Seigneur de Maraveques, Conseiller et Chambellan du Roy de Sicile. Poictiers, par Enguilbert de Marnef et les Bouchets frères. 1567. 4to.

A treatise of 32 pages, including Title, Avant Propos, and Table; always printed with "La Fauconnerie de Jean de Franchières." Other editions: 1585, 1602, 1607, 1613, 1614, 1618, 1621, 1624, 1627, and 1628.

As there were no Kings of Sicily until 1504, the author of this treatise must have lived between that year and the date of this edition of de Franchières, in which it was first printed. Moreover, he refers at p. 95 to Aymé Cassian, a Greek from the Isle of Rhodes, who was a contemporary of Jean de Franchières and personally known to him. The work cannot be regarded, however, as of much practical value; it is written in a superficial and confused style, and deals too much with the maladies of hawks and their supposed remedies.

150. **BOUCHET (Guillaume).** **Recueil de tous les Oyseaux de Prove, qui servent à la Vollerie et**
Fauconnerie par G. B . . . . Poictiers, par Enguïlbert de Marnef et les Bouchets frères. 1567. 4to.

Printed at the end of "La Fauconnerie de Jean de Franchières," and compiled chiefly from the work of Pierre Belon, published in 1555 (No. 146). Strange to say, Schlegel remarks (op. cit.), "On ignore quel est l'auteur de ce traité"!

The first edition (pp. i.-vi., 1-318), "Achevé d'imprimer pour la première fois le 15 Mai 1583." Twenty years later a second edition, revised, and to a certain extent expurgated, by the author, appeared with the title altered as follows:—

FALCONRY receives attention as one of the pleasures of the country.

Schlegel, who, under a much abridged title, cites the second edition of 1604, characterizes this laborious composition of more than 300 pages (pp. i.-iv., 1-319) as a poem of no literary merit and of no scientific interest, though this opinion is not shared by modern French sportsmen (cf. Dunoyer de Noirmont).

Both these editions are now very rare. Two modern editions have been published—one, Paris, 1869, 12mo; the other, much superior, and with an Introduction by M. Ernest Jullien, Paris, Firmin Didot, 1879, 2 vols. 4to.

First edition with woodcuts, now very rare. At the sale of Baron Pichon’s library, in 1869, a copy sold for 300£. A second edition, with a slight addition to the title, as follows:—

Almost as scarce as the first edition. Published in the same year as the third edition of d’Arcussia (No. 153), it is sometimes to be found bound up with it. A reprint of this appeared in 1608, but none subsequently until the following:—

DE L’AUTOURSÉRIE, etc. Nouvelle édition revue et annotée par Henri Chevreuil d’après l’édition de 1608.

"Pierre de Gommer, seigneur de Lusancy, et son frère François, habitaient le manoir de Lusancy, se livrant à la chasse au faucon et au tiercelet d'autour, dans un pays des mieux situés pour cet exercice sur les bords de la Marne, dans ces plaines si fertiles et si giboyeuses des environs de Meaux."

—Introduction, ed. 1877.

The first edition, with an engraved portrait of Henri IV. The second, Paris, Jean Houzé, 1599, 8vo. The third, "divisée en quatre parties, revue, corrigée et augmentée," Paris, Jean Houzé, 1605, the augmentation consisting of the work of De Gommer de l'Autourserie, 1605 (No. 152). A copy of this edition was sold in Paris, April 1889, for 165f., another copy, 1615, fetching the same price. The fourth, "divisée en cinq parties," Paris, Jean Houzé, 1607; subsequent editions (1608, 1615, 1617, 1619, 1621, etc.) being augmented by the addition of fresh parts, until in the edition of 1627 the work seems to have reached completion. It was then entitled:

The title is in red and black, on the verso of which is the table of contents. The ten parts into which the book is divided are the following:

1. De la connaissance des Oyseaux avec leurs portraicts, de leur nature, de leur traitement, et façon de les dresser.
2. De leurs maladies communes et accidentales, avec les remèdes.
3. Des moyens de se servir des Oyseaux.
4. De l’anatomie d’icest par discours et par figure.
5. De l’Autourserie et des Esperviers.
7. La Conférence des Fauconniers.
8. Les discours de la Chasse.
9. Les dernières résolutions des Fauconniers avec un récit de l’histoire de la Reyne Jeanne, etc.
10. Les Lettres de Philoierax à Philofalco, où est traité des maladies des Oyseaux, avec les remèdes pour les guerir.

"Puis le portrait de l’auteur, et vis-à-vis les armes de d’Arcussia
2e feuillet Dédicace au Roy ; au verso, avis au lecteur daté de Paris, 15 Mars 1621. 3e feuillet Sonnet sur la Fauconnerie par Gallaup, et vers latins sur le même sujet par Jan Raynaud d’Aix: au verso privilège daté de Saint Germain, 5 Oct. 1626. Puis commence la 1re partie avec la 1re feuillet numeroté 7 au recto et 8 au verso ; mais au 2me feuillet la pagination recommence 1, 2, 3, etc. signatures A—M M M, pour les six premières parties. La pagination est défectueuse, souvent inexacte. Après la page 296, c’est à dire à la fin de la 4e partie, doivent se trouver 5 planches d’instruments de Fauconnerie, la 5e plus large que les autres, doit être pliée. Après la page 334 doivent se trouver 8 pages d’indice non numerotées." (Souhart.)

At M. Bartel’s sale in Paris, April 1889, a copy of this edition fetched 649f.

sous la porte du Palais, près la Bastille, et Jacques Besongne dans la Cour du Palais. 1644. 4to.

The contents of this edition are the same as in that of 1627 and include all that d'Arcussia has written; but the text is much more correct. On this account it is to be preferred to any of the editions which preceded it. The work is much esteemed on account of its originality and the amount of information which it conveys, and particularly for the description which the author gives of flights which he witnessed when hawking with the King. Notwithstanding the many editions which have appeared, copies are always difficult to procure, and command a high price. At M. Bartel's sale in Paris, in April and May 1889, four different editions were sold as under: the third edition, 1605, for 165f.; 1615, 165f.; 1627, 649f.; and 1644, 560f. In 1617 a German translation of the 4th edition was published at Frankfort, by Hoffmann (No. 97).

A very nice reprint of the seventh part of the Fauconnierie with some excellent notes by the Editor.

This work, with woodcuts, and title in red and black, is of great rarity, and was only known to Lallemant by the title. The Comte de Béhague's copy sold in 1880 for 3000f. It has never been reprinted; but an analysis of it will be found in the Introduction to the Bref Discours sur la louange de la Chasse, reprinted at Louviers, 1888.

The first edition (pp. i.–vi.; 1–96). A second, at Paris, C. Besongne, 1635, and subsequent editions (appended to "La Vénérerie de Jacques de Fouiloux") Paris, P. Billaine, 1634–1635, 4to; Paris, P. David, 1640, 4to; and Rouen, Clément Malassis, 1650, 4to. The author, who was "Fauconnier de la Chambre du Roy Louis XIII.,” and served also under Henri III. and Henri IV., has in this book set down the results of 45 years’ experience. Copies of this work are very difficult to procure, especially the first two editions in octavo. At the sale of Baron de Sellière’s Library, in London, in March 1887, a 4to copy fetched £6 6s. At M. Bartel’s sale in Paris, in April 1889, the 8vo of 1620 fetched 91f.

This “essay” of an encyclopædic nature, contains amongst other things chapters on Hunting and Hawking (chap. iii. pp. 34–52). It passed through several editions at Rouen, 1622, 1624, 1625, 1626, 1631, 1632, 1667, and 1726; at Paris, 1639, 1646; and Lyons, 1642. The author’s real name was Etienne Binet.

158. **RANCONNET** (Aimar de). *Thrésor de la Langue Françoys*, tant ancienne que moderne
auquel entre autres choses sont les mots propres de

... VÉNERIE et FAULCONNERIE ci-devant ramassé par Aimar de Rançonnet ... revue et augmenté par Jean Nicot, etc. Paris, imprimé par David Douceur. 1626. folio.

A useful work of reference for the technical terms employed by French falconers.

159. LÉON (Jacques de). LA FAULCONNERIE de Messire Jacques de Léon, dédiée au Roy, par Gas-

(Second titre.) Véritable discours de Fauconnerie curieusement composé par Messire Jacques de Léon, Conseiller, Escuyer et Échanson de feu Monseigneur le duc d'Orleans et de Milan, et à présent Capitaine des Galères du Roy Louis XII. et Concierge de sa Maison de Marseille estant en l'exercice de Veneur: ou il est traicté de la Fauconnerie de toutes manières d'Oyseaux de proye, sçavoir de leurs natures, condi-

This little volume of 102 pp. with 6 pls. (one on copper, and five on wood, taken from d'Arcussia) is of extreme rarity, and is not cited by Schlegel. Only two copies are with certainty known
to exist, namely, one in the Bibliothèque Méjanès, and another at Aix, which in 1858 was in the possession of the Marquis de Foresta, and which is now, with the original MS., in the library of the Comte de Clapiers at Marseilles; cf. Souhart, “Bibl. Gén. des Ouvr. de la Chasse,” p. 295; and Rouard, “Bulletin de Bouquiniste,” 1858, p. 215.

161. FORTIN DE GRANDMONT (F. François). Les Ruses Innocentes dans lesquelles se voit comment on prend les Oyseaux passagers et les non passagers, et de plusieurs sortes de Bestes à quatre pieds; avec les plus beaux secrets de la Pesche, etc. Par F. F. F. D. G. dit le Solitaire Inventif. Paris. 1660. 4to.

This curious work, which is illustrated with woodcuts, was for a long time very popular with French sportsmen, and is still much sought after by collectors of sporting books.

Other editions: Paris, 1668 and 1700, 4to; Amsterdam, 1695, 8vo, 1700, 12mo, and 1714, 2 vols. 12mo. Some of the illustrations are very quaint.

Each part has a separate title page, pagination, and register.
Other editions, Lyons and Frankfort, 1676, 1687, 1690, 1700, 1701, 1715; Cologne, 1740, and the following reprint:—

Traité fort curieux de la Vénerie et de la Fauconnerie. Réimpression textuelle de l'édition

The first separate reprint (in French and German) of this curious work, containing treatises on Hunting and Hawking, with Glossaries of the technical terms. The author's name is here spelled Pomay. See also German authors, No. 98.

163. **BONNEFOUS (Nicolas).** TRAÎTÉ DES CHASSES, DE LA VÉNERIE ET FAUCONNERIE OÙ EST EXACTEMENT ENSEIGNÉE LA MÉTHODE DE CONNOISTRE, ETC. . . . AVEC LES TERMES, ETC. PARIS, CHARLES DE SERCY. 1681. 12mo.

A scarce treatise, not mentioned by Schlegel or by Souhart, and not in the British Museum.

164. **MORAIS (Claude de).** LE VÉRITABLE FAUCONNIER, PAR M. C. DE MORAIS, CHEVALIER, SEIGNEUR DE FORTILLE, CY-DEVANT CHEF DU HÉRON DE LA GRANDE FAUCONNERIE. DÉDIÉ AU ROY. PARIS, CHEZ GABRIEL QUINET AU PALAIS À L'ENTRÉE DE LA GALERIE DES PRISONNIERS, À L'ANGE GABRIEL. 1683. 16mo.

The first edition (pp. i.–x.; i–144), now very scarce. Reprinted at the end of the "Nouveau Théâtre d'Agriculture," par Louis Liger, 1709, and a later reprint (sm. 4to, pp. 1–96), Paris, Bureau de Gazette des Chasseurs, 1883.

165. **SELINCOURT (Jacques Espée de).** LE PARFAIT CHASSEUR, POUR L'INSTRUCTION DES PERSONNES DE QUALITÉ OU AUTRES QUI AIMENT LA CHASSE POUR SE RENDRE CAPABLES DE CET EXERCICE, APPRENDRE AUX VENEURS, PIQUEURS, FAUCONNIERS, ET VALETS DE CHIENS À SERVIR DANS LES GRANDS ÉQUIPAGES, ETC. À PARIS, CHEZ GABRIEL QUINET AU PALAIS À L'ENTRÉE DE LA GALERIE DES PRISONNIERS, À L'ANGE GABRIEL. 1683. 12mo.
This little volume (pp. i.-xiv., 1-390) is now of some rarity. The author gives sound advice as to the hawks to be used according to the nature of the country in which they are to be flown.

The portion relating to fruit-trees was previously printed in 1653. Kreysig cites a work with a similar title to this, with the date 1681, perhaps an earlier edition of it, though quite likely to be a misprint for 1684, Kreysig being often very inaccurate. “Légendre” is a pseudonym, the author’s real name being Robert Arnaud d’Andilly.

A work similar in character to Les Ruses Innocentes (No. 161). Another edition, Amsterdam, 1699, 12mo. Both rare.

168. LIGER (Le Sieur Louis). LES AMUSEMENTS DE LA CAMPAGNE : ou “Nouvelles Ruses Innocentes” qui enseignent la manière de prendre aux pièges toutes sortes d’oiseaux, etc. . . . Comment affaîter les Faucons, etc. . . . Paris, Prudhomme. 1709. 2 vols. 8vo.

The portion relating to falconry appears to have been compiled chiefly from the works of d’Arcussia (No. 153) and Morais.
(No. 164), and was reprinted without author's name, and with numerous alterations, at Amsterdam, in 1714.

Other editions were published at Paris in 1734, 1740, 1753, and 1756.

169. ANON. L'Art de toute sorte de Chasses et de Pêches, avec celui de guérir les Chevaux, les Chiens et les Oiseaux; un Dictionnaire de la Chasse et de la Pêche; avec une explication des termes de la Fauconnerie, par demandes et réponses. Lyon, Gaudet. 1719. 2 vols. 12mo.

A compilation from various sources, of little value. Other editions, 1730, 1750, both published at Lyons.

Other editions, 1742, 1750. Though a popular work at one time, copies are now seldom to be found. A copy of the edition of 1742, from the library of M. Bartel, which was sold in Paris, in April and May 1889, fetched 52f.

De Chappeville, after stating in his Preface (p. 14) that since the publication in 1655 of Robert Salnove's work on Hunting, nothing had appeared on that subject, adds (p. 15): "L'auteur est un gentilhomme de la Vénerie, qui après avoir servi dans ce corps sous le feu Roy près de 40 ans, est mort depuis quelques années. Il se nommait Antoine Gaffet, Ecuyer, Sieur de la Briffardièere. Son nouveau traité est beaucoup plus ample à bien des égards que celui de Salnove."

In 1885 a reprint of the treatise on Falconry, which in the original extends from pp. 383–401, was issued by M. Pairault, Paris, with the following title:—
A FRENCH FALCONER OF THE XVIII CENTURY

In the uniform of the court of Louis XV.

1715-1774.
171. **CHAPPEVILLE (Pierre Clément de).** *Petit Traité de Fauconnerie* : ou se trouvent les termes de cette espèce de Chasse avec la manière de bien tenir, soigner et traiter les Oiseaux, etc. Par P. C. de Chappeville, gentilhomme de la Vénerie du Roy.

The editor of this reprint (sm. 8vo, pp. 1–28, including half-title and title) has confounded de Chappeville with the Sieur de la Briffardière. It was the latter, not the former, who was "Gentilhomme de la Vénerie du Roy," as we learn from de Chappeville himself in his original Preface (p. 15). The title adopted for the reprint is that which in the original is given in half-page at the commencement of the *Traité de Fauconnerie*, p. 383.

172. **ANON.** *Amusements de la Chasse et de la Pêche* : ou l'on enseigne la manière de prendre toute sorte d'oiseaux et d'animaux à quatre pieds, avec des instructions sur la Volerie, etc. Amsterdam et Leipzig. 1743. 2 vols. 12mo.

First published in 1730, at Lyons, chez les Frères Bruyset, with the title *L'art de toute sorte de Chasse et de Pêche*. Another edition appeared at Lyons in 1750, and one at Amsterdam in 1732, 2 vols. 12mo, with the title *Délices de la Campagne ou les Ruses de la Chasse et de la Pêche*.

Le premier volume, 3 pp. prelim. 750 pp. et 1 p. de privilège; le deuxième, un titre, 238 pp. qui finissent le dictionnaire
d'agriculture et la première partie de l'ouvrage; plus un faux titre et 467 pp. d'une pagination spéciale pour le Dictionnaire de Fauconnerie et de Chasse; enfin 12 planches dépliantes toutes se rapportant à la seconde partie terminant l'ouvrage. (Souhart.)

In these articles, the author, who was a "lieutenant des chasses du parc de Versailles," has given some interesting details on the subject of Falconry, of which Buffon, and after him many others, took advantage.

This useful bibliography, which includes the titles of a great many works in French and Latin on Falconry, occupies the first part (pp.i.–ccxxxvi.) of "L'Ecole de la Chasse aux Chiens courans," par Le Verrier de la Conterie, Ecuyer, Seigneur d'Amigny. The authors' names do not appear on the title, except as printers, but are to be found at the end of the work, in the "Approbation" inserted by order of the Chancellor of France. From this work of Lallemant Frères, the "Dictionnaire des Chasses, précédé d'une Bibliothèque historique et critique des ouvrages théreutiques anciens et modernes," par M. Baudrillart (Paris, 1834, 4to), was in a great measure compiled. (No. 188.)

176. SALERNE (François). L'Histoire Naturelle éclaircie dans une de ses parties principales, l'Ornithologie, qui traite des Oiseaux de terre, de mer, et de rivière, tant de nos climats que des pays étrangers. Paris, Debure. 1767. 4to.
This work, which is to some extent a translation of Ray's *Synopsis Methodica Avium, 1713*, contains some unimportant remarks on the birds of prey employed by Falconers, and is chiefly noticeable for the engraved frontispiece by Martinet, in which the sports of hawking, and fishing with trained cormorants, are fairly represented.

Première édition dans laquelle le nom de l'auteur ne figure qu'au bas de la dedicace au Prince de Conti.

Cette ouvrage est ainsi composé: Première partie—faux titre, titre, épitre dédicatoire, préface, table xii pages préliminaires; texte 98 pp. et 22 gravures numerotées de 1 à 22. Deuxième partie—faux titre et titre non paginés, texte 99-208 pp., et 17 gravures de 23 à 39. (Souhart.)

178. **OLINA (G. P.).** *Les Amusemens Innocens:* contenant le traité des Oiseaux de Volière, ou le parfait Oiseleur. Ouvrage dans lequel on trouve la description de quarante Oiseaux, la manière de les elever, etc. Paris, Didot. 1774. 8vo.

This is a translation from the well-known Italian "Uccel liar" of Gio. Pietro Olina, 1622, in which may be found descriptions and illustrations of the mode of catching the Sparrowhawk, taking Partridges with the Goshawk, and employing the Eagle Owl for Kite-hawking. (See Italian Authors.)
179. **Bulliard (M.)**. *Avicetologie Française* ou Traité Général de toutes les ruses dont on peut se servir pour prendre les Oiseaux. Avec figures. Paris, 1778. sm. 8vo.

Contains some useful suggestions for capturing hawks.

180. **Changran (M. de)**. *Manuel du Chasseur* ou Traité Portatif de Vénerie et de Fauconnerie, etc. Précédé d'un Calendrier perpétuel et suivi d'un Dictionnaire des termes de chasse, etc. Paris, Sangrain et Lamy. 1780. 12mo.

This little manual, now of some rarity, has a history. It was originally published in Paris, in 1773, in 12mo, with the title *Almanach du Chasseur*, but without the author's name. The bookseller Royet, having secured some copies, erased the date and substituted his own name and address, which caused it to be subsequently quoted in catalogues as an "édition sans date." He suppressed also the two leaves of "approbation" and "privilège" containing the date and author's name, but omitted to suppress (or reprint) page 207, on which the date occurs! Another Paris bookseller (Lamy), having acquired the remainder, made a new book of it, with the title *Manuel du Chasseur*, printing a new title-page, with the author's name and that of his own firm, but suppressing the "avertissement" and "privilège." To falconers at the present day it is more curious than useful.

This work, first published in 4to, Paris, 1753, appeared in
2 vols. 8vo in 1759, a 3rd vol., containing the "Mémoires historiques sur la chasse," being subsequently issued in 1781. It is in this third volume that we find some interesting historical notices of Falconry, and an extract from the poem on Hawking by Gace de la Bigne (No. 143).

A two volume octavo edition, edited by Charles Nodier, was published in Paris (De Longchamps), in 1829.

This treatise, illustrated with six folding plates, is restricted to an elucidation of the different modes of flight in the long-winged falcons and the short-winged hawks (les oiseaux rameurs et les oiseaux voiliers). Being communicated by the author to Mauduyt, it served the latter as a basis for his article "Fauconnerie" in his "Encyclopédie Méthodique," published in Paris the same year. From an observation by Huber (p. 44), it would seem that he had prepared a more extensive work on Falconry, which was never published.

Almost all that this author has to say on the subject of Falconry is taken from the Dictionnaire Théorique et Pratique de Chasse, the editor of which in turn compiled his remarks from Tardif, d'Arcussia, and other writers who had preceded him. In the chapter on Heron-hawking, Buchez states (p. 172) that in 1723 the Emperor Charles VI. took a heron which was found to have on one leg a ring which had been attached by Ferdinand III. in 1651. This was removed and a new one substituted, and the bird once more restored to liberty. "It must have been at least 72 years old when it was captured for the second time," unless on the first occasion some one, for a joke, attached an old ring instead of a new one.
184. **DOISY (M.)**. *Tons et manières de sonner à la Chasse* avec des fanfares . . . suivis d’un Dictionnaire à l’usage des chasseurs et contenant tous les termes, explications, et expressions relatives à la Vénerie, la Fauconnerie, etc. Paris. 1804. obl. 4to.

Contains (pp. 298–313) some details on Falconry, and a glossary of technical terms employed by falconers.

Baron de Noirmont cites an edition of 1804 (Preface to Boissoudan, *Mélanges Soc. Bibl. Français*, 1866), but the author protests (*Avant-propos, 1810*) that this was printed without his consent.

The illustrations show the old form of the hood, perch, block, and other accessories used by French falconers at the end of the last and commencement of the present century.

A folio edition, not mentioned by Brunet, is in the possession of the writer.

Not seen. Probably one of those quaint compositions, like the *Débat des deux Dames* of Crétin (No. 144), or that in the *Livre du Roy Modus* (No. 138), so fashionable in former days, wherein the champions of Hawking and Hunting vied with each other in singing the praises of their respective sports.
188. **BAUDRILLART (J. J.).** **Traité Général des Eaux et Forêts, Chasses et Pêches.** Paris, Bertrand. 1821–24. 3 vols. 4to.

3e partie: "Dictionnaire des Chasses," contenant l'histoire de la Chasse chez différents nations; le précis des ouvrages anciens et modernes qui en ont traité; la description des animaux qui font l'objet de la grande et de la petite chasse, etc. Paris, Bertrand, 1834, 4to. La partie bibliographique revue par de Quingery ait été prise en grande partie dans Lallemant (No. 17).

189. **CUISIN (M. V. P.).** **L'École du Chasseur** suivie d'un Traité de Oisellerie, la Pêche, et les nouveaux Fusils, etc. . . . Manuel aussi instructif qu'amusant, . . . . offrant à la fois un ABRÉGÉ DE FAUCONNERIE, un Code de Vénerie, et . . . . ruses du Chasseur, etc. Paris. 1822. 12mo.

A small volume of some rarity, though a compilation of little merit.

190. **GRANDJEAN (J. J.).** **Secrets de la Chasse aux Oiseaux par M. G. [Grandjean].** Paris. 1826. 12mo.

Scarce: not seen. Cited by Souhart. Another edition with altered title, thus:

**Secrets anciens et modernes de la Chasse aux Oiseaux par J. J. G. amateur.** Paris. 1838. 16mo.

191. **HUZARD (Jean Baptiste).** **Notes Bibliographiques, concernant les œuvres du Duc de Nardo (Bélisaire Aquaviva) sur la Vénerie et la Fauconnerie.** Paris. 1835. 8vo.

Brochure de 16 pp. seulement, mais fort intéressant.
192. ANON. La Chasse au Faucon, manuscrit du xviᵉ siècle, publié dans le Feuilleton du "Journal de Paris" de 26 Juillet 1838.

Cited by Schlegel (No. 194).

I have long inquired in vain for this. M. P. A. Pichot, who, after much trouble, has lately discovered in Paris a copy in the Library of the Senate at the Luxembourg, has been good enough to send me the following note:—

"Cet article du 'Journal de Paris' est sans aucune espèce d'importance, et il est étonnant qu'il soit cité par Schlegel. Le soi-disant Manuscrit me paraît apocryphe; on ne cite ni sa provenance, ni son auteur; l'article lui même n'est pas signé. . . . S'il y a vraiment en un Manuscrit du xviᵉ Siècle il a été défiguré; car plusieurs phrases ne sont pas dans le style de l'époque."

This brochure of 21 pp. had its origin at The Hague on the foundation, in 1839, of the Loo Hawking Club, described by the anonymous author as "Une société d'hommes distingués, composée de Néerlandais, d'Anglais et de Français, constituée en Hollande, afin de faire revivre la fauconnerie dans notre patrie, avec l'agrément de sa Majesté, sur les bruyères avoisinant au palais du Loo en Gueldre."

A list of the original members of this Club, twenty-seven in number, is given on the last page. Of these, the following names appear in the "Section Anglaise":—Mr. C. Stuart Wortley, the Duke of Leeds, Lord Willoughby d'Eresby, Mr. E. C. Newcome, Mr. W. Newcome, Sir Joseph Copley, Col. Dawson Damer, Mr. Evelyn Denison, and Lord Cranston. The sole representative of the "Section Française" on the formation of the Club was Baron A. d'Offémont, the Section Néerlandaise comprising seventeen members. In 1850, under the patronage of their Majesties the King and Queen of Holland, the members numbered fifty-five. For details of their sport, see Schlegel.

The finest work on Falconry which has ever been produced; not only on account of the beauty of the plates, wherein the hawks are depicted life-size and of the natural colours, but also for the general accuracy of the letterpress, which was written by the late Prof. H. Schlegel, of Leiden. Exclusive of the "Title" (which is surrounded with a series of vignettes illustrative of scenes in the life of a hawk), "Dedication" to the King of Holland (William III.), and "Avant-Propos," it contains 90 pp. of text, followed by vi. pp. devoted to a "Catalogue Raisonné des Ouvrages de Fauconnerie," one page for "Explication des Planches," and one page for "Index."

The "Catalogue Raisonné" (pp. i-vi.), although extensive as compared with previous lists of the kind, is conspicuously deficient in regard to the titles of English and French works on Falconry; not because many of these were published after Schlegel's "Traité" had appeared (which would of course have been a sufficient reason for omitting them), but because they were evidently unknown to him. Of those which he does cite, the titles are often defective, having been apparently copied "with all faults" from Hammer Purgstall and the inaccurate Kreysig.

Exclusive of the ornamented title-page above referred to, there are 16 folio plates, 2 of which are illustrative of Heron Hawking at the Loo, in 1844, with portraits of contemporary falconers; 2 others contain figures of hoods, jesses, lure, and other accessories; and the remaining 12 give life-sized coloured figures of the hawks employed by falconers, admirably drawn by Joseph Wolf and J. B. Sonderland. On the sale of Prof. Schlegel's books at Leiden after his death the present writer secured the author's own copy of this fine work, and the original water-colour drawings for the plates were purchased, partly by the Zoological Society of Amsterdam, partly by M. Pierre A. Pichot of Paris, in whose libraries they are now preserved. The work was originally published in 3 parts, between 1844 and 1853, costing 55 th. (210f., or £8 8s.), a value which it has ever since justly maintained. See note to No. 221.

Of interest to falconers on account of the treatise (vol. ii. pp. 279–326) on training the Sparrow-hawk, with a facsimile illustration, La chasse à l'épervier en 1379.

In vol. i., a section (Chasse, fol. xiii.–xxii.) is devoted to Fauconnerie, in which are some interesting historical details, with illustrations from old MSS. and engravings, eight of which are from the "Livre du Roy Modus" (No. 138).

Extrait de 5 pp. des "Annales de la Société Royale des Beaux Arts et de la Littérature de Gand."

De la Fauconnerie, pp. 188–204. "La renommée des faucons des Pays-Bas était si grande en ce temps (1595) qu'il fallait continuellement en envoyer à la cour de Madrid" [voir la lettre de Philippe II. à l'archiduc Ernest, gouverneur des Pays-Bas, p. 196]. "L'usage d'envoyer des faucons en Espagne fut observé jusqu'à la fin du dix-septième siècle. Chaque année, quatre fauconniers partaient pour Madrid avec 32 faucons,
qu'ils présentaient au grand fauconnier d'Espagne qui les offrait au roi. Comme ces faucons étaient naturellement de grand prix, et qu'ils étaient dressés avec soin, on prenait une singulièr e précaution pour empêcher que, durant le trajet, on ne leur en substituât d'autres. Le grand fauconnier des Pays-Bas coupait à chacun des oiseaux, une plume de l'aile; ces plumes étaient envoyées par lui au grand fauconnier d'Espagne, afin qu'il pût les confronter avec les faucons, à leur arrivée à la cour de Madrid. Là, les fauconniers recevaient un certificat constatant qu'ils s'étaient bien acquittés de leur mission. Jamais il n'y avait de plaintes au sujet des faucons présentés au roi d'Espagne; l'éducation de ceux-ci faisait le plus grand honneur aux fauconniers brabançons, surtout à la famille Robbrechts. Mais aussi la cour de Bruxelles n'épargnait rien pour de procurer de bons oiseaux. Chaque année, pour ainsi dire, elle en faisait chercher par ses fauconniers dans les pays du Nord, dans le Milanais, dans le royaume de Naples, en Sicile, en Grèce, et jusque dans l'île de Candie. Il n'est donc pas étonnant que la fauconnerie Belge ait joui d'une si grand célébrité dans les pays voisins. On prétent même que du temps de Louis XIII., les seigneurs Français, envoyaient leur fauconniers au Pays-Bas pour y apprendre leur art; c'était dans la Campine surtout qu'on trouvait d'habiles fauconniers" (p. 198).

Includes "La Chasse de l'Autoruche, de la Gazelle, et La Chasse au Faucon."

General Daumas published in 1855 an article in the "Bulletin de la Société d'Acclimatation" sur les Chevaux du Sahara,
in which will be found sundry observations on Falconry, as
practised by the Arabs.

200. CHENU (J. C.) et DES MURS (O.). La
FAUCONNERIE ANCIENNE ET MODERNE. Paris, Hachette.
1862. 12mo.

A pocket volume of 176 pages, illustrated with woodcuts.
Some copies are coloured. In the "Observations sur le vol des
Oiseaux" (pp. 121–149), the authors have reproduced the
greater part of Huber's work (No. 182) with reduced copies
of his illustrations. The woodcut on p. 49, which is lettered
"Faucon sur une Gazelle d'après une ancienne gravure," is copied
from the plate of a Goshawk and Gazelle, by Joseph Wolf, which
forms the frontispiece to Burton's work, published in 1852
(No. 66).

201. PICHON (Baron Jérome). Du traité de
FAUCONNERIE, composé par l'empereur Frédéric II., de
1864. 8vo.

An admirable commentary, published originally in Techener's
"Bulletin du Bibliophile." A few copies were separately printed,
of which one is in the collection of the writer.

202. BOISSOUDAN (Jacques Elie Manceau,
Seigneur de). Méthode pour dresser et faire
voler les Oyseaux pour le vol de la Perdrix. Ou
il enseigne à bien tenir les Oyseaux, etc. Par Mon-
sieur de Boissoudan. Dédie à ceux qui aiment la
Fauconnerie. [c. 1745.] à Niort, chez Robin et L.
Favre, Imprimeurs, Rue Saint Jean. 1864. 4to.

This treatise, composed by a gentleman of Poitou, about the
year 1745, was only published for the first time at the end of an
edition of "La Vénérerie," de Jacques du Fouilloux, in 1864. Two
years later it was edited by Baron Pichon, and printed, with
other rare treatises (e.g., Mouret's Chasse du Roy, 1725), in the
Mélanges de Littérature et d'Histoire, récueillis et publiés par la
Société des Bibliophiles Français.” It is there entitled “Le Fauconnier parfait: ou méthode pour dresser et faire voler les Oiseaux.” The author, having read most of the works of his predecessors relating to Hawking, and having been instructed by some of the best falconers of his day, spent seventeen years in the practice of this art before writing anything on the subject—a great recommendation. His treatise conveys a good idea of the state of Falconry in the 18th century in Poitou, where the native Goshawk was much used.

The terms vol râmé and vol à voiles, of which the distinctive characters are given pp. 73–77, are adopted from Huber, “Observations sur le vol des Oiseaux de Proie,” published at Geneva, in 4to, 1784.

The author says:—“Il y a plus de trente ans que j'ai commencé mes observations sur le vol des Oiseaux; c'est par une imitation et non par une description que je comptais en présenter les résultats.”

Not seen; probably from its size of no importance.

Amongst the chapters in this volume is one of special interest to Falconers, entitled Châtelaine de la Tessoualle et la belle Fauconnerie d'icelle (pp. 83–116), in which is given a minute description of a hawking establishment in the 15th century.

The author, who lived about 1470, thus expresses himself in
his "Prime-proupos" (Avant propos, p. 46), the only portion of
the work in which the style and orthography of the period has
been reproduced by the editor:—"Plus outre ay privémente
commerce avecques des plus grans comme avecques du plus
menu; ay veu courre plus d'ung cerf, et faict voler plus d'ung
hobereau, et somme, ay cueilly bien des fruitz a bien des
arbres de tout feuillaige."

An admirable work, full of historical research on Hunting, Hawking, Fowling, and Shooting as pursued in France from the earliest times to the Revolution.

The third volume contains (pp. 69-200) a section on Falconry, abounding with interesting historical details.

This excellent article, which contains many interesting details relating to the practice of Falconry in Europe in the 19th century, has been quoted at length by M. Magaud D'Aubusson (No. 211), and forms the basis of the following publication:—

A little volume of 48 pp. illustrated with 15 woodcuts, in which will be found many interesting details concerning the Loo Hawking Club (1840-53), the Champagne Hawking Club (1865-68), and the hawking stud of the Maharajah Duleep Singh maintained at Elveden Hall, Thetford, between the years 1856 and 1864.

209. LA CROIX (Paul). Moeurs Usages et
Costumes au Moyen Age et à l'époque de la Renaissance. Paris, Firmin Didot et Cie. 1871. 4to.

In this work already referred to under the head of the English translation (No. 76), we find a section "Chasse: Vénérerie et Fauconnerie," pp. 191–232, the portion on Falconry occupying pp. 212–232 with a dozen illustrations, eight of which are from the Livre du Roi Modus.

A beautifully printed volume with title in red and black, of which only 100 numbered copies were published, that in the writer's possession being No. 72. It contains many interesting historical details relative to falconry in the Middle Ages, with folding plates of facsimile drawings from MSS. of the 14th and 15th centuries.

A work which no student of the history of Falconry should neglect. Amongst the Pièces Justificatives at the end of the volume will be found a chronological list of the Grand Falconers of France; extracts showing the expenses attending the maintenance of hawking in France, from the Household Accounts of François I., Henri I., Charles IX., Henri IV., Louis XIII., Louis XIV., Louis XV. and Louis XVI.; the state of Falconry at the Court of France in 1785, etc. etc.

212. PHARAON (Florian). Sid Mohamed el Mangali. Traité de Vénérerie traduit de l'Arabe par

A most interesting treatise, of which the Arabic as well as the French text is given. A review of it will be found in Harting, No. 79, pp. 362-370. It contains a description of the Syrian method of taming and training hawks. The Saker is particularly mentioned as a bird of double passage, and several varieties are noticed. There is a chapter on the first man who ever tamed the Saker, and another on the mode of taking the Ostrich with Sakers. Other Eastern falcons are described, with remarks on their qualifications and peculiarities. Some useful advice, evidently derived from experience, is given in regard to the feeding of Hawks, and the management of them on a journey.

An admirably printed memoir of 128 pp. with title in red and black, of which only 100 separate copies were issued. It was originally published in the "Mémoires de la Société Eduenne" (n.s. tom. ix.), and conveys a good idea of the vast territorial possessions of the former Dukes of Burgundy, and of the splendour of the hunting and hawking establishments maintained in France during the 14th and 15th centuries. A folding map shows the forests of this ducal domain, and indicates, in addition, the keepers' lodges and the "meets."

The pages relating to Falconry (pp. 195-224) include explanations of the technical terms relating to the art, synonyms in
German, Spanish, and Italian, and occasionally derivations, e.g.,
"on l'appelle créance parce qu'on rameine l'oiseau à croire et à
obéir au leurre" (D'Arcy, Dict. François-Flaman, 1699).

215. SOUHART (R.). Bibliographie générale

A most useful work of reference, but very incomplete as regards
Falconry, and especially the English, Spanish, and Italian litera-
ture of the subject.

216. SOURBETS (Georges). La Chasse au Vol
avec les petites espèces. Notions pratiques de Fauconnerie dédiées aux débutants. Niort. 1885. 4to.

In this brochure the author claims to have set down all neces-
sary and sufficient instruction for taming and training the
Merlin, Hobby, Kestrel (if wanted), and Sparrow-hawk. In
carrying out these instructions, he says, the reader "may attain,
unaided and with very little expense, the most practical and
conclusive results, and thereby encourage the taste for a sport
formerly held in high esteem by our ancestors, and one of which
to the present day in Europe the English alone have preserved
the rules and practice." With this pretty compliment, which it
is to be hoped may not be lost upon those for whom it is intended,
he proceeds to summarise the results of his own experience in
what may be termed an "elementary course," which has since
been followed by a more comprehensive treatise, written by
the same author in conjunction with M. de Saint Marc.

217. SOURBETS (G.) et SAINT MARC (C. de).
Précis de Fauconnerie : contenant les indications
nécessaires pour affaiter et gouverner les principaux
Oiseaux de Vol : suivi de l'éducation du Cormoran.
Ouvrage orné de planches hors texte. Niort, 1887.
8vo.

In this joint work, which is illustrated with woodcuts, we find,
embodied, in ten chapters and less than a hundred and fifty pages,
a neat summary of nearly all that is necessary to be known in order to tame, train, and fly a hawk successfully, whether "long winged" or "short winged," a "bird of the lure" or a "bird of the fist." The distinguishing characters are pointed out of the Peregrine, Merlin, Hobby, Kestrel, Goshawk, and Sparrow-hawk, and the authors indicate the different kinds of "quarry" at which each may be flown with success. The Lanner and Saker (so well known in the East) are passed over as being seldom procurable in France, and requiring treatment not very dissimilar to that of other long-winged hawks. The eagle, notwithstanding its present employment in Russia and Tartary for taking hares and foxes, is condemned as being too heavy to carry with comfort, and difficult to manage on account of its great power of fasting.

The instructions given for bringing up young hawks from the nest are clear and to the point; but the advice given as regards the management of "passage hawks" is at variance with the practice adopted by English falconers, and by the Dutch hawk-catchers by whom they are procured. The chapter on "Hygiene and General Management" contains some useful hints founded evidently upon experience, and the advice given in regard to the treatment of hawks while moulting is good and to the point. In most of the old works on falconry page after page is occupied with recipes for the cure of diseases, real or imaginary, most of them very quaint, and many of them, probably, highly dangerous. These fanciful directions are never followed by modern falconers, who do not recognise a tithe of the maladies enumerated by ancient authors, and who know, moreover, how to cure the few ailments to which hawks are undoubtedly liable in a much more simple and efficacious manner. It is to these only that allusion is made in the present volume. One more feature in the book ought not to pass unnoticed—namely, the extracts which are given from letters addressed to the authors by several English and French falconers, and which contain some useful advice and information.

218. FOYE (G.). Manuel Pratique du Fauconnier du XIXe Siecle. Contenant tout ce qu'il faut savoir pour dresser les Faucons et Autours à la chasse au vol des Perdreaux, Faisans, Canards, Lièvres,
Lapins, etc. Par G. Foye. Illustrations par Albert Bettanier. Paris. 1886. sm. 4to.

In the manual of M. Foye we have another modern aid to the practice of falconry. It is dedicated to the Comte de Paris, and the introduction contains all the names known to the author of living French falconers. Some of the extracts which are given from the old masters might well have been omitted, especially those having reference to hawks which are no longer used in any part of France or England, and which it would be almost impossible to procure. Modern descriptions, too, of the species now in vogue would be preferable to old ones, as being more intelligible. But, apart from these objections, it is evident that M. Foye can claim to write authoritatively on the management of hawks, since the advice which he gives is based not only on what he has read, but on what he has learned by experience. This has been gained chiefly with the Goshawk and Sparrow-hawk, and his instructions for training these birds will, therefore, be useful to those desirous of taking up this branch of the sport. With a female Goshawk which he trained, he killed during the first season (1884) 322 rabbits, three hares, and two magpies; and the following season 280 rabbits, two leverets, eleven partridges, four magpies, and two squirrels.

In this country we use the term falconry in a somewhat wider sense than is the case in France, including thereby every kind of flight with a hawk, whatever may be its species. French falconers apply the term fauconnerie only to flights with the long-winged hawks (Peregrine, Merlin, Hobby, and Jerfalcon), flights with the short-winged Goshawk (autour) and Sparrow-hawk (épervier) coming under the expressive and very convenient term autoursérie. To this branch of sport M. Belvallette has devoted an entire volume, albeit a small one, nicely printed, and illustrated with a dozen full-page plates and some pretty text cuts, which, if not always original (we recognise the work of both English and Japanese artists), are appropriate and fairly accurate. M. Belvallette is well known in France as a skilful falconer, and
he writes with a thorough knowledge of his subject. On this account his little book commends itself at once as being thoroughly practical.

Dealing solely with the management of the Goshawk and Sparrow-hawk, this treatise possesses the novelty of being illustrated with Japanese figures reproduced from the *Ehon taka kagami* (which see, under Japanese authors).

The appearance of so many French books on Hawking within the last decade augurs well for the maintenance of this time-honoured sport.

In this the latest French publication on the subject, we have an illustrated Catalogue of the contents of the Falconry Court at the Paris Exhibition, 1889, including several portraits of Falconers from photographs or old pictures, representations of the sport from Blaine's "Rural Sports" (No. 63), and figures of two eagles trained for hawking, namely (1) a Golden Eagle, belonging to M. Paul Gervais of Rosoy, par Acy-en-Multien, brought from Turkestan by M. Benoit Maichin, and trained to kill hares and foxes, and (2) a Bonelli's Eagle, belonging to M. Edmond Barrachin of Ermont par Harblay, procured with another in Spain, and trained to kill rabbits.

Two of the most useful plates are the outline illustrations on pp. 21, 22, forming a key to the portraits contained in the large folio plates of Heron-hawking in Schlegel's fine work (No. 194).

The lecture on Ancient and Modern Falconry (pp. 49-92) contains much information that will repay perusal.
The author of this poem was a troubadour, a native of Prades near Rodez (Aveyron), who, according to Raynouard (Choix des Poésies originales des Troubadours, 1816–1821, tom. v. 1820, p. 126), was a man of talent and natural good sense, and knew a great deal about Hawks. *E si soup moult la natura dels Auzels prendedors.*

From his poem we may learn how to know a good Goshawk—
*Cossi den hom conoiser auctor sa*; and a good Sparrow-hawk—
*Cossi den hom conoiser espaviet de bonas faissos.* Other verses treat of *De cantas maneiras so'l falò.* . . . *Esmerillos e de lurs conoissensas.* . . . *Cals hom deu tener auzel.* . . . *Cant au-zel a febre* (quand l'oiseau a fièvre), etc.

Under the heading *D'esperimens d'auzels* we find reference to some which the author says were set forth in a book written by Henry I. King of England, who loved hawks and hounds better than any one:

> "En un libre del rei Enric
> D'Angleterra, lo pros el ric
> Que amet plus auzels e cis
> Que non fes auc nuill crestiàs
> Trobei d'asautz esperimens. . . ."*

Of the book here referred to no MS. is known to exist, although Deudes de Prades must have seen a copy not long after the death of the royal author.

Baron de Noirmont observes (Hist. de la Chasse en France, iii. p. 90): "On trouve dans ce poème des traces manifestes de l’œuvre du faux Symmachus, probablement antérieur à Vincent de Beauvais (contemporain d’Albert) et Brunetto Latini (le célèbre grammarien Florentin du 13ème siècle) et notre plus ancien traité de fauçonnerie en langue vulgaire."
See also Galvani, Osservazioni sulla Poesia de Trovate, 8vo, Modena, 1829, and an article by M. G. Azais in vol. viii. of the Journal des Chasseurs.

Catalan.

223. SYMMACHUS (Aquila) et THEODOTIO
Epistola Aquilæ Symmachì et Theodotionis ad Ptolemæum regem Ægypti De Re Accipitraria, Catalanica lingua. Lutetiae. 1612. 4to.

This apocryphal letter, said to have been addressed to a certain Ptolemy King of Egypt by Aquila Symmachus and Theodotio, is cited by Albertus Magnus in his treatise de Falconibus, 1478. The original Latin MS. has been lost, and the treatise is now only known through the version in linguë Catalanica printed by Rigault in his Rei Accipitrariae Scriptores pp. 183–200, and the Excerpta ex libro incerti auctoris de naturâ rerum, printed in the same collection (pp. 201–211). It has been characterised by Baron de Noirmont (op. cit.) as "le plus ancien traité de fauconnerie en langue vulgaire," and treats of the different kinds of hawks used by falconers, the diseases to which they are subject, and the remedies recommended for them.

It commences: —"Assi comensa lo libre dell nudriment he de la cura dels ocels los quals sepetaye ha cassa. . . . Gran Emperador & Senyor tu as manat à nos servidors teus fer obra brev & profitable dels ocels dels libre dels antics translatant ab diligencia. Et nos obediens à la tua volentat ajustatz ensems atorgan brevmēt la tua demanda. E volen la tua altea saber que diverses son les maneres dels ocels d'cassa, & diverses son lurs malauties he moltes, per asso lurs son necessaries les medicines."

Under the heading Del nudriment dell Sperver—i.e., the Sparrow-hawk—is the following curious observation (p. 186), which I have not found noticed by any other writer on
SPANISH.

If Falconry:—"Esperver pres del niu, si al matin es pris lexal endurar tro almidia, mas si es pres la nuyt, endrire tro ala tercia dell seguen jorn."

These extracts will serve to convey an idea of the language in which this treatise is written—a curious mixture of French and Spanish. The longest chapter, "De les malaties he de les medecines des ocels specialment de Falcon" (pp. 190-196), contains several of the quaint recipes which characterise so many of the old works on Falconry in different languages.

Spanish.

This code of regulations relating to the chase was promulgated in 1180 by Sancho VI., the wise King of Navarre. Written upon parchment, it has ever since been preserved amongst the archives of the ancient city of Pamplona, where, after the lapse of 700 years, it has, through the labours of M. Castillon, been carefully transcribed and printed.

With the exception of the English Forest Laws of King Canute (1017-1036), it is believed to be the oldest as well as the most complete code of the kind in existence.

According to M. Castillon, the earliest document of this character in France is dated 1321, or nearly a century and a half later than that of King Sancho. Le Livre des déduicts de chasse de Gaston Phébus, Comte de Foix, et Vicomte de Béarn, was composed some years before the Ordonnance of 1396 which formed the foundation of all French legislation on the subject, and it is curious to note the close resemblance which the work of the French noble bears to that of his Spanish
predecessor, not only in several parallel passages, but in the use of many words evidently of Spanish origin. This is probably to be explained by the fact that, having espoused the sister of Carlos II., King of Navarre, whose territory adjoined his own, he was doubtless often at the castle of Pamplona, where the MS. of the Paramientos of King Sancho was deposited, and where he would, therefore, have opportunity of consulting it.

Furnishing, as it does, an important chapter in the history of the chace in Spain, this code is of considerable interest. After dealing with certain preliminaries, and the religious ceremony which always preceded a royal hunting, the Paramientos, or Regulations, relate to the weapons to be used in the chace, the costumes to be worn, the distinction between large and small game, the formation of packs of hounds, the order of procedure on a hunting day, and the ceremonies and fêtes which brought it to a close. Besides this, there are several sections which relate to hawking. From these it appears that the hawks used in Navarre at this period (1180) were the Falcon, the Goshawk (Astor), and the Sparrow-hawk (Gavilan). They were taken young from the nest, and reared in the hawk-house (halconera), fed upon meal-paste (harina de trigo) mixed with the flesh of birds (av), such as pigeons, partridges, or water-hens (gallinas agua), cut up small; less paste being given as the hawk grew older, until at length it was strong enough to be fed twice a day on beef or mutton. When a month old, the training commenced, and for this directions are given. It is to be remarked that (contrary to modern practice) the old Spanish falconers, by slowly drawing the lure towards them when seized by their hawks, and calling them with a whistle (chiflo), gradually taught them to retrieve the quarry before breaking in to it. The Goshawk (Astor) is stated to be more easily trained than a Falcon, from which observation M. Castillon erroneously draws the conclusion that the hawk called Astor must have been a Merlin, the Spanish name for which is Esmerajon. (See p. 127.)

The detention, or theft, of a trained hawk was punishable by fine, which was greater for a Goshawk than for a Falcon, and heavier still if the hawk had moulted. Of this fine half went to the king, the other half to the owner or the informer.

Until the end of the 17th century Falcons were annually imported into Spain from the Netherlands. See note to Galesloot (No. 198).
225. **EL REY DANCUS. LIBRE DELS FALCÓES.** MS. del siglo xiv.

Although the present bibliography is designed to include only such works relating to Falconry as have been printed, it is of interest to note in connection with the celebrated *Livre du Roi Dancus* (No. 139) that there exists in the collection of Sr. D. José Lopez de Ayala a MS. translation in Spanish referable to the fourteenth century. It is described by Señores De Uhagon and De Leguina in their "Estudios Bibliográficos: La Caza," p. 22 (1888).

See also the Italian edition by Zambrini (No. 296).

226. **JUAN MANUEL (El Principe Don). LIBRO DE LA CAZA del Príncipe Don Juan Manuel Fijo del Muy Noble Infante Don Manuel Adelantado Mayor de la Frontera et del Reino de Murcia, que fabla de las naturas de las FALCONES: de commo se deben conocer por talle, et por faciones, et por plumage, et por empenolamamiento: de commo se deben amansar et criar, et facer sennaleros, garceros, etc., de las purgas et las melecinas: de qué cazas há et qué logares, etc. [1325.] Madrid. 1879. sm. 8vo.

Edited by Don José Gutierrez de la Vega, "con un discurso y notas," in vol. iii. of the "Biblioteca Venatoria—coleccion de Obras clásicas Españolas de Monteria, de Cetrería, y de Caza menor, raras, ineditas, o desconocidas."

According to Don José Gutierrez this is the earliest treatise on the subject written in pure Castillian, and was composed before the *Libro de la Montería*, by the same author, the date of which is conjectured to be between 1342 and 1350. In the opinion of Amador de los Ríos, whom he cites (tom. iv. p. 237), the present work was written during the reign of Ferdinand IV., or the minority of Alfonso XI. Further on (tom. cit. p. 248) the same writer adds that without doubt it was composed before 1325, in which year the last King of Castille ascended the throne. Herr Baist, in his German edition of this work,
(No. 129), puts the date of its composition at 1325 (op. cit. p. 154).

Apart from its antiquity the Libro de la Caza is to be commended for its intrinsic merit, and for the literary beauty of the author's style. Don José Gutierrez thus writes in glowing terms of it:—"Pues bien el Libro de la Caza, conservando la forma didáctica en que tanto sobresalió el docto magnate, brilla por su estilo oriental tan del gusto de los escritores de la Edad Media. Sus cuentos y sus descripciones son verdaderamente admirables: su lenguaje es culto y pintoresco . . . Por eso en el Libro de la Caza se ve al escritor castizo, se lee el narrador florido, y se refleja el venador entusiasta, que parece inspirarse en la sublime majestad del monte, en el dedicado perfume de las flores, y en el dulcísimo canto de las aves" (Discurso sobre los Libros de Cetrería, pp. xxix.–xxx.).

Divided into twelve chapters, the work is composed upon a plan which many subsequent writers on Falconry have adopted. The nature of falcons is first discussed, with a notice of the various species trained for hawking. We are then instructed how to know a good hawk by its size, shape, plumage, etc. (cap. iii.), how to tame those which are caught wild, and how to bring up those which are taken from the nest (cap. iv.), how to tame a heron-hawk (cap. vi.), how to moult hawks (cap. ix.), to give them their first meal of the day (cap. x.), and to remedy the maladies to which they are subject (cap xi.), while the last chapter describes the different sorts of flights, and the best localities for the sport. This is a most interesting chapter. The district of Chincella, within the Bishopric of Cartagena, is said to abound in lakes and wild-fowl, and Villena the best place in the whole of Murcia for every sort of flight; herons, ducks, and cranes, with falcons, and (with goshawks) partridges, and quails, and other birds called flamingoes (flamenques), which are beautiful birds and very good for hawking, though very hard to get out of the water (fermosas aves et muy ligeras para cazar, sinon porque son muy graves de sacar del agua). From this chapter one is enabled to form a good idea of the sport enjoyed by Spanish falconers during the early part of the fourteenth century.

For some account of the life and works of Don Juan Manuel, see the French translation of "El Conte Lucanor," by Adolphe

227. **JUAN MANUEL (El Principe Don). EL LIBRO DE LA CAZA. Zum Erstenmale herausgegeben von G. Baist. Halle, Niemeyer. 1880. 8vo.**

Three preliminary leaves of Dedication, Preface, and Contents, and 208 pp. Highly praised by Don Enrique de Leguina, who writes:—"Preciosa publicacion esmerada y concienzudamente hecha por el Señor Baist, con glosas, comentos, etc., que denotan el profundo estudio que dicho señor hizo de tan precioso codice" (*Estudios Bibliograficos—La Caza, p. 41*).

A copy of this work having been secured after the sheets containing the German titles had gone to press (see No. 129) an analysis of it may be given here:—Vorwort, pp. v.—vi.; Inhaltsverzeichnis, p. vii.; El Libro de la Caza, pp. 1—89; Ammerkungen zum Libro de la Caza, p. 90; Wortregister, p. 107; Personennamen, p. 117; Ortsnamen, pp. 119—127; Beilage I., zur Chronologie der Schriften D. Juan Manuels, p. 128; Beilage II., zur Textkritik, p. 156; Errata und Addenda, pp. 207—208.

In transcribing from the MS., the editor has in several places misread a word; e.g., at p. 118 he mentions names bestowed upon hawks by their owners, such as Perlado, Real, etc., and amongst them he includes Langerote. This is probably a misprint for Tagarote which is not the name but the kind of hawk used (p. 42, l. 10). So alianero is not a species of hawk, but what English falconers would call a "high flier," or "waiter on." The text throughout would have been clearer had the editor employed capitals for all proper names (e.g., p. 42, ll. 14—17).

The publisher's name is Niemeyer, not Niedermeyer as inadvertently printed in No. 129.

This treatise, by the famous Cavalier who wrote the Chronica de Don Pedro I. was extremely popular in its time; and a good many MS. copies of it have been found to exist. Don Enrique de Leguina cites no less than a dozen, dating from the fifteenth, sixteenth, seventeenth, and eighteenth centuries, and preserved in various libraries in Spain.

It is a much longer composition than that of the Prince Juan Manuel, which preceded it by sixty years, comprising forty-seven chapters instead of twelve; a separate chapter being devoted to each kind of hawk, and to each ailment (and the remedy for it) to which it was supposed to be subject. One of the most curious is chapter xlvi.: De como se deben enjerir las penolas quebradas,—How to repair broken flight feathers—showing that the operation known to English falconers as “imping” (French enter) is by no means a modern invention.

It is strange that so important a work as this should not have been earlier printed. It was composed in Portugal during the captivity of the author in the Castle of Oviedes after the battle of Aljubarrota, at which he was taken prisoner. This explains the ending:—“Aquí se acaba [here ends] el Libro de la Caza de las Aves, que hizo Pero Lopez de Ayala en el castillo de Oviedes en Portogal, en el mes de Junio, año del Señor de Mill et trecentios, et ochenta y seis años [1386] era de César de Mccccxxxiv años.”

Edited by Don José Gutierrez de la Vega, “con un discorso y notas,” in vol. iii. of the “Biblioteca Venatoria—coleccion
de Obras clásicas Españolas de Montería, de Cetrería, y de Caza menor, raras, ineditas, ó desconocidas."

*Cetrería*, the Spanish word for hawking, it will be observed, is cognate with the Latin *accipitraria*. Don Pascual de Gayangos supplies the following note on this point in his “Introduccion al ‘Libro de las Aves’” (No. 228), p. viii.:—“La Cetrería, ó caza con azores, de *accipiter* que en Latin significa ‘ave de rapina,’ y *accipitraria* que es el arte de cazar con dichas aves, se formaria la palabra *aceptreria ó cetreria* á que otros asignan diferente origen.”

230. **SANT-FAHAGUN (Juan de).** *Libro de las Aves que cazan.* Con las glossas de D. Beltrán de la Cueva, Duque de Alburquerque.

Cited as a MS. by Hammer Purgstall (No. 112), but since published in the *Ilustración Venatoria*, 1885.

The original MS. of this treatise has apparently been lost, but a neat and perfect copy of it, executed in the fifteenth century, is preserved at Madrid in the Biblioteca Nacional, and is regarded as one of the most important works in the Spanish literature of the chase. Don José Gutierrez de la Vega commenced its publication in the second number of the *Ilustración Venatoria*, 1885 (January 30), and in a recently published criticism of the “Libros de Cetrería del Canciller Pero Lopez de Ayala, de Juan de Sant-Fahagun, y de Don Fadrique de Zuniga y Sotomayor” (29 pp. 8vo, Madrid, 1889), Don Francisco R. de Uhagon has shown, by a comparison of a portion of the two texts in parallel columns, that the work of Sant-Fahagun is in a great measure founded upon, if not actually borrowed from, that of Pero Lopez de Ayala. He thus compares the two (op. cit. p. 9):—

“Divide Sant-Fahagun su obra en tres libros: en el primero trata de los plumajes de las aves, y da reglas para amaestrarlas; en el segundo y tercero parte de las entermedades; y en el tercero también, de las medicinas para ser curadas. Ayala trata en su obra: de la caza de las Aves y de sus plumajes; después, de sus dolencias, y por fin, de los medicamentos. La analogía no puede ser mayor.”

So much similarity is there between these two works that it is
a disputed question to which of them the *Glosas del Duque de Alburquerque* have reference (cf. Bibl. Venatoria, iii. pp. xlvii. et seq.).

Besides the MS. above referred to, other copies (Nos. 90, 91) are cited by D. Gutierrez de la Vega in his *Biblioteca Venatoria* wherein the author’s name appears as “Sahagun,” and “Sant-Fagun,” Señor Gayangos adopts the spelling “Johan de Sant-Fagund” (op. cit. vol. iii. p. xlviii.).

231. **EVANGELISTA. LIBRO DE CETRERIA DE EVANGELISTA [15th cent.] y una profecia del mismo con prólogo, variantes, notas, y glosario, por D. Antonio Paz y Melia. Halle. 1877. 8vo.**

Printed in the *Zeitschrift für Romanische Philologie*, herausgegeben von Dr. Gustav Gröber, Band i. pp. 222–246 (1877), from a MS. in the Imperial Library at Vienna. A few copies separately printed.

The editor of this MS. compares passages in parallel columns with extracts from Sant Fahagund, and concludes as follows:—“Examinando atentamente los tratados de Cetrería conocidos en la época en que se escribió el nuestro, nos hemos convencido de que el que Evangelista parodió fue el que Johan de Sant Fahagund, cazador de Don Juan II. presentó a Enrique IV. en cuyo reinado como luego veremos, se escribió también la parodia. En prueba de nuestra afirmación citaremos algunas notables concordancias que esperamos convencerán al lector” (p. 224).

Some account of this same MS., with extracts, is given by Sr. Adolfo Mustafia in a paper “Über eine Spanische handschrift der Wiener Hofbibliothek.” Wien. 1867. There is also a MS. (of the fifteenth century) in the National Library at Madrid commencing thus:—“Libro de Cetrería que hizo Evangelista corriendo fortuna por al golfo de Leon. A Dios misericordioso por no estar ocioso: y trata de los Aves de rapiña, de los talles, y plumajes, y proprietades de cada una: y de los gobiernos y curas para sus dolencias, como adelante oírás.”

A third MS. of the sixteenth century is preserved also at Madrid in the Royal Library (Biblioteca particular de S. M. el Rey). This begins:—Este libro de Cetrería fizo Evangelista
camino de Rodas sobre la mar por no estar ocioso y no pensar en los peligros de la mar, trata de los Aves de rapina, de los talles, y plumajes, y proprietades: y de los guobiernos y curas de sus dolencias de cada una, como adelante vereis: y acabado lo envió al Prior de San Juan D. Alvaro de Zuñiga, su Senor decia ansi.

This treatise is referred to by Señor Don Pascual de Gayangos, in his "Introduccion" to the "Libro de las Aves de Caça" of Lopez de Ayala (No. 228), as being in the "Biblioteca de la Real Academia de la Historia," and also in the Biblioteca Nacional Madrid; but it is not quite clear from his remarks whether its is printed or in MS. only.

"Un volumen, letra gotica a dos columnas, muchos grabados. Trata de la Perdiz, Paloma, Azor, Halcon, Cavilan, y otros animales cazadores."—De Uhagon y de Leguina, p. 9.

Another edition was printed at Toledo, 1529. (See note to No. 13, anteà, p. 12.)

234. PETRARCA (Francisco). De los remedios contra prospera y adversa fortuna. Valladolid. 1510.

Other editions, Seville, 1513 and 1516; Saragossa, 1518 and 1523; Seville, 1524; and Salamanca, 1533.

This book may be included in the present catalogue on account of Dialogo xxxii., de la Caza de las Aves y Perros.

235. NUÑEZ DE AVENDANO (Pero). Aviso de Caçadores y de Caça. Ordenado por el magnifico
e muy insigne doctor. Pero Nuñez de Avendaño: letrado del Illustissimo señor Don Ynigo Lopez de Mendoça tercero deste nombre: Duque del Ynfantado. Dirigido a su Illustissima Señoria. [al fin] Impreso en la muy noble villa y floretissima Universidad de Alcalá de Henares en casa de Juan de Brocar año 1543. 4to.

In black-letter, title below coat of arms, "Prologo," 3 prelim. leaves, and 40 pp. with side-notes in Latin.

Another edition, "con nuevas adiciones, y con privilegio, en Madrid en casa de Pedro Madrigal, 1593," folio. Both editions are very rare.

This is a general treatise on the laws of Spain relating to hunting and hawking in the sixteenth century. From it we learn (amongst other things) that the clergy, secular and regular, were forbidden to hunt or hawk, or to keep dogs or falcons, as causing too much distraction from their religious duties:—"Los religiosos no pueden yr a caça, ni pueden tener perros: ni aves para caçar," etc., fol. xxvii. "Los clerigos sacerdotes no pueden usar de caça clamorosa dado se mucho a tal exercicio," etc., fol. xxvii. verso. It would seem, however, that they were not prohibited from writing on field sports; see the treatise by Alfonso Tostado de Madrigal, Bishop of Avila, published in 1611 (No. 243).

Concluding with an Epistola Commendatoria (fol. xxxviii.--xxxix.), the present work ends on the last folio (unpaged): "Impso en la muy noble villa y floretissima Universidad de Alcalá de Henares en casa de Juan de Brocar, a xviii. días del mes de Deziembre del año 1543."

Cited by Señor Don Pascual de Gayangos (l.c.) as being preserved in the original MS. in the Biblioteca Nacional, Madrid. He describes it as being divided into five books, or treatises, of which the first four relate entirely to hawking with the Gos-hawk and Sparrow-hawk (azor y gavilan), and the last to hunting.
It is dedicated to Prince Carlos, son of Philip II., at that time only eleven years of age, whose sudden mysterious death caused so much consternation and comment.

237. **CARLOS I. LAS PREGMÁTICAS Y CAPITULOS**

that su Magestad del Emperador y Rey hizo en las Cortes que se tuuieron con el serenisimo Principe D. Philipee en nuestro nombre. Año de mil y quinientos quarenta y ocho en Salamanca, en casa de Juan de Canova. 1564. folio.

"Contiene una peticion sobre les gallinas que han de tomar los cazadores para las aves de caza."—Uhagon y Leguina, op. cit. p. 12.

238. **ZUNIGA y SOTOMAYOR (Fadrique). LIBRO DE CETRERIA DE CAÇA DE AçOR . . . y arte que se ha de tener en el conocimiento y caça destas Aves y sus curas y remedios, en el qual assi mesmo habla algunas cosas de HALCONES y de todas Aves de rapiña, etc. En Salamanca, en casa de Juan de Canova. 1565. 4to.**

This treatise of Zuniga (or Çuniga) 6 prelim. leaves and 126 pp. is perhaps the rarest of all Spanish books which relate exclusively to Falconry, although in regard to date of composition, as above shown, it is not the oldest. The MS. is preserved in the Biblioteca Nacional, Madrid. It is referred to by Schneider, in his edition of the work of the Emperor Frederick II., *De arte venandi cum avibus* (vol. ii. p. 107), as being quoted in the Introduction to the *Oryctographia et Zoologia Aragonica*, 1784, p. 70, and is of interest as giving the Spanish names derived from the Arabs for different kinds of hawks—e.g., *Alfaneque, Borni, Bahari, Sacre, Azor* (Latin *Astur*, the Goshawk), etc. The Kestrel he calls *Cernicalo*; the Sparrow-hawk, *Esparvel*, the ordinary name for any kind of hawk being *Gavilan*, or *Alcon*. On this subject some useful and interesting information will be found in the work of MM. Dozy & Engelmann,

239. ANON. LIBRO DE CETRERIA Y CAZA DE AVES.

A treatise by an unnamed author cited by Hammer Purgstall (No. 112) and Schlegel (No. 194), neither of whom gives the date or place of publication. Probably the work referred to is that of Zuñiga y Sotomayor (No. 238).

240. MIRABEL (Federigo Marques de). LIBRO DE CETRERIA de Caza de Azor, de halcones y de todas aves de rapina. [1565 ?]

This treatise, though not mentioned in the latest Spanish bibliography by Don Enrique de Leguina, 1888, is cited by Ersch und Gruber, in their Allgemeine Encyklopaedie der Wissenschaften und Künste (4to, Leipzig, 1841), in the account given of Peñaranda de Duero, part of the Spanish province of Segovia (sect. iii. theil 15, p. 395). Reference is here made to "Franz von Zuñiga, Herr auf Mirabel, oftwarts von Goria und Brantevilla, erheirathete Alconchel mit Maria Manuel de Sotomayor, und wirde der Vater Friedrichs, des Marques von Mirabel durch creation Kaiser Karl's V., Freidrich schrieb 'Libro de Cetreria, de Caza de Azor, de halcones y de todas aves de rapina'" (p. 395).

Doubtless the "Libro" here referred to was that of Zuñiga y Sotomayor, who was "Señor de las villas de Alconchel, Cahinos, Mirabel, y Aras": cf. Don Pascual de Gayangos' "Introduccion al 'Libro de la Caza de Aves'" (No. 228), p. xxiv.

241. PALMYRENO (Lorenzo). VOCABULARIO DEL HUMANISTA, compuesto por Lorenzo Palmreno [sic] donde se trata de Aves, Peces, Quadrupedos, con sus vocablos de caçar y pescar, etc. Valentiae, ex typographia Petri a Huete, in Platea Herbaria. 1569. 12mo.

This rare little book is in two parts, the first unpaged; the second (pp. 1–128) contains a Primer Abecedario de las Aves, in which the Latin and Spanish names of hawks are given.
Below the title is a rude woodcut of the Goshawk (el Açor) beneath which is the date Año MDLXVII.

The first edition of a work founded, it is said, on that of Don Juan Manuel, illustrated with woodcuts, and of extreme rarity. In 1876 a copy in Paris fetched 450f. It was reprinted in 8vo, Madrid, 1877, in the “Bibliotheca Venatoria” edited by Don Gutierrez de la Vega, and again in 1882. Although included by Hammer Purgstall (No. 112) and Schlegel (No. 194) amongst the books on Falconry, it relates exclusively to hunting, and is only mentioned here as one of the rarest of Spanish books on the Chase, and lest, after the notices above referred to, it might be supposed to have been overlooked.

For some interesting and critical remarks on the authorship of this work, see Adolphe de Puibusque, “Le Conte Lucanor : traduit pour la première fois de l'Espagnol, et précédé d'une notice sur la vie et les œuvres de l'auteur, Don Juan Manuel.” Paris. 1854. 8vo.

243. TOSTADO DE MADRIGAL (Alonzo). Libro que trata del modo que se ha de tener en curar Halcones, Azores, y Gabilanes. Salamanca. 1611.

This treatise on Falcons, Goshawks, and Sparrow-hawks, composed by a Bishop of Avila in the early part of the seventeenth century, shows the attention which was formerly given to field sports by ecclesiastics, although by the Spanish law they were prohibited from taking an active part in them. See Nuñez de Avendaño (No. 235). The MS. preserved in the National
Library, Madrid, has not been printed in full, but some account of it will be found in "La vida y hechos del M. P. Alonzo Tostado de Madrigal," by Gil Gonzales Davila, "Historia del Colegio Viejo de San Bartolomé de Salamanca," 1611 (p. 123).

It is to be hoped that some Spanish editor may be found to undertake its entire transcription and publication.

244. CALDERON (Don Pedro, de la Barca).  EL MAYOR ENCANTO AMOR. Madrid. 1641: 4to.

No account of the Spanish literature relating to Falconry would be complete without allusion to the beautiful description of Heron Hawking which occurs in "Love the Greatest Enchantment," one of the finest compositions of Calderon.

This fiesta was represented before the King on the night of St. John, in the year 1635, at the royal palace of the Buen Retiro, and was published in the second volume of the collected Dramas of the poet by his brother Don José Calderon in 1641. It has been admirably translated into English by D. F. MacCarthy, side by side with the Spanish text (London, Longmans, 1861, sm. to) in which volume the passage referred to will be found (p. 90) in the second Act:

"Atomo ya la garza apenas era,
Cuando, desenhetrada la cimera
Que el capirote enlaza,
Mi mano un gerifalte desembraza,
A quien, porque en prision no se presuma,
La pluma le halagaba con la pluma,
Y él, como hambriento estaba,
Duro el laton del cascabel picaba.
Apenas à la luz restituidos
Se vieron otro y él, cuando atrevidos,
Cuanta estacion vacía
Palestra es de los átomos del día,
Corren los dos por páramos del viento,
Y en una y otra punta,
Este se aleja, cuando aquel se junta;
Y el bajel ceniciento
(Que bajel ceniciento entonces era
La garza, que velera
Los piélagos sulcó de otro elemento
Librarse determina diligente,
Aunque navega sola,
Hechos remos los pies, proa la frente,
La vela el ala, y el timón la cola.
¡Mísera garza, dije, combatida
De dos contrarios! bien, bien de mi vida
Imagen eres, pues sitiar la veo
De uno y otro deseo.

A uno pues, y otro embate,
Coge las alas, ó las velas bate,
Y poniendo debajo de la una
La cabeza, se deja á su fortuna
Venir á pique, cuando
Nos pareció caer revoloteando
Una encarnada estrella,
Y los dos gerifaltes siempre en ella.”

TRANSLATION.

“Scarce had the heron dwindled to a speck
On the far sky, when from about the neck
Of a gerfalcon I unloosed the band
Which held his hood; a moment on my hand
I soothed the impatient captive, his dark brown
Proud feathers smoothing with caressings down;
While he, as if his hunger did surpass
All bounds, pick'd sharply on his bells of brass.
Scarce were they back restored to light,
He and another, when in daring flight
They scaled heaven's vault, the vast void space where play
In whirling dance the mote-beams of the day,
Then down the deserts of the wind they float,
And up and down the sky
One flies away as the other swoopeth nigh;
And then the ashen-colour'd boat
(An ashen-colour'd boat it surely were,
That heron, that through shining waves of air
Furrow'd its way to fields remote)
Resolving to be free and not to fail,
Although alone it faileth now,
Of feet made oars, of curved beak a prow,
Sails of its wings, and rudder of its tail;—
Poor wretched heron, said I then, thy strife
'Gainst two opposing ills, are of my life
Too true an image; since it is to-day
Of two distinct desires the hapless prey.

'Gainst this, 'gainst that, as either doth assail,
It furl'd its wing, and droop'd its languid sail,
And placing its dazed head beneath the one,
Trust ing to fortune, like a plummet-stone
Straight down it fell, we looking, from afar
Saw it descending, an incarnate star
Through the dark sky,
With the pursuing falcons ever nigh."

245. MARTINEZ DE ESPINAR (Alonso). Arte de Ballesteria y Monteria, escrita con metodo para escusar la fatiga que ocasiona la ignorancia. Dividida en tres Libros . . . . en el tercero se declaran las calidades de las Aves, y el modo de cazarlas, con dos capitulos curiosos al fin; el uno de la caza del Perro de muestra; y el otro del cabestrillar con el Buey.* Escrito por Alonso Martinez de Espinar . . . . de orden de S. M. En Madrid en la Emprenta Real año 1644. 4to.

Another edition, "en Napoles, por Francisco Ricciardo, 1739."
Another, "en Madrid, por Antonio Marin, año de 1761," 4to,
This work of 420 pp., with portraits of Don Carlos and the author, and several full-page illustrations, contains (lib. iii. cap. i.) remarks "del Aguila y sus propriedades y de otras Aves de rapina," with chapters on the following kinds of hawks—Alcon Girifalte [the gerfalcon] crianse en las montañas de Noruega, y en las de Irlanda [qu. Icelanda], y Suecia: los mejores son de Noruega, aunque son mayores de cuerpo los de Irlanda [sic] y tienen el plumage mas blanco.

* Perro de muestra, pointer; Buey del cabastrillo, stalking-ox.
Alcon Sacre [the Saker] poco menor que el Girifalte: crianse en Armenia: yendo de passo, toman muchos en las islas de Candia, Grecia, Malta, y Sicilia. Alcon Nebili [the Peregrine] crianse en las montañas de Persia, y Moscovia, y en muchas de las regiones de Scitia, que caen debaxo del Norte, y en las alturas de los Alpes, aunque en toda la Francia, Flandes, y Italia los tienen por passageros, y no saben de donde vienen, y los suelen llamar Peregrinos. En España los llamamos Neblies por la noble condicion que tienen en amansarse. Alcon Bahari [the Peregrine] crianse muchos en nuestra España en peñas muy altas. Alcon Montano [some phase of Peregrine] llamados assi porque se crian en las montañas. Alcon Borni [some phase of Peregrine] se crian en las montañas de Leon, y en otras Provincias. Alcon Alfanque [the Lanner] se crian en Berbería, y se venden muchos en Orán . . . . estos son menores que los Baharies y assi no matan sino avecellas pequeñas quando estan en su libertad; y con la industria de los Cazadores matan la Perdiz, y Picaza [Magpie] y vuelan la Liebre! But note the distinction between matan and vuelan. This Hawk will kill the partridge and magpie, and [to show its spirit] will fly at a hare [which it has not strength to kill]. Alcon Tazarote [a Peregrine of some kind, probably Falco barbarus] se crian en Africa . . . . del color de los Neblies . . . . mas pequeños de cuerpo, pero de grandissimo animo . . . . diferenciaanse de ellos en batir mas apriessa las alas. Alcon Azor [the Goshawk] es mas alto de piernas . . . . su color obscuro, sus ojos dorados y muy lustrosos: cazan estas aves Palomas, Perdices, y Liebres: es mas astuto que los demás Alcones; vuelan muy junto a la tierra, por no ser visto de la caza, etc. Alcon Aleto [probably Falco babylonicus] una especie de Alcon que se cria en las Indias, pequeño de cuerpo, pero de generoso animo . . . . son de muy buenos costrumbres, y se amansan facilmente, y assi se estiman mucho: vuelan con ellos las Per dices. Alcon Gavilan [the Sparrow-hawk] especie de Azor, pero mucho menor de cuerpo que él. Alcon Esmerejon [the Merlin] muy pequeño menor que el Gavilan . . . . mata en su libertad aves pequeñas, Alondras y Calandrias y otras . . . . vuelan con grandissima ligereza: hase de amansar para reducirle dentro de ocho dias. Alcon Alcotan [the Hobby] Menor [qu mayor] que el Esmerejon, amansase con facilidad, etc. Alcon cernicalo [the Kestrel].
These extracts will serve to show the hawks known to falconers in Spain, and the Spanish names for them. Many of these names introduced by the Moors into Spain, and thence carried into France, are derived from the Arabic. See Dozy and Engelmann, "Glossaire des Mots Espagnols et Portugais dérivés de l'Arabe," seconde édition, 8vo, Leyde, E. J. Brill, 1869.

At p. 341 Martinez mentions some of the works on Falconry known to him. He says:—"el que quisiere saber el modo de criarlos, y enseñarlos para la caza, y el regalo con que se han de tratar, y la curacion de sus enfermedades lea à Belisario, Alberto, à Pedro Crescientense, y à Demetrio; y en lengua Francesa à Guillermo Tardebo; y en Alemán à Everardo Tappio que todos escriben largamente de los Alcones, y algunos otros cuyas obras son mas comunes." The work of Demetrius of Constantinople is very rarely quoted, and that of Eberhard Tapp I have not found mentioned by any other writer on Falconry, except Schlegel, who gives the title only.

246. TAMARIZ DE LA ESCALERA (Fernando). Tratado de la Caza del Buelo. En Madrid, por Diego Díaz. 1654. 12mo.

A rare tract of 5 preliminary leaves and 31 pages. Although it is cited by Hammer Purgstall (No. 112) and Schlegel (No. 194) amongst books relating to Falconry, it appears to be a treatise on the art of shooting flying, if for buelo we may read vuelo, and is only mentioned here for the purpose of removing misapprehension concerning it. The first chapter treats "De las Reglas que debe observar el perfecto tirador de buelo," and the author observes: "El perfecto tirador de buelo se ha de fundar en tres importantísimas reglas, como son Conocimiento, Reportacion, y Prontitud." In the eighth chapter, "De los ocho buelos de la Perdiz," we learn "que las Perdices buelan de una de ocho maneras."

D. Gutierrez de la Vega cites a MS. which seems to be a transcript of a second edition, since it ends: "En Madrid por Francisco Sanz, impresór del Reyno, año de 1681." Another, "en Roma, por Pablo Antonio Vasquez, año de 1700;" and Leguina mentions a reprint of the first edition "por Antonio de Santa Maria año de 1798," 8vo (3 prelim. leaves and 45 pp.).
Finally it has been republished by D. Gutierrez de la Vega in the Ilustracion Venatoria.

The author, it appears, was a Captain of Cuirassiers—"Capitan de Cavallos Corazas."

18 prelim. leaves, pp. i–432, "con quatro Tablas Differentes."

Other editions, Madrid, 1670, 1676, and 1683; Barcelona, 1696.

The Barcelona edition, "en Casa de Cormellas por Thomas Lorigente, Impresór Año 1696," is a reprint, page for page, of that published "en Madrid, en la Imprenta de Bernardo de Villa Diego, año de 1683." This curious work may be described as an illustrated volume of sermons on morality and politics, with lessons deduced from a study of ornithology, by a Friar of the Order of Preachers. Illustrations borrowed from hawking are appositely introduced, the Peregrine Falcon being figuratively likened to the Soul striving towards heaven, the Sparrow-hawk to Fortune, the Heron to Fasting, etc.

A noble kind of hawk, he says, is the Falcon, well known in Spain by reason of its being flown at herons (p. 223). The habit which the heron has, on being pursued by a hawk, of throwing up its fish, or other food, to lighten itself and increase its chance of escape, is noted and commented on (p. 145), the moral being that fasting raises the soul towards heaven with a light and rapid flight:—"El ayuno levanta el espíritu hasta los cielos, con buelo ligero y veloz porque verdaderamente que la haze pesado, y aun torpe la comida: subtítus animi ciborum copia impeditur, dixo Seneca" (p. 148).

Referring to the prices formerly paid for hawks, he says (p. 237): "La estimacion que Reyes, Principes, y Señores han
hecho y hazen deste paxaro (el halcon) es tanta (para bolar Garças, y otras aves) que huvo ocasion en que se dieron por un paxaro quinientos escudos de oro!

"De su caça, cria, enseñanza, y singularidades, que a mi intento no conducea, escrivio Demetrio Constantinopolitano un tratado dilatado, que traduxo Pedro Gilio en Latín. Trata también de sus enfermedades, y cura." [See note to No. 245.]

So that in the sermons of this worthy Friar we get some curious information on the subject of Falconry where we should least expect to find it.

248. XIBAJA (Joseph de) y MORALES (Diego de). Aposentadores de la Real Caça de Volateria. 

Sobre que á los dichos aposentadóres se les cumplan y guarden todas las preheminencias y exempciones de que deben gozar los caçadóres, cataribéras, y officiales de dicha Real Caça de la Volateria. Madrid. 1664. folio.

Twenty-two pages only, but interesting as illustrating the state of Falconry in Spain towards the close of the seventeenth century. By aposentadóres we are to understand aposentadóres de camino—i.e., officers of the Court, who precede the members of the royal family when travelling, to arrange for their reception, and by cataribéras, the mounted assistant falconers, whose business it was to follow a hawk and take it up after a flight.

249. CERVANTES (Pedro y Miguel Antonio de). Recopilacion de las Reales Ordenanzas y Cédulas de los Bosques reales del Pardo, Aranjuez, Escorial, Balsain y otros . . . . Del fuero privilegiado de los Ministros y officiales de las Alcazares y Bosques Reales, exempciones de los de la Real Monteria y Volateria etc. Madrid. 1687. folio.

Not seen. Doubtful whether volateria with this author includes, as it sometimes does, hawking, or relates only to fowling.
250. **MERCADER (Matías).** **Breve trasunto sacado de los originales libros que los señores Reies de Aragon tenían para el conocimiento de las Aves de caça, y de toda naturaleza de Alcones, con una breve práctica de Cetrería para curar las enfermedades y dolenzias que acaecen.** Madrid. 1689.

This treatise, of twenty-eight leaves only, consists of brief extracts from the works of Frederick II., *De arte venandi cum avibus*, 1245, and of Pedro Lopez de Ayala, 1386.

Señor Don Gutierrez de la Vega cites two Italian MS. copies of this work of the fifteenth and sixteenth centuries (Nos. 77 and 79) existing, one in the Biblioteca Nacional, the other in the Biblioteca del Escorial.

251. **CALVO PINTO Y VELARDE (Agustín).** **SILVA Venatoria.** Modo de Cazar todo género de Aves y Animales; su naturaleza, virtudes, y noticias de los temporales. . . . En Madrid: En la Imprenta de los Herederos de Don Agustín de Gordejuela. Calle del Carmen, año de 1754. sm. 8vo.

A well-printed little volume of 15 prelim. leaves, 303 pp., and "Indice": treats generally of hunting and fowling, with brief descriptions. Birds of prey are only incidentally mentioned. The Hobby, for example, is thus described (p. 108):— "Es el Alcotan ave de rapiña; su color pardo, y encendido, del tamaño de un Cuclílo, sustentase de comer pajaros: tiene muy veloz el buelo, la vista perspicaz," etc.

252. **CARLOS III. Real Ordenanza por la que se declara vedada y acotada para la Real recreación, y entretenimiento la Caza mayor y menor Aves de volatería, y Pesca, del Real Bosque de Balsain etc.** En Madrid, en la imprenta de Pedro Marin. 1774. folio.

Not seen.

“Pp. 1-310; grabados. En la parte 3ª trata de la Caza del Avestruz, y de la Gaëla á caballo con el Halcon y galgos.”

This work, in which a description is given of hawking as practised by the Arabs of the Sahara, has been already noticed under the head of the French original of 1851 and the English translation (No. 199). The chapter on hawking contains numerous errors due to the author not properly understanding the details of the sport which he attempted to describe.

Not seen. The title of this work recalls that of Martínez de Espinar (No. 245), which possibly may have served the author as his model.

Not in the British Museum, and not seen.

257. RENARD (L.) y VILLALTA (R.). Manual del Caçador . . . . Nueva edicion adornada con abundantes grabados, y precidida de una introduccion
SPANISH.

cinegetica debida a la ilustrada pluma de Don Andres Guerra. Barcelona. 1880. 8vo.

Not in the British Museum, and not seen.

258. PUNONROSTRO (Juan Arias de Avila, Conde de). DISCURSO DEL FALCON que vulgarmente se dice Esmerejon, y en que modo se hara gallinero y perdiguero y garcero, compuesto por Don Juan Arias de Avila Puerta Carrero, Conde de Puñonrostro, dirigido a Don Juan Fernandez de Velasco, Duque de Frias y Condestable de Castilla. Madrid. 1885. 4to.

Published for the first time in the "Ilustracion Venatoria" from a MS. in the National Library, Madrid.

259. ITURRALDE Y SUIT (Juan). LA CAZA EN NAVARRA en los tiempos pasados. San Sebastian. 1887.

Señor Don Enrique de Leguina, to whom we are indebted for an indication of this important publication, writes: "Este notable trabajo, que contiene preciosísimos datos sobre la caza, y alcobría, y exhibe documentos muy importantes del Archivo de Pamplona, se publicó en el número 264 (10 de Noviembre 1887) y siguientes de la Euskal-Esvia, Revista Vascongada que se da a luz en San Sebastian.

We have not yet been fortunate enough to see a copy of this; but the reference to the "important documents in the archives of Pamplona" suggests that the work is probably founded on the Paramientos de la Caza of King Sancho VI. of Navarre. See note to No. 224.

260. UHAGON (Francisco de) y LEGUINA (Enrique de). ESTUDIOS BIBLIOGRÁFICOS. LA CAZA datos reunidos por . . . Madrid. 1888. roy. 8vo.

In this very useful catalogue, of which only 100 numbered copies were printed, the authors have given a list of more than
BOOKS ON FALCONRY.

400 works in Spanish, including MSS. relating to the chase in all its branches—hunting, shooting, fishing, fowling, and hawking. In addition there is a list of 226 anonymous works on these subjects, including several MSS. on Falconry, 17 sporting novels, and 26 "Comedias con titulo venatorio," the whole prefaced by an Introduction of a dozen pages.

In this essay of 30 pp., of which only 100 copies were printed, the author makes a critical examination of the three celebrated Spanish works on Falconry by the writers above mentioned. He shows, by means of extracts printed in parallel columns, that the supposed original work of Juan de Sant-Fahagun is almost entirely founded upon that of Pero Lopez de Ayala, and in a great measure copied from it, several passages being literally transcribed, and others only slightly paraphrased.

See note to No. 230, Sant-Fahagun, anteà p. 117.

A remarkable instance of plagiarism is quoted on p. 16. Ayala remarks that certain falcons ("baharis sardos, et mallorquinos," &c.) commence to moult sooner and get through the moult quicker than any others. Sant-Fahagun repeats this observation in slightly different words, Ayala then adds: "Yo vi un falcon del Rey Don Pedro que dizian 'Doncella' [i.e., "the waiting-maid"] et era bahari de Romania et garcero [a heron-hawk] et altanero [and a high-flier] et vilo la primera semana del mes de Agosto ser ya fuera de la muda et desaynado [and enseamed] et aquella semana matar una garça."

Sant-Fahagun, not to be outdone, actually asserts: "Yo vi en fin de Julio un falcon bahari sardo de Don Alfonso Anriquez, almirante de Castilla, ser mudado y desainado y matar garza!"

We may well exclaim with Senor de Uhagon, "rara casualidad ! chocante coincidencia !"

In Spanish as in other languages the earliest printed books on Falconry do not always contain the oldest treatises. Those, for instance, of the Prince Juan Manuel (No. 226) and the
SPANISH. 135

Chancellor Pero Lopez de Ayala (No. 228), which date back to 1325 and 1386 respectively, have only been printed and published within the last ten years. A great number of Spanish works on hawking still remain in MS. I have notes of more than forty such MSS. in various libraries, public and private.

Amongst these may be specially noticed a Spanish translation of the fifteenth century of the work of Brunetto Latini (No. 263); not from the first printed Italian version of Bono Giamboni but from the original French (see p. 137). Two copies of this are known to exist. The authors of La Caza (No. 260) give the title as follows: “Paredes (Alfonso de)—aqui comienza el libro del Thesoro que fábla de todas las noblezas de las cosas,” and after mentioning some of the most interesting chapters (see p. 137) conclude with the following remark: “Este libro lo trasladé Maestre Brunete de Latyn en romáse Frances, y Don Sancho nieto de Fernando el Santo, lo mandó trasladar de Francés en lenguaje Castellano, al maestro Alfonso de Paredes, físsico del infante don Fernando su fijo, y a Pascual Gomez, escrivano del Rey.”

It is possible that the Spanish Literature of Falconry may yet receive additions, in the shape of treatises by the late Don Antonio Boria y Pascual, who died in 1876, leaving voluminous MSS. for a work on the history and bibliography of Hunting and Hawking, and by Señor Don Enrique de Leguina, whose quarto MS. of 270 pages, “adornado con muchas acuarelas,” was anxiously expected by Don Gutierrez de la Vega when he published, in 1879, his editions of the works by the Prince and the Chancellor above mentioned.

The last-named writer has thus described his own MS.:—
“La Cetería—Apuntes coordinados por Enrique de Leguina 1882. MS. 4to. Adornado con cinco acuarelas, letras de adorno etc.” He adds in a note:—“El objeto de este trabajo es dár á conocer algunos datos sobre la historia de la Cetería, aves que se destinaban á este ejercicio, método de adiestrarlas etc.: pero es solo una réunion de noticias, aun no preparadas para la imprenta. Se halla dividida en nueve capítulos, á saber: (1) de la Caza en general; (2) La Cetería; (3) Division de la Halconeria; (4) el Halcon; (5) su enseñanza; (6) sus enfermedades; (7) obras consultadas; (8) Cazadores y Halcones Españoles célebres; (9) Glosario.”

This cannot fail to prove a most interesting work to falconers, and it is to be hoped that it may be speedily published.
Portuguese.

The only Portuguese work on the subject which has come to light after long search, and inquiries made through friends resident in Portugal. It is mentioned by Hammer Purgstall (No. 112), and, on his authority, by Schlegel (No. 194), but these authors merely give the first five words of the title, without any indication of the contents, as above. It contains 5 preliminary leaves, 118 leaves, and contents 5 pp.

A Spanish translation of this, made by Juan Batista de Morales in 1625, with the title "Arte de Cazar de Diego Fernandez Herrera," is preserved in the National Library at Madrid.

Existing MSS. prove that treatises on Falconry were composed in Portugal as in Spain, but they were much fewer in number, or have been less carefully preserved. Argote de Molina, in his "Noblesa del Andalusia," mentions a Portuguese MS. on Falconry of the fifteenth century, in the Biblioteca de Palacio, Madrid, by Pero Meniño, "que fué Halconero mayor del Rey D. Fernando de Portugal." But it does not appear that this was ever printed.
ITALIAN.

Italian.

263. LATINI (Brunetto). IL TESORO, nel qual se tratta de tutte le cose che a mortali se appartengono volgarizzato da Bono Giamboni. Trevisa. 1474. folio.

This remarkable encyclopædia, which contains several chapters on Falconry (book i. part v.), was composed in Paris at the end of the thirteenth century by the celebrated Florentine grammarian, Brunetto Latini, and was originally written in French—"Li Livres dou Trésor rédigé en langue Française ou Romans selon le parler de France pour ce que la parleure est plus delisible et plus commune à tous langages." M. H. Martin Dairvault, in the Introduction to his edition of the Livre du Roi Dancus (No. 139) has noticed a MS. fragment of the Tesor in the Bibl. Nat. Paris, No. 12581, du Fonds français, which is dated 1284. It was translated into Italian by Bono Giamboni, and first published in 1474. Other editions—Vinezia, 1528 and 1533.

The chapters on Falconry were reprinted for private circulation, in 1851, by Count Mortara, in his Scritture Antiche Toscana di Falconeria (No. 293), but it was not until 1863 that the whole of the original French text was for the first time printed, by M. Chabaille, with the following title:—

LI LIVRES DOU TRESOR PAR BRUNETTO LATINI. Publié pour la première fois d'apres les MSS. de la Bibliothèque Impériale, Bibliothèque de l'Arsenal, etc., par P. Chabaille. Collection de Documents inédits sur l'histoire de France; publiés par les soins du Ministre de l'Instruction publique (2e série, Lettres et Sciences). Paris, Imprimerie Impériale. 1863. 4to.

In this edition, now the most easily referred to, although apparently overlooked by Baron de Noirmont (No. 206, iii. p. 90, note), the pages relating to Falconry are as follow:—Book i. part v., "De la nature des Animaus"; p. 197, ch. 148, de toutes manières de Ostours; p. 201, ch. 149, de tous Espreviers; p. 202, ch. 150, de tous Faucons; p. 204, ch. 151, de tous Emerillons.
The falcons mentioned by Brunetto Latini are—(1) les laniers; (2) les faucons que on aple peleirins parce que nus ne trueve son nif ains est pris aussi cousine en pelerinage; (3) les faucons montains; (4) les faucons gentils ou gruiers qui vaut mieux que li autre; (5) les girfalc; (6) les sourpoin [sur poing] blanche, et semblables au girfaut; (7) les brectons, que li plusor aplelent rodio, cest à dire li rois et li sires de touz autres oisiaux.

This curious work has likewise been edited by M. Chabaille for the Collezione di opere inedite o rare dal secolo xiii. al xvii. Bologna, 1878, with illustrations by L. Gaiter.

The first Italian translation of a work originally composed in Latin, in 1307, at the desire of Charles II., King of Sicily, and translated into French in 1373 at the request of Charles V. of France. It resembles in its plan the Maison Rustique of Estienne and Liebault (No. 148), and deals with agriculture and field sports, the ninth book containing a chapter on Falconry.

For the Latin editions see under Latin authors. The Italian editions, besides that above cited (which is the earliest and rarest), are as follow:—Vicenza, 1490, folio; Venezia, 1511, 1534, 1536, 1538, 1542, all in folio; Venezia, tradotta nuovamente con le figure dell’ erbe e degli animale, e un Vocabolario delle cose difficili per Francesco Sansovino, 1561, 4to; Venezia, per F. Rampazetti, 1564, 8vo; Firenze, appresso Cosimo Giunti, 1605, 4to; Napoli, per Felice Mosca, 1724, 8vo; Bologna, 1784; Milano, 1805, 8vo; and probably others.

According to Lastri, the author of the first translation was not, like the composer, a native of Bologna, as is generally asserted, but a Tuscan. “Quanto al suo primo traduttore è affatto incerto; pare solamente che si possa affermare ch’ ei fosse Toscano, non Bolognese come alcuni anno preteso” (“Biblotheca Georgica,” p. 40).
265. **MEDICI (Lorenzo de’). LA CACCIA COL FALCONE.** Poema della xv. seiclo. [c. 1478.]

“Amongst the materials collected for my use,” says Roscoe, “by a friend in Florence, I had the pleasure to find several beautiful poems of Lorenzo de’ Medici, the originals of which are deposited in the Laurentian Library, although the former editors of his works appear not to have had the slightest information respecting them. These poems, which have been copied with great accuracy, and, where it was possible, collated with different manuscripts, are for the first time given to the public at the close of the present work” (Preface, p. xvii.).

He adds, however, in a foot-note to vol. i. p. 280: “About a dozen copies of these poems were printed in the year 1791, chiefly for the purpose of regulating the text, which have since been distributed by the editor amongst his friends. This he thinks it necessary to mention to prevent any misapprehension on the part of those into whose hands such volume may chance to fall.”

The poem entitled *La Caccia col Falcone*, he observes (vol. i. p. 281), is apparently founded on a real incident. The poet gives a circumstantial and lively account of the then popular diversion of hawking, from the departure of the company in the morning to their return in the heat of the day. As a specimen of the author’s style, the following stanzas may be quoted:—

“E si vedea una gentil valletta
Un fossatel con certe macchie in mezzo,
Da ogni parte rimunita, e netta,
Sol nel fossato star possono al rezzo;
Era da ogni lato una piagetta,
Che d’ uccellar facea venir riprezzo
A chi non avessi occhi, tanto è bella;
El mondo non ha una pari a quella.”
A flight at the partridge with a trained Sparrow-hawk is thus described:—

"Ecco Guglielmo a te una ne viene,  
Cava il cappello, et alzerai la mano;  
Non istar più Guglielmo, ecco a te bene;  
Guglielmo getta, e grida, ahi villano!  
Segue la starna, e dietro ben le tiene  
Quello sparviere, e in tempo momentano  
Dette in aria forse cento braccia;  
Poi cadde in terra, e gia la pela, e straccia.  

Preseli il geto, e per quel l'ha tenuto;  
Dalli il capo, e' l cervello, e non li pesa;  
Sgermillo, e l' unghia e' l becco gli havea netto;  
Poi rimisse il cappello, e torna a getto."

The scene depicted was most probably at Poggio-Cajano (described op. cit. vol. ii. pp. 134–135), about ten miles from Florence, where Lorenzo frequently enjoyed the diversions of hunting and hawking, the latter of which he is said to have preferred. This statement is made on the authority of his contemporary and friend Niccolò Valori, a Florentine, who wrote his Life in Latin, which was not printed until 1749, though an Italian translation of it appeared in 1560. Lorenzo died in 1492.

In the description of the village of Cajano by another contemporary, Michaelo Verini, it is remarked that the neighbourhood abounded with quails and other birds, particularly water-fowl; and that Lorenzo stocked his woods with pheasants and with peacocks, which he procured from Sicily.

266. **AGOGo MAGo. ** *Opera nobilissima* composta per lo excelente maistro Agogo Mago Re de tute le passion vien a Falconi, Astori, e Sparaveri. Milano. 1517. sm. 4to.

Title in black-letter, with woodcut of hawks on a perch, two falconers, one standing, the other seated, and a hound lying beneath the perch. This very scarce tract is printed at the end of a treatise (fols. 28 verso–32) on the Horse, entitled "Libro de la natura di Cavalli & el modo di rilevarli: medicarli; &
LORENZO DE' MEDICI,
1448-1492.
Author of "La Caccia col Falcone."
domarli & cognoscerli: & quali son boni: & del modo de farli perfecti: &c. Item in simel modo tratta de la natura di rilevar: medicar: governar: & mantenir Spalivieri Astori Falconi & simili, &c." This first title (which is not in black-letter) is printed in six and a half lines at the top of the page (fol. 1), below which is a three-quarter page cut of a blacksmith's forge wherein a horse is being shod. On the last page (32 verso) are four woodcuts of bits for horses. The first treatise occupies fols. 2-28; the second, 28 verso-32. It is undated, and the author's name does not appear. It is presumably the work referred to by Capt. Huth in his "Bibliography of the Horse," 1887 (p. 5), as having been printed at Milan in 1517.

Can this be the "traité spécial en Italien" mentioned by M. Charavay on p. 3 of his "Etude sur la Chasse à l'Oiseau au Moyen-âge" (No. 210), "fait au xv siècle et intitulé Medecini de Cavalli e Falconi, lequel traité faisait partie de la bibliothèque de Diane de Poitiers" (Bibl. Nat. it. 939)? He does not state whether the treatise to which he refers was ever printed, but the treatise in my possession, of which I have seen no other copy, answers his description. It is entirely occupied with an enumeration of remedies for diseases in horses and hawks. Who the author was remains to be discovered; perhaps an early King of Sicily (he is described in the title as "Re," and the composition is evidently of some antiquity); perhaps he had no more certain existence than "le Roi Modus" or "le Roi Dancus."

267. CARCANO (Francesco Sforzino da). TRE LIBRI DEGLI UCCELLI DA RAPINA di M. Francesco Sforzino da Carcano, nobile Vicentino, ne quali si contiene la vera cognizione dell' Arte de Struccieri, & il modo di conoscere, ammaestrare, reggere, & medicare tutti gli Augelli Rapaci. Con un trattato de Cani del medesimo. Con privilegio. [Woodcut.] In Vinegia appresso Gabriel Giolito de Ferrari. 1547. sm. 8vo.

Another edition with similar title; nine prelim. leaves, pp. 1-250, and separately printed woodcut on last leaf. In Vinegia, appresso Gabriel Giolito de Ferrari. 1568. sm. 8vo.
BOOKS ON FALCONRY.

Another, Venetia, per i Giolitti. 1581. sm. 8vo.
Two editions of 1585 and 1586 not seen.
Another, with variation in the title, thus:—

TRE LIBRI DEGLI UCCELLI DA PREDA del Signor Francesco Carcano detto Sforzino con un trattato de' Cani. Venetia. 1587. sm. 8vo.

A copy is in the library of M. Pierre A. Pichot, of Paris.
A third variation in the title occurs in the following:—

DELL' ARTE DEL STRUCCIERO con il modo di conoscere e medicare Falconi, Astori, e Sparavieri, e tutti gli Uccelli di Rapina, del Signor Francesco Carcano, nobile di Vicenza. Brescia. 1607. 12mo.

TRE LIBRI DE GLI UCCELLI DA RAPINA di M. Francesco Sforzino da Carcano nobile Vicentino. Ne quali si contiene etc. . . . con un trattato de Cani da Caccia del medesimo. [Woodcut.] In Vicenza, per il Megietti. 1622. sm. 8vo.

A smaller illustrated edition with title as follows:—

DELL' ARTE DEL STRUCCIERO, con il modo di conoscere e medicare Falconi, Astori, e Sparavieri, e tutti gli Uccelli di Rapina. Adornato con le sue Figure. Del Sig. Francesco Carcano, nobile di Vicenza. [Woodcut.] In Milano, per Filippo Ghisolfi, ad instanza di Gio. Battista Bidelli. Con licenza de' Superiori. 1645. 16mo.

Carcano states in his Preface that this treatise is the result of forty years' experience as a falconer, and the perusal of all the Italian and French books he could find relating to Falconry—"che è lo spazio di più di quaranta anni posso con verita affirmare di havere praticato con i migliori struccieri de l' età
nosta, et tratenutone molti in casa mia di paesi diversi et letto quello che gli altri ne hanno scritto così in Italia come in Francia," &c. (p. iii.).

The author's reputation as a falconer caused his book to become very popular, and it not only passed through several editions, as above shown, but was extensively copied by subsequent writers, as, for example, Raimondi (No. 277) and Turbervile (No. 14).

268. **GIOРGI (Federico).** **LIBRO** di M. Federico Giorgi del modo di conoscere i buoni **FALCONI, ASTORI e SPARAVIERI**, di farli, di governarli, et di medicarli, come nella Tavola si può vedere. Con Privilegio. [Woodcut.] In Vinegia, appresso Gabriel Giolito de Ferrari. 1547. 12mo.

The first edition of this esteemed work, to which our English Turbervile (No. 14) admitted his indebtedness. Fifty-three leaves, printed in italic, with "tavola dell' opera." At the end "In Vinegia, appresso Gabriel Giolito de Ferrari, MDXLVII." A slight variation is to be found in the titles of succeeding editions; thus:—

**LIBRO** di M. Federico Giorgi del modo di conoscere i buoni **FALCONI, ASTORI, e SPARAVIERI**, di farli, di governarli, & di medicarli, con una aggiunta nel fine della medesima materia. Con Privilegio. [Woodcut.] In Vinegia, appresso Gabriel Giolito di Ferrari. 1558. 12mo.

The second edition, also printed in italic—53 leaves, with "tavola dell' opera." Another edition, printed at Vinegia, 1567, is cited by Schlegel (No. 194). The title of a fourth edition runs as follows:—

**LIBRO** di M. Federico Giorgi del modo di conoscere i buoni **FALCONI, ASTORI, e SPARAVIERI**, di essercitarli & farli perfetti, di governarli & di medicarli. Con una
Tavola delle cose più notabili, e con una giunta in fine della medesima materia. [Woodcut.] In Vinegia, presso Altobello Salicato. 1573.

The only edition known to Schneider (No. 324).
Two editions of Brescia, 1595 and 1607, not seen. The former is cited by Kreysig (No. 322), the latter by Schlegel (No. 194).
Lastly, the smallest edition thus entitled:—

pp. 136, 2 leaves, “a’ lettori,” and two “tavola dell’ opera.”
This edition has nine small woodcuts in the text between pp. 5–29. At the end, pp. 128–136, “Trattato della cura de Cani,” with woodcut of Spaniel.
Kreysig cites (p. 153) a “Libellus de cognoscendis bonis falconibus,” 1547, but this apparently is only the Latinised title of the present work.

269. BOCCAMAZZA (Domenico). TRATTATO DELLA CACCIA. Libri viii. Roma, per M. Gyronima de Cartolari Perosina. 1548. sm. 4to.

Very scarce; a copy in the British Museum (62. a. 13) wants the title, and the pagination from p. 49 is imperfect. It purports to consist of 135 leaves, but there are 138.
The work is divided into eight books, of which the last three relate to Falconry; the fifth ends thus:—“Qui finisce el quinto libro dove se e trattato de molte & varie cose come se vedeno scritte.” The sixth (i.e., the first on Falconry) begins: “Questo e il libro dove si parla di Uccelli, il quale

The second book of Falconry (the seventh of the work) treats of the maladies of hawks and how to cure them (105 verso–123 verso, rectius 98 verso–126 verso), and the last, which begins "Qui commincia il terzo trattato de la malati che vengono di fuora alli Uccelli," deals also with recipes for various diseases, real or imaginary, and gives such hints as "A fare volare presto uno uccello," "Per fare mutare presto uno uccello." The colophon reads:—"Qui finiscono gli otto Libri de M. Domenico Bocca Mazza quali narreno de vari & diverse cose apertinenti alli Cacciatori. In Roma, per M. Gyronima de Cartolari Perosina. M.D.XLVIII."
the chase of different wild animals; and the fourth relates to birds in general, and falcons and hawks in particular.

"Molti gli augelli son detti Falconi, 
Ch'obediran del suo Signor la mano: 
E come piaceralli alle stagioni 
Ne geti ne capel torralli in vano" (p. 161).

Alluding to the Goshawk (Astore), used in Italy for flying at partridges and pheasants, the author particularly notes its splendid yellow eyes, and its finely curved beak and talons:

"Gli occhi han di color d' oro e risplendenti 
E con grandezza quei volgono attorno 
Il becco e l' unghie havran curve e pungenti 
E 'l dosso lor di terse penne adorno 
Stanno del Falconier al grido attenti 
E fan di lieve al suo pugno ritorno 
Mentre con pollo o starne quella alletta 
E parlo obediente si dileta" (p. 162).

In similar strain the poet sings the delights of heron-hawking and of flying the Sparrow-hawk a minori uccelli (p. 163).

According to Marco Lastri, the author's real name was Ganzarini. He says:—"il vero cognome dell' autore è Ganzarini, detto Scandianese dalla patria nello stato di Modena" (Bibl. Georgica, p. 115).

According to Lastri (Bibl. Georgica), this poem was to have been completed in four books, but the author did not print the other three. The first has been happily rendered in Italian verse and annotated by Prof. Gio. Pietro Bergantini, of the Academy of Pisa, the translator of Il Falconiere of Tuano (No. 284), with which work it was printed "in Venezia, 1735, presso Giambatista Albrizzi, in 4to, col titolo di Uccellatura a Vischio."

The art of taking all kinds of birds with bird-lime, including hawks and falcons.
272. **MANZINI** (Cesare). *Ammaestramenti per allevare pascere e curare gli Uccelli* etc. Opera novamente composta per Cesare Manzini, Romano. In Milano, per Pacifico Pontio. 1575. 16mo.

Brescia, 1607, 16mo. Milano, per Filippo Ghisolfi, ad instanza di Gio. Battista Bidelli, 1645, 16mo. Bologna, per Costantino Pisarri, 1726, 16mo.

This little book relates solely to cage-birds, and is only mentioned here because it is usually bound up with the books on Falconry by Francesco Carcano and Federico Giorgi, and might be supposed to relate to that subject.

273. **VALVASONE** (Erasmo di). *La Caccia*:

*La Caccia* del Ill. Sig. Erasmo di Valvasone. Ricoretta e di molte stanze ampliata con le Annotationi di M. Olimpio Marcucci. In Bergamo, Ventura. 1593. sm. 8vo.

Other editions: Bergamo 1594, Venetia 1602, Bergamo 1603, Venezia 1611, 1612, and Milano 1808.

This poem on the chase, extending to 125 leaves, exclusive of the "Dedication" and "Annotations" by Marcucci, was very popular in its day, and is still held in some esteem by collectors of *opera cynegetica*. It is divided into five cantos dealing with different branches of field sports, each preceded by a full-page illustration on copper. The fifth canto relates to Falconry, in which allusion is made to the different hawks used by falconers, the methods of catching and training them, and the remedies for their ailments. The annotations of Marcucci are chiefly directed to an explanation of the classical allusions made by the poet.
274. **CODROIPO (Francesco).** DIALOGO DE LA CACCIA DE' FALCONI, ASTORI, E SPARVIERI di Francesco Codroipo, gentilhuomo Udinese. Al sereníssimo Don Ferdinando Arciduca d' Austria etc. Con licenza de Superiori. [Vignette.] In Udine, appresso Giovan-battista Natolini. 1600. sm. 4to.

Printed throughout in italic. Title, Dedication, and Commendatory Verses, i.–xiv.; pp. i–90; Tavola, i.–v.

Edizione seconda, Udine, per Pietro Lorio, 1614, 8vo.

In this small quarto of less than a hundred pages, the author, by way of dialogue, relates a series of conversations which he says took place between his father, il Cavaliere Codroipo, and an accomplished falconer with whom he used to stay on a visit, Signor Giacomo Savorgnano, the owner of the castles of Ariis and Isemico, in the district of Friuli. He states that, being present at their discourses when out hawking, and being much struck with all he heard, he committed it to memory, and on his return to the house made a note of it, putting into the mouths of the speakers (who are distinguished as "Sig. Giacomo" and "Cavaliere") the very words which, so far as he could remember, each of them uttered. It is pleasant reading, reminding one of D'Arcussia's *Conférence des Fauconniers* (No. 154), though less spirited and less exact, because related second-hand.

"Posso dire con verità" (says Sig. Giacomo) "che il volo de' falconi a riviera è cosa mavigliosa e stupenda: poiche si vede un animale il più altiero d'animo, ed inimico de l' uomo ch' altro qual si voglia, con la sola patienza ed industria non solo fatto amico, ma quasi intendeinte di tutte le voglie di chi lo regge" (p. 16).

He describes (pp. 18–19) a flight at a heron with a Peregrine. The greater portion of the work is occupied with a discussion on the different kinds of falcons and their peculiarities, on Goshawks and Sparrow-hawks, their ailments, and the remedies recommended for them.

275. **IMPERIALI (Giovanni Vincenzio, Genovese).** Lo Stato Rustico. Poema in verso sciolto
in xvi. parti. Genova, appresso Giuseppe Pavoni. 1611. sm. 4to.

Like *Le Plaisir des Champs* of Claude Gauchet (No. 151), this poem describes the pleasures and recreations of a country life, in which Falconry, like other field sports, plays a part.

A second edition was printed in Venezia, appresso Evangelista Deuchino. 1613. 12mo.

Of all the works on Falconry and the chase written in Italian, this is the only one as yet found to have been printed in London. A curious little volume, dedicated to that great English patron of hunting and hawking, King James I.

277. **RAIMONDI (Eugenio, Bresciano). ** *Le Caccie Delle Fiere armate e disarmate e degli’ animali quadrupedi, volatili et aquatici; opera nuova nella quale pienamente si discorre del governo, cura, e medicamenti degli Uccelli rapaci et innocenti et de’ Cani; con perfettissimi ammaestramenti di tutte le maniere dell’ uccellare etc.* Brescia, per Bartolome Fontana. 1621. 8vo.

*Delie Caccie di Eugenio Raimondi, Bresciano, Libri quattro, aggiuntovi ’n questa nuova impressione il quinto libro della Villa.* In Napoli, per Lazaro Scorrigio. 1626. 4to.

Engraved title, 26 leaves, pp. 1–635, and Tavola. Twenty-one engravings on copper, of which eight are duplicates.
Delle Caccie di Eugenio Raimondi, Bresciano, Libri quattro. Aggiuntovi 'n questa nuova impressione altre Caccie che sperse in altri libri andavano. Venetia. 1630. 4to.

Engraved title, 5 leaves, pp. 1-512, and Tavola. Nineteen engravings on copper, of which two are duplicates, all included in the pagination.

In cap. viii. Lib. i, Della divisione degli Uccelli da rapina (pp. 81-117), the different kinds of falcons and hawks are described, as well as the method of training and flying the Goshawk and Sparrow-hawk, the former of which was much used in Italy in the seventeenth century for taking partridges and pheasants. In cap. ix. Lib. i, Dellostrucciero (pp. 119-173) (though the headline throughout this chapter runs "Cap. viii. Lib. i"), the qualities of a good falconer are noted, the mode of training falcons, making them to the hood, &c., and general advice as to feeding and moulting.

In the previous edition of 1626 this information is given in caps. vi.—vii. Lib. i (pp. 41-137). Schneider, who cites the edition of 1626 in his "Catalogus auctorum rei accipitrariae" appended to his edition of the work of the Emperor Frederick II. (No. 308), expresses a poor opinion of it, regarding it as entirely a compilation—"natura avium rapacium, earumque educatio, et disciplina omnis venatoria et medica explicatur; sed hac omnia cum toto libro ex pluribus alis transcripta nullam proprius usus commendationem habent" (op. cit. ii. p. 14). The author no doubt borrowed largely from Carcano (No. 267).

278. OLINA (Gio. Pietro). Uccelliera overo Discorso della natura e proprieta di diversi Uccelli e in particolare di que che cantano. Con il modo de prendergli, conoscergli, allevargli e mantenergli. E
ITALIAN FALCONERS OF THE XVII CENTURY

Partridge-hawking with the Goshawk.

From an engraving by Tempesta, 1622.
con le Figure cavate dal vero e diligentemente intagliate in rame dal Tempesta e dal Villamena. Opera di Gio. Pietro Olina, Novarese, Dottor di Legge. Dedicata al Sig. Cavalier dal Pozzo. [Armorial.] Con privilegio del Sommo Pontefice. In Roma, appresso Andrea Fei. 1622. 4to.

Dedication 2 pp., then 67 leaves with full-page engraving on verso of each; pp. 68–81 to Indice, which occupies 6 leaves.

Another edition on larger and better paper, with title slightly altered and within engraved border. In Roma, presso M. Angelo di Rossi, 1684, 4to. In this edition the following plates have been re-engraved:—Tordo, p. 5; Bubbola, p. 36; Caccia col bracco a rete, p. 51; Dell' uccellar con la ragna, p. 61; and all the plates differ from those in the earlier edition in having a border at top and bottom.

Considering the date at which these engravings were executed, they are much superior to the figures of birds by English and French artists of the same period, excepting perhaps those by Francis Barlow engraved by Hollar. Chiefly song-birds are represented of the natural size (pp. 1–50), but in addition (pp. 51–81) there are plates of partridge and quail netting; partridge-hawking with the Goshawk; trap to catch a Sparrow-hawk; and illustrations of the mode in which bird-catchers employ the Little Owl (Civetta) and falconers the Eagle Owl (Gufo) depicted on a much finer scale by Ridinger (No. 103).

A French translation of Olina's work appeared in Paris in 1774 (No. 178).

279. FRANCUCCI (Scipione, Aretino). LA CACIA ETRUSCA: POEMA. Firenze, appresso i Giunti. 1624. 4to.

Not seen. Thus described by Lastri (Bibl. Georgica, p. 56): "Canti xvi. in ottava rima. S' imagina e si rappresenta una nobilissima caccia in Toscana, dove intervengono con Ferdinando II. de Medici, i principali signori di Roma e di Toscana. Più descrittivo che istruttivo."

As Falconry was then popular in Tuscany, it will probably be found mentioned by this author. See Mortara (No. 293).
280. CORSINI (Accursio). _Apologetico alla Caccia_, ove dopo narrati i vitii da molte Scrittori rimproverati alla _Caccia e Cacciatori_, scoprioni le virtù di lei, e il modo d' usarla per conseguir ottimo temperamento di complessione, quadratura di corpo, continua sanità, fortezza ed agilità militare acuttezza di sensi sagacità, d’animo, e longa vita . . . . raccolta per l’excellentissimo Dottor di Leggi Accursio Corsini, gentilhuomo di Bergamo. [Vignette.] In Bergamo, per Valerio Ventura. 1626. 4to.

None but the most enthusiastic reader of books relating to the chase would attempt to peruse the _otto libri dell’Apologetica della Caccia_ of Corsini. His closely printed volume of over 600 pages teaches nothing on any branch of the chase, and merely embodies arguments to prove the health-restoring, life-giving, mind-instructing advantages of field sports which most readers at the outset would probably be willing to concede. Moreover, the work relates solely to the _Caccia de Quadrupedi_, for, although, as we gather from his concluding remarks in book viii., the author contemplated the preparation of certain _discorsi della nobilissima Caccia aerea di gli Augelli (e della aquatica Caccia de Pesci)_ it does not appear that they were ever printed.

281. BIRAGO (Francesco). _Trattato Cinegetico overo della Caccia_. Milano. 1626. 8vo.

Not in the British Museum, and not seen. Probably, as in other works of the kind of this period, Falconry, amongst other field sports, receives some share of attention.

282. GALLEGARIS (Bernardino). _Lo Strucccierno_ di Bernardino Gallegaris, nobile Opitergino [of

A copy of this scarce little book, purchased for 40s. at the sale of M. Bartel's library in April 1889, is in the collection of M. Pierre A. Pichot, of Paris, where we lately examined it.

Lastri, in his Biblioteca Georgica (p. 58), cites this author as "Gallevari (Bernardino), Strucchiero . . . per allevare gli Uccelli rapaci. Venezia, 1646."

Not in the British Museum, and not seen. Doubtful whether any reference to Falconry, though this subject is dealt with in books having a similar title, e.g., Saincte Aulaire, Louange de la Chasse (No. 155, note).

Translated from the Latin by Gio. Pietro Bergantini. Embellished with portraits and vignettes, the Italian translation and Latin original being printed in parallel columns.
18 prelim. leaves; Del Falconare, pp. 1–223; L' Uccellatura, separately paged, pp. 1–50; Catalogo degli autori, and Indice, 9 leaves.

Appended to the poem of Tuano are some notes by the author showing the division of all hawks used by falconers into two classes: the long-winged birds of the lure—*Loraria seu Pinnaria* (Gallis, oyseaux de leurre)—and the short-winged birds of the fist—*Pugilares* (Gallis, oyseaux de poing)—their names at different ages (as eyess, brancher, sore-hawk) being added, with the supposed Latin equivalents. For some account of this author see Latin writers, under Thuanus (p. 166).

This bibliography may be mentioned here as a useful work of reference for books on the chase by Italian writers printed before the middle of the eighteenth century.

With portrait and twelve copper plates. Mentioned by Lastri (p. 101), but without date. Of interest to falconers only on account of the methods described for taking hawks.

Lastri (*Bibl. Georgica*), obviously through a misprint, cites this author as "Guarinqui (Ab. Girolamo)."
ITALIAN.

For article "Falconeria."

1 prelim. leaf; pp. i–116. The first edition of this esteemed poem, published by his widow two years after the author's death. It relates to fowling rather than to Falconry, but a variety of birds are mentioned, including falcons and hawks, "il rapitor falcon" e "lo sparavier."

"Già presso all' alte nubi attorno gira
Lo Sparavier con l'affamato rostro,
E col l'unghie mortifere sanguigne,
E l'aer sotto e la campagna guata
Preda cercando, e colà suso un punto
" Sembra all' occhio più acuto che s'affissa."

There have been several editions:—Parma (Gozzi), 1803, 8vo; Verona (Bisesti), 1807, 8vo; Verona (Moroni), 1807, 4to; Parma (Carmignani), 1815, 8vo; Venetia (Orlandelli), 1818, 8vo; Verona (Bisesti), 1818, 12mo; Venezia (Nardini), 1819, 8vo; Venezia (Molinari), 1824, 8vo; Roma (Solviucci), 1824, 8vo; Verona (La Minerva), 1857, 8vo; Venezia (Antonelli a cura del Cav. F. Scolari), 1859, 8vo; Verona (Civelli), 1879, 12mo.

Although deserving of better paper and type, the latest edition, by A. Squarzoni, Verona, 1888, on account of the editor's notes, will probably be the most acceptable to those who desire to read this poem and thoroughly understand all the allusions in the text. It is thus entitled:—

L' Uccellagione di Antonio Tirabosco con le cor-

Pp. 1–4. Some account of the author is given in the Preface (pp. 1–8), and, à propos of the allusions to hawks, the editor has furnished a brief historical sketch of Falconry (pp. 90–95). The original MS. of this poem, it appears, is preserved in the Seminario dall' Abate Santi Fontano, at Verona, and, by the courtesy of the Rector of that institution, was produced for the editor's inspection and use in preparing this edition.

It is curious that a work so much esteemed in Italy as to have passed through a dozen editions should not yet have found a translator in some other country.

A useful work of reference (pp. i.–xi.; 1–152) for Italian books on the chase printed before 1787, though not free from errors and omissions.

291. BOSSI (Luigi). TRATTATO DELLE MALATTIE DEGLI UCCELLI e dei diversi metodi di curarle: si aggiungono alcune altre richere utili e curiosi di ornitologia. Milano. 1822. 8vo.

Not in the British Museum, and not seen.

Including half-title and title, Prenozione, and Indice, pp. 1–104.
No head-lines. Divided into ten chapters, the longest being cap. viii., "Delle caccia degli ucelli praticata col mezzo dei Falconi," pp. 33–89. This chapter is divided into the following sections:—
(1) Della diverse specie di Falconi. (2) Altri ucelli di rapina adoperati per la caccia (Smeriglio, Astore, e Sparviere). (3) Metodo praticato per allevare i Falconi. (4) Modo d'ammaestrare i Falconi. (5) Malattie dei Falconi e degli Sparvieri. (6) Nomenclatura degli' attrezzi adoperati per custodire i Falconi.

The 9th chapter treats of the Eagle (Dell'Aquila), which the author refers to as being occasionally used for the chase, and being trained to take hares, foxes, and young roe deer; but he adds (p. 90): "ma colui che porta I'aquila debb' essere molto forte per poterla sostenere."

293. MORTARA (Conte Alessandro). Scritture Antiche ToscanE di Falconeria ed alcuni capitoli nell'originale Francese del Tesoro di Brunetto Latini sopra la stessa materia con annotazioni del Colonello Conte Alessandro Mortara. Prato, Tipografia F. Albertghetti e Ci. 1851. 8vo.

In this privately printed and now scarce octavo pamphlet of 50 pp., dedicated to lovers of the Tuscan tongue, agli amatori della Toscana favella, Count Mortara has published, for the first time, two Tuscan tracts on Falconry from the original MSS., preserved in the Bodleian Library, Oxford, and entitled (1) "Trattato de' Falconi ed altri Ucelli di Ratto buoni alla Caccia, e dell modo di ammaestrarli;" (2) "Frammento di un Trattato dell cura delle malattie degli Ucelli di Ratto, che l' uomo tiene per diletto d' uccellare." To these he has added (3) the chapters on Falconry from the work of Brunetto Latini (No. 263), "Alcuni Capitoli del Libro primo del Tesoro di Ser Brunetto Latini ne' quali si tratta degli Astori, degli Sparvieri, de' Falconi, e degli Smerli, col volgarizzamento accanto di Bono Giamboni;" the original French text and the Italian translation of Giamboni being printed on opposite pages. It should be observed that the numeration and headings of these chapters as given by Count Mortara, from a MS. assigned to the end of the thirteenth
century, and preserved in the Bodleian Library, Oxford (Douce collection, No. 319), do not quite accord with those furnished by M. Chabaille, as above quoted (see No. 263). For the purpose of comparison, Count Mortara’s version is here given:—Chap. 142, De toutes manières d’ostors (Degli Astori); Chap. 143, Encore de toutes manières d’ostors (Anche degli Astori); Chap. 144, Ci dit de tous Espreviers (Degli Sparvieri); Chap. 145, Ci dit des Faucons (De Falconi); Chap. 146, Ça dit de Esmerillons (Degli Smerli).

The editor has added throughout numerous explanatory footnotes.

294. SPEZI (Giuseppe). Due Trattati del Governo e delle Infermità degli Uccelli, testi di lingua inediti cavati di un codice Vaticano, e pubblicati e con note illustrati dal Prof. Giuseppe Spezi. Roma, Tipografia delle Scienze Matematiche e Fisiche. 1864. 8vo.

Pp. i–xv. and 1–84. Cited by Zambrini in his Introduction (p. xii.) to the Libro delle Nature degli Uccelli fatto per lo Re Danchi (No. 296). The first tract is divided into forty-one chapters (pp. 1–56); the second into twenty-one (pp. 57–70), the remaining pages being occupied with explanatory notes. In the opinion of the editor, the late Prof. Spezi, this operetta, “sia una traduzione Toscana di antico libro Persiano, volto da prima nell’ Arabica favella, ovvero nella Latina, o nella provenzale o francese, e quindi trasportato sul principio del mille e trecento nella lingua nostra.”

Originally published in the periodical Il Propugnatore, edited by Prof. Zambrini, and a few copies separately printed, one of
which is in the writer's possession. Fifty-five pages divided into fifty-eight chapters with the special title (p. 13):

"Trattatto del governo, delle malattie e guarigioni de' Falconi, Astori e Sparvieri."

Prof. Zambrini, in his Introduction to the Libro delle nature degli Uccelli (No. 296), says (pp. xiii.-xiv.): "La lingua non si pare affatto Toscana, ed è versione, come apertamente vi si dichiara dal provenzale in Latino: aci paraule che non furono intese per lo copiatore, ed imperò sono in provinciali istesso. In origine anche questa operetta sembra una compilazione fatta sopra gli ammaestramenti del Re Danco e di maestro Guilielmo figliuolo che fue di Margher Appolitano e falconieri inutrito in corte dello Re Rugieri." (Malgherio fedè Ceruti, p. 20.)

"Edizione di soli 202 esemplari per ordine numerati," forming No. 140 in the Scelta di Curiosita Letterarie inedite o rare dal secolo xiii. al xvii., pp. i.-xxxiv.; 1-70, and Indice.

One of the most remarkable printed books on Falconry, on account of the chromo-lithographic and facsimile miniatures introduced in the text. Introduccion, pp. i.-xxiv. Italian text from the Latin beginning "Incipit Liber de curis Avium" (pp. 1-56), and ending "Explicit Liber, Deo Gratias." Notes, pp. 57-70, and Index, p. 71.

The editor compares his text with the fragment printed by Count Mortara (No. 293), and shows the variations. His notes at the end (numbering 91) are most useful and interesting.

See note to Le Roi Dancus (No. 139).

This treatise (pp. 1-153), printed from an Italian MS., forms
No. 154 of the *Scelta di Curiosita Letterarie inedite o rare dal secolo xiii. al xvii.* It is divided into 210 short chapters (two others being wanting), several of them consisting of three or four lines only, and begins: "Qui se comenza le nature de li falconì, astori, e sparavìeri, le sue cure de tute infirmitade como se pono sanare." It would seem to have been derived from the Persian through an unpublished Latin translation; perhaps copied originally from one made for the Emperor Frederick II., at whose request, on his return from the Crusades, several translations from Persian and Arabic MSS. were undertaken by his physician and secretary. Regarding its origin and date of composition, Prof. Ferraro says: "Le crociate ponendo l’Occidente in contatto coll’ Oriente, avevano quest’ arte rinfocolata. I Persiani, i Turchi, gli Indiani conosciuti in essa maestri, furono invitati a venire in Europa, e si tradussero le opere che intorno alla falconeria avevano scritte, nelle lingue romanze che allora sorgevano. Una di essa sembrami appunto la presente, nella quale non solo si cita un Re Danchi o Danco, Indiano, ricordato da altri libri trattanti di simile materia; ma si parla altresì di alcuni principi che al nome sembrano Tartari, regnanti ai tempi di Marco Polo in Persia, ed il traduttore o l’autore del libro chiamasi anche *Persiano*" (Prefazione, p. 7).

Mention is made of a physician Gatepio (p. 27); of Chaicham or Chaican, a King of Persia (pp. 28, 47, 55); and of one Cluay (p. 35), who, it is suggested, may have been one of the Tartar princes who reigned in Persia in the time of Marco Polo.

Scattered throughout the treatise are Persian names for hawks and for the maladies to which they are liable—a subject which occupies the greater portion of the work.

At p. 12 of his *Prefazione* Prof. Ferraro alludes to the works of Raimondi (No. 277) and "Chippa." This should be Crippa; Bonaventura Crippa, *Trattato della Caccia* (2da ed. Milano, 1834, 12mo, pp. 311). It treats generally of the chase in 4 sections, viz., (1) origin of hunting; chase of the bear, wolf, fox, &c.; (2) chase of land birds; (3) of water birds; (4) dogs used for the chase. In the 2nd section, cap. 2 is entitled *Dell’ arte della Falconeria*, and cap. 3 *Ammmaestramento del Falcone praticate degli Antichi*. Reprinted at Milan, 1871.
Latin.

209 leaves, without title page, pagination, register, or catchwords; with 35 lines to a full page. This is the first edition that has a date. Composed in 1307, at the desire of Charles II., King of Sicily, and translated into French in 1373, at the request of Charles V. of France, this work, in its plan, resembles the subsequently printed Maison Rustique of Estienne and Liebault (No. 148), which was translated into English by Surflet (No. 16). It deals with agriculture and field sports, the ninth book containing a chapter on Falconry.

It passed through several editions in the original Latin—e.g., at Louvain, per Johannem de Westphalia, 1473, 1474, and 1475; Argentine, 1486; Antwerp, 1500; Basle, 1538 and 1548; all in folio—and has been translated into German (No. 96), French (No. 141), and Italian (No. 264).

299. BEAUVAIS (Vincent de). VINCENTII BELLOVACENSIS SPECULUM NATURALE. Strasburg. 1473. folio.

Other editions, Augsburg, 1474; Strasburg, 1476; and Nuremberg, 1486 (fide Schlegel).

This author, who was a friar of the Order of Preachers and a contemporary of Albertus Magnus, Bishop of Ratisbon, has, in his Speculum Naturale, reproduced almost, textually, the apocry-
The first edition of this celebrated treatise, which was composed at Cologne between 1262 and 1280, by Albert de Bollstädt (surnamed by his contemporaries, the Great), Bishop of Ratisbon. A second edition was printed at Mantua, in 1479, and a later edition at Lyons in 1651, all in folio. It will be found in lib. xxiii. at the end of tom. vi. of his general work, De Animalibus. and is also printed with the work of the Emperor Frederick II., De Arte Venandi cum avibus (No. 308), which see.

A German translation, by Walther Kyff, was published in 1545, at Frankfort-am-Main, and an earlier French translation of a portion is printed by M. Henri Dairvault in his edition of the Livre du Roi Dancus (No. 139).

It is a crude compilation from Symmachus (No. 223), the Emperor Frederick's work (No. 308), and other sources, and shows the author to have been but imperfectly acquainted with the subject.

301. **AQUAVIVA (Belisaire, Duc de Nardo)**. Belisarii Aquavivi Aragonii Neritinorum Ducis Aliquot aurei libelli de Principum liberis educandis, de Venatione, de Aucupio, de Re Militari, de singulari certamine. Basileae, apud Petrum Pernam. 1518. sm. 8vo.

Not seen; cited by Lastri, Bibliotheca Georgica

EDITIO ALTERA. BELISARI NERITINORUM DUCIS ALIQUOT AUREOLI VERE LIBELLI, de Principum liberis educandis, de Venatione, de Aucupio, de re Militari, de singulari certamine. His additum est elegans poematum Michaelis Marulli de Principum institutione, nunquam hactenus editum. [Vignette.] Basileæ, ex officina Petri Pernæ. 1578. 8vo.

7 prelim. leaves, pp. 1-224, and Index, pp. 89-114. "Belisarii Neritinorum Ducis Libellus de Aucupio" contains the following sections:—De accipitribus qui vulgo Hierifalcones nominantur; De accipitribus qui Sacri appellantur deq milvorum naturse; De accipitribus Peregrinis; De medianis; De accipitribus generosis qui vulgo Gentiles nuncupantur; De ignobilibus quos vulgo Villanos vocant accipitribus; De quibusdam accipitrum morbis sanandis; Epilogus.

According to Huzard (No. 191), "Notes bibliographiques concernant les œuvres du Duc de Nardo," the addition here made forms part, and is to be found at the end, of the work of Leunclavius, printed at Basle in 1578.

302. GYRALDUS(L. G.). LILI GREGORII GYRALDI DIALOGISMUS DE VENATIONE ACCIPITRUM CETERAR-UMQUE AVIUM RAPACIUM V IN EJUSDEM DIALOGISMIS. Venetiis. 1553. 12mo.

Other editions, Frankfort 1585, 1586, 1603, 1617, 1620.

A German translation by Rud. Heusslein was printed at Zürich in 1581, and at Frankfort in 1600 and 1609, all in folio. An English translation by Topsell, with the title "A Historie of Four-footed Beastes," &c., was published in 1658, folio, of which another edition appeared in 1607.

Gesner has been surnamed the German Pliny, and it was to him that Dr. Caius addressed his celebrated Libellus de Canibus Britannicis. For much of the information in his treatise de Avibus regarding the training of hawks, Gesner was apparently indebted to the now very rare work of Eberhard Tapp (No. 93), and to a MS. of Demetrius of Constantinople (No. 327).

304. TARDIVUS (Guillelmus). De arte Accipitrum una cum Frederici II. Imperatoris de arte Venandi cum avibus, et Manfredi regis additionibus. Geneva. 1560. 8vo.

Other editions, Basle, 1578, 8vo, and Augsburg, 1596, 8vo (fide Lallemant). See note to the "Livre de l'art de Faulconnerie par Guillaume Tardif," anteà, p. 72.

Editio altera, Spiræ Nemetum, 1594, 8vo. The four books of Husbandry occupy 330 leaves. Then follows, to 346 verso, a treatise on the laws relating to Agriculture. To this succeeds "Thereutices ; hoc est de Venatione, Aucupio, atque Piscatione Compendium ;" wherein (at p. 375), in the section De Aucupio, we find observations on Hawking, with the side-notes, Accipi-
trarium aucupium, Aucupii modi, Accipitrum genera, Pretium accipitrum, and Domandi ratio. The author also describes the "seeling" of hawks to tame them, and their periodical moulting, adding remarks on taking partridges and quails.

The "Four Books of Husbandry" were translated, under this name, by "Barnaby Googe, Esquire," at London, and printed by Richard Watkins, 1577, 4to. But he omitted the treatise de Legibus, and the Compendium de Venatione, Aucupio, &c.

The first, though not the best, edition of this esteemed poem by Jacques Auguste de Thou; the quarto of 1735, in which the Italian translation is given in parallel columns with the Latin original, being generally preferred.

In the second edition another "book" was added with the following title:—

Title 1, preliminary leaf (pp. 1–95), ending "Hieracosophion Liber tertius et ultimus explicit." On p. 95 verso, an important note on the various kinds of hawks used for Falconry, with the Latin and French names for them. See note to No. 284.

Following this note, six leaves (Nos. i.–vi.) with Epistola, in verse, ad Philippium Huraltum Franciae Cancellarium.

A third edition (pp. 1–109), including title. On p. 107 the note on Hawks, with their Latin and French names, above referred to.
This poem has also been printed in the *Delicæ Poetarum Gallorun*, 1609 (pars iii. pp. 922–1001) and by Nicholas Rigault in his *Rei Acipitrariae Scriptores*, 1612 (pp. 1–99), the latest edition being that with which the Italian translation is given, published in Venice in 1735 (see No. 284).

The author, Jacques Auguste de Thou, was born in 1553, in Paris, where he was educated, and rose to such distinction as to become President of the Parliament, and Privy Councillor to two Kings of France, Henri III. and Henri IV. He is best known to fame as the author of a Latin History of his own time (1546–1608) in four folio volumes. Voltaire, who ranks him with Hume, styles him an historian distinguished for eloquence and veracity. Cardinal du Perron placed him next to Sallust and Tacitus. Dr. Johnson had so high an opinion of his "History" that he entertained serious thoughts of translating it (cf. Boswell's Life of Johnson, ed. 1804, vol. iii. p. 691).

This poem on the art of Hawking written in Latin hexameters was composed about the year 1581–82 (when he was twenty-nine) while travelling with his friend Pierre Pithou through Languedoc and Provence, where no doubt at that period hawking was commonly practised. He may also have seen something of the sport in Italy when travelling in the suite of the Comte de Foix on an embassy to Rome (1573–74), and perhaps too in Germany (1579) when visiting Languet, the Prime Minister of the Elector of Saxony at Strasburg.

Collinson in his "Life of Thuanus" (8vo, 1807, pp. 34, 80) gives the date of this composition as 1575 (which would make the author only twenty-two when it was written), but, although professing to give some account of his writings, he affords no information as to the circumstances under which this poem was composed.

It is related of Thuanus that, when travelling through France with M. Schomberg on an embassy from Henri III. to the King of Navarre, they were entertained for some days at Mande, the seat of the Bishop and Count of Gevandan. At the first repast it was observed with surprise that all the game or wild fowl brought to table wanted either a head, a wing, a leg, or some other part, which occasioned their host pleasantly to apologise for the voracity of his caterer, who always took the liberty of first tasting what he had procured. It turned out that the game
in question had been taken by the peasants from the nests of eagles in the neighbourhood, whither it had been carried to feed their young.

For fuller details of the life of Thuanus the reader may be referred to Buckley's edition of his "History" (vol. vii.). He died in Paris in 1617, and it is of interest to note that one of his executors was Nicholas Rigault, who in 1612 (as above noticed) had printed his poem in the Rei Accipitrariae Scriptores (No. 314), the other executor being P. du Puy. "Thuanus," says Thomas Hearne, "though he writ Latin admirably well, yet he was not ready nor clear in speaking it. So in a letter from a great man to Sir Robt. Cotton; MS."—"Reliquiae Hearnianae," vol. i. p. 217.

Other editions, Helmstadt 1592, Cologne 1598, Marburg 1698, all in octavo. This treatise is also printed in vol. xvii. of the collection entitled Tractatus Tractatuwm, Venetiae, 1584. There is likewise a quarto edition thus entitled:—

Printed also with Bruckmann (No. 312) and Mor (No. 310) in Tractus III Clarissimorum Virorum (pp. 47-109), and by Fritsch in his Corpus Juris Venatorio-Forestalis, Lipsiae, 1702, folio. See Bruckmann (No. 312).

Augustæ Vindelicorum ad insigne Pinus apud Johannem Prætorium. 1596. sm. 8vo.

7 preliminary leaves, including a folding plate of the Emperor seated on a throne with two attendants on their knees with hawks (from an Italian miniature of the thirteenth century here reproduced—see plate). Liber primus, pp. 1-138; Liber secundus, pp. 139-358. Albertus Magnus de Falconibus, pp. 359-414. The Emperor's treatise ends on p. 358, the remainder of the volume (pp. 359-414) being occupied with the work of Albertus. It was composed about the year 1247, towards the end of his reign. Evidence of the royal authorship is to be found in the mention of his name in the Prologue, reference to his voyage to the East, transmission of the MS. to his son Prince Manfred when seventeen or eighteen years of age, i.e., in 1248-49, and the testimony of Albertus Magnus. The Emperor, who died in 1250, had the work in preparation for thirty years, but the affairs of State long prevented him from completing it.

Prince Manfred arranged some of the chapters in better order, made certain additions which are distinguished by his name, and, with the aid of notes found amongst his royal father's papers, filled up a gap which existed in the original MS. But he was not the only possessor of the treatise. There were copies in which there were no traces of his additions: in fact, the only two copies of the MS. now known to exist are without these additions, although they were to be found in the copy which, in the sixteenth century, came to the hands of Joachim Camerarius, the learned doctor of Nuremberg, and from which this edition was printed. See Pichon (No. 201).

The Emperor's treatise was printed with the Latin version of the Fauconnerie de Guillaume Tardif (No. 304) at Geneva, 1560, and at Basle, 1578, both very scarce editions, and in 1756 a German translation by Pacius (No. 101) was printed at Ansbach. In 1788 Prof. P. G. Schneider, of Leipzig, edited the work in 2 vols. quarto, with the following title:—

Reliqua Librorum Frederici II. Imperatoris de arte Venandi cum Avibus: Cum Manfredi Regis additionibus: ex membranaceo codice Camerarii pri-
ITALIAN MINIATURES OF THE XIII CENTURY.

Illustrating the Latin MS. of the Emperor Frederick II.

"De arte venandi cum avibus."
It is asserted by many writers that the art of Falconry was unknown in Italy before the twelfth century, when it was introduced by the Emperor Frederick Barbarossa. His grandson Frederick II. (born 1194, died 1250) spent much of his life in Italy and Sicily, and practised this sport there with great enthusiasm. (See von Raumer, Geschichte der Hohenstaufen, second ed., Leipzig, 1841, vol. iii. pp. 423–434.) He had seen something of it in the East, and in 1239, on his return from a crusade which he had undertaken the year before, when he was crowned King of Jerusalem and Sicily, he brought with him from Syria and Arabia several expert falconers with their hawks, and spent much of his leisure time in learning from them the secrets of their art, which he considered the noblest and most worthy of all the arts. The excellent treatise which he composed in Latin with the title above given was the first which appeared in the West, and is still one of the best which exists.

There would seem, however, to be some blanks in it, and, in particular, a chapter on the Goshawk is wanting, to which reference is made Lib. ii. cap. 2.

The hawks used at that time were the Jerfalcon, Saker, Peregrine Falcon, Lanner, Goshawk, and Sparrow-hawk. (The eagle, he says, is too heavy to be carried on the fist.) These were either taken out of the nest or caught on passage. It was also the practice to take the eggs out of the nest and get them hatched under hens, but the Emperor himself maintained that birds thus procured were useless for the purposes of Falconry. He advises (Lib. ii. cap. 31, p. 91) that the eyesses should be left as long as possible in the nest, as they are brought up far better there than in captivity. It is necessary, he says, to feed them well, in order to avoid injury to their feathers, by which expression, no doubt, he refers to what English falconers term
“hunger-traces.” Eyesses, he says (cap. 35, p. 95), should be fed twice a day, morning and evening; no one should be allowed to approach, but the person who has charge of them; and they should be allowed complete liberty until full grown. This period having arrived, they are taken up in the evening by candle-light, the extreme points of the talons are “coped,” jesses and bells put on, and their eyes “seeled” (de ciliazione seu blutione ipsorum, Lib. ii. cap. 37, p. 67, and cap. 45, p. 106).

The Emperor discourses at length on jesses, swivel, leash, and bell (de factis, de tornetto, de longa et de campanella), and it is evident from his descriptions that these did not differ much in his day from those used at the present time. He also mentions the drawer (now obsolete), the creance, the lure and how to garnish it, the train, or dead lure (made of the skin of a hare, crane, or heron), and the drum, used to make wild ducks and other water-fowl rise.

It appears that at this period the use of the short leash (French courtrier) for a Goshawk was unknown; at least the Emperor nowhere mentions it in his work. As to the bell, it is said that it was sometimes attached to one or two of the middle feathers of the tail, and on this account it was necessary to perforate these feathers; but the Emperor was opposed to this practice (Lib. ii. cap. 41, p. 101). He then describes the proper way to hold the leash between the fingers, so as to carry the hawk properly on the fist, precisely as it is carried at the present day. He disagrees with those who carry the bird always on the same hand, whether right or left, and maintains that it is as well to carry it sometimes on one, sometimes on the other, according to the direction of the wind (Lib. ii. cap. 42, p. 102). The falconer’s glove (chirotheca) should be roomy (amplum, ut cito posset indui et exuī), and made of thick leather (de cortō grosse). The falconer’s bag (bursa seu carneria) is attached to his belt (ad cingulum suum), and serves to carry the lure (tiratoria) and the hawk’s meat.

Alluding to the mode of capturing hawks, the Emperor merely states that they are taken in nets without giving any description. On being caught, the hawk is at once put in a “sock” or linen bandage (maleolum), and is then treated like an eyess.

Dealing with the training, he observes that there are falconers who neither see their hawks, nor hood them, thus following the
ITALIAN MINIATURES OF THE XIII CENTURY.
Illustrating the Latin M.S. of the Emperor Frederick II.
"De arte venandi cum avibus."
ancient practice; for the art of seeeling hawks, he says, is a recent invention, and as for the hood, he asserts that it was he who, imitating the practice of Eastern falconers, first introduced it into Europe (Lib. ii. cap. 77, p. 162).

After having the jesses put on, the bird was carried for twenty-four hours continuously on the fist without food. This fatiguing operation over, it was given the leg of a fowl. The first lesson was to make the bird jump to the fist. Then being no longer frightened at the approach of its owner, and becoming accustomed to the noise of men and domestic animals, it was gradually unseeled (Lib. ii. cap. 54, p. 125, and cap. 55, p. 127).

To make a hawk sit quiet on the fist, the Emperor recommends that it should be sprinkled with cold water from time to time (Lib. ii. cap. 68, p. 147), a practice still in vogue with the Dutch falconers.

At length being tamed, it is carried to the field, first on foot, then on horseback, choosing on such occasions a calm day, and avoiding too great heat (p. 151).

As to the form of perch, the author describes three kinds, namely, the high perch (pertica alta), which was set up in the room a little distance from the wall; the low perch (pertica imia), just high enough from the ground to prevent the bird from rubbing its tail feathers on the floor; and the block (sedile), pyramidal in form and made either of wood or of stone. The low perch was intended for hawks that were seeled, and the high perch for those that were not seeled.

The Emperor does not appear to have been acquainted with the use of the curtain or screen of canvas which in the modern hawk-house depends from the under-side of the perch to prevent a hawk from swinging after bating off. At least, he makes no mention of it, and discourses at some length on the means to be taken in order to prevent hawks from twisting their leashes round the perch.

As to the illustrations here given from Italian miniatures of the thirteenth century a few words are necessary.

They have been carefully reproduced from the facsimiles in D'Agincourt's famous work, "Histoire de l'Art par les monumens depuis sa decadence au IVe siecle jusqu'a son renouvellement au XVIe" (4 vols. folio, Paris, 1823), where they are thus described (tom. iii. p. 78, pl. 73): "Miniatures d'un traité de
Fauconnerie par l'Empereur Frédéric II. MS. Latin du XIIIe siècle. Lucre de renaissance de cette espèce de peinture en Italie. Les peintures où les premiers rayons de cette aurore semblent se montrer ont pour l'objet d'enrichir et d'expliquer une production d'une plume auguste (p. 79). L'Empereur Frédéric II. était né en Italie, il y avait reçu une éducation digne de son rang, et, ce qui est beaucoup plus rare, il en avait profité. La chasse à l'oiseau était dans ce pays comme ailleurs au XIIIe siècle l'occupation de la noblesse et des souverains. Frédéric, jaloux de perfectionner cet art par des préceptes, en dicta ou en fit écrire les éléments sous ses yeux avec assez de soin pour qu'on lui attribuât ce travail, et il fit joindre au manuscrit des peintures relatives à tout ce qui concernait l'entretien, l'éducation et l'emploi des faucons."

"Il fut si bien servi par le peintre que rien ne manque à la démonstration de la science qu'il veut enseigner. L'ouvrage forme une suite de peintures didactiques sur les oiseaux employés à la chasse du vol."

"Les titres maintenus sur la planche au dessous de chaque tableau et choisis dans les différents chapitres du traité comme propres à présenter une série de leçons, prouveront l'intelligence des deux auteurs. Le naturel qu'on remarque dans les attitudes, soit des hommes, soit des oiseaux, est un effet d'un commencement de vérité dans le dessin."

The plate containing the larger figure of the Emperor seated, with a falconer in a kneeling attitude presenting him with a hawk, forms the frontispiece to the first edition of the work (No. 308), the introduction of a second figure of a falconer being admissible from the greater width of a folding plate.

Compiled chiefly from the works of Demetrius (No. 327), the Emperor Frederick II. (No. 308), Belisarius Aquaviva (No. 301), Albertus Magnus (No. 300), and Carcano (No. 267).
Ornithologiæ hoc est de Avibus Historiæ Libri XII. Francofurti, Typis Wolfgangi Richteri, sumptibus heredum Nicolai Bassæi. 1610. folio.

This edition, printed in double column, is without illustrations, and has no particular merit. Another edition was printed at Frankfurt, 1620–1635, where also a German translation, by Peter Offenbach, appeared in folio, 1610–1640.

Engraved title and numerous woodcuts. The books relating to Falconry are the following:—“Liber quartus qui est de Accipitribus in genere;” “Liber quintus qui est de Accipitribus in specie;” “Liber sextus qui est de Falconibus in genere;” “Liber septimus qui est de Falconibus in specie.”

At the end, “Index nominorum septendecim linguarum—sc. Graeca, Hebraica, Arabica, Persica, Ægyptiaca, Indica [Amer. Merid.], Italica, Gallica, Hispanica, Germanica, Flandrica, Anglica, Polonica, Muscovitica, Illyrica, Turcica.”

The number of languages is sixteen, not seventeen. If the Eastern vocabularies are not more accurate than the European ones, the Index is not of much value. There are numerous typographical errors; but on the whole this may be regarded as the most preferable edition of the work, the type being bold, clear, and not in double column, the illustrations affording a further recommendation. Tomus alter, Libri XIII.–XVIII., 1645; Tomus tertius ac postremus, Libri XIX.–XX., 1637.

Another edition, printed with Bruckmann (No. 312), but
with fresh pagination, pp. 1-127. Printed also by Fritsch in his *Corpus Juris Venatorio*Forestalis, folio, Lipsiae, 1702, vol. i. tract 2.

Printed with Mor (No. 310), pp. 128-144. At pp. 141, 142, this author treats *de Aucupio in specie*, and shows that the term *Aucupium* applies especially to the taking of fowl with falcons and hawks, but includes also their capture by means of nets, snares, &c. "*Fit verò Aucupium variis modis et præcipuè Falconibus atque Accipitribus, retibus, laqueis, pedicis, visco, hamo, sclopo et quæcumq, sit capta fuerent, etiam contra prohibitionem cedunt occupanti."

Three tracts on the Laws of Hunting, Fishing, and Hawking—namely, Bruckmann (pp. 1-46); Medices (pp. 47-109), with Index; and Mor (pp. 1-127), fresh pagination, to which is added (pp. 128-144) the tract by Hay (No. 311). Several points of interest to falconers are discussed—as, for example, whether a person taking up a hawk bearing jesses and a bell is bound to restore it to its owner—a point decided by Medices (pp. 104-105) in the affirmative. See No. 307.
These tracts are also printed by Fritsch in his *Corpus Juris Venatorio-Forestalis*, folio, Lipsiae, 1702.

313. **BISCIOLA (Laëlio).** *Aucupii per Falcatus Aves usus quam antiquus quæsitum de Accipitrum genere quædam notata.* In *Lib. xvi* "Horarum Subsecivarum." Ingoldstadii ex typographeo Adami Sartorii. Anno 1611. folio.

This is the title of cap. i. lib. xvi. of the *Horæ Subseciæ* of Bisciola, a work of an encyclopedic nature, published in two vols. folio, as above *(vide p. 1149).*

*Falcatus aves*, "quod sit unguibus introrsum versis more falds" *(p. 1154).* The dissertation is confined to an examination of the views of older authors on the origin of Falconry, and to a division of the birds employed by falconers into the different kinds of hawks, *Accipitres*; and falcons, *Falcones*.

A work now of some rarity and value. Kreysig *(p. 151)* mentions an 8vo edition, published at Basle in 1578 (of which we have not been able to find a copy), and a second quarto of 1619. In addition to the Greek works comprised in this volume, it contains the Latin translations of Symmachus and Theodotio *(No. 223)*, of Gillius from the Greek of Demetrius *(No. 316)*, and of Thuanus *(No. 306)*, the titles of whose works will be found under their names.

The editor, Nicolas Rigault, was librarian to Louis XIII., and one of the executors of de Thou (Thuanus). See note to *No. 30* p 167.

315. **SYMMACHUS (Aquila) et THEODOTIO. Epistole Aquilæ Symmachi et Theodotionis ad Ptole-
mæum Regem Ægypti, De re Accipitraria, Catalana lingua; De diversis generibus Falconum sive Accipitrum; item de infirmitatibus et medecinis eorum secundum Aquilam Symmachum et Theodotionem in Epistola ad Ptolemæum Regem Ægypti. Ex libro incerti auctoris de natura rerum. Lutetiae. 1612. 4to.

Printed by Nicolas Rigaltius in his Rei Accipitrariae Scriptores (No. 314). See also No. 223.

316. GILLIUS (Petrus). De re Accipitraria Liber. Lutetiae. 1612. 4to.

From the Greek of Demetrius Constantinopolitanus (No. 327). First printed with the Historia Animalium of Ælian, Lugduni Batavorum, 1562, 8vo, and subsequently by Rigaltius in his Rei Accipitrariae Scriptores (No. 315), together with the following:

Alius Liber de re Accipitraria minus elegans quam superior et multo durior itaque a nobis versus paulo durius et magis constantia causa quod primum verteramus. Lutetiae. 1612. 4to.

Not in the British Museum, and not seen. Cited by Kreysig (No. 323).

318. ISACHIUS (Alphonsus). De Venatione Tractatus in quo de Piscatione, Aucupio, sylvestriumque insectatione agitur etc. Regii apud Flaminium Bartolum. 1625. 4to.

Printed throughout in italic, and unpaged. Headlines:—"Quæstio prima," "Quæstio secunda," &c., to "Quæstio decima septima." In the tenth of these sections the author discusses
the question which is the most excellent of field sports—Fishing, Hawking, or Hunting.

Kreysig (No. 323) cites an 8vo edition of 1570.

Not in the British Museum, and not seen. Cited by Kreysig (No. 323), and said to contain 4 plates.

Not seen. Cited by Kreysig (No. 323).

This dissertation upon Heron-hawking is cited by Kreysig (No. 323), and is said to contain 5 plates. No copy is to be found in the British Museum, nor have we been able to meet with one elsewhere.

A Latin poem on Hawking (pp. 1–54) in two Books. Not in the British Museum, and probably of some rarity. The above title was transcribed from a copy in the library of M. Pierre A. Pichot, of Paris.

The earliest printed bibliography of works relating to the Chase and Falconry, but, even for the date at which it was published, very incomplete and inaccurate. The absence of notes, moreover, renders it of little value, save as a guide to authors' names, the complete titles of whose works must be sought for elsewhere.

Referring to the value formerly set upon Iceland falcons and the prices paid for them, this author remarks (p. 2):—"Utrum falco islandicus speciei sit singularis, vel ad alias notas referendus nondum constat. Varietates sunt sine dubio 7–9 [these numbers refer to his descriptions] quas soli Daniae Regi vendere tenetur Islandi. Pretium quoque tripexus pro triplici haec varietate Islandis solvendum a rege est constitutum; nempe pretium Falc. 7 (albus) in Islandia est 17 impp. dan. Falc. 8 (albus) 10 impp. Falc. 9 (fuscus) 7 impp."

On being brought from Iceland to Copenhagen these hawks were at least partially trained by the royal falconers before being forwarded as presents to the Courts of Europe.
“Hafniam singulo anno ex Islandiæ portu Holmenshavn transportantur falones hi qui postea, venatione edocti, ad varias aulas principum munera inter septentrionis rariora mittuntur.”

Writing of the Hobby *Falco subbuteo* (p. 3), Brünnich states that this bird, as well as the Goshawk and Iceland Falcon, were trained for hawking at the royal villa near Copenhagen. “*F. gentilis* (Blaæfugl dicitur hic a falconaris Danicus) *islandus et subbuteo* in villa regia prope Hafniam ad venationes instruuntur.”

He also refers to the falconers’ method of imping or repairing broken feathers:—“Retrices lææ v. detritœ reparingur a falconaris addendis alis, acubus nempe belgicis ad basin veteris pennæ novam affigunt; quod observatione dignum ne descriptores tali artificio decepti, novas effingant species vel varietates” (p. 3).

325. **SCHNEIDER (Jo. Gottl.).** **CATALOGUS AUCTORUM** qui de re **ACCIPITRARIA** scripscrunt cum locis inde excerptis. Lipsiæ. 1788. 4to.

This catalogue is appended to the author’s edition of the work of the Emperor Frederick II. (No. 308), vol. ii. pp. 106-125, but is hardly worth mention, since it does not include notices of more than a dozen works on Falconry. The author, however, was evidently sensible of its deficiency when writing as follows:—“Poterunt facile catalogo huic attexere multos alios, imprimis gallice scriptos de arte falconaria libros, quibus usus publicarum copisque abundantium literariis bibliothecarum catalogorumque conceditur, quo mihi carendum est” (p. 125).

Although allusions to the art of Falconry may be found in the works of several Latin authors not mentioned above, as, for example—

Ælian, *De Nat. An.*, lib. ii. cap. 42;
Martial, *Epigr.*, lib. xiv. no. 216;
Oppian, *Cynegeticon*, lib. i. 62-66;

the passages referred to are not of sufficient length or importance to justify the insertion of the full titles of the works in the present bibliography.
BOOKS ON FALCONRY.

In the first volume of this work by the Russian naturalist Pallas, will be found many details of interest to falconers under the head of Jerfalcon (p. 325), Falcon (p. 327), Lanner (p. 331), Hobby (p. 332), Merlin (p. 337), Eagle (*Berkut*, p. 339), Goshawk (p. 367), and Sparrow-hawk (p. 371). The Russian, Tartar, and Calmuck names for these birds are also given, which will be found useful when referring to the Russian works on Falconry hereafter to be mentioned.

This author particularly mentions the delight which the Empress Catharine II. of Russia took in lark-hawking with Merlins, adding that she used to liberate them at the end of the season, fresh ones being caught for her every year (p. 337).

Of the eagle trained by the Tartars, and called by them *Berkut*, he observes:

"Instruitur praesertim ad Anteloparum, et Luporum Vulpiumque venationem, et inter duos falconarios in pertica, vel in ligneo sustentaculo stapedi equitis innixo, tecta oculos praeferitur."

A trained eagle, he says, was considered equal in value to two camels: "Docta aquila apud Kirgisos duobus camelis aequiparatur" (p. 339).

He refers to a white variety of the Goshawk, *Astur palumbarius* which is remarkable:—

GREEK.

Note.—While on the subject of Latin works on Falconry, it may be of interest to refer to some notes by John Holmes on a Latin MS. of Italian execution, fifteenth century, British Museum Add. MSS. 20774 (f. 79).

The writer's name with date occurs at the end thus: "Antonius de Lampugnano cognatus et discipulus Magistri Jacobi de Caponayo, Mediolanensis, scripsit hoc opus anno Domini mccccliiij."

It comprises seven tracts, the titles of which are given by Holmes (Ic). The second is entitled "Tractatus de Libro Moami de dispositionibus rapacium avium et medicamentis infirmitatum occultatum." The book of Moamus, or Mohamin, an Arab falconer, is one of those which, having been first rendered into Latin, was translated by Tardif from the Latin into French (see ante, pp. 66 note and 72 note). It is also mentioned by Arcussia (No. 153), and by Artelouche de Alagona (No. 149), whose work is printed with that of Jean de Franchières (No. 145). An Italian translation of this treatise, made for Ferdinand I. of Aragon, King of Naples, was in the Earl of Ashburnham's library. As to the book of Moamus or Mohamin, see notes to Nos. 139 and 359, and the introductory notice by Jullien to his edition of Tardif (No. 142), p. xvii.

The fourth tract is entitled "Aliae rubrice de infirmitatibus et medicinis secundum Danchum regem," commencing "Danchus rex stabat in suo pallatio" (see No. 139, note).

Holmes refers to an Arabic treatise in the Bodleian Library, Cod. MS. Marsh 148, by Alhegiagi ben Khaithama, which appears to agree nearly with this, and of which the title in Latin would be "Utilitates avium morborumque earum remedia."

Greek.

327. Δημητρίου Κωνσταντινοπόλειτον περὶ τῆς τῶν ἰερακῶν ἀνατροφῆς τε καὶ θεραπείας. 1270.

Demetrius of Constantinople, physician to the Emperor Michael Palaeologus in 1270, is one of the oldest writers on Falconry.
The Greek text of his treatise was first printed in 1612 by Rigault, librarian to Louis XIII., in his *Rei Accipitraria Scriptores* (No. 314) from two MSS. in the Bibliothèque Royale, Paris; but a Latin translation by Pierre Gilles (à Petro Gillio Latine redditus) had been previously published at Leyden in 1562 with the *Historia Animalium* of Ælian. This is reprinted by Rigault (op. cit.), with separate pagination (pp. i–118).

Besides the two MSS. in Paris, there is a third in the Imperial Library at Vienna, in which there are considerable variations (cf. Hammer Purgstall, No. 112, p. xxix.). It was probably this MS. which was lent by a physician of Vienna to Gesner, who in great part translated and incorporated it in his work *De Avibus* (No. 303).

As both this MS. and that used by Gillius (No. 316) have the name of Demetrius at the commencement, it has been assumed that this was the name of the author of the treatise. He styles himself "Constantinopolitou," and addresses himself to the Emperor, who was devoted to training and managing hawks.

The treatise commences by teaching how and when hawks are to be caught; how to choose one; how to distinguish the different kinds; how to tell whether a hawk is sick or in good health; how to tame and train them; and concludes by an enumeration of the various diseases to which hawks are supposed to be liable, with the remedies prescribed. These recipes were apparently copied from older MSS., for the author in his first chapter states that not a few wise men had already written on this part of the subject.

The details which he gives of the methods of catching and training hawks in Greece in his day (the middle of the thirteenth century) are interesting as showing the antiquity of some of the practices well known to modern falconers.

The capture of the birds was effected from a hut in which the falconer was concealed, and from which he let out decoy pigeons, on taking which the hawks themselves were seized.

Another plan was for the falconer to extend himself at full length upon the ground, covering himself with grass, and fluttering a pigeon to attract the hawk, which he grasped by the legs as soon as the pigeon was taken. Hawks were also
A FALCONER OF CYPRUS.

From an engraving after Titian.

The original in possession of the Earl of Carlisle.
captured by pegging down a live pigeon in the midst of limed twigs, or in a net suspended from a tree in front of which was tethered a live fowl or pigeon.

As soon as taken, the hawk was enveloped in a linen "sock" (as is the practice with the Dutch hawk-catchers of the present day), and kept thus for a day or two until the taming commenced. It was then placed in a dark room on a perch, to which it was attached by jesses, and the perch had a linen curtain depending from it, as at the present day.

It was carried indifferently on the right or left hand; was fed only once a day, and had a bath every fourth day. The principles of training were the same then as now, but it seems that the hawks were only flown from the hand, and were not put upon the wing before the game was sprung. They were flown at partridges, pheasants, and wild-ducks, the falconer running quickly towards the quarry, and putting it up with a shout, or, in the case of wild fowl, by beating a drum. In the latter case, says the author, the hawk did not carry bells. Each hawk was flown three or four times a day. It is remarkable that no mention is made of the hood, which was first introduced into Europe by Frederick II., who had learnt its use from Arab falconers when in the East. On the other hand, the use of the curtain, though not mentioned by the Emperor Frederick (No. 308), was (as shown above) known to the Greek falconer.

328. Ορνεοσόφιον ἀγροκότερον.

This anonymous work is the second of the Greek treatises printed by Rigault (op. cit.), and occupies pp. 177–239 of his collection. The Latin translation by Gillius, given in the same volume, is entitled Alius liber de Accipitraria. It is believed to be of later date than the work of Demetrius, and deals entirely with the maladies of hawks and their supposed remedies.

329. Ορνεοσόφιον κελεύσει γεγονός τον ἀοιδο-μον βασιλέως κυρίου Μιχαήλ.

This treatise, which is also anonymous, was composed for the Emperor Michael VIII., and is the third and last of the Greek treatises printed by Rigault (op. cit.).
It has not been translated. It is divided into two parts, of which the first contains descriptions of the different kinds of hawks, while the second relates to the treatment of their diseases.

330. Ιερακοσόφιν εἰς ἰατρείαν όρνηων, καὶ εἰς κοπας καὶ κρωμα, σοῦν ζαγανῶν, φαλκονίων, πετριτῶν, ιερακίων, τζουρακίων καὶ οξυπερφύγων.

Printed by Hammer-Purgstall, in his *Falknerklee* (No. 112), pp. 81–85, with a commentary by von Eichenfeld, pp. 86–88. The MS., in semi-modern Greek, is preserved in the Imperial Library at Vienna. It is virtually an extract from the last-named, and is perhaps the second Greek treatise on the subject referred to by Gesner in his work *De Avibus*.

**Russian.**

331. ЦАРЯ АЛЕКСИЯ МИХАИЛОВИЧА КНИГА ГЛАГОЛЕМСЯ УРЯДНИКЪ: НОВОЕ УЛОЖЕНИЕ НА УСТРОЕНИЕ ЧИНА СОКОЛЬНИЧАГО ПУТИ. 1668.

Tsarýa Alekseyâ Mîchalovitcha Knigha glagolëmsya uryâdnik' : nòvoe ulozhênie na ustroenie chîna sokolînîchova putei. 1668.*

Of all the Russian Sovereigns whose names in history have

* The system of transliteration here adopted is phonetic; but such that the words may be easily found by any one able to use a Russian dictionary. The vowels are pronounced as in Italian; the consonants as in English. The hard sign is indicated in the body of a word by doubling the consonant; the soft sign, when necessary, by ρ. The guttural German ʤ is so written; the thick i (ɪ) is written i.
been associated with a love of field sports, none gave greater support and encouragement to the practice of Falconry than the Tsar Alexis Michaelovitch. At the village of Kolo-mensk, about seven versts from Moscow, he maintained a considerable hawking stud, and employed a very large number of falconers to look after the birds, which were captured by professional hawk-catchers in all parts of the Russian empire. So great was his enthusiasm for this sport that in 1668 he caused special laws to be drawn up for the purpose of regulating its practice, supplemented by notes under his own hand, the observance of which was enforced under severe penalties.

The title of this code is given above. The original is preserved at Moscow, and will be found printed in the "Old Russian Library" (part iii. p. 430), and in the edition of the letters of the Tsar Alexis Michaelovitch, with remarks by P. Besçonoff, and explanatory notes by S. T. Akçanoff, according to Haller (No. 336) not always accurate.

It is referred to by Korsakoff (No. 335), and an extract is given by Adelung in his account of the travels of the Austrian ambassador, Baron Meyerberg, in 1662—Augustin Freiherr von Meyerberg und seine Reise nach Russland, St. Petersburg, 1827, pp. 211-229 and notes, pp. 298-305.

According to Hammer Purgstall (No. 112), p. xxii., this code was probably derived from Mongol sources, but a perusal of the outlines given by Adelung and Haller has not led us to that conclusion.

After a somewhat lengthy justification of such an exceptional statute for an apparently trifling object, there follows a disquisition in praise of fowling in general, and hawking in particular. The practice of Falconry is then treated in several chapters with extraordinary diffuseness and in considerable detail: the rank, duties, and costume of the different grades of falconers are carefully indicated, and even the rank and trappings of the favourite falcons minutely described; to which are added the names of no less than ninety-two of these valuable birds. Their appellations are derived, sometimes from their colour, sometimes from individual peculiarities or other circumstances. Amongst them we find Gamanon, the noisy one, from gam, a noise; Maletz, the knave; Belai, the white one; Smelai, the bold one; Orel, the eagle; &c. The seventh clause indicates
the duties of a newly appointed falconer, which were read out to him in presence of the Tsar, and includes the form of his appointment and investiture with the insignia of his office, namely, an ermine cap, a pair of gloves, and a silver shoulder-belt, from which hung a red velvet falconer's bag containing the certificate of his appointment and a copy of the oath administered to him, in addition to which he received a lure, a silver horn, and a hawking-glove.

During this reign, Falconry may be said to have reached its zenith in Russia, and although to some extent hawking was carried on by the successors of Alexis Michaelovitch, with his death national enthusiasm for the sport died out.

The weak state of health of the Tsar Feodor Alexejevitch, the insufficient means of Ivan Alexejevitch to keep up so costly an appurtenance of state, and the early inclinations of Peter the Great for occupations of a very different kind, caused Falconry to lose much of the importance which once attached to it in Russia, and reduced it to comparative insignificance.

During the last few years an attempt has been made to revive the sport in that country by the formation at St. Petersburg, in 1884, of a Russian Falconry Club (see Haller, No. 336), of which, in 1888, the present writer was elected an honorary member.

Zevschin' (B.). Sovershennii Eger [i.e., jäger]. 1779.
Zevschin (V.). THE COMPLETE SPORTSMAN. 1779.

According to this writer, in his day considered an authority on field sports, and cited by Haller, No. 336, p. 73, the Russian falconers distinguished three different kinds of northern Jerfalcons used by them for hawking, namely, the White Jerfalcon, Chetvertnoi krehet, considered very rare; the Spotted Jerfalcon, Pouketovoi krehet, with black spots on a white ground; and the Grey Jerfalcon, Servi krehet, of a pale-grey colour, probably the immature plumage.

Besides these there is the Saker, which the Russian falconers call Krasnii krehet, or Red Jerfalcon, from the reddish or sandy colour of the dorsal plumage.
According to Haller, the Kirghis and Bashkirs call the Jerfalcon Schounkar, distinguishing the White Jerfalcon as Ak-schounkar, though Meyerberg (1662) says it is the male only which they call Schonkar, the female bird being designated Itelgoe. Cf. Adelung, Meyerberg und seine Reise nach Russland, p. 218. Meyerberg's statement is confirmed by the Russian naturalist Pallas (No. 326), i. p. 325.

On the subject of the white falcons of Siberia sent to China, which will be found noticed hereafter under the head of Chinese works on Falconry, the reader may be referred to John Bell's "Travels to Pekin," 2 vols. 4to, Glasgow, 1763 (vol. i. ch. xi.); "The Travels of Marco Polo," translated by William Marsden, 4to, London, 1818 (pp. 221, 342, and 749), and Ranking's "Historical Researches on the Wars and Sports of the Mongols and Romans," 4to, London, 1826 (pp. 77 note, 80, and 210).

333. СЕМЕНТОВСКОГО: СКАЗАНИЕ О ЛОВАХ КНЯЗЕЙ КИЕВСКИХ.

Sementóvskova. Skazánie o Lováx Knyazéi Kievs-kíx.

Sementovski: Narrative of the Hunting of the Princes of Kiev.

Cited by Haller (No. 336). Referring to the captivity of Ixor Prince Severski, it is said that he was allowed to amuse himself by hawking with the Goshawk—петрёбак ловящь.

The falconers—скóлъник (whose office in Russia dates back to the fourteenth century)—besides other duties, had to procure hawks. These they got from Zavalochie on the Petchora, in the Ural regions, Perm and Siberia, especially from the shores of the White Sea, on the Mourman, Zimnie, Terski, and in Novaja Zemlia.

By virtue of a treaty with the great city of Novgorod, the Tsars sent their falconers there every year, ordering them to be furnished with provisions and horses.

In Heym's Geogr. Encycl. des Russ. Reichs, p. 561, it is stated that at one time the population of Novgorod included 179 male
and 186 female falconers (Falkenjäger). See also Karamsin, 

In the government of Kiev, according to Count Branicki 
(cited by Schlegel, No. 194), a peculiar method of partridge 
hawking was practised. A dog and sparrow-hawk were 
employed for the purpose. The dog having "set" the par-
tridges, the falconer stood behind him with the hawk on his fist 
while his assistant walked round the birds and got some distance 
in front of them. He then showed the hawk the lure, and, as 
it flew off the falconer's hand and skimmed low over the 
ground, the partridges lay so close that they were easily covered 
with a net. This sport was practised in the month of October. 
On the same authority, Schlegel states that in the government of 
Moscow quails were taken with the sparrow-hawk, which 
was flown from the hand immediately the quail had been 
flushed by the dog.

Korsakoff (A.). Selö Koloménskoe: istoricheskiı 
ochërk. 1870.

Korsakoff (A.). The Village Kolomensk: an 
Historical Sketch. 1870. [New Edition.]
According to Haller (No. 336), this book, from which he gives extracts (p. 10), has already become scarce, and the first edition is perhaps hardly to be obtained.

It contains a detailed account of the ceremony observed by the Tsar Alexis Michaelovitch on the appointment of a royal falconer, the ceremony taking place at Kolomensk, a village near Moscow, where the Tsar often went for hawking, and where the imperial hawks were kept.

The hawk-house here contained, it is said, as many as 3000 (qu. 300) different Falcons, Jerfalcons, Goshawks, and Sparrow-hawks. They were fed, according to Kaschikhine, an historian of the seventeenth century, upon beef and mutton brought daily from the imperial larder, and upon pigeons, which the falconers had the right to catch everywhere and bring to Moscow to a spacious pigeon-house, containing, it was said, 100,000 birds, which were fed upon bran, rye, and wheat.

The Tsar was said to know every hawk by name, and usually bestowed the names himself. Their transport from the places where they were caught was effected under special regulations, inattention to which was severely punished (cf. Haller, p. 15).

336. ГАЛЛЕРЪ (К.). ОХОТА СЪ СОКОЛАМИ И Ястребами. Петербургъ. 1885.

Haller (C.). Охота съ Соколами и Ястребами. Петербург. 1885.

In February 1884, under the auspices of Prince Alexander Petrovitch of Oldenburg, a Falconry Club was organised at St. Petersburg, and the author of this book, the late Mr. Constantine Haller, was elected the first president thereof. His enthusiasm for the sport prompted him to publish this contribution to the literature of Falconry, in the hope that it might give encouragement to its attempted revival.

With the exception of the code of rules and regulations issued by the Tsar Alexis Michaelovitch (No. 331), which can scarcely be termed a treatise on Falconry (although containing many
details of interest to falconers), this is the only work in Russian which has come to hand relating exclusively to the subject of hawking. It is divided into twelve chapters, preceded by an Introduction in which the author states (p. 4) that the chief obstacle to the revival of the sport in Russia is the want of professional falconers, who should come, he says, from England, Holland, or elsewhere, like John Barr, the well-known Scotch falconer, who was engaged for some time by the Champagne Hawking Club, in an attempt to revive the sport in France.

The first chapter is entitled *Istoricheskii ocherk oхоты с ловчими птицами*, or historical outlines of the chase with raptorial birds. In this we find a good many details which have been given by previous authors, though we do not remember to have elsewhere met with the statement (p. 6) that, in Prussia, Hochmeister Conrad von Jungingen founded a school of Falconry in 1396.

In Russia hawking with Falcons, Goshawks, and *berkuts* (or eagles)—охота с красными ястребами, и беркуты—was very widely practised (p. 6), and was for centuries a favourite amusement (p. 8). Sementovski's "Narrative of the Hunting of the Princes of Kiev" (No. 333) is quoted (p. 8), and the doings of the Tsar Alexis Michaelovitch, who is said by some to have inherited his taste for Falconry from his grandfather, Feodor Nikitich Romanoff, and by others to have imbibed it from his tutor, Morozoff (p. 9). Adelung's account of Baron Meyerberg's travels in Russia is quoted, and Korsakoff's description (No. 335) of the imperial hawking stud at the village of Kolomensk (p. 10) and of the ceremony of appointing a royal falconer (pp. 11–15), already noticed. After the death of the Tsar Alexis, Falconry became neglected in Russia. When Peter I. came to the throne the transport of falcons from Verkotourie was stopped. The Empress Elizabeth Petrovna sometimes went out hawking in the neighbourhood of Moscow, as did also the Empress Catharine II., who especially loved a flight with Merlins, охота в усадьбе. The last hawking seen at the Russian Court (until the establishment, in February 1884, of the new Falconry Club) was at the coronation of the Emperor Alexander II. in 1856, when *berkutes* (eagles) were brought from Orenburg for the purpose of being flown in the demesne of Count Tolstoi at bagged wolves and foxes.

The second chapter indicates the chief divisions of birds of prey used for the chase, with general remarks on the Falcon,
Jerfalcon, and Goshawk—sokol, krechet, i yastreb—including the Red Jerfalcon or Saker, krasnii krechet. Chapter iii. relates to "the Balaban, a species of Falcon," namely, the Lanner (although in Persia this name is applied to the Saker—see note to No. 343); chapter iv., the Peregrine Falcon, sokol; chapter v., the Eleonora Falcon, chernyui; chapter vi., the Hobby, kopets, a name also applied to the Merlin (kopets is a small lance, or dart); chapter vii., the Merlin, derbnik, with a section entitled "Hawking in the Nineteenth Century," and details of the quarry killed with different hawks; chapter viii., short-winged hawks, yastreba; chapter ix., the Goshawk, velikiy yastreb; chapter x., the Sparrow-hawk, maliy yastrebi literally the little Goshawk; chapter xi., procuring, rearing, and managing hunting birds, добывание воспитание и содержание ловчих птиц (Lobiivanie vospetanie e sodershanie lobchikh ptits)—this chapter is illustrated with figures of jesses, swivels, blocks, &c.; chapter xii., "calling off" and training eyesses and flying them, instructions, remarks, and advice, with figures of hoods.

The following are the Russian names for Falcons and Hawks, extracted from the authorities above quoted:—

**Jerfalcon.**—Female, Krechet; male, Tsichelg-krechatoi.

With the Bashkir-Tartars, male, Schonkar; female, Itelgoe.

White Jerfalcon: Chetvertnoi Krechet.

The orthography of the Tartar name for the Jerfalcon varies, and has probably been written phonetically by the authors who have attempted to quote it. Pallas has Schonkar. The Swedish traveller Strahlenberg,* who refers to the white falcons "which are sent in great numbers to China from the province of Dauria," calls the bird Tsungar. Mr. A. O. Hume, the leading authority on the birds of India, identifies with the Shanghar a bird which he describes and figures under the name *Falco Hendersoni* ("Lahore to Yarkand," 1870, p. 171), but which Mr. J. H. Gurney thinks may be only a stage of the Saker, and is identical with *Falco milvipes*, Hodgson.

**Falcon** (i.e., Peregrine).—Female, Sokol; male, Tsichelg Sokolei.

---

* "An Histori-geographical Description of the North and Eastern part of Europe and Asia, but more particularly of Russia, Siberia, and Great Tartary, both in their ancient and modern state. Written originally in High German by Mr. Philip John von Strahlenberg, a Swedish officer, thirteen years captive in those parts. Now faithfully translated into English. 4to. London. 1736."
LANNER.—Balabàn, S. Russia; in Siberia, Sherebetz; with the Calmucks, Itelgoe. Common throughout the desert of Tartary.

SAKER.—Krasniï Krechet, i.e., Red Jerfalcon; Itelgoe, Itelgui, with the Bashkirs and Kirghis (Haller).

HOBBY.—Shchoglok, or Choglak; in some provinces, Kopets.

RED-LEGGED HOBBY.—Kopets and Koptschik.

MERLIN.—Derbnîk and Derbnîchok (dimin.).

KESTREL.—Pustolga.

EAGLE.—Orél (generic), Berkut (specific); with the Tartars generally, Bjârkut. See an article on this bird in *The Field* of December 27, 1890. With the Kirghis a trained eagle is worth two camels (Pallas, vol. i. p. 339).

The Spotted Eagle, *Aquila clanga*, Pallas, *naevia*, Brisson, is called by the Tartars Karagush, i.e., black eagle.

The writer has been recently informed by Prince Boris Swiatopolk Cyetwertynski that in his opinion the species to which the name berkut is properly applied is not, as has been supposed by some authors, the golden eagle (*Aquila chrysaetus*, Linneus, *nobilis*, Pallas), which the Russians call orél, but one of the smaller eagles, either *A. naevia* or *A. bonellii*. He adds, however, that the young golden eagle in its first or dark plumage, which is called by the Tartars Kara-tsagyl, or "black eagle," is often called berkut. He describes the true berkut as being "larger than a falcon, but smaller than an eagle."

Strahlenberg has some interesting remarks on the Siberian eagles used by the Tartars. "There are three sorts of eagles," he says, "in Siberia. The first and largest sort the Tartars call Barkut. They are coal-black, and so is the very beak of them. The skin about the nostrils and the legs only are of a lemon colour. . . . . The second sort is called in the Tartarian tongue, Kutschugan; and the third and least sort, Kara-kush, in Latin *Aquila naevia* [the Spotted Eagle]. The Tartars make use of this sort of eagles as they do of falcons for hawking" (p. 360).

See also Col. T. E. Gordon, "The Roof of the World: being a narrative of a journey over the high plateau of Tibet to the Russian frontier, and the Oxus sources on Pamir," 8vo, Edinburgh, 1876 (pp. 78, 88).

GOSHAWK.—Yastrêt; the young, Raibik. With the Calmucks and Mongols, Itelgoe.

SPARROW-HAWK.—Pereplyatnik, i.e., the Quail-hawk.
FALCONERS OF TURKESTAN
WITH THE TRAINED EAGLE, OR BERKUT,

From a sketch made by Col. T.E. Gordon

In Eastern Turkestan.
NOTE.—The latest contribution to the literature of Falconry in Russia will be found in three articles by the present writer, contributed to The Field in 1890, namely, "Trained Eagles," with an illustration of one, August 2; "The Eagles used by Russian Falconers," August 16; and "The Berkut of Turkestan," December 27.

Turkish.

The Book of the Hawk of Mahmud B. Md. ul Bârchîni. Fourteenth century.

This work, which appears to be an adaptation of the treatise described by Dr. Rieu (Cat. Persian MSS. in Brit. Mus., vol. ii. pp. 484, 485), is printed in Turkish, with a German translation, by Hammer Purgstall (No. 112), from a MS. at Milan. It was composed, he says, in the fourteenth century, and the Turkish author states that it was at first written in a civilised language, and was translated into Arabic, thence into Persian, and from Persian into Turkish.

It consists of 155 bâbs, or sections, some of them very short ones, and after some confused traditions relative to the origin of Falconry, descriptions of the birds used, and notes on the method of feeding and training them, the greater portion of the treatise is devoted to an enumeration of the diseases to which hawks are supposed to be liable, and the remedies proposed for them.

Schlegel, who cites this work on the authority of Hammer Purgstall, is of opinion that the latter has failed in his attempt to identify the species of hawks referred to by their Turkish or Arabic names, and in this he is right. For example, the Shahin, can hardly be the Lanner; by this name Indian falconers designate the Peregrine. The Kartschal, if used (as the Turkish author states) to take Roe-deer, is not likely to be any species
of Harrier (Circus), as suggested by Hammer Purgstall. According to the Russian naturalist, Pallas (No. 326), the proper mode of spelling this word is Kara-tschagyl—i.e., "black eagle," which is said to be the Golden Eagle in the dark immature plumage; called also in Turkish Kara-Kusch or black bird, it is used by the Tartars, Calmucks, Mongols, and Tangutes for catching deer, wolves, and foxes, and is called by the Tartars Berkut or Barkut (Persian Bargut).

The Taghrul from the description given seems to be some kind of eagle, but cannot be, as Hammer Purgstall supposes, Pallas's Sea Eagle. It is probably the Tschagyl, above mentioned.

The Lesak, or Kiltisch Kusch, which he identifies with the Hobby, Schlegel thinks more likely to be the Kestrel, although he overlooks the fact that this bird is of no use to falconers.

In translating the Turkish word Tshakir (Arabic, Sakr)—i.e., the Saker—by the German word Habicht (Goshawk), he has overlooked the statement of the Turkish author that his bird had dark eyes, not yellow ones, and was therefore a long-winged falcon, and not a short-winged hawk.

Finally, the bird referred to by the name Otilga, and considered doubtful by Hammer Purgstall (p. xvii.), is in all probability the Saker, which is known to the Kirghis as Itelgoe, or Itelgui, though according to Pallas (No. 326) this name is applied by the Bashkirs to the female Jerfalcon.

Mr. Sidney J. A. Churchill, now on the British Legation at Tebràn, writes that he has examined a Persian MS. in the possession of Mr. J. Fargues, the Superintendent of the Indo-European Government Telegraph Department at Tebràn, which appears to be a copy of the work referred to by Dr. Rieu, and that Hammer Purgstall's text is a Turki version of it. The MS. at Tebràn was copied A.H. 1236—i.e., A.D. 1820. The author states that "his friends suggested that he should gather together the experience of masters of the craft, and their books, and that which was in accordance with the laws of Nature, composed by" various writers named by him, and dated in the years A.H. 569, 571, 590, and 592, equivalent respectively to A.D. 1173, 1175, 1193, and 1195. It is therefore a compilation. He adds that he had heard that books had been found in Baghḑad, and that by royal orders the library had been removed to Alexandria; and that after Alexander a lady ascended the throne,
and removed the books to Antioch, where they remained until her son succeeded her as Sovereign of Constantinople. Orders were subsequently given for the library to be destroyed, but a man named Ibráhím Ben Hailán, of the Zání faith, got hold of some of the books and took them to Baghdád, where they were translated into Syriac. "I procured these books," he says, "and sought for somebody who understood them. Amongst others came a man of the Uzlug Turkish tribe from the sea-shore. The puny one knew all languages, and translated the book from the Syriac into our language." Then follows the origin of Falconry according to the ancient text.

The Book relating to Hawks of Sharef ud Din Alp Arselán Garáblí. A.H. 915—i.e., A.D. 1509.

This is No. 62 of Hammer Purgstall’s Catalogue (p. xxxii.), wherein only the Turkish title is given. His No. 63 is the Baz Nameh, or Book of the Hawk, of Mahmud ibn Muhammed ul Bárichiní, of which the entire Turkish text is printed with a German translation as above noticed. He omits the author’s statement that he is better known as "Katib Turkiyeh," or the Turkish Scribe.

In a volume of miscellanies preserved in the British Museum, Add. MSS. 23,594, there is a Turkish treatise on Falconry apparently of the eighteenth century. It consists of 84 folios, and is described as:

339. A Treatise on Animals used in the Chase, viz., Hawks, Hounds, and Hunting Leopards; their training and the treatment of their diseases. Translated from the Arabic by Murtezá, known as Nazmí Zádeh with the heading Báz Náme, the Book of the Hawk.

The Turkish translator states that he wrote this version, A.H. 1115 (A.D. 1703), by desire of 'Ali Páshá, Governor of Baghdád. The Arabic text was contained in a recent copy of
the second part of the work of Isá B. 'Ali B. Hasan al-Asedi; and Nazmí Zádeh, unable to procure the first part, supplied some additional matter from other sources. An imperfect copy of the original work is described in the Catalogue of Arabic MSS. in Brit. Mus., p. 634 b. See also Leclerc, Histoire de la Médecine Arabe, i. p. 503.

The work is divided into a great number of small sections, termed bâbs, but not numbered. The first contains traditions respecting those who first made use of birds of prey for the chase, fol. 2 b. The second describes the various kinds of hunting birds, fol. 4 a. The rest of the contents may be briefly described as follows:—Training and Feeding of Hawks, fol. 7 b; Diseases of Hawks and their Treatment, fol. 14 a; On the Nature and Good Qualities of Hounds, fol. 66 b; Diseases of Hounds and their Treatment, fol. 71 a; Diseases of the Cheetah, or Hunting Leopard, fol. 81 b.

**Note.**—For an interesting account of Hawking as practised in the province of Cilicia, Turkey in Asia, where the Goshawk (Turkish, doghan) is chiefly employed, the reader may be referred to a volume by William Burckhardt Barker (son of John Barker, who died at Suwaidyah, near Antioch, in 1850, and godson of the eminent traveller and oriental scholar Louis Burckhardt), entitled "Lares and Penates: or, Cilicia and its Governors; being a short historical account of that Province from the earliest times to the present day." 8vo. London, 1853. The observations on Falconry will be found pp. 284–298. Besides the Goshawk, the Turkomans train the Peregrine (Turkish, Sheheen), the Lanner (Turkish, Sefee), and the Sparrowhawk (Turkish, Atonajia), while the Jerfalcon, or, it may be, the Saker (Turkish, Songhar), is said to be sometimes taken in the north of Asia Minor (p. 297). But the Goshawk is the favourite bird, as it is found to be the most useful, and best suited to the nature of the country.

"The Goshawk," says this writer (p. 290), "when properly broken in, requires little or no attention; his master need keep no servants or falconer to attend upon him, and carry him day and night on the hand, which is requisite with the Peregrine; if in proper trim, he is ready to hunt, and you can count upon him
and fly him as often as you please in the course of a day. I do not ever recollect seeing my hawks done up from flight after flight, for six hours consecutively; and I have known a Goshawk belonging to Rizu Kuli Mirza Nayebel Ayaly, a Persian prince residing at Bagdad, take twenty-one Francolins consecutively. The Prince assured me, and I firmly believe him, that he made sure of the quarry every time he let him fly from his hand. I have myself taken four hares, and a dozen Francolins, with several minor birds, in one day; and I invariably found my Goshawk improve by exercise—the more I hunted him, the more he was anxious to continue the sport."

The Book of 'Ali Kameh the Khorasáni—i.e., the native of Khorasan.

This is the first (No. 47) of three Persian treatises on Falconry, of which the titles only are given by Hammer Purgstall (No. 112) in Persian characters (Nos. 47, 48, 49), here transliterated by the kindness of Mr. Sidney A. J. Churchill, of the Persian Embassy.

The Book of Jemálí Muhammed of Ganjeh (E. Caucasus) the Samani. A.H. 540—i.e., A.D. 1145.

No. 48 of Hammer Purgstall.
342. Kitāb al-buzāt li Nūshirvān,

The Book of Hawks of Nūshirvān.

No. 49 of Hammer Purgstall; no date assigned. More accessible information on the subject of Falconry in Persia is to be found in the following:—

The Aīn i Akbari, says Prof. Blochmann, contains that information regarding Akbar's reign which, though not strictly historical, is yet essential to a correct understanding of the times, and embodies therefore those facts for which, in modern times one would turn to Administration Reports, Statistical Compilations, or Gazetteers. It contains the aīn (i.e., mode of governing) of Akbar [who died in 1615], and is in fact the Administration Report and Statistical Return of his Government, as it was about A.D. 1590. The contents, therefore, are naturally varied and detailed. Abul Fazl's high official position gave him access to any document he wished to consult, and his long career and training in various departments of State, eminently fitted him for undertaking such a work. "His love of truth and his correctness of information," adds Prof. Blochmann, "are apparent in every page of the book."

In the portion which relates to Hunting (Book II. Aīn 27 and 28) there is a section on "Hunting with Hawks" (Transl. pp. 293–296), in which the writer describes the various species used, with their Persian names; their allowance of food; prices paid for them; and the minimum number of each kept at Court.

The birds mentioned by their Persian names are not always to be identified, for the reason that Persian falconers give different names to the sexes of hawks, as well as to old and young, and to those which have and have not moulted; but we recognise amongst them the Peregrine (Shāhin and Bahri),
INDIAN FALCONERS WITH SAKERS AND PEREGRINE.

From a photograph taken in the Punjab, 1891.

By Capt. D. C. Phillott.
Jerfalcon (Shungar), Saker (Baldbán, when captured in nets, and Charkh, when taken from the nest), Merlin (Turumtdi), Goshawk (Bašâ and Girgî), besides the Bargut, or trained eagle. As to the hawks used by Persian falconers see the remarks of Major Oliver St. John in the account of the Persian Boundary Commission, 1870-72, edited by Sir Frederic Goldsmid, 2 vols. 8vo, London, 1876, vol. ii. pp. 102-111.

An earlier translation of the Ain i Akbari, by F. Gladwin, was printed in 4to, Calcutta 1783, and London 1800, but that by Blochmann, here quoted, is considered preferable.

344. Baz Namah, or Book of the Hawk.

Amongst the Persian MSS. in the British Museum, Egerton, 1012 ff. 124 (cf. Rieu, Cat. ii. 485), is a Báz Námah, or Book of the Hawk, seventeenth century, in metre. "Bahádúr" is the poetical surname assumed by the author, and occurs in a versified preamble, fol. 1-5, containing eulogies on 'Abd ul-Kadir Jilání, and on the reigning Sovereign Aurangzib. The author states in a succeeding prose preface that he had undertaken the work at the urgent request of Ja'fer Beg, whom he calls his master in the craft. He mentions having written the work in the twenty-fifth year of the reign of 'Alemgir, corresponding to A.H. 1091, or A.D. 1680.

The treatise is divided into forty-three chapters (bábs), a list of which is given at the end of the preface, fol. B. The first thirty-nine treat very fully of the training of hawks and other hunting birds, and of their employment in the chase. Then follow: Báb xl., Diseases of Hunting-birds, in sixty-eight sections (fasl), fol. 84 b; Báb xli., their treatment, fol. 93 b; and Báb xlii., miscellaneous instructions, in four sections.

345. Baz Namah, or Book of the Hawk.

In the same collection, Egerton 1013, pp. 108 (cf. Rieu, Cat. ii. p. 485), is a Báz Námah, or Book of the Hawk, dated A.H. 1163, i.e., A.D. 1749, by Muhib 'Ali, surnamed Khán Khás Mahallí B. Nizam ud Din 'Ali Michhilání.

The author, a son of Nizam ud Din 'Ali Khalifeh, Prime Minister of Bábér, was raised to the dignity of Khan in the first year of Akbar's reign, and died Governor of Delhi, A.H. 989,
200 \textit{BOOKS ON FALCONRY.}

\footnotesize

\textit{i.e., A.D. 1581.} See Erskine, \textit{Hist. India under Bāber}, vol. i. p. 385; and Blochmann, \textit{Ain i Akbari}, p. 420.

The author states that he was nearly sixty years old at the time of writing, and that, having from his youth upwards accompanied illustrious Sovereigns in the chase, he had acquired considerable experience. He dedicates the work to Akbar, whose skill and prowess in the hunting field he praises at great length.

The treatise is divided into sixty-one chapters or sections (bābs), a full table of which is given in the preface.

Contents: Preface, fol. 2 b; Precepts of the Law relating to the Chase, fol. 9 b; Qualifications of a Perfect Sportsman (Mir Shīkār), fol. 12 b; Capture and Rearing of Hawks, fol. 13 a; How to Select Hawks and other kinds of Hunting Birds, fol. 20 a; Signs of Health and Disease, fol. 24 a; Directions Relating to Hunting in General, and to the Diet and Training of the different kinds of Hunting Birds, fol. 26 b; Diseases of Hawks and their Treatment, fol. 68 b; Snares and Decoys, fol. 87 b; Selection and Training of Cheetahs (yūz), fol. 101.

346. \textit{Bāz nāmah}, or Book of the Hawk, transcribed A.H. 1160, \textit{i.e.}, A.D. 1747.

A treatise on the qualities and rearing of Hawks, and their use in the sport of Falconry. An 8vo MS. Persian, in an Indian handwriting; in the possession of Mr. Quaritch.

The transcriber was Muhammed Mustafā Kusūri, who wrote it at the request of Muhammed Khanhīv. The authorship is not disclosed; but the work is spoken of as a compendium (mukhtasar) compiled A.H. 970 (about A.D. 1562).

The work is divided into 72 sections or bābs, each section having several chapters.

Thus it is not the same as the "Bāz-nāmah" of Khan Khas Mahalli, who wrote for Akbar about the same time as the composition of the above compendium. His Baz-namah is very similar in contents, but is quite differently arranged in 61 sections.

The Book of the Hawk of Nasir, A.D. 1842.

For a knowledge of this work the present writer is indebted
to the courtesy of an enthusiastic falconer in India, Lieutenant
D. C. Phillott, intelligence officer to the British forces at Dera
Ismail Khan, Punjab.

Nasir is one of the names of the present Shah, and the work
is styled his out of compliment. The author is Mirzá Taimúr,
Governor of Fárs, son of Husain Ali Mirzá, and grandson of
Fateh Ali Shah Kájár. Fateh Ali Shah was the great-grand-
father of the present Shah. The place of publication is not
mentioned, the book is lithographed, and is what is known in
India as a “bazar edition.”

For further details concerning the practice of Falconry in
Persia than is afforded by the treatises above named the reader
may be referred to Jaubert, who visited the summer quarters
of the Persian Court near the ruins of Sultanieh on the great plain
of Irán, and saw falcons, from the southern shores of the Caspian
and Aral, flown at bustards, hares, gazelle, and wild-duck
(“Voyage en Arménie et en Perse, p. 353); Morier, who
witnessed hawking in the plain of Bushire (“Journey through
Persia and Armenia,” 4to, London, 1812), and Sir John Mal-
colm, who gives an account of gazelle-hawking, and bustard-
hawking on the sandy plains of Persia about 20 English miles
from Abubekir, and hare-hawking in the environs of Shiráz
(“History of Persia,” 2 vols. 4to, London, 1815; and “Sketches
of Persia, 2 vols. 8vo, London, 1828). See also Dr. John
p. 887; Ranking, “Historical Researches on the Wars and
Sports of the Mongols,” 4to, London, 1826, pp. 92–99; De
Filippi, “Note di un Viaggio in Persia nel 1862,” 8vo, Milan,
1865; and Colonel Yule’s edition of “Marco Polo’s Travels,”

The latest information on the subject of Falconry in Persia is
that afforded by Major Oliver St. John in the “Account of the
Persian Boundary Commission,” 1870–72, edited by Sir Frederic
p. 102–111.

Note.—No treatises on Falconry in Hindustani have come
to light, although copies of several Persian MSS. on the subject
are well known to falconers in India. As to the origin of Falconry in India, where it is believed to have been introduced by the conquering Mahommedans in the tenth century, see Schlegel, op. cit. (No. 194), pp. 59 and 64; and for details of the sport as practised in that country see "An Account of the Hunting Excursions of Asoph ul Doulah, Visier of the Mogul Empire and Nabob of Oude, by William Blane, who attended in these Excursions in the years 1785 and 1786," printed in Blane's Cynegetica, or Essays on Sporting, 8vo, London (Stockdale), 1788, pp. 183–201; Johnson, "Sketches of Indian Field Sports," 8vo, London, 1822, pp. 46, 47 (the pages relating to Hawking have been extracted by Belany, No. 64, pp. 51–56); Corvin Wierbitski (No. 115), Burton (No. 66), and Delmé Radcliffe (No. 72). The last-named writer gives a complete list of the hawks now in use in India, with their native names.

Reference should also be made to the valuable remarks of Mr. R. Thompson on hawking in India, printed in Hume's "Rough Notes on Indian Oology and Ornithology," 8vo, Calcutta, 1869, pp. 57, 69, 74–75, 86, 93, 114–115, and 125.

Arabic.

As frequent allusion is made in the Persian and Arabic titles to "the year of the Hegirà," indicated by the letters A.H., it may be well to give here a brief explanation of a term which applies to a celebrated epoch used by the Arabs and Mahometans for the computation of time.

The word is Arabic, written Hejirà, and signifying "flight," the Arabic letters of which it is composed being Ḥ, j, r, d, or ḍh, and the supplied vowels are pronounced short.

The event which gave rise to this epoch was Mahomet's flight from Mecca to Medina, when the rulers of Mecca, fearing he might raise a sedition, expelled him from that city in the year of our Lord 622.

The first year of the Hegirà, therefore, corresponds with A.D. 622. To save the trouble of computation, the reader may be referred to Marsden's very useful "Table," printed in the Philosophical Trans-
ARAB FALCONERS WITH LANNERS.

From a photograph taken in Algeria, 1889.
actions, vol. lxxviii., which exhibits at a glance the correspondence of the years of the Hegirâ with those of the Christian era, and the month and day of their respective commencement.

It should be observed that the Orientals do not agree with us as to the time of the Hegirâ. Among the Mahometans, Amasi assigns it to A.D. 630, and according to the Greek computation among the Christians, Said Ibn Batrick refers it to A.D. 614. In the present bibliography the dates adopted are those given in Marsden’s “Table” above mentioned.

The Book of the Great Khágán, and King of India, by Izzud-Din Muhammed Pelásguní. A.H. 577, i.e., A.D. 1181.

This is the first (No. 50) of a dozen Arabic treatises (Nos. 50–61) given by Hammer Purgstall (p. xxxii.) in native characters, and here transliterated, through the kindness of Mr. Sidney A. J. Churchill.

No. 55 of Hammer Purgstall.

The Book of the Wonders of Creation, by Kazvíní.

No. 56 of Hammer Purgstall. See Rieu, Cat. Persian MSS. in Brit. Mus., ii. pp. 462, 463. The author is Zakaria bin Md. bin Mahmúd ul-Kamuni ul-Kazvíní. A Persian translation of the Arabic original was published at Tehrân, A.H. 1264, i.e., A.D. 1848, and a German translation by Dr. H. Ethé, at Leipzig, 1868.

The Life of Animals, by Damiri.

No. 57 of Hammer Purgstall. The author died A.H. 808, i.e., A.D. 1405. Copies of his work may be found in the British Museum, together with Persian adaptations (cf. Rieu, Cat. Persian MSS. ii. p. 842 b).

356. Kitab Manáfa' ut-Tair veh alajatihim.

The Book of the Usefulness of Birds, and their maintenance in health.

To this title, No. 58 of Hammer Purgstall, is the note

357. **Kitab al Buzát ul-Turk.**

**The Book of Hawks of the Turk.**

No. 59 of Hammer Purgstall.

358. **Kitab Ghattrif li Abi al Gasim.**

**The Book of Ghattrif, by Abu al Gasim.**

No. 60 of Hammer Purgstall. In the Turki text the author is styled Abú al Gásim.

359. **Kitab al Tair li Ibn Sina.**

**The Book of Birds of Ibn Sina (i.e., Avicenna).**

No. 61 of Hammer Purgstall. Tardif, in the Preface to his "Livre de l'art de Faulconnerie" (No. 142), states that he translated from the Latin book of King Dancus, and from the Latin works of Moamus, Guillinus, and Guicennas (vide anted, p. 72, note). The book of Moamus, as already shown (p. 181), was a Latin translation from the Arabic of some falconer, named Mohamed, or Mohamin. Rigault, No. 314, refers to him as Moamus Arabs, and in the Biblioteca Nacional, Madrid, there is a MS. entitled *Mohamin, Tratado de Cetrería*, traslado del Arabe al Latin, por N. Theodoro, Bibl. Nacional, Madrid, L. 141. Possibly the treatise by Guicennas, who, according to Lallemand (No. 175), was an Arab, was similarly translated from the Arabic of Ibn Sina. As to Guillinus, so called, he is perhaps identical with the *Guillelmus Regis Rogerii Falconarius*, quoted by Albertus Magnus (No. 300), cap. xviii. and xxi.

360. **Sid Mohamed el Mangali.** Traité de Vénerie; traduit de l'Arabe par Florian Pharaon, avec une Introduction par M. le Marquis de Cherville. Tiré à 300 exemplaires numerotés. Paris. 1880. 8vo.

The Arabic text is printed with a French translation. A
review of it is given by Harting, No. 79 (op. cit. pp. 362–370). See note to No. 212, anted, p. 104.

For some details of the sport as practised by the Arabs, the reader may be referred to Dr. Thomas Shaw’s "Travels in several parts of Barbary and the Levant," folio, Oxford, 1738, reprinted in vol. xv. of Pinkerton’s "Collection of Voyages and Travels;" Pierre de Castellan, "Souvenirs de la Vie Militaire en Afrique," 8vo, Paris, 1849; C. Van Breughel, Dutch Consul at Tripoli, quoted by Schlegel, op. cit. p. 70; Canon H. B. Tristram, "The Great Sahara," 8vo, London, Murray, 1860, pp. 63–66, 81, 274; and General Daumas, whose work, "Les Chevaux du Sahara et les moeurs du Désert," 8vo, Paris, 1862, has been translated into English (see No. 199) and Spanish (No. 254), and contains a section on hawking as practised by the Arabs.

Through the influence of the Moors in Spain a variety of Arabic terms relating to Falconry, and names for different kinds of hawks, were introduced into that country. Such words, for example, as "Alcotán," "Alfaneque," "Azor" (Arabic, as-sor), "Bahari" (from Bahr, the sea, indicating the migratory nature of the Peregrine Falcon, to which species this name is applied), "Borni" (al borni, the Barbary Falcon, from the province of Bornou), "Nebli," "Sacre" (from ṣaqr or sakr), "Tagarote," &c., are frequently to be met with in old Spanish books on Falconry. For an explanation of them the reader should consult the useful and interesting work of MM. Dozy et Engelmann, "Glossaire des Mots Espagnols et Portugais derivés de l’Arabe," 2nd ed. 8vo, Leyden, 1869.

Chinese.

The Chinese and Japanese titles here given have been taken, with a few exceptions, from the Traité de Fauconnerie (No. 194), of Schlegel, whose transliteration has been preserved to whom they were communicated by Hoffmann from the originals in the Japanese collection at Leyden. A few additions to the list have been made from Japanese books in the writer’s own collection, and from others
in the library of M. Pierre A. Pichot, of Paris. To that gentleman and to Mr. F. V. Dickins, of the London University, the writer is indebted for much kind assistance in the preparation of this portion of the *Bibliotheca Accipitraria*.

It should be observed that Schlegel's French titles were translated from the German of Hoffmann, and, as the Chinese and Japanese characters are not given by him, it has been impossible to test the accuracy of the transliteration, in which there is reason to believe several mistakes have been made.

361. WEI YEN CHIN. YNG FOU.

**WEI YEN CHIN. CLASSIFICATION OF FALCONS.**

This work, No. 119 of Schlegel's Catalogue, is a practical production, and dates from the Sōui dynasty, A.D. 581–617. An extract from it is given in No. 366, vol. xlv. p. 4. Li Chi Tchin, the author of the Chinese Natural History (No. 363), has also borrowed from it some of his descriptions. It may be here observed that in Chinese there are several words which denote a hawk or falcon, but that generally used by experts is *Yng*. See note to No. 363.

362. ANON. YNG HO FANG.

**ANON. THE ART OF THE FALCON.**

No. 118 of Schlegel's Catalogue, cited by the author of the Japanese work, *San Kai Mei san dsou e* (No. 369), as having emanated from the Corea, whence Falcons were first sent to the Court of Japan A.D. 247. See note to No. 365.

363. LI CHI TCHIN. PEN-T'SAO KANG MOU.

**LI CHI TCHIN. A GENERAL NATURAL HISTORY.**

Sixteenth century.

No. 116 of Schlegel's Catalogue. Contains a few notices of Falcons and their capabilities for the chase. The author states that the technical Chinese name for a Falcon is *Yng*, so called because it strikes with the breast (*yng*), an observation which is entirely erroneous, although, strange to say, it is indorsed by Schlegel (*op. cit. p. 65, note) as *une observation très-juste!* Every falconer knows, or should know, that hawks, on stooping at
the quarry, always strike with the feet, and more particularly with the powerful hind talons.

According to this Chinese author, the best hawks come from the province of Liaotoung, and only the natives of Southern China, he says, make use of eyesses. He adds that the birds employed (Falcons and Goshawks) are flown chiefly at pheasants and hares, although the Sparrow-hawk is used for taking quails.

364. ANON. OU TSA TSOU.

ANON. THE FIVE MISCELLANEOUS CATEGORIES.

The author of this work (No. 117 of Schlegel's Catalogue) states that the Falcons from Liaotoung are the most highly prized, and that those from China are inferior to those from the Corea. He gives an outline of the Chinese method of training hawks, which is commenced by first hooding the bird with a hood of soft flax, and then starving it for a time. In ten days the hood is removed and the wings are brailed. In six or seven weeks the hawk is flown at midday (when all other birds are supposed to be at rest), and, being unable on this account, as he says, to find food, it will come down to a pheasant thrown out as a lure. This method is not nearly so good as that adopted by European falconers, and occupies twice as many weeks as are necessary. It is from this work chiefly that the article on Falconry in the "Chinese and Japanese Encyclopaedia," by Simayosi Anko, 1714 (No. 366), seems to have been compiled.

For further information concerning the practice of Falconry in China and Tartary, see the Travels of William de Rubruquis, who was sent as Ambassador to different parts of the East, in 1253, by Louis IX., and who mentions, amongst other things noted by him, the use of the halsband for Sparrow-hawks; the Travels of Marco Polo, who gives an account of Falconry as practised, during the latter half of the thirteenth century, by the Chinese Emperors of the Mongolian dynasty and successors of Genghis Khan (Marsden's translation, 4to, London, 1818; and Colonel Yule's edition, 2 vols. 8vo, London, 1875); John Bell (of Antermony), "Travels to Pekin," 2 vols. 4to, Glasgow, 1763; Strahlenberg (op. cit., cf. ante, p. 191), who states that
“in the province of Dauria, and near the river Amoor, there are a great many milk-white falcons, which are sent in great numbers to China.” This writer describes three sorts (differentiated according to plumage, dependent upon age), and details the method of taming them (p. 361). See also Schlegel (op. cit. pp. 60-61, 65-66); and an article on “Birds used for Sport in China,” translated by the present writer from the French of M. Pierre A. Pichot, in The Zoologist for December 1885. According to Col. Yule (op. cit. i. 396), hawking is still common in North China.

Japanese.

365. TONERINO SINWO. NIPPONKI.

This voluminous work, No. 110 of Schlegel’s Catalogue, contains a history of Japan from 661 B.C. to A.D. 696.

The author, after stating that the Japanese empire was founded in 660 B.C., asserts that in A.D. 239 Falconry, with other arts, was introduced into Japan from Southern China, and that in A.D. 247 Falcons were sent for the first time from Petsi, in the Corea, to the Court of Japan, where the practice of Falconry was first attempted A.D. 355 (Schlegel, op. cit. p. 66). See also vol. vii. p. 35, and vol. xlv. pp. 4-5, of the following:

366. SIMAYOSI ANKO. WA KAN SAN SAI DSOU-E.

SIMAYOSI ANKO. CHINESE AND JAPANESE ENCYCLOPÆDIA. 1714. IN 105 VOLS. 8VO.

This is No 106 of Schlegel’s Catalogue. Some interesting details relative to Falconry, derived chiefly from the Chinese work, Ou Tsa Tsou (No. 364), are given vol. vii. p. 35, and vol. xlv. pp. 4-5. Mention is made (vol. vii. p. 35) of a clever falconer named Sakourawi Goro, who, in 1206, was summoned to the Court of the Emperor Sanetomo, at Yedo, to give instruc-
tion in Falconry, and who trained the Grey Shrike, or Butcher-bird (Pie-grîche of the French), to take sparrows and other small birds, an example afterwards followed by Louis XIII. of France, in the Jardin du Louvre (cf. Arcussia, No. 153, p. 170, ed. 1644). The difference in size between the sexes of hawks is noted (vol. xlv. p. 5), the male being called Seo (the little) and the female Tai (the great).

A young hawk is termed Waka taka; a partially moulted hawk, Kata kaveri (in Chinese, P'hien P'hien); a hawk in its third year, Moro kaveri (in Chinese, Tsai P'hien), that is, a hawk that has moulted twice. One taken from the nest and reared in the house is Sou taka, that is, nestling hawk, or eyess; one taken after it has left the nest and is able to shift for itself, Akake, that is, taken with a net; an adult hawk, or haggard, is Nozare, that is, not easily tamed; a Jerfalcon, Sirâ taka (in Chinese, Pe yng or Suê pe yng), that is, white hawk, or snow-white hawk.

Then follows an account of the mode in which hawks are trained—by being carried on the fist for three weeks, fed often, but very little at a time, and then flown in a creance. The Japanese falconers, when holloaing to a hawk, cry, O-ou O-ou! When a hawk is put up to moult the jesses are removed, and it is cast loose into the mew and there fed at discretion. A broken tail feather is repaired by joining a new one to it with a kind of varnish made from a tree of which the scientific name is Rhus vernix. From this it would appear that a means of repairing broken feathers, known to English falconers as "imping," is practised by the Japanese, although they make use of strong varnish instead of an imping needle.

Schlegel states that in Japan the hawk is carried on the left hand, while in China it is carried on the right (op. cit. p. 68).

367. KONOSITA YOSITOMO. DSOU KAI-BOU Yô Ben-Ryak. Yedo. 1747.

KONOSITA YOSITOMO. CONCISE DESCRIPTION OF ALL THAT IS NECESSARY FOR A SOLDIER. WITH ILLUSTRATIONS. Yedo. 1747. 8 VOLS. 8VO.

This is No. 107 of Schlegel's Catalogue. Vol. viii. contains
more than a hundred pages on Falconry, including the technical terms used by Chinese and Japanese falconers—the Chinese title of this work is *Tou Kiay Wou-Young Piên Lio*—a description of the different kinds of hawks used, and of the various flights according to the season of the year; preceded by some historical details concerning the introduction of Falconry into Japan. Schlegel, who quotes this treatise as *Le Code du Guerrier*, states that it is compiled from older and more voluminous works.

368. **MOTO FUSA. SI-FAU-DEN-NO-MI-KOTO.**

**Moto Fusa.** [Title unintelligible.]

This is No. 108 of Schlegel's Catalogue. It is cited by Konosita Yositomo (No. 367), who states that it exhausts the subject of Falconry. There appears to be some mistake, however, in the translation of the title. Schlegel renders it *Trois mots comprenant les traditions de tous les pays*; but the Japanese words as printed do not bear that signification, and in the absence of the Japanese characters any correction would be doubtful.

369. **KIMOURA KOKJO. SAN KAI MEI SAN DSOU-E.**

**Kimoura Kokjo.** *Illustrated Description of the Principal Land and Sea Products of Japan.* Ohosaka. 1799. 5 vols. 8vo.

This is No. 109 of Schlegel's Catalogue. The second volume contains some curious information (p. 26, &c.) relative to Falconry in Japan. The author, Kimoura Kokjo, states that the province of Fiouga in the island of Kiouisiou, and that of Iyo in the island of Tosa, as well as the mountainous districts of Kahi and Tango, produce hawks of small size, *Ko taka*. Larger and finer hawks, *Oho taka*, are found in the southern parts of the empire, in the province of Moutsou, especially in the district of Kouro-gava (lat. 38° 27' N.). Those from the district of Sinobou, that is to say, from the mountains to the east of Foukou-sima (lat. 37° 38' N.), are known by the name of *Sinobou taka*. The White Falcons come from the Corea, and are flown at geese and cranes.
This author states that, in Japan, Falcons are usually taken young from the nest, but at Oyamada, in the province of Iyo, they are also taken at daybreak in silk nets, three or four feet wide and twelve long, with a mesh of two and a half inches square, the lure being a live starling. The starling is kept in a state of agitation by showing it an artificial snake made of jointed wood and painted to nature. A hawk, on being caught, has jesses of soft leather put on, varvels of stag's horn or hollow bamboo stem, and a long leash, the wings and tail being enveloped in a "sock" made of soft flax, just as described in 1240 by the Emperor Frederick II. in his treatise de arte venandi cum avibus (No. 308), and as practised at the present day by the professional hawk-catchers in Holland.

370. ANON. Ko Kon Taka No Koto.

An 8vo volume, No. 105 of Schlegel's Catalogue, of which no account is given beyond the title; nor is any reference made to the date or place of publication.

371. ANON. Ehon Taka Kagami.

A comparatively modern work, in five parts 8vo, of which a copy is in the writer's possession and another in the collection of M. Pichot. It is profusely and graphically illustrated, and is probably the best book on the subject in Japanese now obtainable.

The treatise of Konosita Yositomo (No. 367), cited by Schlegel as the Code du Guerrier, contains references to the five following works relating to Falconry, but, as the Japanese characters are not given by Schlegel, it is not possible to supply a reliable transliteration:

372. Katano Seo Sjo. Yo Sei Rok, of which the Chinese title is Yng Tsching Lo.

No. 111 of Schlegel. The title only mentioned.
A JAPANESE FALCONER.

From the "Ehon Taka Kagami," or Mirror of Falconry.
373. OUSDIDONO. NITSI RAI KI; in Chinese, JI LAI KI.

No. 112 of Schlegel, who gives no details beyond the title.

374. DSI MEO IN. SAN KAU TEN.

No. 113 of Schlegel. Title only.

375. TEI KA (Prince). TAKA.

PRINCE TEI-KA. THE FALCON (an Ode).

No. 114 of Schlegel. Title only.

376. AKIZATO RITO. KAWATSI MEI-SJO DSOU-E.

AKIZATO RITO. TOPOGRAPHY OF THE PROVINCE KAWATSI. With Plates. 1801-1808. 6 vols. 8vo.

No. 115 of Schlegel.

This author states that, in China, Falcons were amongst the presents made to princes from the time of the (mythical) Hia dynasty, which commenced about 2205 B.C. Whether the art of Falconry was understood so long ago as this it is now impossible to ascertain. At any rate, we know from Ctesias and Ælian that it was practised in Central Asia about 400 B.C. (Cf. Ctesio Cnidii Operum Reliquiae, edit. J. C. Bähr, 8vo, Francofurti, 1824, p. 250; Ælian, de Natura Animalium, lib. iv. cap. 26, edit. Jacobs, 8vo, Jena, 1832.) We learn also from Ctesias, who was physician to the Shah of Persia, Artaxerxes Mnemon, that at this period Falconry was altogether unknown in Persia and India. (See note to No. 347, p. 201.)

377. NIGIRI-KOBUShI. SHIJÜ HACHI TAKA NO ZUSAN.

NIGIRI-KOBUshi. THE FIST: OR FIGURES WITH DESCRIPTIONS OF 48 KINDS OF HAWKS. 6th year of HOZEI, i.e., A.D. 1710.

For a knowledge of the contents of this book, of which a
copy has been forwarded for inspection by M. Pichot, of Paris, the writer is indebted to Mr. F. V. Dickins, who has furnished a translation of the most material portion of it.

This author states that hawking was practised in China during the Han and Tang dynasties (i.e., from B.C. 206 and from A.D. 618), and that it was introduced into Japan in the forty-seventh year of the Empress Tingu (A.D. 244) from Haku-sai, in Corea, and again in the forty-second year of the Emperor Nintoku (A.D. 355), who was the first really to hunt with hawks. (See note to No. 365.)

Amongst the birds mentioned by this author are—O-washi-taka, the great Eagle Hawk; Kasumi-taka, the Mist-hawk; Hai-taka, the Sparrow-hawk; Shiva-bu-taka, white-barred hawk; No sushi-taka, the Moor-hawk; Koi-kiri-taka, the pike-catching hawk (Osprey); Mushu kui-taka, the insect-eating hawk; Kamome-nari taka, the gull-like hawk (Harrier); and Mashiro-taka, the pure white hawk (Gerfalcon). Besides these are named Mozu, the Grey Shrike, or Butcher-bird, which is trained like a hawk for catching small birds (see note p. 210); Tobi, the Kite; Fukuro, the Owl; and Mimizuku, the Eared Owl.

378. MACHIDA HISANARI. TAKA GARI

ICHIRAN.

MACHIDA HISANARI. A SURVEY OF FALCONRY ILLUSTRATED. Compiled by Machida Hisanari in the 9th year of Meiji, i.e., of the present era, which commenced in 1868.

This modern composition, obligingly forwarded for inspection by M. Pichot, of Paris, may be described as a "broadside," being printed on a single sheet, which measures 20.5 by 14.5 inches, and is illustrated, in colours, with figures of the Gos-hawk, Ō-taka; the Peregrine, Haya-busa; and the Sparrow-hawk, Hai-taka; and with representations of the hawk-house, toya; perch, chiboko; glove, yugake; sock, fuseginu; falconer's bag, hato fukuro (i.e., pigeon-bag); creance, oki nawa; jesses, ashikawa (i.e., leg-leathers); bell, suzu; leash, ō-o (i.e., the great cord), made of eight strands of silk, red for ordinary
hawks, and purple for those that have distinguished themselves by killing cranes (tsuru), et cetera.

Though there are many kinds of hawks, says this author, those used for Falconry are mainly these three:—O-taka, or great hawk, i.e., the Goshawk; Hayabusa, literally "swift tuft-hawk," the Peregrine; and Haitaka, or creeping hawk, in reference, perhaps, to its crafty habits, the Sparrow-hawk. Three other kinds, much inferior, are scarcely ever used for hawking.

To catch hawks nets are employed. A large net is spread, and in the middle a smaller net of the kind known as chochin (lantern-shaped, i.e., nearly barrel-shaped) is fixed, in which are placed five or six sparrows at liberty to fly about in the interior. This contrivance acts as a decoy, and the hawks are thus trapped.

The best time for catching them is between the great heats of summer and the full spring of the succeeding year. When caught, the birds receive each a generic name: thus, a bird of any year taken in the autumn would be called akage, red-plumed [but the point lies in the resemblance in sound of aka to aki, autumn]; taken from the nest (su), su-taka; taken during the lesser summer heats, after having left the nest, su-mawari, nest-hoverer or brancher; and so forth.

Taka and Hayabusa are flown at cranes, wild geese, wild duck, and white herons; Haitaka, at teal, water-hens, and larks. These three hawks receive each a different training.

A complete translation of this "broadside," by Mr. F. V. Dickins, will be found in The Zoologist for May 1891.

It would seem that at the present day Falconry is but little practised in Japan. The latest traveller who has furnished any account of the sport in that country from personal observation is Dr. A. von Roretz, who, in the German periodical Der Zoologische Garten for September 1879, published an article on hawking in Japan, of which a translation by the present writer appeared in The Field of October 18, 1879.

Dr. Roretz states that formerly, wherever large uncultivated tracts of scrub, and marsh, and grass land were to be found, amongst other sports hawking flourished. In more populous districts, too, powerful princes and wealthy proprietors indulged in this pastime, at which their dependents dared not murmur,
having to consider themselves privileged in being allowed to witness the sport, and to repair the damages to crops, &c., which it sometimes occasioned. This was the state of things in Japan when the Daimios were masters of the life and property of their subjects. But all has been changed since the reforms of the present day have brought their civilising influence to bear in these remote lands, and given the peasants protection for their crops. Falconers have dropped off, abandoning their annual expeditions to the steep rocks, where they were wont to seek their half-fledged pupils. Hawking may now be regarded as a thing of the past in Japan, for only a few magnates, whose extensive estates permit such a luxury, occasionally indulge in this delightful pastime. "To a very limited extent" (he says) "I was enabled to learn something of the old sport. . . . It varies according to the quarry flown at. I never saw very small hawks flown quite loose. A very thin silk line, tightly twisted, about the size of ordinary sewing silk, but much stronger, is fastened to the jesses. This line is about thirty yards in length. It is used more to restrain the hawk from following the quarry too far, than to prevent it from trying to escape. Goshawks and Falcons are always flown loose. The falconer gets as close to the quarry as he can, screening it from view of the hawk by means of the long sleeve of the Japanese dress. As soon as he is near enough he withdraws the sleeve and the hawk is cast off. Hawking on horseback seems to have died out; at least during my long stay there I never heard of any. According to description, it must have resembled the hawking which is still practised in Persia."

Belonging to the Author.
GLOSSARY

EXPLAINING THE TECHNICAL TERMS EMPLOYED 
BY ENGLISH FALCONERS.
GLOSSARY

EXPLAINING THE TECHNICAL TERMS EMPLOYED
BY ENGLISH FALCONERS.

Arms, the legs of a hawk from the thigh to the foot.

Ayre, and Eyrie, s., Fr. aïre, the aillery, eyrie, or nesting-place.

"Our aïry buildeth in the cedar's top."—Shakespeare.

The form eyre occurs in Reed's "Governance of Hawkes," 1557
(MS. Bibl. Harl. 676).

Bate, Bating, fluttering or flying off the fist, which an untrained hawk
commonly does at the sight of the approaching hood. Literally, to
beat the air with the wings, from the French battre. "It is calde
batyng for she batith with hirslef, most oftyn causeles."—"Boke of
St. Albans," 1486.

Beam-feathers, s., the primaries or phalangeal feathers of the wing.

See Flags.

Becchins, s., morsels, mouthfuls. Fr. becquie, and bechée, 16th cent.

"Prend le faulcon et luy donne une beschie de char, et luy mets le
chaperon."—"Livre du Roy Modus," 1486. "She bekyth when she
seweth; that is to say she wypith her beke."—"Boke of St. Albans,"
1486. The modern French equivalent of bechins is beccades. Thus
Baron Dunoyer de Noirmont, explaining the meaning of the expres-
sion "to give tiring" (g.v.), writes "donner à tirer, permettre au
facon de prendre quelques beccades au tiroir, aileron de volaille pré-

Bewits, s., short thin strips of leather by which the bells are fastened to
the legs.

Bind, v., to fasten on the quarry in the air.

Block, s., a truncated cone or cylindrical piece of wood having a ring in
it for the attachment of the leash, and placed out of doors, whereon
the hawk is set to "weather" (g.v.).
GLOSSARY.

BOLT, TO FLY AT, v., said of a short-winged hawk; to fly straight from the fist at the quarry.

BOWISER, s., a young hawk able to fly from bough to bough.

BOWSE, v., to drink; variously spelt "bouse," "boose," "bouze," and "booze." O. Dutch, buisen.

BOWSING, drinking.

BRAIL, s., a narrow slip of thin soft leather, with a long slit in it, used for tying one wing of a restless hawk that bates much.

BRANCHER, s., a young hawk that has lately left the nest. Called also a "ramage-hawk."—Ray, "Summary of Falconry," 1678.

CAGE, s., the wooden oblong square frame on which hawks are carried hooded to the field.

CAGGER, the person who carries the hawk; hence the abbreviated form "cad," a person fit for no other occupation.

CALLING OFF, luring a hawk from an assistant at a distance for exercise. See CREANCE.

CANCELEER, v., Fr. chevaucher, to make two or three sharp turns in the descent when stooping.

"The fierce and eager hawks down thrilling from the skies
Make sundry canceleers ere they the fowl can reach."

CARRY, v., to fly away with the quarry.

CAST, s., a "cast of hawks," i.e., two; not necessarily a pair.

CAST, v., "caste her to hode" (1575). When a hawk will not stand to the hood, or requires coping (q.v.), she has to be "cast" or held for the purpose.

CAST GORGE, Fr. jeter la gorge, to throw up the meat that is in her crop. See Turberville’s "Booke of Falconrie," 1575, p. 287.

CASTING, s., fur or feathers given to a hawk with her meat to cleanse the pannel (q.v.), and afterwards cast up in the shape of oblong pellets enveloping the indigestible portions of the food which are thus rejected. Cotgrave gives Oiseau acurel, a hawk that hath had "casting" given her. An old proverb says:

"Wash'd meat and stones maketh a hawk to flie,
But great casting and long fasting maketh her to die."

Latham's "Falconry," 1615, p. 23.

CAWKING-TIME, s., pairing time.—Reed, "Governance of Hawkes," 1557.

See Harting, No. 81, Introd. p. xvi.

CERE, s., Fr. cire, Lat. cera, the bare wax-like skin above the beak.

CHECK, v., whence checking, to fly at; to change the bird in pursuit.
GLOSSARY.

CLUTCHING, seizing the quarry in the feet.

COME TO, v., to begin obeying the falconer.

COPING, cutting off the sharp points of beak and talons. "Let her be short-coped, so I would advise all short-winged hawkes to be used, for the safety of thine owne hands."—Bert, "Treatise of Hawkes," 1619, p. 67.

COWERING, quivering or shaking the wings, observed in young hawks.

CRABBING, i.e., grabbing; said of hawks when two are flown together, and one seizes the other on the quarry by mistake.

CRAY, s., a disease in hawks, namely, a stoppage of the tewell (q.v.), so that the bird cannot mute (q.v.). "The Cray commyth of washed meete the wich is washed withe hote water in the defawte of hote meete."—"Boke of St. Albans," 1486.

CREANCE, s., Fr. créance, Lat. cre'dentij, a long line attached to the swivel, and used when "calling-off" (q.v.) flying a hawk as it were on credit. Bert, in his "Treatise of Hawkes," 1619, has "cranes" (pp. 20, 21, 24) and "calling-cranes" (p. 54).

CRINES, s., the short hair-like feathers about the cere (q.v.). Nicholas Cox, in "The Gentleman's Recreation," 1674, has crinetts.

CROAKS, or KECKS, Fr. crac, a disease of the air-passages, analogous to a cough, and so called from the sound the bird makes during any exertion, such as bating, or flying. See PIN.

CROP, s., the dilatation of the gullet which serves as the first receptacle for the food taken by a hawk.

CROSSING FLIGHT, when another bird flies between the hawk and her quarry.

DECK-FEATHERS, s., the two centre feathers of the tail.

DISCLOSED, said of hawks that are just hatched; now obsolete.

DRAW the hood, to draw the braces which open and close the hood behind.

DRAWING from the mew, i.e., withdrawing a hawk after she has moulted.

ENDEW, v., whence endewing and endewed, to digest the food. "And ye shall say this hauke is fully gorged and hath endewed, or put over."—"Boke of St. Albans," 1486. The forms indues and induing; also occur, Fr. enduire, and induire. See PUT OVER.

ENEW, or INEW, v., the same as PUT IN (q.v.). Drayton has ineawe. "For very fear they instantly ineawe. "Polyolbion," 1622, song xx. l. 234.
GLOSSARY.

ENSEAM, with old authors ENSAFME, v., whence ensayminge and en-
saymed, sc. ensem, from the Fr. essimer, to purge a hawk, and rid
her of superfluous fat. "Ensayme of an hawke is the grece."—
"Boke of St. Albans," 1486. With a different spelling, "ensaim," the
word occurs in a Close Roll of 3 Hen. III. (1218). For the context,

ENTER, v., to fly a hawk at quarry for the first time.

EYRIE, s., a nestling, or young hawk taken from the "eyrie" or nest ;
from the Fr. niais, the initial n being dropped, as in many other
English words (e.g., adder, from A.S. neddre). The terms applied to
hawks of different ages are explained by D'Arcussia in his "Faucon-
nerie," 1605. He assigns five different names to hawks as they
chance to be taken at different seasons—viz., (1) Niais, if taken in
May ; (2) Gentil, in June, July, or August ; (3) Pelerin, or Passager,
in September, October, November, or December ; (4) Antenere,
Antanneaire (O.Fr. Antan, i.e., Pannée passéé), or Antevere, in
January, February, or March ; and (5) Agar ("mot Hébreu qui
signifie, estranger"), if she has once moulted ; hence our word
"Haggard" (q.v.), applied to a wild-caught old hawk. Tardif, how-
ever, had long previously explained these terms in his "L'Art de
Faulconnerie," 1492, thus :—"Nyais oyseau est celui qui est prins au
nid. Branchier est celui qui suit sa mere de branche en branche,
qui est aussi nommé rammage. Sor est appellé à sa couleur sorette,
celui qui a volé et prins devant qu'il ait mué."

EYRE, s., see Ayre.

FALCON, the female Peregrine par excellence, but applied generally to
the females of all long-winged hawks.

FALL AT MARK, to alight upon the ground and there await the owner.
See Bert, "Treatise of Hawkes," 1619 (pp. 6, 72).

FEAKE, v., seeing ; said of a hawk when she wipes her beak on the perch
after feeding. It was also said "an hawke snytith or sewith hir
beke, and not wipeth hir beke."—"Boke of St. Albans," 1486.

FILANDERS, s., intestinal worms, filaria. Cf. The Zoologist, 1881, p. 309.

FLAGS, s., the secondary, or cubital feathers of the wing. See Beam-
feathers.

FLY ON HEAD, v., to miss the quarry and check.

FOOT, v., to clutch. A good footer is said of a hawk that catches well
and holds.

FROUNCE, s., a canker or sore in the mouth and throat. For modern
GLOSSARY.

223

treatment, see Salvin and Brodrick, "Falconry in the British Isles," 2nd edit. p. 142.

FULL-SUMMED, adj., when a hawk has got all her new feathers after moulting. See SUMMED.

GALBANUM, s., a gum resin derived from an umbelliferous plant, Ferula galbaniflua; usually obtained by making an incision in the stalks, when a milk-white fluid exudes in tear-like drops, which, after a few hours' exposure to light and air, change to a yellow colour, and become dry and hard enough to gather. It is regarded as an internal remedy in chronic mucous catarrh and rheumatism, and is applied externally in the form of galbanum plaister as a mild stimulant to relieve tumours and chronic pulmonary affections.

GET IN, v., to reach the hawk as soon as she has killed.

GLEYMA, the substance thrown up after casting gorge.

GORGE, s., the crop ; GORGED, adj., full fed.

GURGITING, choking with too large a mouthful.

HACK, s., the place where the hawk's meat is laid.—Nicholas Cox, "The Gentleman's Recreation," 1674.

HACK, flying at ; Fr. voler au tuquet; the state of liberty in which eyess falcons are kept for a few weeks before being trained; coming in daily to feed on the hack-board where their meat is cut up for them. Sir John Sebright employs the term: "Observations upon Hawking," 1826, p. 8. John Dawson Downes, a contemporary falconer of experience, to whom he submitted the MS. of this work for criticism prior to publication, invariably wrote at heck, and asserted that the term is not applicable "until after the birds have been taken up and trained." See The Zoologist, 1890, p. 418.

HACK-BELLS, large heavy bells put on hawks to hinder them from preying for themselves whilst "flying at hack."

HAGGARD, s., a hawk that has been caught after assuming its adult plumage, that is, after having moulted in a wild state. Prof. Skeat states ("Etym. Dict.") that the original sense is living in a hedge (hag), hence wild; though Peregrine Falcons do not live in hedges. D'Arcussia derives the word from the Hebrew agar, which signifies stranger, and which, in this sense, is synonymous with Passage-hawk. See EYESS. The unknown author of the "Menagier de Paris," 1393, has "Esprevier hagart est celluy qui est de mue de haye," ed. Pichon, 1846, vol. ii. p. 317. In a foot-note to this remark Baron Pichon observes: "D'Arcussia (pp. 8 et 36) et Saincte Aulaire (p. 12) discnt aussi que le faucon hagart (ou mué de champs) est celui qui a
déjà mué une fois. D'Arcussia fait deriver ce nom du mot hébreu agar, signifiant étranger. Il semble qu'il doit plutôt signifier égaré, sauvage, à moins qu'attendu l'explication qu'en donne ici notre auteur on ne le fasse venir de haya, haie." Selincourt, in his "Parfait Chasseur," 1683, gives some advice as to the best kinds of hawks to keep according to the sort of country they are to be flown in, and refers to the "fauconniers flamands qui en apportent tous les ans tant de niais que de hagars."

HALSBAND, s., literally, neck-band; a contrivance or soft twisted silk placed like a collar round the hawk's neck and the end held in the hand; used by Indian falconers, when flying the Sparrow-hawk to steady the bird when cast off.

HAVOCK, to cry, from A.S. hafoc, a hawk. See HOO-HA-HA.

HEY and HEYE, adj., in old authors, sc. high, i.e., in good condition.

HOOD, s., the leathern cap (Fr. chaperon, Dutch huij, and German haube) used for blindfolding hawks to tame them. "I never in the house let her sit hooded at all, and when shee is a flying hawke, never unhooded in the field."—Bert, "Treatise," 1619, p. 23. Before the Crusades the hood was unknown to European falconers; it was introduced by the German Emperor, Frederick II., who adopted the use of it from the Syrian Arabs. The hood proper has a plume of feathers on top; the rufter-hood is without this. See RUFTER-HOOD and SEALING.

HOOD OFF, v., to pull off the hood and slip a hawk at the quarry.

HOOD-SHY, said of a hawk that has been spoilt by clumsy hooding.

HOO-HA-HA. The modern version of an old cry raised by falconers when the quarry is sighted and the hawk is encouraged to pursue. Drayton (No. 23) gives it in a description of hawking by the river, 1622 (vide ante, p. 19). Perhaps the expression, to cry havock, meant originally to give the hawking cry before slipping at the quarry, hafoc being the A.S. word for hawk. Claude Gauchet, in his "Plaisir des Champs," 1583, writes: "puis au partir de l'arbre hoya, hoya, se crie" and Dangeau, in his "Etats de la France," has: "Toutes fois qu'elle part (la Pie) on crie, houya, houya!" Baron de Noirmont (No. 206), describing the French method of duck-hawking (vol. iii. p. 184), says: "on mettait les oiseaux, c'est à dire les faucons, à mont, puis on faisait partir les canards; au moment où ils prenaient leur vol, on criait ha, ha! ou bien encore hou, hou! à la mode flamande." The Arab falconers shout "ha-hou!", which, according to General Daumas (No. 199), signifies with them "There it is!" The Japanese falconers, when halloaing to a hawk, cry, "O-ou, O-ou!" See the
GLOSSARY.

INDUE, INRING, note to No. 10. See ENDEW.

IMPING from the Lat. impono, a method of repairing broken flight or tail feathers. For the modus operandi, see Salvin and Brodrick, "Falconry in the British Isles," 1873, p. 134.

INE, s., the neck of the quarry (q.v.), now obsolete.

INTERMEWED is "from her first mewing till she come to be a white hawk."—Latham, 1615. Literally, "between moults." “I have seen divers intermewers.”—Bert, 1619. This word is now seldom used.

JACK, the male Merlin.

JERKIN, the male Jerfalcon.

JESSES, s., the short narrow straps of leather fastened round a hawk's legs to hold her by. See LEASH.

JOKIN, sleeping; used by old authors; a term now obsolete.

JOKITH, jouketh, i.e., sleepeth. Amongst the "kyndeli termis that belong to hawkis," explained in the "Boke of St. Albans," 1486, the fifth is that your hauke jouketh and not slepith.

 LEASH, s., a long narrow thong of leather attached to the jesses with a swivel or varvels (q.v.), and by means of which a hawk is tied to perch or block.

LINES, s., loynes, lunes, also lewnes. “Lunes for hawks, leashes or long lines to call them.”—Phillips, “New World of Words,” 1696. “The jesses were made sufficiently long for the knots [ends] to appear between the middle and the little fingers of the hand that held them, so that the lunes, or small thongs of leather, might be fastened to them with tyrrits or rings, and the lunes were loosely wound round the little finger.”—Strutt, "Sports and Pastimes," p. 32. Hence it would appear that the lunes took the place of the modern leash, which is attached to the jesses with a swivel or varvels. Bert terms them "lines," thus:—“until he hath with her lines fastened her calling-cranes unto her.”—“Treatise of Hawkes,” 1619, p. 54. See CREANCE.

LURE, s., from the O.Fr. loerre, modern leurre; O. German Luoder, a bait. Technically, a bunch of feathers, or couple of wings tied together on a piece of leather, and weighted. Being garnished with raw meat, the hawk is always fed upon it. Hence, when swung aloft, it serves to lure the hawk back to the falconer.

MAIL, s., the breast feathers of a hawk.
MAIL, v., to mail a hawk, i.e., to wrap her up in a soc or handkerchief (Fr. l’envelopper d’un linge nommé chemise), either to tame her, as described by Bert (op. cit. pp. 46–47), or to keep her quiet during an operation, as “coping” or “imping” (q.v.).

MAKE-HAWK, s., an old experienced hawk flown with an eyss, when training, to teach it or encourage it.

MANNING, manned, making a hawk tame by accustoming her to man’s presence. See Reclaim.

MANTLE, v., said of a hawk “when she stretcheth one of her wings after her leg, and so the other.”—Nicholas Cox, 1674.

MAR-HAWK, s., one who spoils a hawk by clumsy handling.

MARK, to fly at, v., generally said of a Goshawk when, having “put in” a covey of partridges, she takes stand, marking the spot where they disappeared from view until the falconer arrives to put them out to her.

MARROW, with old authors mary, e.g., mary of beefe; mary of goose; given as a remedy, or to envelope medicine.

MEW, s., the place where hawks are set down to moult. When the royal “mews” at Charing Cross were converted into stables in 1534, the name, confirmed by long usage, remained to the building, although inapplicable after the hawks were removed. In later times, when the people of London began to build ranges of stables at the back of their houses, they continued the name of the buildings, though appropriated to other uses.—Stow’s “Survey of London,” 1598.

MEW, v., to moult, from the Fr. muer, to change the feathers. In “The Gentleman’s Academie,” by Gervase Markham, 1595, will be found special directions for the mewing of hawks, from which we learn that the best time to commence is the beginning of Lent, and, if well kept, the bird will be mewed, that is, moulted, by the beginning of August. French falconers term their hawks “mûes” lorsqu’ils ont fait cette première mue en captivité; mûes des bois ou des champs, quand elle a eu lieu en liberté.”—Dunoyer de Noirmont. “Pour les muez des champs, ils sont du tout infidèles, et vont toujours aux moucherons.”—D’Arcussia, “Conférence des Fauconiers” (11e journée). This explains the term “muer de haye,” used in reference to a Goshawk in one of the Paston Letters, 24 Nov. 1472, which seems to have puzzled commentators.

MITES, s., the parasites that infest the head and nares of a hawk.

MONEY, s., with old authors, sc. mummy, Fr. momie; formerly, when reduced to powder, used as medicine for hawks: cf. Ray, “Summary
GLOSSARY.

of Falconry," 1678, chap. ii. § 9. The old Spanish writers on Falconry refer to it as moomia : cf. Pero Lopez de Ayala, "Libro de las Aves de Caça," chap. xxviii. The use of it was probably introduced into Spain by the Moors, as it appears to be derived from the Arabic moomiya, from moum, wax.—Cf. Dozy et Engelmann, "Glossaire des Mots espagnols dérivés de l’arabe," 2nd edit. Leyde, 1869.

Muer des champs, or Muer de haye. See Mew.

Muset, s., the male Sparrow-hawk; French mouchet, Dutch mosket.

Mutes, s., the droppings or excrement of hawks. "And ye shall say that your hauke mutith."—"Boke of St. Albans," 1486. Or, if a short-winged hawk, she "sliceth," op. cit.

Nares, s., the nostrils of a hawk. From the Latin.

Nyas, s, sc. an eyas, or eyess, Fr. niais, a nestling hawk taken from the eyrie or nest.—Dunoyer de Noirmont, "Hist. de la Chasse en France," iii. p. 120. O.Fr. nyés. "Tu auras fauclons et laniers nyés, ramaigès, sors, muers."—Gace de la Bigne, 14th cent. Turberville, in his "Booke of Falconrie," 1575, has a chapter entitled "How to kepe Nyasse Sparowhawkes." See note to EYESS.

Ostringer, s., sc. astringer, and astringer (Shakespeare), generally restricted to one who keeps short-winged hawks, especially the Goshawk. Fr. austour and autour. "We usually call a falconer, who keeps that kind of hawk, an astringer."—Cowell, "Law Dict." Bert employs the term astringer.—"Treatise of Hawkes," 1619. The form ostreger also occurs, from ostercus or austercus.—Ducange, sub voce Astur. "A Goshawk is in our records termed by the several names of osturcum, hostricium, estricium, asturcum, and austurcum, all from the Fr. austour [mod. autour; Lat. astur]."—Blount, "Ancient Tenures," 4to, 1815, p. 266. "A techer or ynstructor of fawkners and ostrigers."—Reed, "Governance of Hawkes," 1575. Turberville has "certaine observations for an Ostreger in keeping of a Goshawke."—"Booke of Falconrie," 1575. Ray also has "Ostreger."—"Summary of Falconry," 1678.

Pannel, s., the stomach or lower bowel of a hawk.

Pantar, s., a disease in hawks akin to asthma.

Passage-hawk, a wild hawk caught upon the passage or migration.

Paster, s., plaister; used medicinally; now obsolete.

Perch, s., is that whereon you set down your hawk when you put her off your fist.—Ray, "Summary of Falconry," 1678. The perch is used in the house; the block, out of doors. See BLOCk.
GLOSSARY.

PELT, s., the dead body of the quarry.
PENDANT FEATHERS, those behind the thighs of a hawk.
PETTY SINGLES, the toes of a hawk.
PILL, or PELF, s., what is left of the quarry after the hawk has been fed upon it.
PIN AND WEB, s., a disease of the eye in hawks akin to dimness and film. Bert describes another disease (p. 86) called "pinne in the throat," which from his description resembles what modern falconers term "croaks" (g.v.).
PITCH, s., the height to which a falcon rises in the air by ringing up (g.v.).
PLUMAGE, s., given for "casting" (g.v.).
PLUME, v., to pluck the feathers off the quarry.
POINT, to make her, when a hawk throws herself up in the air above the spot where the quarry has "put in" (g.v.).
POUNCES, s., the claws of a hawk.
PREEN, v., to dress the feathers with the beak.
PRINCIPALS, the two longest feathers in the wing of a hawk.
PUT IN, v., to drive the quarry into covert.
PUT OVER, v., said of a hawk "when she removeth her meat from the gorge into the bowels, by traversing with her body, but chiefly with her neck."—Nicholas Cox, "The Gentleman's Recreation," 1674. See ENDREW.
QUARRY, s., the game flown at. O.Fr. curée, the reward given to hounds when they killed; from the Low Lat. corata, the entrails of a slain animal.
QUICK, adj., alive.
RAKE AWAY, v., to take off, instead of pursuing the quarry flown at, or to fly wide of it.
RAMAGE-HAWK. See BRANCHER.
RANGLE, s., small stones given to hawks to aid digestion. If set down on a block where it can reach them, a hawk will pick them up voluntarily.
RECLAIM, v., Fr. réclamer, to make a hawk tame, gentle, and familiar. "In the manning and reclaiming, you must by kindness make her gentle and familiar with you."—Nicholas Cox, "The Gentleman's Recreation," 1674.
RED-HAWK, s., the modern term for a "sore-hawk" (g.v.).
GLOSSARY.

RING-UP, v., to rise spirally to a height.

ROBIN, s., the male Hobby.

ROUSE, v., is when a hawk lifteth herself up and shaketh herself.—Nicholas Cox, op. cit. "Rowse," "Boke of St. Albans," 1486.

ROUSING; with old authors ROWYSIN. See ROUSE.

RUFF, v., Fr. buffeter, to hit the quarry and make the feathers fly, without trussing it. See TRUSS.

RUFTER-HOOD, s., Dutch ruishuif, German rüsthaube, French chaperon de rust, a plain, easy leather hood, through which the hawk can feed, and opening wide behind; used when a hawk is being tamed, and superseded by the hood proper when she is trained. The absence of a plume prevents her from pulling it off. See HOOD.

RYE, s., a disease in hawks which shows itself by a swelling in the head. "For defawte of hote meate this sekenese the Ry commyth."—"The Boke of St. Albans," 1486.

SAILS, s., the wings of a hawk.

SCOURING, s., purging. See Turberville's "Booke of Falconrie," 1575 (pp. 285, 286).

SCREEN-PERCH, s., the form of perch used for hawks when kept in a room. See PERCH and BLOCK.

SEARE, and SERE, s., with old authors, for cere, from Lat. cera, the wax-like skin above the beak. See CERE.

SEDGE, AT-, a corruption of "at siege;" said of a heron when at the waterside, in contradistinction to being "on passage."

SEELING, an old method of obscuring the sight of the hawk by passing threads through the lower eyelids and tying them behind the head, a practice long superseded in this country by the more humane use of the hood, though still adopted by native falconers in India.

SERVING a hawk, helping to put out the quarry from covert.

SET DOWN to moul, put into the mew.

SHARP SET, very hungry.

SLOOSE, s., with old authors, for sloes (Prunus spinosa, Linn.), used medicinally; A.S. sla; O.E. sle. For an interesting note on the meaning of this word, see Prior, "Popular Names of British Plants," 3rd edit. (1879), p. 217.

SNITING, with old authors; an obsolete term for sneezing.

SOCK, German Falkensack. See MAIL, v.

SORE-HAWK, s., a hawk of the first year. From the Fr. sor, or saure, reddish brown; whence sorrel. "A sowyr hawk ys much tenderer
GLOSSARY.

than a muyd hawk."—Reed, "Governance of Hawkes," 1557. A coloured figure of a sore Sparrow-hawk is given in Rowley's "Ornithological Miscellany," 4to, 1875 (vol. i. p. 58).

Spring, v., to flush the partridge, pheasant, or other bird to be flown at.

Stalke, s., with old authors, the leg (tarsus). See Harting, No. 81, pp. 5, 7, 16, 31.

Stavesaker, s., stavesacre, Delphinium staphisagriae, Linn., a plant formerly in request for destroying lice in a hawk.

Stoop, s., the swift descent of a falcon on the quarry from a height; synonymous with swoop.

Strike the Hood, v., to half open it, so as to be in readiness to hood off the moment the hawk is to be flown.

Summed, adj. A hawk is said to be "summed" or "full summed" when, after moulting, she has got all her new feathers, and is fit to be taken out of the mew. See note to No. 10, ante, p. 10.

Swivel, s., used to prevent the jesses and leash from getting twisted when the hawk is tied upon the perch. See Leash, Tyrrit, and Varvels.

Take the Air, v., to mount.

Tewell, s., the lower bowel, affected by the disease termed cray (q.v.).

Tiercel, TerceL, Tassel (Shakespeare), and Tarsell (Bert), the male of any species of hawk, the female being termed a falcon. The tiercel is said by some to be so called from being about one-third smaller in size than the falcon; by others it is derived from the old belief that each nest contained three young birds, of which two were females, and the third and smallest a male. Note the familiar line in "Romeo and Juliet": "Oh! for a falconer's voice to lure this tassel-gentle back again."

Tire, v., Fr. tirer, to pull at a tough piece. See "Tiring."

Tiring, s., any tough piece (as the leg of a fowl with little on it) given to a hawk when in training to pull at, in order to prolong the meal, and exercise the muscles of the back and neck. "I have knowne many Falconers that never make their hawkes to tyre, saying that it is but a custom, and needlesse; but I say the contrary, for inasmuch as the hawke is exercized by reasonable tyring, shee becommeth the healthier and the lighter both of body and of head by all moderate exercises, yea, and shee is the better in state also as you may perceve."—Turbervile, "Booke of Falconrie," 1575.

Tower, v. See Ring up.
GLOSSARY.

TRAIN, s., the tail of a hawk. Also the live bird that is given on a line to the hawk when first entered.

TRUSS, v., Fr. trouser, to clutch the quarry in the air instead of striking it to the ground.

TYRRIT, s., a swivel, or turning-ring, from the Fr. tourret, the use of which is thus explained by Littré: "anneau double qui empêche les jets d'un faucon ou toute autre courroie de s'embroutilier;" and by Baron Dunoyer de Noirmont: "pour empêcher les jets et la longe de s'enrouler, on interposait entre eux un tourret, composé de deux anneaux de métal, tournant l'un sur l'autre." The word occurs in Chaucer, who describes greyhounds "with mosel fast ybound, colored with gold, and torretes filed round." See Warton's note on the passage, "History of English Poetry," vol. ii. p. 99 (1824). The mode of making a tyrrit or swivel is minutely described and its use explained in the work of the Emperor Frederick II., "De arte venandi cum avibus," written about 1247, and first printed in 1596. See chapter xi. of the second book, entitled "De tornetto, qualiter factum sit, et ad quid sit utile."

UNRECLAIMED, adj., wild.

UNSTRIKE THE HOOD, v., to loosen the braces so that the hood may be easily pulled off.

UNSUMMED, adj. A hawk is said to be unsummed while moulting, before her new feathers are grown up.

URINES, s., nets to catch hawks.—Nicholas Cox, 1674. A corruption probably of the Fr. araigne, "sorte de filet pour prendre les oiseaux divers et même les oiseaux de proie."—Cerfon, "De la Basse Volerie," p. 145.

VARVELS, s., small flat rings of silver on which the owner's name was engraved, fastened to the ends of the jesses, and used instead of a swivel, the leash being passed through them. One is figured on the title-page of Bert's Treatise, 1619. See also Camden, "Britannia," i. 329; Gentleman's Magazine, vol. 63, p. 101; vol. 65, p. 474; Archaeologia, vol. xii. p. 410, pl. 51; and Dillon, Proc. Soc. Antiq., 2nd series, vol. iv. (1869), p. 353.

WAIT ON, Fr. tenir à mont. A hawk is said to "wait on" when she soars in circles over the head of the falconer, waiting for the game to be flushed.

WARBILDE, WARBEL, and WARBLE, v. A hawk warbleth when after "rous- ing" and "mantling" (q.v.) she crosses her wings together over her back. "She mantellith and not stretchith when she putteth her leges from her oon after another: and hir wynges follow after hir leggs: then
she dooth mantill hir, and when she hath mantilled hir and bryngith booth hir wynges togeder ouer hir backe, ye shall say youre hawke 'warbellith hir wynges.'"—"Boke of St. Albans," 1486.

Watching. Part of the old method of taming hawks was to watch them for the first night or two after their capture, to prevent them from sleeping. "I kept them upon the fist that day they came unto me, and that night they were truly watched."—Bert, "Treatise of Hawkes," 1619 (p. 46). Shakespeare employs the word in this sense, "Taming of the Shrew," act iv. sc. 1, wherein Petruchio gives a lesson in "reclaiming" a hawk.

Weather, v., whence weathering, to place the hawk upon her block in the open air. Simon Latham (who states in the Preface to his book that "the practice and experience of many years is given in a few leaves not drawn from traditions in print, or otherwise taken upon trust, but out of certain and approved conclusions") remarks on the subject of "weathering" that an eyess may be set abroad to weather at any time of day unhooded, and better when her gorge is full, for she will then sit quietly upon the block; but a haggard should be set down in the morning, or else in the evening before she is fed, and should always be hooded to prevent her from "bating" (as she otherwise would do) and continually striving to be gone, whereby her training would be greatly hindered. See Latham's "Falconry; or the Faulcon's Lure, and Cure," 1615 (p. 35).

NOTES TO THE ILLUSTRATIONS.

I. (Frontispiece.) Portrait of Sir Ralph Sadler, of Everley, Wilts, Grand Falconer to Queen Elizabeth. From a painting on panel, attributed to Marc Gerhardt, in the possession of Sir John D. Astley, Bart. Reproduced in colour by W. Griggs from the original picture preserved in the Manor House at Everley.

Sir R. C. Hoare, in his “History of Modern Wilts,” folio, 1826, under the head of “Everley,” writes:—“In the first year of the reign of King Edward the Sixth a grant of the manor of Everley, and park and free warren, was made to Edward, Duke of Somerset, Lord Protector (1547), on whose attainder it reverted to the Crown, and was afterwards granted by Queen Elizabeth to her royal falconer, Sir Ralph Sadler,” of Standon, in the county of Herts, who had been Chief Secretary of State to Henry VIII.

“Sir Ralph was fond of hawking, and no place could have been better adapted to that sport than Everley, with its extensive and adjoining open country. . . . He is said to have partly built the mansion-house there, and especially one room, where was his picture in small life, with his hawk on his arm, as well as his crest, and which painting is now (1826) removed from its original situation, but is still preserved by the present owner.”

The picture referred to is that here reproduced, and is attributed to Marc Gerhardt (1580–1635). A coloured print of it is given by Clutterbuck in his “History and Antiquities of Hertfordshire,” 1827, vol. iii. p. 235.
Sir Ralph Sadler's love of hawking once nearly involved him in disgrace at Court. He had been appointed to guard the unfortunate Mary, Queen of Scots, during her imprisonment in the Castle of Tutbury (1584-85), and complaint was made against him by some of her enemies that he was conniving at her escape by permitting her to accompany him to some distance from the castle during his hawking excursions. He admitted that he had sent home for his hawks and falconers, wherewith to divert the miserable life which he passed at Tutbury, and that he had been unable to resist the solicitations of his royal prisoner to permit her to see a sport in which she greatly delighted. But, he added, this was under the strictest precautions for the security of her person (Memoirs, vol. i. p. 33).

Sir Ralph, who was born at Hackney, Middlesex, in 1507, died, at the age of eighty, in 1587, at Standon in Hertfordshire, and was buried in the chancel of the church there, on the south side of which there is a fine monument erected to his memory. An engraving of this is given in Clutterbuck's "Hertfordshire," vol. iii. p. 235. Lloyd, in his "State Worthies," says of him: "Little was his body, but great his soul; the more vigorous the more contracted" (ed. 1670, p. 96).

He left three sons, Thomas, Edward, and Henry. The last-named, to whom Symon Latham was falconer (see No. 19, note), married Dorothy Gilbert, of Everley, and on him Sir Ralph bestowed the estate at Everley. The property passed from the Sadlers to the Evelyns of Godstone, Surrey, and West Dean, Wilts; thence to the family of Barker, who subsequently disposed of it to Sir John D. Astley, Bart., whose tenant, Mr. C. W. Curtis, is now in possession.

The house unfortunately was partially destroyed by fire in the winter of 1881-82, but has since been rebuilt, and the portrait is still preserved there. It was lent for exhibition by Sir John Astley in the spring of 1890, and hung for a few months during the "Exhibition of Sports and Arts" in the "Falconry Room" at the Grosvenor Gallery. It is curious that neither the historian of Wilts nor the historian of Hertfordshire has been able to discover any other portrait than this of so important a personage.

For fuller details concerning Sir Ralph Sadler than can here be given, the reader may be referred to the authorities above
NOTES TO THE ILLUSTRATIONS.

A grandson and namesake of Sir Ralph Sadler—namely, the only son and heir of Sir Thomas Sadler—kept a pack of otter-hounds at Standon. He is mentioned in the first chapter of Walton's "Compleat Angler," wherein Venator refers to a meet of his hounds at Amwell Hill. He died February 12, 1660.

II. PORTRAIT OF ROBERT CHESEMAN, FALCONER TO HENRY VIII. From a painting by Hans Holbein in the Royal Gallery at the Hague.

He was the son and heir of Edward Cheseman, Cofferer and Keeper of the Wardrobe of the Household to Henry VII., and was born in 1485. (Harl. MSS. 1546, fol. 67\* and 1551, fol. 28\*)

This portrait of him was painted in 1533, when he was in his forty-eighth year.

He lived at Dormanswell, near Northcote, in Middlesex, and owned land and tenements at Norwood and Hanwell, besides several houses at Kentish Town, and a house, garden, and orchard in Fetter Lane. He was made a Justice of the Peace for the county in 1531 (Gairdner, Calendar State Papers, Henry VIII., vol. v. p. 77). He sat upon several Royal Commissions—as, for example, the commission of inquiry in 1535 as to first-fruits and tenths (Gairdner, vol. viii. pp. 40, 49), and that in 1545 for the viewing of wheat and oats in Middlesex, with the object of ascertaining what was available for the King's use after allowance for the necessities of the owners. Sir Ralph Sadler was a member of the Privy Council which met on this business at Windsor, the 24th October 1545 (Acts of the Privy Council, 1542–1547, ed. Dasent, pp. 260–261). Robert Cheseman was also one of the commissioners of inquiry concerning the possessions of Cardinal Wolsey at the date of his attainder (Gairdner, vol. iv. No. 2931); and on the occasion of the Northern Rebellion his name appears on the list of "such noble-
men and gentlemen as be appointed to attend upon the King's own person," when he was required to furnish thirty men at arms (Gairdner, vol. xi. p. 233).

He had for a near neighbour at Harrow-on-the-Hill, Dr. Richard Layton, rector of Harrow, archdeacon of Bucks, and visitor of monasteries, who, like himself, was devoted to hawking. This appears in a letter from Dr. Layton to Thomas Cromwell, Lord Privy Seal, dated "Harrow-on-the-Hill, 25 September, 1537," wherein the following passage occurs:—

"Mr. Cheseman dined with me at Harrow last Thursday, and when he showed me that the Friars of Hounsley [Hownslow] would have sold him their house and lands, I advised him to go to your lordship, the King's High Vicar-General, to whom it pertained to redress their misgovernance. Nevertheless, the morrow after, he obtained this lease [a lease for 99 years] as the minister [of the Friars] confessed, whom I sent for to Harrow as soon as I heard of this bruit. The Prince, their founder, and your lordship will best know what to do. I send by this bringer perisse [pears] of Harrowe, graffed by my Lord of Duresme his own hands, and partridges my own hawk kills." (R. O., No. 748, Gairdner, xii. p. 268.) In a subsequent letter to Cromwell he writes: "If you had come to Harrow on Friday your bed was ready. You shall have twenty beds in the town, where there has been no sickness this year, and a dozen in the parsonage. I send by the bearer half-a-dozen partridges. If you come not soon there will be none to fly at. I send out my hawk to-day to kill some for your supper on Monday. . . . Harowe this Saturday." (R. O., No. 749, Gairdner, xii. p. 269.)

As Cheseman accompanied the King in his hawking excursions, it is not unlikely that he was present on the occasion of the memorable accident mentioned in Hall's "Chronicle," already referred to (Introduction, p. xv). He died 3 July 1547, as appears by the Inquisition post mortem (1 Edward VI. part 2, Middlesex, No. 1), wherein, as usual, the will is recited. It would seem that he did not hold the office of Royal Falconer until his death, for three years after his portrait was painted—namely, in 1536—Henry Norris, Esquire, was Master of the Hawks, with a salary of £40 per month. (Cal. State Papers, Dom., vol. x. p. 364.)
The following entries relating to the Royal Falconers are extracted from the Privy Purse Expenses of King Henry the Eighth, from November 1529 to December 1532:

March 1530.—Itm the v days paid to the henne-taker for hawks mete . . . . xs.
Itm to iiij of Maister Skevingtons s"vnts in rewarde for bringing iiij hobbyes to the Kings grace . . . . iiij li.
Itm the xj daye of Marche paied to Garrat and Richard the fawconers in rewarde for finding the herons . . . . xs.

Dec. 1530.—Itm the iiij daye paied in rewarde to Sr Richard Sandes s"vnt for the bringing of a Saker to the King at Hampton Courte . vs.
Feb. 1532.—Itm the ij daye paied to Nicholas Clampe one of the fawconers for one hole yeres wages to ende at our lady daye in Lent next . . . . x li.
Itm the iiij daye paied to a stranger called Jasper, fawconer, for vj Sakers and v Sakeretts at viij coron a pece which amounts to ⅞ viij coron . . . . xx li. xs viijd.

July 1532.—Itm the xviiij daye paied to a s"vnt of Sr John Bowcher's in rewarde for bringing of a caste of hawks to the Kings grace . . xs.
Sept. 1532.—Itm the xxvj daye paied to a s"vnt of my lorde of Derby in rewarde for taking up of an hawke of the kings . . . . vjs viijd.
Itm to the same John Evans for the mete of iiij hawks by the space of lxxxxvij dayes for ev'y one penny by the daye . . xxxijs. iijd.

Nov. 1532.—Itm the iiij daye paied to a s"vnt of the Frenche Kings in rewarde for bringing hawks to the Kings grace to Calys c coron xxij li. vjs viijd.
Dec. 1532.—Itm the same daye paied to Bentley for the expenses of the Frenche fawconers by the space of a monethe . . . . lviijs xd.

In the "Household Book" of the L'Estranges, of Huntstanton, co. Norfolk, 1519-1578, will be found many curious entries relating to the purchase and keep of hawks in that
NOTES TO THE ILLUSTRATIONS.

county during the reign of Henry VIII. and Elizabeth, some of which have been quoted in Stevenson's "Birds of Norfolk" (vol. i. p. 16). In these accounts occur entries of "fesants kyllyd wt the goshawk," "ptriches kyllyd with the sper-hawke," and "larks kyllyd with the hobbye."

III. An Elizabethan Falconer's Bag. Mounted on an enamelled frame of silver gilt, and embroidered in silk with representations of the blackberry and mistletoe, emblematical of autumn, the hawking season.

The original is in the possession of Lady North, of Wroxton Abbey, Banbury, Oxfordshire, who has also a falconer's glove and a lure of the same period, similarly embroidered.

We may take it that such accoutrements were intended only for state occasions, or for the use, perhaps, of royal personages. The ordinary glove, lure, and bag for every-day wear would be of plain leather, with little or no ornament beyond perhaps a tassel, or fringe.

The lure used by Elizabethan falconers was in the shape of a horse-shoe covered with cloth or leather, on which a piece of raw meat was tied, and weighted, to prevent its being carried by the hawk. An older form of lure, used at the end of the fifteenth century, is figured by Viollet-le-Duc in his Dictionnaire Raisonné du Mobilier Français (vol. ii., art. Chasse, p. 440, fig. 21). Such a falconer's bag as that here figured may well have been used by Sir Walter Hungerford, of Heytesbury, Wilts, who was a noted falconer in Queen Elizabeth's reign, and whose position and means would have warranted the use of such costly articles. He was a contemporary of Sir Ralph Sadler, already noticed (p. 242), and was doubtless well acquainted with Mr. Henry Sadler, of Everley, with whom probably he often hawked over the Wiltshire downs. The son of Walter Lord Hungerford, who unfortunately lost his head for treason in 1540, he was commonly called "Sir Walter of Farley," since he inherited Farley, Farleigh, or Farleigh Castle (as it is variously spelled), and resided there. There are two portraits of him in the possession of Sir R. Hungerford Pollen, of Rodbourne, near Malmesbury, both of which are engraved
in Sir R. C. Hoare's "History of Modern Wilts," vol. i. Heytesbury, p. 112. One, painted in 1574 at the age of forty-two, is a half-length portrait, which represents him bare-headed, with a falcon on his glove; the other, a very curious one, depicts him on horseback in a full suit of armour, with ostrich plumes in his helmet and on his horse's head, a black greyhound by his side, a hare running ahead of him over down-land, above him a heron flying, and in the foreground a pool on which swims a wild duck, on either side of which, seated on the bank, is a ger-falcon. Above and below the picture runs the following quaint inscription:—

"S' Walter Hungerforde, Knight, had in quene Elyzabeths tyme the seconde of her raine, for fouer yere together a baye horse, a blacke grehounde, a leveratt; his offer was for fouer yere together to all Eynglande not above his betters he that shoulde showe the best horse for a man of armes, a grehounde for a hare, a haucke for the ryver, to wine iiij hundred poundes, that was a hunderythe pounds apese; also he had a gerfalcon for the herne in her Majestys tyme wiche he kept xvij yere and offered the lyke to flye for a hundred pounde, and were refused for all."

He died in 1596, and was buried in a vault in the chapel of Farley Castle, where there is a monument to him with a curiously cut inscription, beginning with his motto, "Tyme tryeth Truth." It is reproduced in the late Canon Jackson's "Guide to Farleigh Hungerford, co. Somerset," 8vo, Taunton, 1860 (p. 23).

IV. JAMES I. AS A YOUTH, CARRYING A SPARROW-HAWK. Engraved by Raddon from an original picture in the possession of the Earl of Dartmouth.

This portrait was exhibited by the Hon. R. Baillie Hamilton at the exhibition of the Royal House of Stuart in the New Gallery, Regent Street, in 1889, and was numbered 57 in the catalogue of that collection. It was there described as "James VI. (afterwards James I.) when a child; from the collection of Charles I. Small half-length figure of a boy, in front view, dressed in black, with a black cap; face nearly in full view; holding a hawk on his left hand; right hand on hip."
V. JAMES I. AFTER HIS ACCESSION TO THE THRONE OF ENGLAND, 1603–1625. From a Portrait by Vandyck.

Through his love of hawking and hunting, to which he was passionately addicted; by his royal invitations to foreign princes and noblemen well skilled in these pursuits, to instruct his own people; and by his frequent importation and purchase of hawks, horses, and hounds, James I. did more to encourage and promote the exercise of these field-sports in England than any English monarch before or since his time. See (1) a letter from Sir George Chaworth to the Earl of Shrewsbury, dated from Newmarket, 29th November 1607, printed in Lodge's "Illustrations," vol. iii. p. 336; (2) a letter from the King to the Duke of Buckingham, Harl. MS. 6987, vol. 101, p. 184; and (3) the MS. diary of Hans Jacob Wurmser von Vendenheym, who accompanied Lewis Frederick, Duke of Wurtemburg, on his diplomatic mission to England in 1610, and found the King at Thetford in May of that year; Add. MSS. Brit. Mus. 20,001.

See also No. 27 of this Catalogue (pp. 104–105, 2nd ed. pp. 96, 97); No. 65, Appendix, pp. 226–227; No. 79, pp. 79–82; and Trans. Norfolk Nat. Soc., vol. iii. pp. 87, 88.

The expenses of the royal falconers in the time of James I. were:

- Wages, at £30 per month . . . . . £360
- Hawks' meat, at 10s. per day . . . . 182
- Four falconers for crow-hawks, at £50 per annum . . 200
- For hawks of all kinds . . . . . 600

**Total** . . . . . £1342

In the autumn of 1623, while the King was at Newmarket, the Clerk of the Kitchen, William Lamplough, received in two payments an advance of £500 "for providing divers French gentlemen, lately sent unto his Majesty with a present of hawks from the French King, with all necessaries in a journey along with his Majesty to Theobalds, Royston, and Newmarket, they being to reside there for a season to exercise the game of hawking for his Majesty's disport and recreation." (Devon, "Issues of the Exchequer," temp. James I., p. 279.)

In January 1624, the King went again to Newmarket, against
the advice of his physicians, to see some hawks flown. A French falconer had arrived in London, with a present of hawks, horses, and setting-dogs from Louis XIII. Chamberlain, writing to Sir Dudley Carleton from London on January 17 of that year, says: "He made a splendid entry with his train by torchlight, and will stay till he has instructed some of our people in this kind of falconry, though he costs his Majesty £25 to £30 a day."

The King's health failed visibly in 1624, which much affected his enjoyment of field-sports. The following significant entry occurs in the Docquet Book:—

"To Oliver Browne his Majesties Upholdster uppon the Councell's warr dated xiiij Dec 1624 for making sixe portable chaires covered with velvett, to be used in tyme of hunting for ease, and sixe seats of Spanish leather to lift his Majestie to and from his bed xxxixl xiis."

Writing to Sir Dudley Carleton on the 8th January 1625, Chamberlain remarks: "The King kept his chamber all Christmas, only going out in his litter in fair weather to see some flights at the brook."

On February 3, 1625, James was for the last time at Newmarket, accompanied by the Duke of Buckingham and a small suite. [Amongst other business transacted during this visit, directions were given to the Master of the Toils "to take three brace of bucks in Hyde Park, and convey them to Marylebone Park (now the Regent's Park), to supply the scarcity caused by the great rain there."]

On February 23 the King removed to Chesterford Park en route for Royston, which was reached on the 27th. Here Prince Charles joined his royal father, who had evidently not long to live. For the last time the King was moved to Theobalds on March 1, and there, on the 27th of that month, he died of a quartan ague, in the fifty-ninth year of his age and the twenty-third of his reign. Intent upon sport to the last, the latest incidents of his life had reference to a present of four casts of hawks which he sent to Louis XIII. by the hand of Sir Anthony Pell, Knight, his Master Falconer.

A warrant of Sir Anthony Pell concerning the King's choice of hawks, and dated January 26, 1621, is printed by Pennant in the second volume of his "British Zoology," ed. 1812, Append. iii. pp. 309-311.
VI. The Hon. Lewis Latham, Falconer to Charles I., born 1555, died 1655. From an original portrait in the possession of his descendant, Mr. F. A. Holden, of Hyattsville, Maryland, U.S.A.

Lewis Latham, of Elstow, in the county of Bedford, gentleman, was descended from a younger branch of the Lathams, of Latham House, near Ormskirk, Lancashire. The old moated house, which in 1644 withstood a siege by the Parliamentary forces under General Fairfax, gave way in 1750 to a more modern one, which was built by the celebrated architect Leoni.

The office of falconer in the time of Charles I. was one of importance. The Master Falconer was Sir Patrick Hume, who had succeeded Sir Thomas Monson (1615–1618), and who had thirty-three other gentlemen associated with him as falconers, one of whom was Lewis Latham, who also served under Andrew Pitcairn. After Sir Patrick Hume the Master Falconer was Sir Allen Apsley (1669), who was succeeded in 1682 by Charles, Earl of Burford, afterwards created Duke of St. Albans, who, by letters patent bearing date July 5, 1686, was appointed to the office of "Master Surveyor and Keeper of the Hawks," and created Hereditary Grand Falconer (Patent Roll, 3 James II., part 7, membrane 19), an office only recently abolished.

The following records relate to Lewis Latham:

1625, July 15.—Warrant to pay Andrew Pitcairn, Master of the Hawks, to the use of Lewis Latham, Eustace Norton, and the rest of the under-falconers, the stipend formerly allowed them when the King was Prince of Wales.

1627, Aug. 18.—Warrant from Secretary Conway to Attorney-General Heath to prepare grants of the place of Serjeant of the Hawks to Lewis Latham with £65 per annum, and of the place he held of falconer to Richard Berwick.

1655, May 15.—Lewis Latham, gent., deceased the 15th day of May, at Elstow, Bedford.

1655, Sept. 1.—His will, dated 6th May 1653, proved at London by his wife and executrix, Winifred Latham, and registered in the Prerogative Court of Canterbury. His two sons, Henry and John, and five daughters, Ann, Frances, Katharine, Elizabeth, and Ellen, named as legatees: residue to Wife.
1662, May 9.—Winifred Latham, described as the wife of Latham, the King's Serjeant Falconer, petitions for arrears of her late husband's salary.

1662, May 13.—Warrant to pay her £40 out of the privy seal dormant of £10,000.

The present possessor of the portrait, Mr. Frederick A. Holden, claims descent through Frances, second daughter of Lewis Latham. She married four times—(1) Lord Weston, (2) William Dungan, (3) Jeremiah Clarke, (4) William Vaughan. Her son, Thomas Dungan, married and settled in Pennsylvania, and his daughter Frances married Randall Holden, from whom descends the above-mentioned Frederick A. Holden. Her daughter Barbara married James Barker, of Rhode Island, from whom arose a numerous line of descendants claiming relationship with Lewis Latham.

In a quarto volume entitled "The Ancestry of Thirty-three Rhode Islanders born in the 18th Century," by John Osborn Austin, published at Albany, N.Y., by Joel Munsell's Sons, 1889, much stress is laid upon the number of those claiming descent from Lewis Latham—eleven grandchildren and eighty-two great-grandchildren—and a pedigree is printed tracing these descents through his daughter Frances.

In all probability Symon Latham, who wrote "The Faulcon's Lure and Cure," 1615-1618 (No. 18), and who was falconer to Mr. Henry Sadler of Everley, Wilts (third son of Sir Ralph Sadler), was a relative of Lewis Latham—perhaps a brother or a nephew, but not a son, his two sons being, as above stated, Henry and John.

Mr. J. O. Austin, in the work above quoted, refers to this portrait of Lewis Latham as having been "fortunately preserved through the care of many generations of descendants," and we are now indebted to Mr. Holden, its present owner, for his very courteous permission to reproduce it.

A portrait of another of Charles the First's falconers, Sir Alexander Abercromby, with a hawk upon his glove, is in the possession of the present baronet, Sir Robert Abercromby, at Forglen House, Turriff, Aberdeenshire.
VII. English Falconers of the Seventeenth Century. Pheasant-hawking with the Goshawk.

By Francis Barlow, engraved by W. Hollar, 1671.

The print of which this is a copy is one of a scarce series of twelve, published without text, in oblong quarto, 1671, with the title, "Severall Wayes of Hunting, Hawking, and Fishing, according to the English Manner" (see 33, and note thereon). Beneath each plate is a descriptive quatrain, that on Pheasant-hawking being as follows:—

"The feasant cock the woods doth most frequent,
Where spaniells spring and pearch him by the scent,
And when in flight the hawke with quicken'd speede
With's beake and savage talons makes him bleede."

Francis Barlow, the English painter, was born in 1646, in the county of Lincoln, where, amongst the waterfowl of the fens, he had probably good opportunities of studying such scenes as those described a few years earlier by Michael Drayton in his "Polyolbion" (No. 23). He especially painted birds, and was a good draughtsman, though no colourist. He studied under W. Sheppart, the portrait painter, and furnished a great number of the subjects engraved by Hollar.

The plate here reproduced affords a good illustration of the mode in which pheasant-hawking was pursued with the aid of spaniels, as described by Edmund Bert in 1616, in his "Approved Treatise of Hawkes" (No. 22).

VIII. Colonel Thomas Thornton, of Thornville Royal, in Yorkshire, born 1757, died 1823. From a portrait in the possession of the Earl of Rosebery, at The Durdans, Epsom.

Colonel Thornton, one of the most remarkable figures in the English annals of Falconry, came of a distinguished family. His grandfather, Sir William Thornton, was knighted by Queen Anne. His father, Colonel William Thornton, with a troop of yeomanry and tenantry, one hundred in number, raised and fed at his own cost, served with great distinction under the Duke of Cumberland in the Scottish rebellion, and was present at the battles of
Falkirk and Culloden. On his return from the war he was elected M.P. for York. He died rather suddenly in 1771, at the age of fifty, leaving his son Thomas a minor.

The boy had been sent to Charterhouse, where he remained till he was fourteen, and then went to Glasgow College, where he had been about two years when his father died, and stayed there three years longer. It was then that he manifested a passion for field-sports, especially Hawking, on which he expended much time and money, resolving to bring the sport as near perfection as possible.

Leaving Glasgow College at the age of nineteen, he repaired to the family mansion at Thornville Royal, where, with well-trained hawks and dogs, he formed the basis of a sporting establishment which afterwards became famous. He joined the West York Regiment of Militia, of which he subsequently became Colonel, and formed a Falconers’ Club, to which reference will be made when describing the trophy presented to him by its members (Plate IX.).

His love of foxhunting led him to keep a pack of foxhounds, and there is a fine engraved portrait of him, by Sawrey Gilpin, on horseback, cap in hand, cheering his hounds. Another half-length portrait of him, wearing a hunting-cap, forms the engraved frontispiece to vol. iii. of the “Annals of Sporting,” 1823.

He was fond of racing, and used to ride matches himself. One such is on record, which created a great deal of interest at the time. This match, for four miles over Knavesmire, was ridden on the 24th March 1778, on a horse named “Sir Thomas Thumb,” against Mr. Hare, who rode a horse called “Tu Quoque.” After a close contest Colonel Thornton won.

His bodily activity was remarkable. In a walking match he went four miles in thirty-two minutes. In leaping he cleared his own height (5ft. 9in.) for a considerable bet. In another match he leapt over six five-barred gates in six minutes, and then performed the same feat on horseback. At Newmarket, on horseback, he ran down a hare, which he picked up, in the presence of a large concourse of people assembled to witness the feat. He was an excellent shot with gun and rifle, and a good fisherman. But it is as a falconer that we have chiefly to consider him. He was especially skilled in flights at the kite, and in grouse- and snipe-hawking, and his published “Sporting Tour” (No. 57)
abounds with the most interesting details of his experience in these branches of the sport. He was the only falconer of modern times who procured a young goshawk from a nest in Great Britain. This bird was taken in the forest of Rothiemurcus (op. cit., p. 176), where there were a few eyries in the great fir trees, some of which he saw (op. cit., p. 107).

While residing at Thornville Royal (now called Stourton), in Yorkshire, his hawks were flown "at hack" from the observatory in the park, and the present dairy was then the mews. He hawked all over the neighbouring moors, as Blubberhouse and Grassington Moors, and the then open country about Kirk Deighton. At Beilby Grange (then called Wetherby Grange) there was a herony; and Clifford and Bramham Moor being not then enclosed, he flew at the herons "on passage" as they crossed over the moors. Whilst the crops were standing he used to adjourn to the Yorkshire wolds, where he built a house, which he called Falconers' Hall, near Boythorpe, about twelve miles from Scarboro'.

In 1805 Thornville Royal was sold to Lord Stourton, to whom possession was given in January 1806. For the mansion, pleasure grounds, and park he gave £163,800, and for twenty-eight other lots, £62,650; or in all, £226,450. ("Annals of Sporting," 1823, vol. iii. p. 294.)

In 1808 Colonel Thornton left Yorkshire for Spye Park, in Wiltshire, which he took upon lease, as the Yorkshire wolds at that time were beginning to be spoiled for hawking by being broken up for corn crops. (Salvin and Brodrick, p. 8, note.) The Rev. A. C. Smith states ("Birds of Wiltshire," p. 345), on the authority of Mr. James Waylen, that "when Colonel Thornton, who once rented Spye Park, sported in Wiltshire, he occasionally flew his hawks at bustards, the apparent slowness of that bird, when seen at a distance, tempting him to the trial, but the hawks had no chance."

About 1815 he gave up hawking and retired to France, where he had already, in 1802, made an enjoyable sporting tour (see No. 58). Here, in July 1817, he purchased the château of Pont-le-Roi (now Pont-sur-Seine), Département d'Aube, which, however, he resold in 1821 to M. Casimir Perrier, the famous statesman and orator (whose son is still in possession), and took a lease from the Princesse de Wagram of her residence at Chambord.
He died in Paris in the spring of 1823, in the seventy-fifth year of his age, leaving an only daughter, who in 1838 married Captain (afterwards Admiral) the Hon. E. T. Wodehouse. His will, dated October 2nd, 1818, wherein he is described as of Falcons' Hall, Boythorpe, in the East Riding of York, and of Pont-le-Roi, France, was proved in London by his executor, Mr. B. Curling, to whom probate was granted 26th April 1823.

IX. Silver Gilt Urn, presented to Colonel Thornton, of Thornville Royal, by the Members of the Falconers' Club, at Barton Mills, 23rd June 1781. Now in the possession of the Earl of Orford.

The members of this club, whose names are given below, used to meet at Alconbury Hill, which was a favourite rendezvous on account of the number of Kites which at that time were to be found there. (For a description of Kite-hawking see an article in The Field of 10th January 1891, with an illustration by J. Wolf.) They used then to go on to Barton Mills, as appears by a memorandum in the handwriting of Colonel Thornton, which in 1823, the year in which he died, was in the possession of Mr. T. Gosden.

The handsome trophy, of which a representation is now for the first time given, is of unique design in silver gilt. It is appropriately surmounted by figures of a Goshawk holding a Hare, and bears the following inscription:

"Colonel Thornton, proposer and manager of the Confederate Hawks, is requested to receive this piece of plate from George, Earl of Orford, together with the united thanks of the members of the Falconers' Club, as a testimony of their esteem and just sense of his assiduity, and of the unparalleled excellence to which, in the course of nine years' management, he has brought them, when, unable to attend them any longer, he made them a present to the Earl of Orford. Barton Mills, 23rd June 1781."

Then follow the names of the members on a scroll surrounding the armorial bearings of the Earl of Orford. With a magnifying glass these names may be easily read on the plate.
NOTES TO THE ILLUSTRATIONS.

MEMBERS OF THE CLUB.

Earl of Orford  Mr. Vaughan
Mr. Sturt  Mr. R. Wilson
Mr. Snow  Mr. Musters
Mr. Smith  Mr. Barrington Price
Mr. Stephens  Mr. Daniel
Earl Ferrers  Hon. Mr. Rowley
Hon. Thos. Shirley  Lord Mulgrave
Sir Thos. Tancred  Captain Grimston
Mr. A. Wilkinson  Captain Yarburgh
Mr. B. Wrightson  Earl of Leicester
Mr. Drummond  Mr. Stanhope
Sir Cornwallis Maude  Mr. Leighton
Duke of Ancaster  Mr. Francis Barnard
Mr. Williamson  Mr. Nethorpe
Mr. Baker  Mr. Porter
Mr. William Baker  Colonel St. Leger

Mr. Coke  Mr. Parkhurst
Duke of Rutland  Mr. Molyneux
Mr. Belford  Earl of Surrey
Mr. Lascelles Lascelles  Sir William Milner
Mr. Parker  Sir John Ramsden
Mr. Tyssen  Mr. Royds
Mr. Molloy  Sir Richard Symonds
Mr. Affleck  Earl of Leinster
Mr. St. George  Earl of Lincoln
Earl of Eglinton  Marquis of Granby

Mr. Parsons

Chaplain—Mr. Edward Parsons.

This urn, with other sporting trophies, after the Colonel's death, became the property of his grandson, Colonel Thornton Wodehouse, R.A., the son of his daughter, who in 1838 married Captain (afterwards Admiral) the Hon. E. T. Wodehouse.

On the 11th of June 1884, the whole of these trophies were sold at auction by Messrs. Christie, Manson & Wood, when the urn now figured, weighing 136 oz., was purchased for £112 by the present Earl of Orford. Thus, after the lapse of a century,
SILVER GILT URN.

Presented to Colonel Thornton of Thornville Royal
By the Members of the Falconers Club,
Barton Mills, 23 June 1781.
Now in the possession of the Earl of Orford.
NOTES TO THE ILLUSTRATIONS.

the trophy returned to the Orford family, by whose representative in 1781 it had been, as above shown, presented.

An account of the other trophies sold at the same time, some of them of great interest, will be found in The Zoologist for 1884, p. 275.

There is a scarce engraving, from a picture by Sawrey Gilpin, of Heron-hawking, in which Colonel Thornton is represented as just dismounted, and taking up a hawk from a heron in front of a thatched cottage, from the door of which an old woman is looking out in wonderment. This picture is inscribed: “To the Noblemen and Gentlemen of the Falconers’ Club, this plate is humbly inscribed by their most obedient and devoted servant, T. Morris, 1780”—the year before the silver-gilt urn was presented.

X. Edward Clough Newcome, of Hockwold, in the county of Norfolk, born 1810, died 1871.

Norfolk has long been the seat of Falconry in England. Indeed, it may be said that the falconers of Norfolk and Suffolk have done more than those of any other county, except perhaps Yorkshire under the régime of Colonel Thornton, to encourage and maintain the practice of this ancient sport. From the time of John Paston, of Norwich, who, in September 1472, wrote to his brother in London to send him “a mewyd gosshawe,” to the present day, when Mr. Francis D’A. Newcome enthusiastically follows in his father’s footsteps, Hawking has never ceased to be practised, and the names of such masters of the craft as Lord Orford, Colonel Wilson of Didlington (afterwards Lord Berners), Sir John Sebright, John Dawson Downes of Gunton, John Hall of Weston, and Edward Clough Newcome of Hockwold are “household words” in the mouths of their modern disciples. To be convinced of this we have only to turn to the account of the sport given by the Rev. Richard Lubbock in his “Fauna of Norfolk,” and the valuable Appendix to his remarks contributed by Professor Newton to the second edition of that work, printed in 1879. (See No. 65.) From this source of information, supplied by friends who knew him, as well as from Sir John Sebright’s “Observations” (No. 61), the following brief notice of Edward Clough Newcome will serve to explain the reason for presenting the reader with his portrait.
His hawking career commenced about 1827 or 1828, when as a boy of seventeen or eighteen, accompanied by his brother William, he used to go out with Colonel Wilson of Didlington, who succeeded Lord Orford as chief of the Norfolk falconers. The heron-hawks were then kept at High Ash in charge of old Frank van der Heuvel and the Brothers Bots, all of whom came from Valkenswaard, in Holland. The “meets” were, according to the wind, at High Ash, Mundford, Cranwich Barn, Northwold Field, and Methwold Field; Cranwich being far the best. The heronry at Didlington was surrounded by open country on every side. The herons used to go out in the morning to the great fen district, and to rivers and ponds at a very considerable distance in search of food, returning to the heronry towards evening.

It was at this time, says Sir John Sebright (op. cit., p. 39), that the falconers placed themselves down wind of the heronry, so that when the herons were interrupted on their return home, they were obliged to fly against the wind to gain their place of retreat, and a fine ringing flight was then usually obtained. If the heron flew down wind, he was seldom taken; the hawks were in danger of being lost; and as the flight was in a straight line, it afforded little sport.

In 1831 Mr. Newcome advertised for jerfalcons on his own account (Newton, op. cit., p. 235), and afterwards went himself to Norway for them. In 1838, after the death of Colonel Wilson (who in 1832 had become Lord Berners), Mr. Newcome, with the Duke of Leeds, Mr. Stuart Wortley, and Baron d’Offémont, helped to found the celebrated Hawking Club, whose headquarters were at the Loo, near Apeldoorn, the summer palace of the King of Holland, under whose patronage and with whose consent the members met every summer for about six weeks’ heron-hawking. When this was over, Mr. Newcome returned to Norfolk and spent the rest of the year in hawking, shooting, and fishing at Hockwold, where he resided.

About 1853 the Loo Hawking Club ceased to exist, and from that time until a few years before his own death, when he took a leading part in forming a new association, which still exists, and is now known as the Old Hawking Club, he confined his hawking excursions to his own neighbourhood. “Here,” says Professor Newton (op. cit., p. 237), “I had frequent
opportunities of joining him and of watching his skill, for nothing pleased him better than the company in the field of any who took an interest in the art of which he was so great a master. But, from the causes already assigned, herons grew yearly fewer and fewer, until from their scarcity it became impossible to train a hawk to fly them. Rooks, as affording the next best kind of flight available, gave a certain amount of sport, and Mr. Newcome was at great pains to form a rookery near his house, succeeding at last, but only after many failures.

"The open country around Hockwold, Wilton, and Feltwell was his most constant ground, and here from the beginning of March until the corn was well grown he might be nearly always met. He had a boy to carry the cadge, and occasionally to unhood a second hawk, but he was his own falconer both at home and afield. . . . Somewhat later in the season Lakenheath and Wangford Warrens, in Suffolk, were places of resort; and here Stone Curlews often furnished a flight, while sometimes the hawks were taken into the fens for the chance of a Crow or a Pie. When the corn-fields were cleared he had some diversion with Merlins, but herein he was not so very successful, for the larks, as soon as they had got over their moult, and were strong upon the wing, generally beat their pursuers, which, it must be remarked, were eyesses.

"I remember his once having a Sparrow-hawk which was rather good at taking blackbirds, but I do not think he ever possessed a Goshawk while I knew him!"

In 1852 Mr. Newcome took up his abode at Feltwell Hall, and there he lived until his death, on the 22nd September 1871, in his sixty-second year.

In an interesting review of the second edition of "Falconry in the British Islands" (No. 67) which appeared in the Quarterly Review for July 1875, the writer, referring to the loss occasioned to the sport by the recent death of Mr. Newcome, remarked (p. 183): "On field or fen, on moor or mere, by the riverside or on the racecourse, no man had more friends or fewer enemies than the late Edward Clough Newcome. But from his own Norfolk 'brecks' to the bogs of Ireland, from Salisbury Plain to the heaths of Brabant and the fells of Norway, he, from his boyhood, followed the sport of Falconry more keenly than any other; sharing its comparative prosperity of
fifty years since; keeping alive its traditions when its practice had all but expired; reviving it when his own enthusiasm, by infecting others, had given promise for its continuance; and performing feats hitherto unknown in the annals of the art. Untired in his devotion, even by the drudgery of the labour of love he undertook, as an efficient falconer he was unequalled, whether by professionals or amateurs.” His assiduity and success are shown by the fact that he trained eyess falcons to take wild herons on passage. He was the last who kept heron-hawks in England, and an interesting account, communicated by himself, of two remarkable birds which he possessed, named “Sultan” and “De Ruyter,” will be found in Freeman’s and Salvin’s “Falconry” (see note to No. 68). The late Mr. J. D. Hoy, of Stoke-by-Nayland, in Suffolk, an eye-witness of the sport which was enjoyed at Didlington, High Ash, and Cranwich, has left a pleasing account of what he saw in a fragmentary journal not long published (“Trans. Norfolk Nat. Soc.,” vol. ii. p. 390), which has also been quoted by Professor Newton in his Appendix to Lubbock’s “Fauna,” above mentioned.

XI. FLEMING OF BAROCAN, RENFREWSHIRE, WITH HIS FALCONERS, JOHN ANDERSON AND GEORGE HARVEY. Engraved by C. Turner from a painting by J. Howe, of Edinburgh, 1811.

A remarkable instance of a succession of falconers from father to son for many generations occurs in the ancient family of the Flemings of Barochan, near Paisley, in Renfrewshire. The member of that family whose portrait is here given kept the Renfrewshire Subscription Hawks, which were flown chiefly at partridge and woodcock, from the commencement of the present century until his death in 1819. His grandfather was a celebrated falconer, and a more remote ancestor, Peter Fleming, at the end of the fifteenth century, on the occasion of his beating the King’s falcon with a tiercel of his own, received from James IV. of Scotland (1488-1513) a jewelled hawk’s hood, still preserved in the family.

He is here represented on horseback, carrying a hooded falcon, and followed by a favourite black poodle. At his horse’s head stands John Anderson, a celebrated Scotch falconer, with
two hawks on his glove, one hooded, the other pulling at a partridge apparently just killed. At Anderson's side, between him and his master's horse, stands a famous pointer; while before him, in characteristic attitudes, are four spaniels, which were always used for woodcock hawking. To the right an assistant falconer, George Harvey, seated on a felled tree, carries on his glove a cast of spare hawks.

John Anderson was so renowned as a professional falconer that a few lines relative to his career may be acceptable. He was born about 1750 in the parish of Currie, near Edinburgh, and was at first apprenticed to a currier; but his love of hawking becoming known, he was engaged by Mr. Fleming of Barochan as assistant to John Hainshaw, who was then head-falconer. He lived to succeed Hainshaw, and then had for his assistant Peter Ballantine (see Plate XII), who became almost as renowned a falconer as himself. On Mr. Fleming's death in 1819 he was engaged by the Earl of Morton at Dalmahoy, and on the occasion of the coronation of George IV. in 1820 he was selected on behalf of the Duke of Athole to present the King with a cast of hawks, that being the feudal tenure by which the Dukes of Athole held the Isle of Man from the Crown.

There is a scarce print of Anderson in the dress worn by him on that occasion—namely, a dress of the period of James I., with a cast of hawks on his glove. It has been lately reproduced by M. Pichot (No. 221).

After spending some time in the service of Sir Alexander Donne of Ochiltree, Anderson in 1832 retired upon a pension, in the eighty-second year of his age.

The engraving of which a reduced facsimile is here given was made from the original oil painting by Howe preserved at Barochan, and is dedicated to Sir John Maxwell of Pollock, Bart., who was one of the most enthusiastic supporters of the Renfrewshire Subscription Hawks, and who had in his own service as falconer, William Barr, the father of William, John, and Robert Barr, all of whom were skilled falconers.

A memoir of John Barr by the present writer (a pupil of his), in The Field of the 17th July 1880, supplies some interesting links in the history of Falconry between the period above referred to and the present time. Another link is supplied by Mr. Freeman's memoir of John Pells, who was falconer to the Duke
of Leeds and Mr. Newcome, and who died at Lakenheath in March 1883. (See "The Hawking Career of John Pells" in *The Field*, 23rd June 1860, and an obituary memoir of him, *The Field*, 31st March 1883.)

XII. Peter Ballantine, the last of the old Scotch Falconers, born 1798, died 1884. From a painting by A. D. Cooper, 1879, in the possession of Mr. R. Oswald of Auchincruive, Ayrshire.

Peter Ballantine was born in 1798 at Dumfries House, Ayrshire, where his father—who had formerly acted as falconer to the Earl of Eglinton—was employed as steward to the Marquis of Bute. The elder Ballantine was devoted to Falconry, and had sufficient leisure time on his hands to keep a hawk always in training, while his friend John Anderson, already noticed, was in the service of Sir Alexander Donne at Ochiltree, hard by, as falconer. Between these two the young Peter had no difficulty in learning the first principles of Falconry; but in addition to this he imbibed that love for hawks and that gentleness in their treatment which he preserved to the day of his death.

At the age of about twenty Peter Ballantine took service under his old friend John Anderson, who was then falconer to the Renfrewshire Subscription Hawks, which were maintained at Barochan, the seat of Mr. Fleming. Peter remained with Anderson as his assistant until the retirement of the latter on a pension in 1832, when he entered the service of Lord Carmarthen, afterwards Duke of Leeds, as assistant falconer to John Pells, father of the last John Pells, who died at Lakenheath in March 1883.

The hawks were then kept at Huntly Lodge, Aberdeenshire, and while old Pells kept a few passage falcons at work, Ballantine trained the Scotch eyesses, and excellent sport was obtained at herons with the former, and at every description of game with the latter. The finest sport of all was the flight at the woodcock, which was plentifully found in the young plantations which then clothed Deeside, a flight which combined the glorious "stoop" of the well-placed game falcon with the "high mountee" or ringing flight usually obtained with the heron.
NOTES TO THE ILLUSTRATIONS.

It was at this period of his life that Peter Ballantine adopted the Dutch principle of making hoods, and the system of using long jesses and a swivel, in place of the old varvels and leash of the Scotch falconers, to which he had been educated. On leaving Lord Carmarthen's service he entered that of Sir James Boswell of Auchinleck, where he had charge of a kennel of greyhounds, and also trained a cast or so of hawks annually. He was in Sir James's service for twenty-five years, until the death of that gentleman, and was then employed by Mr. Robert Ewen of Ewenfield, Ayrshire. It was perhaps during his service with this gentleman that Peter showed the best sport during his long career, and fairly established his claim to be considered nearly the most successful trainer of eyesses for game-hawking that has lived during the last two generations. In 1870 his score of game was 269 head. In 1871 he killed 346 head, and in 1873 his score was 367 head. Two of the best hawks he had during this period were The Imp, which he kept for five years, and Rantin' Robin, which hawk was moulted ten seasons, and to the last he was as good as ever, when in the humour. Many other hawks which were trained by Peter will live in the memories of those who saw their fine performances, notably a falcon called Jan Van, and another named Band of Hope.

For these particulars the writer is indebted to the Hon. Gerald Lascelles.

On the death of Mr. Ewen, Ballantine found a kind master in Mr. R. A. Oswald of Auchincruive, who kept him on in his old home, and enabled him to continue his old pursuit almost to his dying day.

With Mr. Oswald in 1878, 1879, and 1880, Peter showed fine sport, and trained a splendid falcon called Pearl, which was perhaps as good a game-hawk as could be flown. Up to the last-mentioned date Peter was almost as active as ever—at least he could walk after his hawks for the longest day, and cheer them when on the wing with a voice like a bell; but for the last few years of his life nature asserted itself, and the old man failed a little. But even in the year he died (1884), at the age of eighty-six, he trained a hawk; and it is a curious fact that this bird, having been amiss for some days previously, died on the same day as her famous old master.
NOTES TO THE ILLUSTRATIONS.

XIII. A DUTCH FALCONER OF THE SIXTEENTH CENTURY. From a Portrait by Franz de Vriendt, in the Brunswick Gallery.

The original picture by Franz de Vriendt, commonly called Franz Floris, a painter of Antwerp (1520–1570), is one of the finest examples of that artist’s work. Who the falconer was cannot now be ascertained; but there can be little doubt that it is a portrait, and a good one, of some enthusiast of the day.

The Dutch falconers have long been celebrated for their skill, from the time when the Spanish prince, Don Juan Manuel, sounded their praises in 1325 (see No. 226), down to the present day, when their descendants in North Brabant still occupy themselves every autumn in taking “passage hawks” on the great heath of Valkenswaard (see Nos. 194, 198, and 79). An account of some of the more celebrated Dutch falconers of modern times, particularly those who were intimately associated with the practice of the sport in England, has been furnished by Professor Newton in his Appendix to Lubbock’s “Fauna of Norfolk” (No. 65); and Monsieur P. A. Pichot, in his lately published Essay on the Falconry Court at the Paris Exhibition of 1889 (No. 221), has given a portrait of the celebrated Adrian Mollen, who was for many years falconer to the Loo Club, and who happily still lives to impart the secrets of his art to pupils of all nations (see No. 79, pp. 111, 112). He was a pupil of Jan Bots, with whom he was assistant falconer from 1833 to 1836. In 1837 he entered the service of Prince Trautmansdorf at Oberwaldersdorf, some leagues from Vienna. Here he remained until 1840, and during that time was engaged in training the “passage hawks” brought from Holland, and nestling lammers from Hungary for flying at partridges, rooks, and stone curlews. In 1841 he became falconer to the Loo Hawking Club, his place at Prince Trautmansdorf’s being taken by a nephew of Jan Pells from Valkenswaard.

XIV. PRINCE WILLIAM V. OF ORANGE, HERON-HAWKING AT THE LOO IN 1767. From a rare engraving by Mourik.

Long before the formation of the Loo Hawking Club in 1839, the Royal domain of the Loo, near Apeldoorn, in
Holland, was celebrated for the excellent heron-hawking which the wide open country there afforded to lovers of the sport; but its renown was emphasised when, in that year, under the presidency of Prince Alexander of the Netherlands, a few English, French, and Dutch falconers, headed by Mr. Edward Clough Newcome, Mr. Stuart Wortley, the Duke of Leeds, the Baron d’Offémont and Baron Sloet (treasurer and secretary), formed an international association, with the object of heron-hawking annually in the best country in the world for that purpose, during the months of May, June, and July.

This club flourished for about twelve years, and included amongst its members the leading falconers of several nationalities. The following names appear in a *Liste des Membres* drawn up in 1847:

1839.—Mr. E. C. Newcome,* C. Stuart Wortley, Baron d’Offémont, and Baron Sloet * (Hon. Sec.). 1840.—H.R.H. the Prince of Orange, Princes Alexander,* Frederick, and Henry * of the Netherlands, Baron de Nyvenheim, Baron van Zuylen van Nievelt, Baron de Constant Rebecque,* Baron van Brienen van der Groote Lindt, Sir Edward Disbrowe, the Hon. W. S. Jerningham, the Duke of Leeds,* Baron Tindall, Mr. William Newcome. 1842.—Lord C. Hamilton,* Mr. Knight,* Mr. Edward Green, Mr. J. Balfour, Lord Suffield. 1843.—M. Dubois, Baron van Westreenen, Baron van Verschuer,* Mr. Milbank. 1844.—Mr. Stirling Crawford, Count Westerholt, Mr. John Melville. 1845.—Baron van den Bogaerde, Baron Mollerus, Lord Alvanley, Baron Hardenbroek, the Earl of Chesterfield, Count Alfred von Hatzfeld, Baron van Tuyll van Serooskerken,* M. van Lennep, M. Crommelin. 1846.—General Hare Clarges, Mr. Thornhill, M. le Comte de Breteuil. 1847.—M. Gudin, Major Montjoy Martin, Lord Villiers, Mr. F. Milbank,* the Earl of Strathmore,* M. Charles Martyn, and the Hon. C. Maynard.

The professional falconers were the veteran Franz van der Heuvel,* who had been falconer to Louis XVI. from 1785 to 1792, Jan Pells,* P. Bekkers,* Jan van den Boom,* J. Bots,* and Adrian Mollen* (falconer to the King of Holland) and his brother Paul Mollen, both of whom are still living.

Portraits of those to whose name an asterisk (*) is affixed will be found in the folio plates of Schlegel,* whose own portrait and
that of his colleague, Verster van Wulverhorst,* are also included. A key to these portraits is given by M. Pichot in his latest work on Falconry in the Paris Exhibition of 1889 (No. 221), where also will be found portraits of Adrian Mollen (p. 38) and John Barr (p. 23), besides several English falconers of the present day.

By the rules of the club the annual subscription was fixed at not less than one hundred florins, and the hawking season commenced on the 15th May and continued until the 10th July or thereabouts.

The number of hawks (peregrines and jerfalcons) maintained by the club, and the number of herons taken by them “on passage,” appear in the following table:

Details of the sport may be found in the works of Schlegel (194) and Pichot (207), in the anonymous *brochure* (193), and in an article by M. de Rodenburg published in the *Journal des Chasseurs* in 1855.

When taken uninjured the herons were often liberated, after having a brass ring fastened on one leg, inscribed with the name of the club and the date of capture. They were sometimes retaken at long intervals at a considerable distance from the Loo. Thus, Dr. Campanyo, in his *Histoire Naturelle du Département des Pyrénées Orientales*, 1863, states (p. 225) that in April 1845, an old male heron was killed on the farm of M. Lacombe, at Saint Michel, near Perpignan, which had a plate on the leg with an inscription to the effect that it had been taken two years previously by a falcon belonging to the Loo Hawking Club; and that in 1856 another heron was killed on the seashore at Alenya, near Perpignan, having on one leg a similar plate, which it had carried for seven years.
NOTES TO THE ILLUSTRATIONS.

XV. A German Falconer of the Sixteenth Century. From a scarce engraving by an artist whose name has not been ascertained.

No copy of this is to be found amongst the large collection of prints in the British Museum, although from the serial number in the left-hand corner, and the word "Aer" in the top right-hand corner, suggestive of its being one of a set of emblems, there ought to be no difficulty in identifying it. The drawing is particularly good, and the treatment very artistic.

For other figures of German falconers the reader should turn to the fine engravings of Ridinger, already noticed (p. 51), and to those of Hans Burgkmair which illustrate the life of Maximilian I. in Der Weiss König, 1514, reprinted at Vienna in 1775. In one of these plates, No. 34 of the series, the Emperor is represented Heron-hawking. Attended by mounted falconers, he is seated on horseback, in the act of unhooding his falcon at a heron, at which other hawks have already been flown.

XVI. A French Falconer of the Eighteenth Century, in the Uniform of the Court of Louis XV., 1715-1774.

Furnished by Monsieur P. A. Pichot "d'après les figurines découpées de P. Lesueur, appartenant à M. Bidault de L'Isle."

For some account of Falconry in France during the reign of Louis XV. the reader may be referred to the works of Bois-soudan (No. 202), Baron Dunoyer de Noirmont (No. 206), vol. iii. pp. 107-109, and D'Aubusson (No. 211), p. 207. The Grand Falconer in this reign was the Duc de la Vallière, who had a salary of 4200 livres. The under falconers were paid on a proportionately liberal scale, and the annual expenditure for salaries, purchase of hawks, and cost of maintenance amounted to 24,190 livres français, or nearly £20,000 (D'Aubusson, loc.)

The palmy days of Falconry in France terminated with the Revolution in 1792. The sport was revived for a short period by Napoleon, who, in 1810, sent for the Dutch Falconers Daams and Daankers with four assistants, and maintained a hawking establishment at Versailles until 1813, when the French
Eagle claiming more attention than the trained falcons, the sport was once more suppressed. Nor was it again revived until 1866.

In that year a little band of enthusiasts formed the "Champagne Hawking Club," with John Barr for their falconer, and for three seasons enjoyed some excellent sport at rooks, crows, pies, partridges, stone curlews, and little bustards. M. Alfred Werlé was president, and amongst the members were MM. le Vicomte de Champeaux-Verneuil, le Baron d'Aubilly, le Comte le Couteulx de Canteleu, le Vicomte Georges de Grandmaison, le Comte Fernand de Montebello, Julio Alfonso de Aldama, and Pierre Amédée Pichot. The unavoidable return of John Barr to England, and the impossibility of finding a substitute, led unfortunately to the dismemberment of the club. In 1879, however, through the efforts of M. Paul Gervais, another revival took place, and his example was followed by MM. Sourbets, Saint Marc, Foye, Belvalette, Cerfont, and Edmond Barrachin, all of whom are keeping hawks at the present day, and with the aid of M. Pichot are helping to find goshawks for the English falconers who are five or six times as numerous.

XVII. Italian Falconers of the Seventeenth Century, Partridge-hawking with the Goshawk. From an engraving by Tempesta, 1622; reproduced from the work of Olina (No. 278).

Antonio Tempesta (b. 1555, d. 1630), a Florentine painter and engraver, was a pupil of Stradanus (or, to give him his real name; Jan Strada), a Fleming. Other plates of his will be found mentioned in the note to No. 278.

XVIII. Lorenzo de' Medici. Born, 1448; died, 1492. Author of a celebrated poem, "La Caccia col Falcone."

This portrait of "Lorenzo the Magnificent," whose life has been so ably written by William Roscoe (2 vols. 4to, 1796), is a facsimile of the frontispiece to that work, and a brief notice of
him in connection with Falconry will be found in the notes which follow the title of his poem (No. 265). *Vide anted.*, p. 139. A "receipt" from the falconer of Lorenzo de' Medici to the Treasurer of the Duc d'Orléans for a gratuity of "xxxii sols. tournois" on his bringing a present of a falcon, 15th Jan. 1483, is printed by Charavay (No. 210), p. 7.

XIX. AND XX. ITALIAN MINIATURES OF THE THIRTEENTH CENTURY, illustrating the Latin MS. of the Emperor Frederick II., "De arte venandi cum avibus."

As these miniatures, reproduced from the facsimiles in D'Agincourt's famous *Histoire de l'Art*, have already been described on pp. 171-172, it will be unnecessary to repeat the account there given of them; but the reader may be reminded of Baron Pichon's admirable commentary (No. 201) on the treatise which they serve to illustrate.

Those who are interested in the subject of illuminated manuscripts would do well to read the very instructive lectures which were delivered at the London Institution by Messrs. R. Thomson and W. Tite, M.P., in 1857, "On some of the most characteristic features of illuminated manuscripts from the eighth to the eighteenth century"; and "On the materials and practice of illuminators, with biographical and literary notices illustrative of the art of illumination."

XXI. A FALCONER OF CYPRUS. Engraved by W. Skelton, from a picture by Titian, in possession of the Earl of Carlisle.

From an inscription on the back of the picture it appears to be the portrait of a brother of a queen of Cyprus. The words are "Georgius Cornelius frater Caterinae Cipri et Hierusalem (sic) Reginae." The original, which is on canvas, and in good condition, has been a long time in the possession of the Earl of Carlisle's family, and is preserved in the collection at Castle Howard. About 1807 it was temporarily removed to London, and was engraved for Forster's "British Gallery of Engravings
from pictures of the Italian, Flemish, Dutch, and English Schools,” published in that year.

There is a mezzotint of a falconer by Reynolds from a picture by Northcote, R.A. (said to be a portrait of the painter himself), which was evidently suggested by Titian’s portrait. Even the dog by the falconer’s side has been introduced.

**XXII. Falconers of Turkestan, with the trained Eagle, or Berkut.** From a sketch made by Colonel (now General) T. E. Gordon, in Eastern Turkestan.

See pp. 180, 192, 193. For an account of the way in which the Golden Eagle, or *Berkut* (old Persian, *Bargut*), is trained and flown in some parts of the East at deer, hares, foxes, and wolves, the reader may be referred to Atkinson’s “Travels in the Regions of the Upper and Lower Amoor,” 1860, pp. 58, 492 (where the native name of the bird is phonetically spelt *beartoot*), and to Colonel T. E. Gordon’s “Roof of the World,” a narrative of a journey over the high plateaus of Thibet to the Russian frontier, and the Oxus sources on Pamir, 1876 (pp. 68, 72, 78, 85). In this entertaining volume, wherein the bird is styled *burgoot* and *burgut*, Colonel Gordon gives a report of a journey eastward from Kashgar to Maralbashi towards Aksu (39° 46’ N.) made by Captain J. Biddulph, the first European traveller in that direction. From Maralbashi (the stag’s haunt), known also as Burchuk and Lai Musjid, he went to Charwagh, a village fourteen miles on the Aksu road. “Here,” he says, “I had good sport shooting gazelles and pheasants, which abounded, and I also saw the *burgoots*, or trained eagles, kill gazelles and foxes. I was not fortunate enough to see them kill a wolf, though they were twice flown, but the animals on both occasions being in thick bush jungle, and at a great distance, the birds did not sight them. Their owners, however, spoke of it as an ordinary occurrence. When the jungle is not too high they sight their prey at a great distance, and sweep up to it without any apparent effort, however fast it may be going. Turning suddenly when over its head, they strike it with unerring aim. If a fox, they grasp its throat with one powerful talon, and seize it round the muzzle with the other, keeping the jaws closed with an iron grasp, so that the animal is powerless.” [A vignette of an eagle
NOTES TO THE ILLUSTRATIONS.

seizing a fox is given on p. 88 of the work quoted.] The author continues:—“From the great ease with which an eagle disposes of a full-grown fox I could see that a wolf would have no better chance. Gazelles are seized in the same way, except those with horns, in which case the eagle first fastens on to the loins of the animal, and, watching his opportunity, transfers his grasp to the throat, avoiding the horns.

“The burgoof, however, is not very easy to manage, and requires the whole of one man’s care. Its dash and courage are great, but if flown unsuccessfully once or twice, it will often sulk for the rest of the day. When it kills, it is always allowed to tear at its game for a little time. The men told me that if prevented doing so while its blood was up, it would very probably attack our horses.”

It is even flown at wild boar. “During the envoy’s tour in the Artush district at the end of February,” says Colonel Gordon (p. 85), “the villagers assembled to show this sport. They were mounted on the strong, active little horses of the country, and carried clubs bent at the end like hockey sticks, with which they strike the animal on the head till he is stunned, when the death-blow is generally given with some other weapon... The trained eagle is flown at the hog on the first favourable opportunity, and generally succeeds by its sharp and powerful attack in bringing it to bay, when the men close in with their clubs.

“On the occasion alluded to, a splendid tusker was killed in this manner; but from all I heard I should say that the wild boar of these parts is not equal in fighting spirit to his brother of Bengal.”

For further information respecting these trained eagles see the references given in the note at top of p. 193.

It may be added, in conclusion, that the spelling, berkut, here adopted is that in vogue with the Russian falconers, who procure these eagles via Orenburg from the Kirghis.

It is not a little curious that the Welsh name for the Kite, according to Pennant, is barcud, pronounced barkit. It is so-called in Carmarthenshire, while in Pembrokeshire the common Buzzard is thus designated (E. C. Phillips, Zoologist, 1891, p. 173). Lord Lilford has heard the same name in Merionethshire applied to the Marsh Harrier. The precise meaning of the word is not explained, but it suggests that our word Kite has
probably some affinity, and it is remarkable that the Tartars, Russians, and Persians apply the name berkut or barkut to an eagle.

XXIII. Arab Falconers with Lanners. From a photograph taken in Algeria in 1889.

In addition to the sources of information indicated on p. 206, concerning the practice of Falconry by the Arabs, the reader may be referred to the following articles on the subject which have appeared at intervals during the last few years:—"Arab Falconry," The Field, 30th April 1881; "Souvenirs of Modern Egypt: How Prince Halim hunted the Gazelle," The Field, 30th January 1875; "Gazelle Hawking in Egypt," The Zoologist, 1878, pp. 335–337; "Hawking in Barbary," The Field, 9th September 1882, and "Hawking in Morocco," The Field, 13th March 1886.

XXIV. Indian Falconers with Sakers and Peregrine. From a photograph taken in the Punjab in 1891, and forwarded by Capt. D. C. Phillott, 3rd Punjab Cavalry.

The Saker, Falco sacer (Hind. Cherkh or Cherrug), is trained to kill cranes, bustards, and hares, and shows excellent sport when flown at the Indian kite, Milvus goonda, which might be thought more than a match for it.

Native falconers assert that the Saker breeds in the Bhoor lands, or sandy and desert tracts of Western India. Many are brought for sale at the beginning of October. Mr. Thompson saw three at the Nawab of Rampore's, in Rohilcund; they were purchased for 15 rupees, which shows that they are not difficult to procure. A trained female goshawk costs from 20 to 50 rupees; a male from 10 to 30 rupees.

XXV. A JAPANESE FALCONER. From the “Ehon Taka Kagami,” or Mirror of Falconry.

The merits of the work from which this plate has been reproduced in facsimile (No. 371) have been already noticed on p. 212. This figure has been selected in preference to many others in order to show the form of the Japanese hood (zukin), glove (yugaki), jesses (ashikawa, i.e., leg leathers), creance (okinawa), and frisfrass (buchi), which is a stick of wistaria, with the end teased out like a Japanese tooth-brush, used to cleanse the beaks of goshawks and falcons.

XXVI. PORTRAIT OF A TRAINED FALCON.

The figure of a hooded Tiercel on the glove, which appears in the vignette on the title-page, and was drawn and engraved for this work by Mr. G. E. Lodge, being on rather too small a scale to show all the accessories, it has been thought desirable to give a larger figure of a trained Falcon, unhooded, from an excellent photograph recently taken by Lieut.-Col. H. Watson. Here is the hood:—
## INDEX.

**Note.**—The number of books in different languages which relate wholly or in part to Falconry and are catalogued in this volume, chronologically under the head of Countries, amounts to 378.

This Index to their authors, artists, printers, and publishers contains in addition the names of other writers whose works—historical, biographical, and critical—have been referred to in the Notes, as affording "side-lights" on the literature of the subject not without interest and value.

The figures following these names refer in every case to the page, and not to the serial number of the Catalogue.

T
OTHER WORKS ON

FALCONRY AND FIELD SPORTS

ISSUED BY

BERNARD QUARITCH,

15 PICCADILLY, LONDON.

Falconry.

BERT’S TREATISE OF HAWKS AND HAWKING. For
the first time reprinted from the Original of 1619. With an
Introduction by J. E. HARTING. Sm. 4to, Roxburghe. 1891.
Price £1 1s.

The author, an experienced falconer, lived at Collier Row, near Romford,
Of this rare Treatise only 100 copies have been printed; very few remain for sale.

A PERFECT BOOKE FOR KEPINGE OF SPARHAWKES
OR GOSHAWKES. Written about 1575. Now first printed from
the Original MS. on vellum. With Introduction and Glossary
by J. E. HARTING. Sm. 4to, Roxburghe. 1886. Price £1 1s.

“One great merit which the present treatise possesses is that it is perfect, and not
a mere fragment like some of the MSS. before noticed. . . . It is here printed for the
first time verbatim et literatim, and a facsimile page is given (p. 34) to show the
character of the handwriting. . . . It evidently embodies the result of the author’s
personal experience.”—EDITOR'S INTRODUCTION, p. xxx.
Salmon and Trout Fishing.

This fine series of coloured plates was privately printed at the expense of Sir William Jardine. Each plate has a charming background of some delightful bit of Scotch scenery. Most of the figures are of the size of life.

LIST OF PLATES.

VIGNETTES.
Stake Nets on the Solway Firth.
Tweed Salmon-Flies in use about the year 1780. Woodcut.
Poke Nets on the Solway Firth.
Young states of S. trutta from Mr. Shaw’s ponds. Coloured.

Hunting, Racing, &c.

HORSES AND EQUITATION: A Bibliographical Record of Hippology. By F. H. Huth. Sm. 4to, half vellum. 1887. Price 12s.

The Bibliography is arranged chronologically, and extends from p. 1 to p. 314; the Index to Names of Authors to p. 372; the Index to Works on Horses comprises subdivisions:

The earliest English book on Racing here mentioned is one by Geryse Markham, entitled “How to choose, ride, train, and dyet both Hunting and Running Horses.” It at first formed part of his “Discourse of Horsemanship,” 1593, but in 1596 was separately printed under the title just quoted. In all, 143 books on Racing are here noticed.

The works on the Chase mentioned in this Bibliography are 122 in number, and dated from the time of Guillaume Twici, Huntsman to Edward II. in 1307, down to the Dressage du Cheval de Chasse published in 1886.
